The normal requirement for a Master of Engineering program is credit in 24 units of course weight in graduate courses, 15 of which must be in the candidate's major field, MEC E 601, plus a project equivalent to six units of course weight.

There is no language requirement for the degree of MEng.

The minimum residence requirement is one four-month term for a BSc graduate with at least one year of post-BSc experience, and one session (two four-month terms) for a BSc graduate with less than one year of post-BSc experience.

Length of Program

Candidates may complete the program in 9 to 12 months. The maximum time permitted for completion of a Master of Engineering program is four years from the date of first registration.

204.47.4 The Degree of PhD

Program Requirements:

The Department normally requires candidates to satisfactorily complete approved courses in one major field and at least one minor field. The minimum requirements after a bachelor's degree are 27 units of course weight in graduate courses, 15 of which must be in the major field, MEC E 601, plus research leading to a thesis of high calibre. For those students entering the PhD program after a master's degree the minimum course requirement is 12 units of course weight in post-master's courses. As part of the requirements for admission to candidacy for the PhD the provisional candidate will normally have to pass comprehensive departmental examinations (either oral or written) embracing the major field that will be arranged in consultation with the Department.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary with the individual candidate; however, a minimum of 30 months of study and research is normally required.

204.47.5 Graduate Courses

The courses MEC E 610, 630, 640, 650, 670, 681 and 684 normally will be offered annually. Other courses will be offered on a lecture basis when there is sufficient enrolment; otherwise they will be offered on a guided reading basis.

THES 900 Thesis
THES 999 Thesis
MEC E 900 ★6 Directed Research Project Detailed engineering report in the student's major area of interest.

MEC E 601 Graduate Seminar
□0.5 (either term, 0-1s-0). Presentations by Master's graduate students, staff, and visiting scientists on current research topics. (★0.5)

MEC E 602 Graduate Seminar
□0.5 (either term, 0-1s-0). Presentations by PhD graduate students on current research projects. (★0.5)

MEC E 605 Experimental Strain Analysis
□3.0 (either term, 3-0-0). Basic experimental methods used in engineering mechanics, including photoelasticity, strain gauges, brittle coatings; measurement in static, dynamic and transient system, ultrasonics; laboratory exercises. (★3)

MEC E 606 Experimental Fluid Mechanics
□3.0 (either term, 3-0-0). The techniques covered include flow visualization, laser-Doppler anemometry, thermal anemometry and automation of experiments. Physical principles, criteria for choosing instruments and practical problems are discussed. (★3)

MEC E 610 Engineering Economic Analysis
□3.0 (either term, 3-0-0). Advanced topics in engineering economics including: operating and capital budgets, financial statement use by managers, replacement analysis, cost of capital and leasing. Prerequisite: MEC E 413 or equivalent. (★3)

MEC E 611 Project Management Techniques
□3.0 (either term, 3-0-0). This course involves study of the management techniques that are particularly relevant to the design, development and control of engineering projects. Special attention will be given to Network (CPM, PERT) Systems and the use of computers for time and cost control. (★3)

MEC E 612 Operational Research
□3.0 (either term, 3-0-0). The applications of operational research and decison analysis techniques to Engineering Management problems. Techniques to be used include linear programming, dynamic programming, integer programming, queueing theory and computer simulation. Applications will involve the use of case studies and computer modelling. Application areas will include resource allocations, maintenance, inventory control, reliability and search. Prerequisite: MMP E 597, MGTSC 352, MEC E 515 or equivalents. (★3)

MEC E 613 Managing in a Technical Environment
□3.0 (either term, 3-0-0). Design concepts for management systems, philosophy of engineering management, the management function, matrix management, management by objectives. (★3)

MEC E 614 Computer Applications in Engineering Management
□3.0 (either term, 3-0-0). The use of computers in engineering organizations. Particular topics to include decision making with computers, computer aided manufacturing and management information systems. The problem solving portion of the course will employ microcomputers as the principal computer tool. (★3)

MEC E 615 Welding Fabrication Systems
□3.0 (either term, 3-0-0). (★3)

MEC E 620 Combustion
□3.0 (either term, 3-0-0). Chemical reactions, chemical equilibrium and flame temperatures. Flame propagation and explosion theories. Detonations. Air pollution from combustion sources. (★3)

MEC E 630 Fluid Dynamics
□3.0 (either term, 3-0-0). Kinematics of fluid motion; fundamental fluid equations and concepts, common governing equation formulations in computational fluid dynamics, laminar boundary layers, potential flow. (★3)

MEC E 632 Turbulent Fluid Dynamics
□3.0 (either term, 3-0-0). Governing equations of turbulent flow. Statistical and phenomenological theories of turbulent transport of momentum, heat and mass in wall bounded and free flows. Computational techniques, empirical data and applications. (★3)

MEC E 635 Gas Dynamics
□3.0 (either term, 3-0-0). Equations of motion; compressible fluid flow; shock waves; one-dimensional flow with friction and heat transfer; real gas effects; method of characteristics; multidimensional flow. (★3)

MEC E 640 Analytical Thermodynamics
□3.0 (either term, 3-0-0). Extension of classical thermodynamics, statistical thermodynamics applied to engineering systems. Irreversible thermodynamics: thermoelectricity and thermodiffusion. (★3)

MEC E 650 Analytical Dynamics
□3.0 (either term, 3-0-0). Principle of virtual work; Lagrange's equations of motion for holonomic and non-holonomic systems; Hamilton's principle; application to gyroscopes, stabilizers, etc. (★3)

MEC E 652 Nonlinear Oscillations
□3.0 (either term, 3-0-0). Phase plane, singular points; non-linear conservative systems, limit cycles, stability; perturbation method, non-linear resonance. (★3)

MEC E 653 Singal Processing of Time and Spectral Series
□3.0 (either term, 3-0-0). Practical application of processing techniques to the measurement, filtering and analysis of mechanical system signals; topics include: signal classification, A/D conversion, spectral analysis, digital filtering and real-time signal processing, acoustic and vibration studies, turbulence analysis, engine knock detection, predicting probabilities in air pollution. (★3)

MEC E 655 Dynamics of Structures
□3.0 (either term, 3-0-0). Behaviour of elastic structures subjected to dynamic loads. Vibrations of buildings and bridges excited by machinery, earthquakes, wind and traffic. (★3)

MEC E 660 Design of Mechanical Systems I
□3.0 (either term, 3-0-0). A critical analysis of some existing mechanical systems. (★3)

MEC E 661 Design of Mechanical Systems II
□3.0 (either term, 3-0-0). A critical analysis of some existing mechanical systems. (★3)

MEC E 663 Discrete Element Analysis of Mechanical Systems
□3.0 (either term, 3-0-0). Applications of matrix methods, finite element and boundary element techniques to problems in applied mechanics. Emphasis on the use of micro-computers. (★3)

MEC E 664 Techniques of Mechanical Design
□3.0 (either term, 3-0-0). Techniques of optimization; applications to specific problems of mechanical design. Linear and nonlinear programming. Reliability mathematics; relation of factor of safety to reliability; statistical nature of design, computer-aided design. (★3)

MEC E 665 Pressure Vessel Design
□3.0 (either term, 3-0-0). This course offers an integrated treatment of stress analysis, design theory, material behavior and construction of pressure vessels used in the energy, chemical and petroleum industries. Special topics covered include the basis of the ASME code, stresses in shells and heads, discontinuity stresses arising from openings and attachments, and design of welded joints. Prerequisite: MEC E 584 or consent of instructor. (★3)

MEC E 670 Advanced Heat Transfer
□3.0 (second term, 3-0-0). Advanced topics in conduction and convection heat transfer; solution by analytical and numerical methods. (★3)

MEC E 671 Convection Heat Transfer
□3.0 (either term, 3-0-0). General theory of convection systems. Forces and free convection for laminar and turbulent conditions. Internal and external flows. (★3)

MEC E 672 Thermal Radiation
□3.0 (either term, 3-0-0). Principles of radiant energy transfer. Gaseous radiation. Spectral characteristics. Geometrical characteristics of systems involving thermal radiation. Electrical analogy. (★3)

MEC E 680 Continuum Mechanics
□3.0 (either term, 3-0-0). Introduction to cartesian tensor algebra and calculus; analysis of finite deformation and kinematics of motion; transport theorems and balance laws; analysis of stress; continuum thermodynamics, constitutive equations and material symmetry with application to solids and fluids. (★3)

MEC E 681 Elasticity
3.0 (either term, 3-0-0). Extension, torsion and flexure of beams; two-dimensional problems; complex variable methods; integral transform methods; variational methods. (★3)

MEC E 682 Plasticity
3.0 (either term, 3-0-0). Yield condition, plastic potential, elastic-plastic problems, characteristic theory, slip line fields, plane stress anisotropy. (★3)

MEC E 683 Plates and Shells
3.0 (either term, 3-0-0). Solutions of the plate equation for rectangular and circular plates with various boundary conditions; special and approximate methods; membrane theory of shells; bending theory of cylindrical shells. (★3)

MEC E 684 Static and Dynamic Stability
3.0 (either term, 3-0-0). Classical stability analysis of bars and plates subjected to various loading conditions. Energy methods. Dynamic stability of non-conservative force systems and the effects of internal friction. Inelastic buckling, torsional buckling. (★3)

MEC E 685 Macro Fracture Mechanics
3.0 (either term, 3-0-0). Basic concepts of linear and nonlinear fracture mechanics: linear and nonlinear stationary crack-tip stress, strain and displacement fields; energy balance and energy release rates; fracture resistance concepts-static and dynamic fracture toughness; criteria for crack growth; fracture control methodology and applications.: (★3)

MEC E 686 Fatigue of Engineering Materials
3.0 (either term, 3-0-0). A study of mechanisms and mechanics of fatigue process: damage caused by constant and variable cyclic amplitudes and random loading; effects of load interaction: initiation and propagation of fatigue cracks; life prediction; effects of multiaxial stress states, temperature and environment. (★3)

MEC E 718 Reading Projects in Engineering Management I
3.0 (either term, 3-0-0). (★3)

MEC E 719 Advanced Topics in Engineering Management II
3.0 (either term, 3-0-0). (★3)

MEC E 728 Advanced Topics in Advanced Applied Thermodynamics I
3.0 (either term, 3-0-0). (★3)

MEC E 729 Advanced Topics in Advanced Applied Thermodynamics II
3.0 (either term, 3-0-0). Combustion, refrigeration. (★3)

MEC E 738 Advanced Topics in Advanced Fluid Dynamics I
3.0 (either term, 3-0-0). (★3)

MEC E 739 Advanced Topics in Advanced Fluid Dynamics II
3.0 (either term, 3-0-0). Aerodynamics, rarified gas dynamics, turbulence, hydro and thermo stability. (★3)

MEC E 748 Advanced Topics in Advanced Thermodynamics I
3.0 (either term, 3-0-0). (★3)

MEC E 749 Advanced Topics in Advanced Thermodynamics II
3.0 (either term, 3-0-0). Energy conversion, general thermodynamics, irreversible thermodynamics. (★3)

MEC E 758 Advanced Topics in Advanced Dynamics I
3.0 (either term, 3-0-0). (★3)

MEC E 759 Advanced Topics in Advanced Dynamics II
3.0 (either term, 3-0-0). Wave propagation, orbital dynamics. (★3)

MEC E 778 Advanced Topics in Advanced Heat Transfer I
3.0 (either term, 3-0-0). (★3)

MEC E 779 Advanced Topics in Advanced Heat Transfer II
3.0 (either term, 3-0-0). Conduction, convection, radiation. (★3)

MEC E 788 Advanced Topics in Advanced Solid Mechanics I
3.0 (either term, 3-0-0). (★3)

MEC E 789 Advanced Topics in Advanced Solid Mechanics II
3.0 (either term, 3-0-0). Elastic plasticity, viscoelasticity, shells. (★3)

204.48 Medical Microbiology and Infectious Diseases

Department of Medical Microbiology and Infectious Diseases
141 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2H7

204.48.1 General Information

The Department offers programs leading to the degrees of Master of Science and Doctor of Philosophy. The Department has well-equipped laboratories for research in various aspects of medical microbiology and infectious diseases.

Inquiries should be directed to the Chair or the Graduate Coordinator.

Entrance Requirements:

The Department's minimum admission requirement is an undergraduate degree in microbiology or a related field such as agriculture, biochemistry, biology, chemistry, medical laboratory science, medicine, pharmacy, and veterinary medicine. The Department generally does not accept students with a grade point average of less than 7.0 during their last two years of undergraduate (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §202.2.2), a TOEFL score of 550 is normally required.

Financial Assistance:

A limited number of teaching and research assistantships are available. Exceptionally qualified students are encouraged to apply for extramural support through the studentship award programs of agencies such as the Alberta Heritage Foundation for Medical Research, the Medical Research Council of Canada, and so on.

204.48.2 The Degree of MSc

Program Requirements:

Required courses depend on the student's undergraduate background and the proposed area of specialization; however, the MSc program consists of at least six units of course weight in graduate-level courses and a thesis on an approved research topic. In addition, each student must participate each year and must register once for credit in the medical microbiology seminar (MMID 501); students who have not previously taken MMID 361 (or equivalent from a recognized institution) must take MMID 361 for credit during their first session in the graduate program.

Terminal MSc students are required to maintain a program GPA of not less than 6.5; however, students wishing to proceed to a later PhD in the Department must maintain a program GPA of 7.0. Any student's supervisory committee has the option to call an oral assessment examination at the conclusion of the student's first session in the graduate program. An oral thesis defence examination is required.

There is no language requirement other than English for the MSc.

Length of Program:

The time required to complete the program will depend on the student's background and the nature of the thesis project. Normally, a minimum of two years of full-time study and research is required.

204.48.3 The Degree of PhD

Program Requirements:

Required courses depend on the student's background and the proposed area of specialization; however, the PhD program normally consists of at least 15 units of course weight in graduate-level courses and a thesis on an approved research topic. In addition, each student must participate each year in the medical microbiology seminar (MMID 501); students who have not previously taken MMID 361 (or equivalent from a recognized institution) must take MMID 361 for credit during their first session in the graduate program.

Students are required to maintain a program GPA not less than 7.0. Any student's supervisory committee has the option to call an oral assessment examination at the conclusion of the student's first session in the graduate program. In addition, the student must pass an oral candidacy examination and an oral thesis defence examination.

There is no language requirement other than English for the PhD.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the student and the nature of the research undertaken; however, a minimum of four years of full-time study and research is normally required.

204.48.4 Undergraduate Courses

The following courses may be taken for graduate credit:

MMID 425 Medical Virology
★3 (second term, 1-0-5). A detailed examination of the principles underlying the identification of viruses of medical importance. Strong emphasis will be placed upon the practical application and rationale of viral diagnostic methods. Prerequisite: MICRB 224 or MMID 224 and consent of department.

MMID 426 Medical Parasitology
★3 (second term, 3-0-3). A survey of the protozoan and metazoan parasites of man. Emphasis will be placed on laboratory methods for detection and identification as an aid to diagnosis and therapy. Prerequisite: A course in medical microbiology or consent of department.

MMID 427 Medical Mycology
★3 (first term, 3-0-3). Laboratory study of the fungi associated with human disease with particular emphasis on the methods for demonstration, isolation and identification of pathogenic fungi. Attention will also be given to the epidemiology, serology and pathology of fungus diseases. Prerequisite: Introductory medical microbiology or microbiology or BOT 341.

204.48.5 Graduate Courses

THES 900 Thesis
THES 999 Thesis

MMID 501 Microbiology Literature Review
★3 (either term, 3-0-0). A supervised course dealing with current ideas in microbiology. Students attend discussion sessions in the Department and prepare seminars.

MMID 505 Mechanisms of Pathogenicity
★3 (first term, 3-0-3). A functional approach to the production of disease by microbes emphasizing the biochemical, immunological and physiological properties of host and microbe which account for a pathological process. Prerequisite: Introductory bacteriology or microbiology and biochemistry or consent of department.

MMID 512 Special Projects
★3 (either term, 0-0-3).

MMID 520 Bacterial Plasmids
★3 (first term, 3-0-0). The biology of plasmids and plasmids as tools for molecular biology The structure and properties of various bacterial plasmids (antibiotic resistance plasmids, colicin and enterotoxin-producing plasmids) will be considered in light of our current understanding of the evolution of plasmids. The involvement of insertion sequences and transposons in plasmids organization will be discussed. The course will focus on the modes of plasmids DNA replication and the means by which bacterial plasmids are maintained in host cells. Important plasmid-coded functions such as incompatibility and conjugative transfer will be discussed in detail. The effect of plasmids in human and veterinary medicine and on plant pathogenesis (the crown gall disease) will also be considered. The use of plasmids in genetic engineering including the choice of vectors, cloning methods and risks and benefits will complete the course. Note: Designed for advanced honors and graduate students and offered in alternate years. Prerequisite: BIOCH 301 MICRB 193 or consent of Department.

MMID 525 Immunobiology of Virus Infection
★3 (first term, 2-1s-0). A lecture and seminar course designed for advanced undergraduates and graduate students as well as for residents in Medicine and Medical Microbiology and Infectious Diseases. The course will cover both normal and pathological immune reactions during viral infections. Both experimental and clinical infections will be dealt with during the lectures. Each student will also give a seminar on a selected topic on viral immunopathogenesis. Prerequisite: Consent of department. Maximum enrollment 12. Offered alternate years during the fall term.

204.49 Medical Sciences

204.49.1 General Information

The Departments of Applied Sciences in Medicine, Immunology, Medicine, Pathology, Paediatrics, Psychiatry, and Radiology and Diagnostic Imaging are participating in an interdisciplinary PhD program in the medical sciences. This program has as its objective the training of medical research scientists who are strongly motivated to pursue a medical research career in areas of ultimate clinical relevance. It may be combined in a flexible manner with an MD degree program, providing the candidate satisfies the admission requirements of each program.

Entrance Requirements:

Candidates with either bachelor's, master's, and/or medical degrees are encouraged to apply. Admission to

the program is generally dependent on honors grades in the last two years of undergraduate work (or graduate work) at the University of Alberta or a recognized institution, and (where applicable) a TOEFL score of not less than 550 (see §202.2.2.). Candidates should prepare themselves for the program by taking the basic science courses necessary for the program they have in mind, and they should identify the department they wish to work in, and a faculty member within that department who will act as their mentor. Qualified students will normally enter the program as provisional candidates for the PhD.

Financial Assistance:

Students who are accepted into the program are encouraged to apply through their prospective supervisors for studentships from the Medical Research Council of Canada ($14,140 per annum) and the Alberta Heritage Foundation for Medical Research ($13,595 per annum). Each successful applicant to either agency also receives a research allowance from the Alberta Heritage Foundation to defray the cost of the applicant's research project (including travel to scientific meetings). Graduate assistantships are available from some departments. The University offers University of Alberta PhD Scholarships; details are available from the Faculty of Graduate Studies and Research.

204.49.2 The Degree of PhD

Program Requirements:

Admission to the PhD in medical sciences program is dependent upon the recommendation of the PhD committee. The committee comprises a representative of each department participating in the program, plus the Associate Dean of Medicine (Research) and a basic scientist from a department with a long-established PhD program. Course requirements are tailor-made for each student. They are determined by the committee as a whole and are based on the background of the student and the area of specialization to be undertaken. Normally, a minimum of 15 units of course weight in graduate courses is required.

A PhD candidate must prepare a thesis describing the results of the candidate's research project and be examined orally by a committee formed according to Faculty of Graduate Studies and Research regulations.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

In general, the PhD program will take a minimum of three years to complete, with the first year devoted to course work and a qualifying exam in the field of the candidate's choice.

Inquiries concerning the PhD in medical sciences program should be directed to:

Associate Dean of Medicine (Research)
University of Alberta

204.50 Medicine

Department of Medicine
2F1 Walter Mackenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2R7

204.50.1 General Information

The Department of Medicine offers the degree of MSc in Experimental Medicine either as part of a coordinated pattern of training leading to fulfillment of requirements for postgraduate training in the medical specialities, or as a separate program for those proceeding from a BSc. A PhD program is also offered to highly qualified candidates, as part of the PhD in Medical Sciences interdisciplinary program (see §204.49).

Research may be carried out in either basic or clinical sciences and may be either theoretical or applied in nature.

Inquiries should be directed to the Director of Graduate Education of the Department of Medicine.

Entrance Requirements:

The Department's normal requirements for admission of graduate students are a 7.0 or equivalent GPA during the previous two years of university and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

Limited financial assistance is available to support these programs, but applications should be made at least 12 months in advance.

204.50.2 The Degree of MSc

Program Requirements:

Such course work is required as may be necessary for the proper understanding and carrying out of research and preparation of the thesis. Transfer credit may be granted in appropriate cases for courses taken during the latter years of the MD program at the discretion of the Dean, Faculty of Graduate Studies and Research.

There is no second language requirement for the MSc.

For candidates holding an MD, the program's minimum residence requirement is one calendar year of full-time attendance at the University of Alberta. For other candidates an additional (qualifying) year may be required.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 18 months is normally required.

204.50.3 Graduate Courses

MED 501 Clinical Pulmonary Physiology
★3 (second term, 2-0-0). Basic and clinical lectures on: Lung Structure; Pulmonary Blood Flow; Airflow; Gaseous Diffusion; Ventilation/Perfusion Matching; Control of Ventilation; Oxygen Transport; Lung Defense; Mucociliary Transport; ARDS; Asthma; Exercise; Lung Growth; Surfactant; Lung Metabolism; Pulmonary Function Testing. Prerequisite: General courses in Physiology, Physics and Biochemistry or consent of department.

MED 511 Molecular Biology in Medicine
★3 (second term, 3-0-0). This course will review the contributions of advances in molecular biology to the understanding of human diseases, with special emphasis on recombinant DNA and hybridoma technologies. Topics to be discussed will include the isolation and characterization of human genes, the production of pharmaceuticals and biologicals such as immune regulators and subunit vaccines by genetically engineered microorganisms, the molecular basis of selected genetic and infectious diseases, and the application of advanced technology to rapid diagnosis of viral infections and to prenatal diagnosis of genetic defects. Offered in alternate years. Prerequisite: BIOCH 300 or equivalent and consent of department.

MED 571 Directed Reading in the Basic Medical Sciences
★3 (either term, 3-0-0). Reading and study of basic medical science topics relevant to the student's chosen field of study under the direction of one or more faculty members. Prerequisite: Consent of department.

MED 573 Directed Reading in Clinical Medicine
★3 (either term, 3-0-0). Reading and study in a field of clinical medicine relevant to the student's chosen field of study under the direction of one or more faculty members. Readings currently available in GI Physiology, Experimental Hematology, Steroid Receptors, Cardiophysiology, Renal Physiology, and Endocrinology. Prerequisite: Consent of department.

MED 575 Nutrition and Metabolism
★3 (1-1s-0). A seminar and discussion course in advanced nutrition and metabolism that examines current topics in nutrition and features regular seminars on alternate weeks throughout both terms of the winter session. A discussion group meets after each seminar. Preference will be given to graduate and postgraduate students in the area of nutrition and metabolism. Maximum enrolment of 15. Prerequisite: Consent of department.

MED 673 Research Design and Data Analysis in Clinical Medicine
★3 (second term, 3-0-0). Application of statistical techniques, designing research projects, preparation of grant proposals, and techniques for evaluating the quality of research publications in medicine. Addresses experimental test tube, animal and human research as well as clinical trials using a critical, problem-solving, example-based approach. A basic course in statistics is a recommended prerequisite. Preference will be given to graduate and postgraduate students in the Department of Medicine. Maximum enrolment of 25.

§204.51 Reserved

204.52 Meteorology

Department of Geography
3-32 Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4

204.52.1 General Information

The Department of Geography offers programs leadin to graduate degrees in meteorology. Offered are an MS in geography with a specialization in meteorology, and a MSc and PhD in meteorology.

Programs leading to the PhD degree concentrate o those fields of interest in which the Division of Meteorolog has the competence to guide the student, namely: ha studies, icing and precipitation physics, synoptic an satellite meteorology, weather modification, urban an industrial meteorology, turbulent diffusion, Arctic and applie climatology, and micrometeorology.

Entrance Requirements:

The Department's minimum admission requirement are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) a the University of Alberta, or an equivalent qualificatior from a recognized institution, and a TOEFL score of 55 where applicable (see §202.2.2).

Financial Assistance:

See §204.33 (Geography).

204.52.2 The Degree of MSc

Two separate programs lead to the MSc degree with specialization in meteorology. Prerequisite to either program is an Honors BSc degree or equivalent with adequate preparation in mathematics and physics.

MSc in Geography (Specialization in Meteorology)

The program of studies for the degree of MSc (geography) with specialization in meteorology is designed for students who wish to apply a knowledge of meteorology to some allied field. Prospective candidates should write and inquire of the Department stating their interests and their background.

Program Requirements:

Candidates are required to take 18 units of course weight in meteorology and climatology, and to prepare and defend a thesis on an approved topic. Course work should include METEO 330, 331, 432 and GEOG 435. Candidates who do not have any background in statistics should also include an introductory course in that field.

There is no language requirement for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 12 months is normally required.

MSc in Meteorology

A second program leading to an MSc (meteorology) degree is given with the cooperation of the Atmospheric Environment Service, Environment Canada. To be admitted to this program a student must have an Honors degree in mathematics or physics (or the equivalent), or a degree in meteorology.

Program Requirements:

For students with little background in meteorology, the first academic year will include METEO 330, 331, 332, 425, 430, two of (220, 230, 531, 432) and GEOG 333, 433, or 533. Appropriate courses from other departments may be substituted in some instances with the consent of the Department. Normally, a student will take METEO 432, 433, one of (434, 530, 531) and GEOG 533 and will prepare a thesis in the second year.

No language other than English is required for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

Twenty-four months of study and research is normally needed to complete the requirements for the degree.

204.52.3 The Degree of PhD

Program Requirements:

The PhD program consists of a minimum of six units of course weight taken for graduate credit and a thesis. Students without an MSc in meteorology will be required to take additional courses.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary with the individual candidate; however, a minimum of 36 months of study and research is normally required.

204.52.4 Undergraduate Courses

The following may be taken for graduate credit:

METEO 330 Atmospheric Physics I
★3 (first term, 3-0-0). Principles of thermodynamics, thermodynamics of dry and moist air, thermodynamic diagrams, hydrostatic stability, convection, principles of radiation, solar and terrestrial radiation. Prerequisite or corequisite: METEO 230, and MATH 215.

METEO 331 Introduction to Atmospheric Dynamics
★3 (second term, 3-0-0). Kinematics of the atmosphere, equations of motion and their simplification, pressure change, atmospheric interfaces, circulation and vorticity, pressure coordinates, introduction to turbulence. Prerequisite or corequisite: METEO 230 and MATH 215.

METEO 332 Synoptic Meteorology I
★3 (second term, 3-0-3). An introduction to synoptic analysis. Meteorological codes, sea-level map analysis of isobars, air-masses and fronts, stability, constant pressure chart contour and isotherm analysis, thickness charts and thermal winds. Prerequisite: METEO 230.

204.52.5 Graduate Courses

THES 900 Thesis
THES 999 Thesis

METEO 406 Reading and Seminar Course in Meteorology
★3 (either term, 3-0-0). Prerequisite: A 300-level Meteorology course.

METEO 415 Meteorological Statistics
★3 (second term, 3-0-0). Application of statistics to meteorology. Fourier analysis, factor analyses, multiple discriminant analysis and curve fitting by regression. Variance spectrum analysis of time series. Prerequisite: A 300-level Meteorology course.

METEO 425 Atmospheric Turbulence and Diffusion
★3 (second term, 3-0-0). Viscosity. Navier-Stokes Equations. Dimensional analysis. Averaging. The Reynolds stress equations. The Boussinesq approximation. The planetary boundary layer. The equilibrium atmospheric surface layer. Evaporation. Advection. Disturbed-surface-layer flows. Canopy flows. Plume rise. Atmospheric diffusion. Numerical simulation of atmospheric flow and mass diffusion. Prerequisite: A 300-level Meteorology course.

METEO 430 Atmospheric Physics
★3 (second term, 3-0-0). Condensation of water vapor in the atmosphere, condensation nuclei, growth of droplets from the vapor, statistical growth of drops by collection, ice nuclei, ice formation, snow crystals, growth of hail, numerical modelling of cumulus clouds and precipitation, artificial modification of clouds, weather radar. Prerequisite: METEO 330.

METEO 432 Synoptic Meteorology II
★3 (first term, 3-0-0). Structure of the atmosphere. The structure and behavior of weather systems. Planetary scale motion systems. Jet streams. Vertical motion. Condensation phenomena. Meso-scale phenomena. Prerequisite: METEO 331, 332.

METEO 433 Applied Meteorology
★3 (second term, 3-0-0). Weather forecasting techniques, student map discussions, visits to weather offices. Guest lectures. Prerequisite: METEO 432.

METEO 434 Atmospheric Modelling
★3 (second term, 3-0-3). Complementary to METEO 433. Advanced synoptic analysis and an introduction to computer methods. Numerical weather prediction, quantitative precipitation forecasting, and interpretation of prognostic charts. Prerequisite: METEO 431 or 432.

METEO 507 Seminar Course in Meteorology
★6 (1-1s-0).

METEO 530 Advanced Topics in Atmospheric Physics
★3 (first term, 3-0-0). Radiation as the fundamental mechanism for heating and cooling the earth's atmosphere. The transfer of solar and long-wave electromagnetic radiation. Radar meteorology. The role of ozone in the stratosphere. Prerequisite: METEO 430.

METEO 531 Geophysical Fluid Dynamics
★3 (first term, 3-0-0). Planetary fluid dynamics emphasizing waves in the atmosphere. Principles of numerical weather prediction. Prerequisite: METEO 331.

204.53 Microbiology

Department of Microbiology
M330 Biological Sciences Building
University of Alberta
Edmonton, Alberta T6G 2E9

204.53.1 General Information

The Department of Microbiology offers programs leading to the Master of Science and Doctor of Philosophy degrees.

Research in the Department is currently being conducted in such areas as enzyme purification and characterization, enzyme synthesis; immobilization of enzymes and cells; bacterial and fungal metabolites; metabolic control mechanisms; gene cloning, structure and expression; biosynthesis of antibiotics and other secondary metabolites, cloning of enzymes involved in antibiotic synthesis; nitrogen fixation; bacterial transport systems; bacterial adhesion; bacterial gene transfer systems; human and plant bacterial pathogenesis; viral and bacterial ultrastructure; immunology and immunochemistry; degradation of oil and phenolic compounds; corrosion; microbe-plant interactions and other areas of microbial physiology and ecology.

Further information is available through enquiry to the Chair of the Department.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 600 where applicable (see §202.2.2). GRE scores, if available, would be useful in determining acceptability.

Students may enter the graduate program with degrees in agriculture, biochemistry, chemistry, genetics or pharmacy, but will be required to take courses to complete their background wherever deficiencies exist.

Courses offered by the Department of Microbiology will be augmented with those from other departments such as Biochemistry, Chemistry, Genetics, etc. to develop a graduate program appropriate to each applicant's interest and background.

Teaching is normally required as part of a graduate program.

Financial Assistance:

Graduate assistantships, as well as financial assistance from research grants to faculty members, are available for most qualified candidates.

204.53.2 The Degree of MSc

Program Requirements:

The courses required for an MSc degree depend on the area of specialization and the undergraduate background of the student and will be decided by the student's supervisory committee. The minimal course requirement consists of a full-year seminar course, two other formal courses, and a thesis on an approved topic.

There is no language requirement for the MSc degree.

The minimum period of residence is two academic terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary with the individual candidate; however, a minimum of two years is normally required.

204.53.3 The Degree of PhD

Program Requirements:

The courses required for a PhD degree depend on the area of specialization and the undergraduate background of the student and will be decided by the student's supervisory committee. The minimal course requirement consists of a full-year seminar course, four other formal courses, and a thesis on an approved topic.

There is no language requirement for the PhD degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.

204.53.4 Undergraduate Courses

The following may be taken for graduate credit:

MICRB 303 Microbial Taxonomy
★3 (first term, 3-0-0). The history, principles, and methods of microbial classification and nomenclature. Prerequisites: MICRB 193, 265.

MICRB 311 Microbial Physiology
★3 (first term, 3-0-0). The structure, growth, and metabolic pathways used by bacteria, yeasts, and molds. Emphasis is placed on the comparative biochemical aspects of microbial life. Prerequisites: MICRB 193, 265, BIOCH 301.

MICRB 313 Microbial Physiology Laboratory
★3 (first term, 0-6L-0). Laboratory exercises introduce the microanalytical techniques used for measuring microbial growth and for following metabolic events at the cellular and subcellular level. Prerequisite or corequisite: MICRB 311.

MICRB 324 Animal Virology
★3 (second term, 3-0-3). The characterization, classification, and replication of animal viruses, together with experimental approaches to the use of various tissue culture systems in virology. Prerequisite: MICRB 224. Prerequisite or corequisite: BIOCH 301.

MICRB 332 Microbial Metabolism
★3 (second term, 3-0-0). Comparative aspects of the metabolic pathways used by anaerobes and autotrophic microorganisms for growth on unique energy sources. Ecological implications of such pathways also will be discussed. Prerequisite: MICRB 311.

MICRB 390 Environmental Microbiology
★3 (first term, 3-0-4). Interrelationships between microorganisms and their living and abiotic environment. Topics include methods of sampling and monitoring microbial activities, petroleum microbiology, eukaryotic tissue as an ecological habitat, microbial adaptation to extreme environments, survivial of airborne microorganisms, microbial response to pollution. Prerequisite: MICRB 265.

MICRB 401 Immunology
★3 (second term, 3-0-0). Molecular aspects of immunology. Qualitative and quantitative reactions, properties and structures of antibodies and antigens. Prerequisites: MICRB 193, 370 (or equivalent) and a university course in Biochemistry. Offered in alternate years.

MICRB 405 Immunology Laboratory
★3 (second term, 0-0-3). Laboratory exercises to demonstrate quantitation of the immune response and the isolation and characterization of antigens. Offered as Special Project to a very restricted number of students. Approval of instructor required. Corequisite or Prerequisite: MICRB 401.

MICRB 414 Molecular Biology of Bacterial Viruses
★3 (first term, 3-0-3). The structure and replication of viruses. Prerequisites: MICRB 193; BIOCH 301, and MICRB 224.

MICRB 444 Microbial Laboratory Techniques
★6 (second term, 2-0-8). Current techniques used in the growth of procaryotic cells and the isolation and characterization of their macromolecular constituents e.g. enzymes, DNA and ribosomes. Prerequisite: MICRB 313.

204.53.5 Graduate Courses

Note: Not all graduate courses are given each year.

THES 900 Thesis
THES 999 Thesis

MICRB 406 Topics in Cell Biotechnology
★3 (0-2s-0). This course is designed to develop familiarity with current research literature in Cell Biotechnology. Note: Restricted to Honors Cell Biotechnology students.

INT D 407 Intermediary Metabolism
★3 (first term, 3-0-0). A detailed description of enzymatic reactions in biosynthetic pathways of carbohydrate, amino acid, vitamin and coenzyme metabolism, emphasizing interrelationships among microbial and animal cells. Offered in alternate years. Prerequisites: BIOCH 301 and MICRB 311. [Microbiology]

MICRB 410 Structure of Microorganisms
★3 (second term, 3-0-0). Cellular structure of bacteria and lower eukaryotes with particular emphasis on the use of antibiotics as tools for investigating cell structure. Prerequisite: MICRB 311.

MICRB 415 Biosynthesis of Microbial Metabolites
★3 (second term, 3-0-0). Microbial production of organic acids, antibiotics, vitamins, enzymes, and steroids. Emphasis will be placed on control and regulation of metabolic pathways involved in the formation of these microbial products. Prerequisite: MICRB 311.

MICRB 450 Fermentation Biotechnology
★6 (1-0-6). This course will describe the use of microbes and recombinant DNA constructs in fermentation technology. Course material will also include theoretical aspects of kinetics, design, scale-up and downstream processing. The selection, modification and optimization of the proper organism, medium and fermentation facility and economic considerations will be discussed. Prerequisites: MICRB 311, 313.

MICRB 499 Honors Projects
★12 (0-0-12). Directed laboratory study under supervision of a staff member, submission of a written research

report and participation in departmental seminar program is required. Restricted to Honors Microbiology students in their senior year. Prerequisite: MICRB 313.

LB AN 500 Animal Models for Research
★3 (first term, 2-0-3). Principles and concepts in the selection and utilization of animal models for research. Special reference will be given to procedures of pre- and post-operative animal care, and minor surgery techniques. Laboratory project sessions. Enrollment limited to ten students.

MICRB 507 Cellular Control Mechanisms
★3 (second term, 0-0-6).

MICRB 508 Recent Developments in Virology
★3 (either term, 3-0-0). Note: Offered alternate years.

MICRB 512 Immunogenesis
★3 (second term, 3-0-0). The phylogenesis and ontogenesis of the immune response. Prerequisite: MICRB 470. See ZOOL 412.

MICRB 600 Immunobiology
★0 (second term, 0-1s-0). An advanced seminar series for staff and students, which emphasizes a theme, or a limited number of themes. The seminars are intended as explorations of the biological significance of advances in immunology. Prerequisite: Consent of department.

MICRB 607 Graduate Seminar
★6 (0-3s-0). Required each year of all graduate students. Credit will be given when a satisfactory standard is attained.

204.54 Mining, Metallurgical and Petroleum Engineering

Department of Mining, Metallurgical and Petroleum Engineering
606 Chemical-Mineral Engineering Building
University of Alberta
Edmonton, Alberta T6G 2G6

204.54.1 General Information

The Department of Mining, Metallurgical and Petroleum Engineering offers graduate courses and provides research facilities for students who wish to pursue advanced studies leading to the degrees MEng, MSc, and PhD in metallurgical engineering, mineral engineering, and petroleum engineering; MSc and PhD in metallurgy; MEng and MSc in mining engineering; and MEng and MSc in metallurgical engineering (welding).

Active research areas in the Department include mineral processing; coal preparation; modelling and simulation; intelligent processing of materials and solidification processing; hydrometallurgy; pyrometallurgy; high temperature electrochemistry; corrosion; physical and mechanical metallurgy; process metallurgy; welding metallurgy; powder metallurgy; ancient materials; ceramic materials; electronic materials; geomechanics applied to mining; geostatistics; simulaton of mining systems; application of bucketwheel excavators; mine productivity; mineral economics; properties of coal; coal gasification; liquefaction, multiphase flow through porous media; immiscible, miscible and micellar flooding; heavy oil recovery using thermal energy; interfacial phenomenon, pressure build up and drawdown analysis, and mathematical simulation of petroleum recovery systems pressure buildup and drawdown analysis.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree in engineering or the basic sciences with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §202.2.2), candidates must pass the TOEFL test with a minimum score of 575, MELAB (Michigan English Language Assessment Battery) with a score of 85. Applicants for Metallurgical or Petroleum programs must submit the results of a GRE.

Financial Assistance:

Financial assistance is available in the form of scholarships and fellowships (see Awards section of this Calendar), and through the Department in the form of teaching and research assistantships (available for Canadian students and students holding valid work permits). The assistantships are available on a full-time or part-time basis with remuneration according to the student's qualifications and hours of service. Summer assistance can sometimes be arranged for students without scholarship support who continue their research through the summer months. Assistantships are limited, and applicants should investigate every opportunity to obtain funds outside the University of Alberta.

204.54.2 The Degree of MSc

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MSc program shall contain not less than 15 units of course weight in graduate-level courses plus one graduate seminar and a thesis.

There is no language requirement for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a minimum of 18 months of study and research is normally required.

MSc Degree in Welding Engineering

The Master of Science in Welding Engineering will require the completion of 18 units of course weight, the graduate seminar, plus a thesis. The degree awarded will be Master of Science in Metallurgical Engineering (Welding).

204.54.3 The Degree of MEng

Program Requirements:

Registration in the Master of Engineering programs is restricted to engineering graduates. MEng programs normally consist of 30 units of course weight, plus an engineering project equivalent to six units of course weight.

There is no language requirement for the MEng degree.

The minimum residence requirement is one four-month term for a BSc graduate with at least one year of post-BSc experience and one session (eight months) for a BSc graduate with less than one year of post-BSc experience.

Length of Program:

A candidate may complete a Master of Engineering program in a minimum of nine months. The maximum time permitted for completion of the program is four years from the date of first registration.

MEng Degree in Welding Engineering

a. Depending on the student's field of study for the student's BSc degree, the student will be assigned to either the Department of Civil Engineering, Mechanical Engineering or Mining, Metallurgical and Petroleum Engineering as the student's home department. Degree designation will be Master of Engineering in field of study in home department (e.g., Master of Engineering in Metallurgical Engineering (Welding).

b. Certain courses must be taken by all students in the program, regardless of educational specialty. Consult with Dr. Barry Patchett for details.

c. Work on the project may be conducted within the University environment or outside in industry; however, approval, control and supervision will remain with the student's supervisor.

204.54.4 The Degree of PhD

Program Requirements:

The minimum course requirement for a PhD program is 15 units of course weight in graduate courses, plus an additional 15 units of course weight in courses as determined in consultation with an adviser, plus two graduate seminars. A major component of the program is the preparation and defence of a thesis on an approved topic.

Before taking the candidacy examination, students in Metallurgical Engineering may have to satisfy their supervisory committee that they possess knowledge of one of French, German or Russian, sufficient for reading publications in the language.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant, and the nature of the research undertaken; however, a minimum of three years is normally required.

204.54.5 Graduate Courses

THES 900 Thesis
THES 999 Thesis
MMPE 900 ★6 Directed Research Project An engineering project for students registered in a Master of Engineering program.

Metallurgical Engineering

MET E 601 Research Techniques in Metallurgy
□3.5 (either term, 2-0-3). Statistical analysis, electron diffraction, crystal growth, diffuse scattering of x-rays, electron emission, high speed strain measurements, internal friction and radioactive tracers. Zone refining, high pressure and vacuum processes. (★3)

MET E 610 Welding Metallurgy
□3.0 (second term, 3-0-0). Heat flow. Effect of welding thermal cycles on weld joints. Weld metal solidification. Metallurgical changes during solidification. Heat-affected zones. Residual stresses and distortion. Ferrous alloy metallurgy. Non-ferrous alloy metallurgy. Dissimilar metal joints. Metallurgy of brazing and soldering. Prerequisite: MET E 450 or equivalent. (★3)

MET E 611 Welding Processes
□3.8 (first term, 3-0-3/2). Process classification and selection. Welding heat sources. Heat transfer, metal transfer, gas-metal and slag-metal reactions. Power source characteristics. Analysis of industrial arc welding processes. Cutting processes. Surfacing and metal spraying. Resistance welding. Solid phase bonding. Brazing and soldering. Welding of plastics. Adhesive bonding. Prerequisite: Consent of instructor. (★3)

MET E 615 Quality Control of Weldments
□3.8 (either term, 3-0-3/2). Quality assurance schemes and audits; destructive and non-destructive testing methods; fabrication code requirements and fitness-for-purpose criteria; welding procedures; statistical methods; case studies. Prerequisite: MET E 450 or consent of instructor. (★3)

MET E 630 Special Topics in Process Metallurgy
□3.0 (either term, 3-0-0). Topics of current interest related to process metallurgy, such as process analysis, mathematical modelling and simulation, metal extraction from secondary sources, iron and steel making, physical chemistry of molten systems and production of industrial minerals. (★3)

MET E 640 Special Topics in Metallurgical Thermodynamics and Kinetics.
□3.0 (either term, 3-0-0). Heterogeneous reactions involving mass transport by diffusion or vapor phase chemical reactions, solid state reactions and formation of non-equilibrium phases. Other subjects of current interest. Prerequisite: MET E 440 or consent of instructor. (★3)

MET E 645 Electrochemical Processes
□3.0 (either term, 3-0-0). Aqueous, molten and solid electrolytes: thermodynamics, structure, transport properties. Applications of conductivity measurements. Electrodes: types, reactions, potential. Electrochemical cells. Applications of EMF measurements. Electrical double layer, electrode kinetics, overpotential. Chlor-alkali industry, electrometallurgy, electrolysis of water, electroplating. Electrochemical energy conversion: primary and secondary batteries, fuel cells. High temperature applications. Prerequisite: MET E 530 or consent of instructor. (★3)

MET E 651 High-Temperature Oxidation
□3.0 (first term, 3-0-0). Lattice defects and diffusion in crystals. Theories of metal oxidation mechanisms. Mechanisms of alloy oxidation. Oxidation by gases other than oxygen. Experimental research methods. Protection of metal surfaces from oxidation. Prerequisite: MET E 545 or consent of instructor. (★3)

MET E 652 Soil Corrosion and its Prevention
□3.0 (second term, 3-0-0). The chemical and physical character of soils; soil surveys and tests; estimation of corrosivity. Types of corrosion, including microbial corrosion, stray currents, stress corrosion. Detecting corrosion with potential measurements, line current, and earth current measurements. Methods of reducing corrosion. Cathodic protection principles, design, testing and measurement. Cathodic equipment and problems. Corrosion control management and economics. Prerequisite: MET E 545 or consent of instructor. (★3)

MET E 653 Stress Corrosion Cracking
□3.0 (first term, 3-0-0). The role of corrodents, stresses and microstructure in the phenomena of stress corrosion cracking; dissolution models and mechanical models proposed as mechanisms. Stress corrosion of high-strength steels, stainless steels and the principal nonferrous metals. Stress corrosion testing and methods of preventing stress corrosion cracking. Prerequisite: MET E 545 or consent of instructor. (★3)

MET E 654 Electrochemical Theory of Corrosion
□3.0 (second term, 3-0-0). Principles and applications of electrochemical corrosion theory in basic and applied research. Equilibrium thermodynamics and electrode kinetics. Passivation and breakdown of passivity. The study of galvanic corrosion; alloy evaluation. Corrosion testing methods and electrochemical measurement of corrosion rates. Prerequisite: MET E 545 or consent of instructor. (★3)

MET E 660 Metallurgical Applications of X-rays
□3.0 (either term, 3-0-0). Production and detection of x-rays; x-ray fluorescence spectroscopy; electron probe microanalysis; interaction of x-rays with crystals; reciprocal lattice construction; single crystal diffraction patterns; powder diffractometry and measurement of preferred orientations, stress, particle size, etc.; x-ray absorption microscopy; x-ray diffraction microscopy. Prerequisite: MET E 457 or consent of instructor. (★3)

MET E 662 Fracture of Metals
□3.0 (either term, 3-0-0). Theoretical strength of solids, Griffith crack theory, mechanisms of brittle and ductile fracture, the ductile to brittle transition, fatigue and creep fracture, environmental effects on fracture. Prerequisite: MET E 450 or MET E 458 or consent of instructor. (★3)

MET E 663 Nuclear Engineering Materials
□3.0 (either term, 3-0-0). Metallurgy of hexagonal close packed metals. Review of metal behaviour in nuclear reactors. The metallurgy of zirconium, with emphasis on applications in nuclear reactors, including texture control, creep and growth in reactor, influence of hydrogen on properties and corrosion and stress corrosion. (★3)

MET E 664 Diffusion and Diffusion-Controlled Processes in Metallurgy and Materials
□3.0 (either term, 3-0-0). Fundamentals of diffusion, diffusion in dilute alloys, diffusion in a concentration gradient, diffusion in non-metals, high diffusivity paths, thermal diffusion. Applications to materials: sintering, superplasticity, creep, metal oxides and non-stoichiometry. (★3)

MET E 665 Materials Applications of Transmission Electron Microscopy
□3.0 (either term, 3-0-0). Principles and design of the transmission electron microscope, specimen preparation, electron diffraction, image contrast theory, introduction to analytical electron microscopy. Applications to defects in metallic and non-metallic crystalline materials. Prerequisite: MET E 458 or consent of instructor. (★3)

MET E 666 Materials Applications of Scanning Electron Microscopy
□3.0 (either term, 3-0-0). Principles and design of the scanning electron microscope, electron beam-specimen interactions, image formation, x-ray microanalysis in the scanning electron microscope, specimen preparation, application to materials analysis. Prerequisite: MET E 458 or consent of instructor. (★3)

MET E 668 Colloidal Ceramics Processing
□3.0 (first term, 3-0-0). Principles and application of colloidal materials to the fabrication of advanced ceramics. Synthesis of fine powders, sols and gels; study of their properties, phase transformation and sintering behaviour during heat treatment. Colloidal ceramics composites. Prerequisite: MET E 480 or consent of instructor. (★3)

MET E 669 Theory of Alloy Phases
□3.0 (either term, 3-0-0). Application of thermodynamics, zone theory and other pertinent concepts to the study of the nature and formation of solid solutions and intermediate phases. Systematic analysis of the variables that are active in alloy formation. Correlation of the nature of bonding, crystal structure and physical properties. Prerequisite: MET E 457. (★3)

MET E 675 Crystal Lattice Imperfections and the Mechanical Behavior of Solids
□3.0 (second term, 3-0-0). Point, line, plane and volume defects in crystalline materials. Properties of defects. Kinetics of formation, migration and annihilation of defects. Surfaces and grain boundaries. Anelasticity, internal friction, creep, radiation damage. Prerequisite: MET E 458 or consent of instructor. (★3)

MET E 676 Special Topics in Physical Metallurgy
□3.0 (either term, 3-0-0). Subjects of current interest such as kinetics of heterogeneous nucleation and phase transformations in solids, grain boundary phenomena, internal friction, physics and chemistry of friction and wear. (★3)

MET E 680 Ceramics
□3.0 (either term, 3-0-0). Important ceramic materials and products, processing, typical properties. Structure: binary and ternary compounds, crystalline silicates, glass. Point defects, nonstoichiometry, defect reactions, dislocations. Diffusion, electrochemical transport, examples. Thermal and mechanical properties, thermal shock resistance, electrical conduction. Applications: solid electrolytes, energy conversion systems, refractories, electronics. Prerequisite: MET E 432 and 457 or consent of instructor. (★3)

MET E 682 Graduate Seminar
□0.5 (0-1s-0). Discussion of progress and problems in research underway in the metallurgical area. Graduate students are required to attend and to give a seminar related to their research. (★3)

Mining Engineering

MIN E 602 Design Project I
□3.0 (first term, 3-0-0). Design of a mining operation. (★3)

MIN E 603 Design Project II
□3.0 (second term, 3-0-0). Continuation and extension of MIN E 602. (★3)

MIN E 611 Mining Property Evaluation
□3.0 (second term, 3-0-0). Ore reserve estimation, with emphasis on geostatistical techniques. Cost estimation, taxation, feasibility analysis, computer simulation approach to decision making. (★3)

MIN E 620 Rock Mechanics
□3.0 (either term, 3-0-0). An advanced treatment of selected topics in rock mechanics. (★3)

MIN E 621 Geomechanics in Underground Mining
□3.0 (either term, 3-0-0). Energy changes due to mining; multi-seam mining; interactions; pillar design in hard rock, coal and potash; strata mechanics in longwall and shortwall coal mining; rock mechanics of potash mining and caving methods; rock bursts and bumps; subsidence; underground rock mechanics instrumentation and applications of numerical methods of stress analysis. Prerequisite: MIN E 423 or equivalent. (★3)

MIN E 622 Surface Mining Systems and Equipment
□3.0 (second term, 3-0-0). An advanced treatment of selected topics in surface mine design, selection of mine equipment, and planning of operations. Prerequisite: MIN E 513 or consent of instructor. (★3)

MIN E 623 Rock Slope Stability in Surface Mining.
□3.0 (either term, 3-0-0). Economic, operational and geological factors affecting slope design. Design stages; collection of structural and strength data. Data synthesis, interpretation, design values. Methods of design, deterministic and probabilistic methods. Bench design. Controlled blasting; stabilization techniques. Monitoring. Spoil pile stability. Prerequisite: MIN E 423 or equivalent. (★3)

MIN E 624 Underground Mining Support
□3.0 (either term, 3-0-0). Classification and mechanics of rock failures around mine openings, roof falls and types of support. Mechanics of artificial supports widely used in mining. Estimating loads for design. Effect of mine environment. Prerequisite: MIN E 423 or equivalent. (★3)

MIN E 630 Advanced Mine Transport
□3.0 (either term, 3-0-0). Advanced studies in the methods and systems of material movement in mines. In-depth consideration of selection, specifications, and costs of transportation for surface and underground mines. Prerequisite: MIN E 430, and MIN E 513, or MIN E 514, or consent of instructor. (★3)

MIN E 640 Simulation of Industrial Systems
□3.0 (first term, 3-0-0). Formulation of models of engineering problems and industrial systems for experimentation using a general purpose simulation language. Statistical and operational validation of simulation results. Prerequisite: Consent of instructor. (★3)

MIN E 650 Special Topics in Mining Engineering.
□3.0 (either term, 3-0-0). Special studies of developments of current interest within the mining industry in exploration, mining methods, mine planning, mine simulation, environment, regulations, economics and management; e.g., tar sands mining, ocean mining, in situ gasification. (★3)

Mineral Engineering

MNL E 630 Advanced Topics in Coal Preparation
□3.0 (either term, 3-0-0). Advanced topics in coal preparation, including the modelling of unit operations used in coal preparation, circuit analysis and optimization and process control. Coal preparation economics. Prerequisite: MET E 431. (★3)

MNL E 635 Coal Conversion and Utilization
□3.0 (second term, 3-0-0). Coal processing, with emphasis on carbonization, gasification, liquefaction and selected aspects of combustion and pollution abatement techniques. Prerequisite: MET E 535. (★3)

MNL E 640 Advanced Topics in Mineral Process Engineering
□3.0 (either term, 3-0-0). An advanced treatment of selected topics of current interest in mineral process engineering. (★3)

MNL E 682 Graduate Seminar
□0.5 (0-1s-0). Discussion of progress and problems in research underway in the mining and mineral process area of the Department. (★1)

Petroleum Engineering

PET E 612 Porous Media
□3.0 (first term, 3-0-0). Physical properties of porous media, with emphasis on transport phenomena in porous media; geometrical and mechanical properties, single phase fluid flow and (miscible and immiscible) multiphase fluid flow through porous media; and heat transfer in porous media. (★3)

PET E 614 Well-Logging and Formation Evaluation
□3.0 (second term, 3-0-0). Petrophysics and modern well-logging methods; discussion of the physical properties of porous media and the measurement of geometric and mechanical properties of the porous media, fluid saturations, chemical composition of the saturating fluids; application of the results in formulation and reservoir evaluation. (★3)

PET E 630 Petroleum Reservoir Engineering
□3.0 (first term, 3-0-0). Characteristics of reservoir materials (rock, reservoir fluids); reservoir evaluation (volumetric method, material balance method with water influx), fundamental production processes (primary recovery). (★3)

PET E 632 Advanced Topics in Petroleum Production Mechanics
□3.0 (second term, 3-0-0). Concepts of reservoir engineering from an advanced point of view as applied to forecasting the performance of oil and/or gas reservoirs; combined driving mechanisms; applications to practical problems encountered during performance by primary means. (★3)

PET E 634 Secondary Recovery
□3.0 (second term, 3-0-0). Evaluation and operation of secondary recovery projects; fundamental consideration of petroleum engineering and reservoir behaviour applied to secondary recovery of oil; recent technical papers. (★3)

PET E 635 Numerical and Analytical Solution of Porous Media Flow Problems.
□3.0 (first term, 3-0-0). The goal of this course is to develop techniques for the solution of a wide variety of single phase flow problems in porous media for compressible and incompressible flow. Two dimensional flow will be considered for the greater part. Selected mathematical techniques, analytical as well as numerical, will be developed for specific problems. In a number of cases, analytical and numerical solutions will be compared. (★3)

PET E 644 Fluid Mechanics of Natural Gas Production
□3.0 (first term, 3-0-0). Single and multiphase flow in circular conduits; steady and transient single phase flow in porous media. (★3)

PET E 650 Reservoir Simulator Development
□3.0 (second term, 3-0-0). The principal objective of this course is the development of reservoir simulation theory to the level required for the construction of a three-phase, three-dimensional reservoir simulator. In addition to providing practice in developing a simulator, the course will also cover recent advances in simulation and history matching. (★3)

PET E 668 Advanced Well Test Analysis
□3.0 (second term, 3-0-0). Analytical techniques employed to solve complex well test problems. Pressure derivative analysis. Production time effects on buildup analysis. Pressure transient analysis for fractured wells. Layered reservoir testing. Prerequisite: PET E 468 or consent of instructor. (★3)

PET E 682 Graduate Seminar
□0.5 (0-1s-0). Discussion of progress and problems in research underway in the Department. (★1)

PET E 684 Oil and Gas Property Evaluation
□3.0 (second term, 3-0-0). Economic structure of the petroleum industry; factors influencing oil economics; the value of money; taxation of oil and gas properties and income; engineering analysis; application of data in the analysis; estimation of costs; evaluation of processing facilities; analysis of profitability; the evaluation report. (★3)

PET E 694 Advanced Topics in Petroleum Engineering
□3.0 (either term, 3-0-0). An advanced treatment of selected petroleum engineering topics of current interest to staff and students. (★3)

204.55 Music

Department of Music
3-82 Fine Arts Building
University of Alberta
Edmonton, Alberta T6G 2C9

204.55.1 General Information

The Department of Music offers programs leading to the degrees of Master of Music and Doctor of Music.

Areas of concentration within the MMus program include: applied music (keyboard instruments, orchestral instruments and voice); choral conducting, composition; ethnomusicology, musicology and the theory of music. The DMus program is offered only in performance (piano or organ).

Application forms, calendars and further information can be obtained from the Associate Chair, Department of Music. Applications must be received by April 1. For further information write to the Associate Chair, Department of Music.

Entrance Requirements:

The Department's minimum admission requirements are a BMus degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). In the case of the MMus (Ethnomusicology, Musicology) an Honors BA is acceptable in place of the BMus. An audition is required as part of the admission procedure for applicants in Applied Music and Choral Conducting; sample papers must be submitted by applicants in Ethnomusicology, Musicology and the Theory of Music, and a portfolio of compositions by applicants in Composition. Applicants must also submit a one-page statement of purpose. Placement tests in music history (all periods) and music theory (tonal and chromatic harmony, two and three part counterpoint and aural skills) will be given to entering graduate students. The results of these tests may lead to program requirements in addition to those set forth below.

Financial Assistance:

Graduate students in music are eligible to compete for the general graduate awards listed in §206 of this Calendar, and are encouraged to do so. Inquiries should be directed to the Director of Student Awards. Graduate assistantships are available within the Department; inquiries should be addressed to the Associate Chair of the Department.

204.55.2 The Degree of MMus

Program Requirements:

The MMus program in applied music will include MUSIC 505, 621, 635 or 639, and nine units of course weight in music options. All MMus (Applied Music, Band, and Orchestral Instruments) are required to participate in a large ensemble for one year. An essay on some carefully defined subject closely allied to the applied music major must be successfully completed prior to the student's graduate recital jury examination. The jury examination will be considered the equivalent of the final oral examination. Keyboard performers may specialize in solo performance, chamber music, pedagogy, or vocal accompanying/coaching.

The MMus program in composition will include MUSIC 505, 651, 652, 660 and nine units of course weight in music options. In addition, students who have not taken at least three units of course weight in electronic music in their undergraduate training will be required to take MUSIC 444. A group of compositions by the candidate is to be presented in a public recital during the candidate's period of residence. A thesis in the form of a major composition is required.

The MMus program in music theory will include MUSIC 505, 651, 652, three units of course weight in a music theory option, six units of course weight in a music history option, and six units of course weight in a music option. A thesis is required.

The MMus program in musicology will include MUSIC 505; a three units-of-course-weight seminar selected from MUSIC 604, 605, 606 or 643; two, three units-of-course-weight seminars selected from MUSIC 508, 509, 606, 607, 608, 613, 615, and 616; three units of course weight in theory selected from MUSIC 544, 545, 638, 651 or 652; and 9 units of course weight in options in music history or theory. A thesis is required.

The MMus program in Choral Conducting will include MUSIC 505, 630, 640, and 12 units of course weight in music options. An essay on some aspect of choral literature or conducting must be completed successfully prior to the student's graduate recital. The recital will be considered the equivalent of the final oral examination.

The MMus program in ethnomusicology will include MUSIC 505, 665, one graduate music seminar, three units of course weight in Cultural Anthropology, six units of course weight in a music option. A thesis is required.

All Master of Music candidates in Choral Conducting, Composition, Ethnomusicology, Musicology and the Theory of Music are required to demonstrate a reading knowledge of French, German or another language other than English, appropriate to the area of research. This requirement must be completed before the thesis is undertaken. For MMus candidates in the Applied Music program no language other than English is required.

The minimum period of residence for the MMus degree is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is normally required.

204.55.3 The Degree of DMus

Entrance Requirements:

The entrance requirement is an MMus degree or equivalent and evidence of outstanding ability and accomplishment in the area of specialization. Placement examinations will be required of graduates from other institutions and of University of Alberta graduates who have held their master's degrees for more than two years prior to application.

DMus candidates will be required to demonstrate reading proficiency in one approved language other than English before being admitted to candidacy.

Program Requirements:

Courses of study for DMus students will be formulated by the Department according to individual need; however, 30 to 36 units of course weight are normally required.

The DMus candidacy examination will be in two parts, written and oral, and will cover music history, music theory, and the literature of the major instrument. The examination should normally be taken near the end of the student's second year as a provisional candidate and must be successfully completed before the third required public performance. The oral part of the examination must take place not later than one month after successful completion of the written part of the examination. If the student fails the examination, all or a portion of it may be repeated once within one year of the first attempt, at the discretion of the committee.

In lieu of a formal dissertation DMus candidates will write a scholarly essay and present at least four public performances including a solo recital, a lecture recital, a chamber music recital, and a second solo or chamber music recital or solo performance with orchestra.

The final examination for the DMus degree will include a defence of essay and performances.

In addition to the regulations outlined above, the general regulations for the PhD degree stated in §203.2.1 also apply.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary with the individual candidate; however, a minimum of three years of study and research is normally required.

204.56 Nursing

Faculty of Nursing
3-111 Clinical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2G3

204.56.1 General Information

The Faculty of Nursing offers a two-year program which provides preparation for advanced nursing practice across the health-illness continuum. The aim of the program is to prepare nurses to function as advanced level practitioners in hospital, community, or educational settings. The options of undertaking a Certificate in Nurse-Midwifery along with the Master of Nursing program, and an MN degree with a Nursing Administration minor are also available.

The Faculty of Nursing offers a PhD in Nursing program. The program prepares nurses to advance nursing knowledge through identification of nursing phenomena and the development and testing of nursing theory. The number and types of courses included in the program will vary according to the individual needs of the student.

The Faculty of Nursing is committed to the principle of research-based nursing practice. The Faculty research development program includes visits by leading nurse scientists, a Research Office, community-wide nursing research seminars, thesis seminars, computer facilities, and provision for the communication of nursing research. Also, the Canadian Clearinghouse for Ongoing Research in Nursing (CCORN), housed within the Faculty, provides a computerized data base accessible to North American researchers.

Entrance Requirements:

The Faculty's minimum admission requirements are:

(1) A baccalaureate degree in Nursing with an average of at least 6.5 (approx. 70%) in the work of the final two years (or an equivalent qualification from a recognized institution).

(2) Three letters of reference (criteria described on the application form).

(3) An undergraduate course in each of statistics and research methods.

(4) Normally, applicants wishing to undertake the MN degree program must have a minimum of one year of clinical nursing experience.

(5) A TOEFL score of at least 580 where applicable (see §202.2.2 of this Calendar).

(6) Submission of the results of a Miller Analogies Test (no arbitrary standard is used).

(7) Applicants wishing to undertake the combined MN degree and Certificate in Nurse-Midwifery program must meet the following admission requirements in addition to requirements 1 to 4: (a) appropriate work experience of at least two years in maternal-newborn nursing, including six months (minimum) in labor and delivery, and (b) two of the three required references must be from maternal-newborn work situations.

Upon acceptance into the MN program, the following additional requirements must be met by each student:

(1) A specified schedule of immunization must be completed prior to commencement of clinical practice in the program.

(2) Evidence of active registration in the Alberta Association of Registered Nurses (AARN) of possession of a valid permit from the AARN to practice nursing in Alberta is required.

(3) Completion of Health Assessment (NURS 468) or an equivalent course. MN students who do not meet this requirement must do so by the end of the first year of the MN program. This requirement is in addition to the graduate program courses and entails the payment of extra fees. Credits obtained for such a course are not applicable to the MN degree.

(4) Evidence must be provided of certification at the Basic Rescuer's Level in CPR by December 31 of the first year in the MN program, and evidence of recertification provided in each subsequent year of registration in the MN program.

Financial Assistance:

Information regarding assistantships and other forms of financial assistance will be supplied on request.

204.56.2 The Degree of MN

Program Requirements:

Student programs are designed on an individual basis within the MN curriculum framework. Programs are planned in light of the student's career goals, clinical interests, and research interests of relevance to nursing practice.

Each student's program will normally consist of NURS 502, NURS 503, NURS 505, one course in nursing practice (e.g., NURS 506), one course in the nursing profession (three credits), one graduate-level statistics course (three credits), one graduate-level research course (three credits), and two electives (three credits each). In addition, students are required to register in NURS 599 (Thesis Seminar) for one academic year (two terms) during the program.

A thesis is required for all students.

MN Candidates pursuing a Certificate in Nurse-Midwifery in combination with the MN degree undertake NURS 453, 514, 517, 518, 519, and a course in reproductive physiology.

No language other than English is required for the MN.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program varies according to the candidate's undergraduate preparation and career experience, and the nature of the research undertaken. Generally, a minimum of two academic years plus one summer is required.

204.56.3 Graduate Courses

THES 900 Thesis
THES 999 Thesis

NURS 502 Nature of Nursing Knowledge
★3 (either term, 3-0-0). Enquiry into the nature, scope, and object of nursing knowledge; the distinct contribution of nursing art, philosophy, history, and science. Prerequisite: Consent of the instructor.

NURS 503 Design and Conduct of Nursing Research
★3 (either term, 3-0-0). Experimental, quasi-experimental, historical, and descriptive approaches to the investigation of nursing phenomena.

NURS 505 Advanced Clinical Nursing I
★6 (either term, 0-3s-6). Advanced clinical experience in nursing with emphasis on analysis and use of nursing theories/frameworks. (The hours cited should be regarded as minimum. Individual students may be required to complete additional clinical practice requirements.) Prerequisite or corequisite: NURS 502.

NURS 506 Advanced Clinical Nursing II
★6 (either term, 0-3s-6). Advanced clinical experience in nursing with emphasis on process and activity patterns. (The hours cited should be regarded as minimum. Individual students may be required to complete additional clinical practice requirements.) Prerequisite: NURS 505.

NURS 514 Health Care of Women in the Reproductive Years
★6 (second term, 0-3s-6c). Preconceptual factors influencing pregnancy (including family planning), educational and health assessment, and identification of risk in mothers and families in the prenatal period. In clinical practice, the emphasis will be on the prenatal period. Consent of the instructor required.

NURS 517 Care of the Family During Labor, Delivery and the Postpartum Period
★6 (first term, 0-3s-8c). The course will focus on the nursing care needs of selected low-risk families during labor, delivery, and the postpartum period. Prerequisite: NURS 514 or consent of the instructor.

NURS 518 Social and Cultural Context of Reproductive Care
★3 (second term, 0-3s-3c). An exploration of the major trends in reproductive care, the cultural influences on care, and ethical issues related to reproductive care.

NURS 519 Midwifery Practicum
★6 (Intersession, 0-4c-0). A six-week intensive clinical experience in midwifery care of low-risk families based on an advanced understanding of midwifery principles. Each student will be required to care for a minimum of 25 mothers in labor and conduct the delivery under the guidance of a physician and/or nurse-midwife. Deliveries will be followed-up in the initial postpartum period. Prerequisite: NURS 514 and 517.

NURS 540 Qualitative Methods for Nursing Research
★3 (either term, 3-0-0). An introduction and overview of qualitative research methods (primarily ethnography, ethnoscience and participant observation) and their application for nursing research. Prerequisite: Consent of the instructor.

NURS 550 Advanced Seminar in Trends in Nursing
★3 (either term, 0-3s-0). Advanced analysis of trends, problems and issues in the field of nursing, with emphasis on its interrelationships with other components of the health care system. Prerequisite: Consent of the instructor (elective).

NURS 560 Topics in Advanced Study in Nursing
★Variable (either term, Variable). An elective course aimed at developing in-depth knowledge regarding topic(s) related to advanced-level nursing. Learning experiences may include clinical experience. Normally, NURS 502, 503, and 505 are required prerequisites.

NURS 561 Guided Individual Study in Nursing
★Variable (either term, 3-0-0). A course designed for in-depth, individual study of a topic related to advanced-level nursing. Learning experiences may include clinical experience.

NURS 562 Guided Study in Nursing
★3 (either term, 3-0-0). A course designed for in-depth study, by non-MN students, of a topic(s) directly or indirectly related to advanced level nursing.

NURS 599 Thesis Seminar
★1 (either term, 0-2s-0). Required for one academic year (two terms) of the Master of Nursing program. Prerequisite: NURS 503.

NURS 600 Theory Development
★3 (either term, 3-0-0). Theoretical frameworks, models

of nursing and philosophical underpinnings, as related to other disciplines.

NURS 610 Nursing as a Practical Science
★3 (3-0-0). Conceptualization of nursing as a practical science, with particular attention to relationships with other practical sciences.

NURS 660 Guided Individual Study in Nursing
★3 (either term, 3-0-0). Prerequisite: Consent of the instructor and the Faculty.

NURS 699 Dissertation Seminar
★1 (either term, 0-1s-0). (Compulsory for students in residence). Opportunity for discussion of proposed and ongoing research.

204.57 Occupational Therapy

Department of Occupational Therapy
308 Corbett Hall
University of Alberta
Edmonton, Alberta T6G 2G4

204.57.1 General Information

The Department of Occupational Therapy offers programs leading to the degree of MSc in several fields of study, described below. Availability of courses and research supervision is dependent on department resources; potential students are encouraged to contact the Department directly before applying. The deadline for receipt of applications is March 1.

(1) Work Evaluation: Emphasis on work performance, physical measurement of work, and evaluation of work capacity. Research may be undertaken in collaboration with Western Industrial Research and Training Centre, Goodwill Rehabilitation Services, and other agencies.

(2) Psychosocial Dysfunction: Advanced study in occupational therapy assessment and intervention in psychosocial dysfunction. A number of clinical facilities and teaching hospitals provide opportunities for collaborative research investigations in this area.

(3) Life Span Development: Advanced study in occupational therapy assessment and programming in paediatrics through geriatrics. A number of special schools could provide research opportunities, as well as major centres such as the Glenrose School Hospital, Alberta Children's Hospital in Calgary, the planned Northern Alberta Children's Hospital, Edmonton General Youville Wing.

Entrance Requirements:

The Department generally does not accept students with an overall GPA of less than 6.5 in their last two undergraduate years. Applicants must have an undergraduate degree in occupational therapy, or an equivalent qualification from a recognized institution, plus one year of clinical experience preferably including six months in the field to be studied. Applicants are required to submit three letters of reference. Where applicable (see §202.2.2) applicants must have a minimum TOEFL score of 550. Diploma therapists must complete the undergraduate postdiploma degree completion before applying to the Master's degree program.

Financial Assistance:

Financial assistance may be available in the form of teaching or research assistantships. Other sources of funding may be sought as described in the Awards section of the Calendar, from provincial bursaries, professional associations, private foundations, etc.

204.57.2 The Degree of MSc

Program Requirements:

Each student's program will normally consist of 24 units of course weight at the graduate level (including OCCTH 500, OCCTH 505, OCCTH 521, and EDPSY 500) and a research thesis. Remaining courses should include at least two specific to the field of study, plus relevant courses which may be offered by other departments.

No language other than English is required for the degree.

The period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

Normally a minimum of two academic years are required to complete the MSc program.

204.57.3 Graduate Courses

REHAB 500 Research Seminar
★3 (either term, 0-3s-0). The examination, evaluation and preparation of the research report. Students will discuss critically various aspects including the selection of the problem, the review of the literature, the research hypothesis, the collection and analysis of the data, and the significance of the research.

****OCCTH 505 Instrumentation and Theory in Occupational Therapy**
★3 (either term, 0-3s-0). Measurement principles and their application to occupational therapy. Overview of measurement techniques used by therapists. Prerequisite or corequisite: EDPSY 501 or equivalent.

****OCCTH 515 Occupational Therapy Seminars**
★6 (4-2s-0). Seminars on teaching methods and the preparation of a minimum of two activities to an advanced level in the laboratory.

OCCTH 516 Occupational Therapy Curriculum Design
★3 (3-0-0). Curriculum design principles for clinical and academic settings. Includes consideration of national and international recommendations for essentials of an undergraduate curriculum.

OCCTH 517 Principles of Clinical Instruction in Occupational Therapy
★3 (0-1s-4). Discussion of problems and issues plus application of principles and techniques to occupational therapy instruction in a clinical setting.

OCCTH 521 Program Evaluation in Occupational Therapy
★3 (either term, 0-3s-0). Designed to equip the student with the resources and skills to evaluate occupational therapy program delivery.

OCCTH 525 Occupational Therapy Seminars
★3 (4-2s-0). A continuation of OCCTH 515. Detailed preparation of teaching plans for full academic courses. Formulating lesson plans. Programmed learning.

OCCTH 526 Administration and Supervision Seminar
★3 (0-3s-0). Seminar on health care administrative and management techniques to prepare an individual for a middle management position such as department head.

OCCTH 527 Analysis of Instructional Techniques for Occupational Therapy Education
★3 (0-1s-4). Discussion of problems and issues plus application of educational principles and techniques to occupational therapy education in an academic setting.

OCCTH 528 Practicum
★0 (8 weeks). Credit. Practicum in a specific area of occupational therapy. May be required if the department feels the student needs additional practical experience in their area of concentration. Such experience may be done at any appropriate centre but must occur while the student is enrolled in the graduate program.

OCCTH 532 Clinical Conditions
★3 (either term, 3-0-0). Aetiology, clinical features, and lifestyle implications of various clinical conditions frequently seen in rehabilitation settings. Prerequisite: Consent of department.

OCCTH 533 Human Sexuality
★3 (either term, 0-3s-0). Seminars on sexual concerns as they relate to the counselling process in rehabilitation. Opportunity will be provided for students to practice sexual counselling skills. Prerequisite: OCCTH 532 or consent of department.

OCCTH 534 Group Skills
★3 (either term, 0-2s-1). A seminar/laboratory course designed to provide an advanced theoretical background and practical skills in using Occupational Therapy with groups. Prerequisite: Consent of department.

OCCTH 535 Psychosocial Aspects of Rehabilitation
★3 (either term, 0-3s-0). Discussion of psychological factors affecting physical and psychiatric rehabilitation, and implications for program planning. Prerequisite: OCCTH 532 or consent of Department.

OCCTH 538 Counselling in Rehabilitation
★3 (either term, 0-3s-0). Discussions on specific issues related to counselling handicapped persons. Opportunity to practice and apply communication and counselling skills. Prerequisite: OCCTH 532 or consent of Department.

****OCCTH 540 Applied Neurophysiology and Neuroanatomy**
★3 (either term, 3-0-0). Selected aspects of neurological function and structure needed for analysis of current therapeutic approaches to patients with neurological conditions. Prerequisite: PHYSL 262 and OCCTH 455 or equivalents.

****OCCTH 542 Advanced Research Seminar in Neurology**
★3 (either term, 0-2s-2). Current comprehensive evaluation and treatment procedures for patients with a variety of neurological conditions. Students will be expected to identify problem areas in therapeutic approaches and carry out a research project with minimal supervision. Prerequisite: OCCTH 540 or equivalent.

****OCCTH 554 Advanced Therapeutic Procedures in Psychosocial Dysfunction**
★3 (either term, 0-3s-0). Discussion of various psychc therapeutic activities as they relate to occupation therapy intervention.

****OCCTH 556 Advanced Research Seminar in Psychiatry**
★6 (0-3s-3). A variety of assessment tools will be critical reviewed and the most appropriate ones will be used to d actual client assessment in an interdisciplinary setting Individual programs will be designed, implemented an evaluated for effectiveness. Specific attention will be pai to ICD9-DSM III. Prerequisite: OCCTH 505.

****OCCTH 561 Sensory Integration Dysfunction**
★3 (either term, 2-2s-0). Theory of sensory integrativ dysfunction and remedial techniques. Prerequisite OCCTH 401 or equivalent.

****OCCTH 562 Occupational Therapy Programming for Exceptional Children**
★3 (either term, 0-3s-0). Consideration of current issues in the development of occupational therapy program using a variety of service delivery models in medical educational and community settings.

****OCCTH 563 Development Assessment**
★3 (either term, 2-0-1). Selected measurement tech niques applicable to occupational therapy. Prerequisite OCCTH 505.

****OCCTH 565 Evaluation of Sensory Integration Dysfunction**
★3 (either term, 2-0-2). Administration and interpreta tion of the SCSIT and SCPRN. Acceptable as a CSSIL certification course. Prerequisite: OCCTH 561.

OCCTH 570 Evaluation of Occupational Performance
★3 (either term, 0-3s-0). Presentation of resources and techniques necessary for work evaluation, work adjust ment and work samples used in rehabilitation.

OCCTH 597 Research and Directed Studies
★3 (either term, 0-0-3). Work on a specific project under the supervision of a faculty member. Prior approval of the supervisor and the student's advisor required.

OCCTH 598 Special Seminars
★3 (either term, 0-3s-0). Content varies from year to year. Topics will be announced prior to registration period. Prerequisite: Consent of department. May be repeated.

OCCTH 599 Directed Study
★3 (either term, 0-3s-0). Designed to allow a student to pursue a topic of interest in more depth than permitted by existing courses. Prerequisite: Departmental approval of plan of study. May be repeated.

204.58 Paleontology

Departments of Geology and Zoology

The following table lists renumbered courses effective 1990-91:

Old	New
PALEO 620	PALEO 520

PALEO 318 Paleontology of the Lower Vertebrates
★3 (first term, 3-0-3). Evolution of fish-like vertebrates, amphibians, reptiles and birds, with emphasis on systematics, major adaptive shifts and subsequent evolutionary radiation. Prerequisite: GEOL 201 or ZOOL 225 or ZOOL 200.

PALEO 319 Paleontology of the Higher Vertebrates
★3 (second term, 3-0-3). The Mesozoic history of mammals as illustrative of the origin and evolution of a higher taxon; adaptive radiation of Tertiary mammals, with special emphasis on insectivores, primates, carnivores, proboscidians, and ungulates. Prerequisite: GEOL 210 or ZOOL 225 or ZOOL 200.

†PALEO 414 Advanced Paleontology
★3 (second term, 3-0-0). Contemporary aspects of theoretical Paleontology, including: functional morphology, adaptation and evolution in invertebrate and vertebrate fossils; and distribution of fossils as evidence for continental drift. Prerequisite: GEOL 314 or ZOOL 252/253 or consent of the instructors.

PALEO 520 Problems in Vertebrate Paleontology
★3 (either term, 0-1s-0). Prerequisite: PALEO 318 and 319.

Note: For further related courses see §204.34.5.

204.59 Pathology

Department of Pathology
5B4.02 Walter C. Mackenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2R7

204.59.1 General Information

The Department of Pathology provides a program leading to the degree of Master of Science in medical laboratory science or in the field of experimental pathology. In addition, Pathology is one of eight departments working jointly to offer a PhD program in medical sciences. Further information on the PhD interdisciplinary program is found in §204.49.

Inquiries should be directed to the Chair of the Department of Pathology.

Entrance Requirements:

Candidates with either a BSc in medical laboratory science (or related scientific subjects), or an MD or its equivalent in medicine may enter this program. The Department generally does not accept students with an overall grade point average of less than 7.0 in their undergraduate years at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §202.2.2), candidates must obtain a score of 600 on the TOEFL test. Prerequisite courses will be specified at the time of arrangement of the candidate's program, although some biological sciences, particularly microbiology, biochemistry and physiology should have been studied.

Financial Assistance:

Limited financial assistance is available to some students and is awarded on the basis of merit upon application.

204.59.2 The Degree of MSc

Program Requirements:

The requirements for the degree include course work, seminars and an approved research project. Approved courses offered by the Departments of Anatomy, Biochemistry, Physiology, Pharmacology, and Plant Science may be included in the candidate's program. In certain circumstances courses offered by other departments may be approved.

There is no language requirement for the degree of MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

Candidates with a BSc normally require two years, while those with an MD normally require one year to complete the program.

204.59.3 Graduate Courses

Note: Not all graduate courses are offered each year. The Chair of the Department should be consulted regarding the availability of graduate courses in any academic year.

THES 900 Thesis
THES 999 Thesis

PATH 501 Cellular and Tissue Structure and General Mechanisms of Disease
★6 (78 hours). Advanced seminars on the Cell Cycle; Instrumentation and Techniques of Electron Microscopy; Pathobiology of Lysosomes, Mitochondria and Endoplasmic Reticulum; Humoral and Cellular Mechanisms in Immunology; Hypersensitivity; Autoimmune Diseases; Immunology of Cancer; Immunodeficiency Diseases; Transplantation Immunity; Evaluation of Renal Function; Glomerular Disease; Renal Vascular Diseases; Renal Transplantation; Renal Tumors; Hormonal Mammary Dysplasia; Mammary Tumors; Liver Function Tests; Viral Hepatitis; Cholestasis; Alcoholic Liver Disease; Acute and Chronic Hepatitis; Neoplasms of Liver; Fetal and Neonatal Pathology; Diseases of the Placenta. To be offered in alternate years. Restricted to Postgraduate Medical Education students or consent of department.

PATH 502 Cellular and Tissue Structure and General Mechanisms of Disease
★6 (78 hours). Advanced seminars on Collagen Structure and Function; Blood Coagulation; Bleeding Disorders; Thrombosis and Embolism; Shock; Atherosclerosis; Amyloidosis; Glycogen Storage Diseases; Diabetes Mellitus; Parathyroid Pathology and Metabolic Bone Disease; Disorders of Melanin Metabolism; Nevi and Melanomas; Pathology of Skeletal Muscle; Pathology of the Small Intestine; Pathology of the Colon; Pulmonary Pathology; Pathology of Lymphoid Organs; Parasitology. To be offered in alternate years. Prerequisite: PATH 501, or consent of department. Restricted to Postgraduate Medical Education students or consent of department.

PATH 504 Seminars in General Pathology
★1 (either term, 1-0-0).

PATH 506 Medical Biochemistry
★6 (2-0-0). Advanced seminars on instrumentation, Hepatic, Renal, Pancreatic Endocrine and Exocrine Functions; Enzymology and Diagnostic Applications of Enzyme Determinations, Hyperlipidemias. Prerequisite: Undergraduate courses in Medical Physiology and Biochemistry. To be offered in alternate years.

PATH 507 Medical Biochemistry
★6 (2-0-0). Advanced seminars on Metabolic Disorders of Carbohydrates and Amino Acids, Nutritional Deficiencies and Malnutrition, Endocrine Functions, Organization and Quality Control in Medical Biochemistry. Prerequisite: PATH 506 or consent of department. To be offered in alternate years.

PATH 510 Cryobiology I
★3 (first term, 2-1s-0). Physiochemical changes in aqueous solutions at low temperatures and responses of living cells and tissues to those changes. Current theories of damage and protection during freezing and thawing.

PATH 511 Cryobiology II
★3 (second term, 2-1s-0). Freeze-thaw responses of enzyme systems, individual cells and organized tissues. Preservation of spermatozoa, blood and bone marrow cells, embryos and various tissues. Approaches to the cryopserservation of organs and whole organisms. Applications in medicine and agriculture. Prerequisite: Consent of department.

PATH 520 Pathology Research Seminar
★1 (0-1s/2-0). Graduate seminars presented by graduate students, faculty and guests in the Department. Required of all pathology graduate students.

204.59.4 Reserve List

The Department is unable to offer the following courses regularly. Students should consult the Department for further information.

PATH 505 Fundamentals of Histochemistry

PATH 610 Subcellular Morphology
★2 (second term, 2-0-0).

204.60 Paediatrics

Department of Paediatrics
2C300 MacKenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2R7

204.60.1 General Information

Facilities exist within the Department of Paediatrics for students who wish to proceed to the Master of Science degree. Inquiries should be directed to the Chair of the Department of Paediatrics.

In addition, Paediatrics is one of eight departments working jointly to offer a PhD in medical sciences. (More information on the interdisciplinary program in medical sciences is found in §204.49.) Preference is given to those with an MD degree who wish to obtain training for a career in clinical research. Highly qualified candidates with an MSc or MD, who wish to proceed to a PhD will be considered. Inquiries about this program should be directed to the Chair of the Department of Paediatrics.

Entrance Requirements:

Candidates who wish to apply for either MSc or PhD program must have one of the degrees noted above with an average of at least 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §202.2.2), applicants must obtain a minimum score of 550 on the TOEFL test.

Financial Assistance:

Financial assistance may be available to some students; it is awarded on the basis of merit. Application to outside agencies is encouraged (e.g. Alberta Heritage Foundation for Medical Research, Medical Research Council, and so on).

204.60.2 The Degree of MSc

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MSc program normally consists of 18 units of course weight and a thesis. A number of courses will be compulsory (or at the discretion of the supervisor or Department), but the major portion will be dictated by the area of research undertaken by the student.

There is no language requirement for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a minimum of two years is normally required.

204.60.3 The Degree of PhD

Program Requirements:

The PhD program normally consists of the preparation and defence of a thesis on an approved topic and appropriate courses as authorized by the supervisor, the student's PhD committee and/or the Department (see §204.49).

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant as well as the nature and progress of the research undertaken; however, a minimum of two years is normally required.

204.61 Pharmacology

Department of Pharmacology
9-70 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2H7

204.61.1 General Information

The Department of Pharmacology offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in pharmacology.

The Department offers a wide range of research fields as determined by the interests of the staff. These include problems in the physiological, biochemical and molecular aspects of pharmacology. Techniques available include electrophysiological and patch-clamp recording, rapid kinetic studies, radioactive tracers, spectrophotometric assays, photofluorometric assays, isolation of cell and fractions.

Graduate studies in pharmacology may be of interest to candidates with general degrees in biology, psychology, physics, chemistry, biochemistry, physiology, bacteriology, pharmacy, neuroscience, medicine, and dentistry.

Graduate and undergraduate courses offered by other departments may be included in a candidate's program by arrangement between the departments concerned.

Inquiries should be directed to the Chair of the Department of Pharmacology.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). Prerequisite courses will be specified at the time of arrangement of the candidate's program.

Financial Assistance:

Financial support is available for a limited number of students in the form of graduate assistantships.

204.61.2 The Degree of MSc

Program Requirements:

Individual programs vary depending on the student's background, but are designed to provide students with an appropriate graduate education in pharmacology courses. At least nine units of course weight in graduate pharmacology courses are normally required, as well as a thesis on an approved research topic.

There is no language requirement for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a minimum of 12 months is normally required.

204.61.3 The Degree of PhD

Program Requirements:

Individual programs vary according on the student's background, but are designed to provide students with an

appropriate graduate education in pharmacology. At least 15 units of course weight in graduate pharmacology courses are normally required, as well as the preparation and defence of a thesis on an approved research topic.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 30 months is normally required.

204.61.4 Advanced Study in Pharmacology

A special program has been arranged for graduates in medicine wishing to spend an additional year in a basic science department. This program does not lead to a degree, but may satisfy some of the course requirements should the student wish to proceed to a master's degree. The program includes graduate courses, a weekly seminar, participation in a research project and optional attendance at undergraduate lectures. Those wishing to undertake the program should register as special students in the Faculty of Medicine

204.61.5 Undergraduate Courses

The following may be taken for graduate credit. (Details of courses are given in the Faculty of Science section of the calendar).

PMCOL 432 General Pharmacology
★6 (3-0-3). Prerequisite: BIOCH 301 or equivalent, and PHYSL 310 and consent of department.

PMCOL 435 Experimental Procedures in Pharmacology
★3 (either term, 1-0-6). Prerequisite: Normally PMCOL 432 or an equivalent course is required as a pre- or corequisite. Consent of department is also necessary.

PMCOL 436 Analytical Techniques
★3 (either term, 1-0-6). Prerequisite: Consent of department.

204.61.6 Graduate Courses

Note: Not all graduate courses are offered each year. The Chairman of the Department should be consulted regarding the prerequisites for and availability of graduate courses in any academic session.

THES 900 Thesis
THES 999 Thesis

PMCOL 501 Pharmacology Tutorial, Research and Reading Course
★3 (first term, 3-0-0).

PMCOL 502 Pharmacology Tutorial, Research and Reading Course
★3 (second term, 3-0-0).

PMCOL 503 Pharmacology Tutorial, Research and Reading Course
★3 Intersession, 3-0-0).

PMCOL 505 Cancer Chemotherapy
★3 (either term, 3-0-0). A survey of the cellular and biochemical pharmacology of agents currently employed in chemotherapy of neoplastic disease; drug metabolism, mechanisms of action and of resistance will be discussed. Given in sequence with Division of Oncology courses. Prerequisite: BIOCH 301 or equivalent and consent of department.

PMCOL 506 The Actions of Drugs on Membranes
★3 (either term, 3-0-0). This course will examine the interactions of drugs with selected membrane lipids, receptors, transporters and enzymes. Prerequisite: Consent of department.

PMCOL 508 Molecular Pharmacology
★3 (either term, 3-0-0). This course aims to provide an understanding of the general mechanisms of drug action at the molecular level. Theoretical aspects of drug-receptor interaction are presented in detail followed by a consideration of the mechanisms of signal transduction that have been associated with different receptor types. Prerequisite: Consent of department.

PMCOL 509 Neuropharmacology
★3 (either term, 3-0-0). This course aims to provide an examination in depth of the mechanisms of action of drugs that influence the central nervous system. The course includes a review of basic membrane biophysics and transmitter biochemistry, before dealing with the major classes of centrally acting drugs. Time will also be devoted to selected special topics. Prerequisite: Consent of department.

PMCOL 510 Advanced Topics
★3 (first term, 3-0-0).

PMCOL 511 Advanced Topics (Cardiovascular Pharmacology)
★3 (either term, 3-0-0). This course aims to provide instruction on current concepts of relevant drug action on both the heart and the vasculature at a molecular level as well as providing an overview of current therapeutic options in the treatment of cardiovascular disease. Prerequisite: Consent of department.

PMCOL 512 Neurotransmitters
★3 (either term, 3-0-0). Current concepts of neurotransmitters, neuromodulators and trophic factors are discussed in the context of the normal, diseased and developing nervous systems. Students should have some biological background either in physiology, pharmacology, zoology, or the neurosciences. Prerequisite: Consent of department.

PMCOL 515 Cardiovascular Pharmacology
★3 (either term, 3-0-0). This course aims to provide instruction on current concepts of drug action at a molecular level, on both inotropy and rhythmicity the heart, and the selevtive control of the vasculature as well as providing an overview of current therapeutic options in the treatment of cardiovascular disease. Prerequisite: PMCOL 432 or equivalent and consent of department.

PMCOL 600 Seminar in Pharmacology
★0 (0-1s-0).

PMCOL 602 Clinical Pharmacology
★3 (either term, 2-0-0). This course is aimed at providing residents in the Faculty of Medicine, together with graduate students in Pharmacology, Phamacy, and Nursing with an understanding of the interaction of basic pharmacological principles that occur during the therapeutic action of drugs in the treatment of disease. The course takes the form of seminars that review clinical cases, with explanatory input from a panel of experts on each aspect of the caes. Prerequisite: Consent of department.

Note: These are also listed in the Faculty of Medicine §124.18.

204.62 Pharmacy and Pharmaceutical Sciences

Faculty of Pharmacy and Pharmaceutical Sciences
3118 Dentistry-Pharmacy Centre
University of Alberta
Edmonton, Alberta T6G 2N8

204.62.1 General Information

The Faculty of Pharmacy and Pharmaceutical Sciences offers programs leading to the Master of Pharmacy, Master of Science and Doctor of Philosophy degrees; a limited number of graduate students can be accommodated in modern well-equipped laboratories.

Research may be undertaken in fields such as pharmaceutics, biopharmaceutics, physical pharmacy, bionucleonics, radiopharmacy, medicinal chemistry, pharmaceutical chemistry, drug analysis, drug metabolism, microbiology, pharmacology, hospital pharmacy, clinical pharmacy, toxicology, and neurochemistry.

Entrance Requirements:

The minimum admission requirements of the Faculty are an undergraduate degree in pharmacy with an average of 6.5 in the last two years of undergraduate (or graduate) work at the University of Alberta or an equivalent qualification from a recognized institution. Individuals with previous degrees in such fields as biology, microbiology, biochemistry, pharmacology or chemistry will be considered. Where applicable (see §202.2.2), applicants must obtain a minimum score of 550 on the TOEFL test.

Financial Assistance:

Financial assistance may be available from the Medical Research Council of Canada, the Alberta Heritage Foundation for Medical Reseach and from other sources.

Prospective candidates should consult with the Dean of Pharmacy regarding the requirements.

204.62.2 The Degree of MPharm

A program combining academic course work, professional experience and research investigation leading to the degree of Master of Pharmacy in clinical pharmacy is offered to acceptable students holding a BSc degree in pharmacy and a licence to practice pharmacy in the province of Alberta. The program integrates a core of required courses with options appropriate to the individual needs and interests of the student. The professional portion of the program consists of research and study in a professional environment.

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MPharm program normally consists of 30 units of course weight, clinical rotations and a project equivalent to six units of course weight.

There is no language requirement for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program is two years of full-time study and research.

204.62.3 The Degree of MSc

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MSc program normally consists of a minimum of 12 units of course weight and a thesis.

There is no language requirement for the degree. The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a minimum of two years is normally required.

204.62.4 The Degree of PhD

Program Requirements:

The PhD program normally consists of 12 units of course weight and the preparation and defence of a thesis on an approved topic.

There is no language requirement for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is required.

204.62.5 Undergraduate Courses

The following may be taken for graduate credit:

MLSCI 260 Clinical Biochemistry
★6 (3-0-3). Prerequisite: CHEM 100 or 104 and 160.

PHARM 415 Biopharmaceutics and Pharmacokinetics
★3 (first term, 3-0-0). Prerequisite: PHARM 320 and PHARM 360. Corequisite: PHARM 431.

H S A 430 Methods and Statistics in Health Services Administration I
★3 (first term, 3-0-0).

H S A 431 Methods and Statistics in Health Services Administration II
★3 (second term, 3-0-0).

PMCOL 436 Analytical Techniques
★3 (either term, 1-0-6). Prerequisite: Consent of department.

PHARM 450 Introduction to Radiopharmacy
★3 (first term, 3-0-2). Prerequisite: Consent of the Faculty.

PHARM 454 Isotopes in Nuclear Medicine
★3 (second term, 5-0-0, second six weeks of term). Prerequisite: PHARM 450 or PHARM 601 or consent of the Faculty.

PHARM 473 Selected Topics in Medicinal Chemistry
★3 (either term, variable). Prerequisite: PHARM 370 and 431, PMCOL 431 or consent of the Faculty.

PHARM 481 Veterinary Pharmacology
★3 (second term, variable).

PHARM 484 Biological Products
★3 (either term, 3-0-0). Prerequisite: MICRB 193 or consent of the Faculty.

PHARM 492 Pharmacy Management I
★3 (first term, 3-0-0).

PHARM 494 Pharmacy Management: Selected Topics
★3 (either term, variable). Prerequisite: PHARM 403.

PHARM 496 Professional Management: Community
★3 (second term, 3-0-0). Prerequisite: PHARM 403.

204.62.6 Graduate Courses

THES 900 Thesis
THES 999 Thesis
PHARM 900 ★6 Directed Research Project

PHARM 551 Clinical Radiopharmacy Laboratory
★3 (second term, 3-0-4, second six weeks of term). A series of laboratory experiments with appropriate introductory lectures designed to acquaint the student with the preparation and quality control of currently used radiopharmaceuticals in nuclear medicine. Prerequisite: PHARM 450 or PHARM 601. (Restricted to Pharmacy students.)

PHARM 554 Radiation Biology
★3 (first term, 3-0-0; second term, 5-0-0 first six weeks of term). Biological effects of ionizing radiation on molecules, cells and whole body systems from the physical, biochemical and clinic viewpoint. Prerequisite: Consent of the Faculty. Background courses in physics and chemistry recommended.

PHARM 561 Pharmaceutical Manufacturing
★3 (first term, 2-0-4). Introduction to the processing of pharmaceutical dosage forms on a manufacturing scale. Requirements of the physiochemical properties of the dosage form, manufacturing equipment, quality control and good manufacturing practices to produce multiple units of a product are discussed and demonstrated. Prerequisite: PHARM 360. (Restricted to Pharmacy students).

PHARM 565 Clinical Pharmacokinetics
★3 (either term, 1-3s-1). A comprehensive course dealing with basic pharmacokinetic principles of dosage regimen calculation and pharmacokinetic considerations relating to the use of various drugs. Clinical pharmacokinetics of therapeutically important drugs will be covered in detail. The laboratory portion is designed to expose the students to the methods used in dosage regimen adjustment based on the clinical status of the patient. Prerequisite: PHARM 415 and 431, PMCOL 431 and consent of the Faculty. (Restricted to Pharmacy students).

PHARM 570 Advanced Pharmaceutical Analysis — Spectroscopy
★3 (first term, 3-0-3). Applications of instrumental methods of analysis (ultraviolet and infrared spectroscopy; NMR; mass spectrometry; atomic absorption spectroscopy) to pharmaceutical compounds.

PHARM 573 Advanced Pharmaceutical Analysis
★3 (second term, 3-0-4, first 6 weeks of term). The theory and application of chromatography techniques eg. thin-layer, gas-liquid, high-pressure liquid chromatography to the identification and quantitation of drugs and drug metabolites.

PHARM 574 Advanced Pharmaceutical Analysis — Forensic Pharmaceutical Analysis.
★3 (second term, 3-0-4, second 6 weeks of term). The theory and application of techniques of analytical forensic toxicology eg. optical and chemical microscopy. UV, IR and GC-Mass Spectrometry, to drugs of misuse and abuse.

PHARM 575 Advanced Pharmaceutical Analysis
★3 (first term, 3-0-3). The theory and application of chromatographic techniques to the identification and quantitation of drugs, drug metabolites, and toxic substances. An introduction to forensic analyses, types of screening tests, and the systematic analysis of biological samples for drugs and specific poisons. Prerequisite: PHARM 325 or consent of the Faculty. Corequisite: PHARM 570 or consent of the Faculty.

PHARM 586 Pharmaceutical Toxicology
★3 (either term, 3-3s-0). Methods used to evaluate the toxic potential of drugs and other chemicals, including a discussion of selected topics in toxicology, such as environmental hazards, respiratory toxicity and neurotoxicity of chemicals. Seminars will cover specific problems in predictive toxicology and the toxicity of specific agents. Prerequisite: PHARM 431 and PMCOL 431 or consent of the Faculty.

PHARM 593 Advanced Radiopharmaceutical Sciences II
★3 (first term, 3-0-4). Application of radionuclides in medical diagnosis and treatment; control of radionuclides in the hospital. Laboratory: preparation, quality control and clincal utility of currently used radiopharmaceuticals in nuclear medicine. Prerequisite: PHARM 443 or PHARM 501 or consent of the Faculty.

PHARM 595 Clinical Rotations
★6 (900 hours). A clinical experience which will provide the student with the opportunity to practice clinical pharmacy in several specialty areas. The student will be expected to demonstrate professional competence in patient counselling, obtaining medication histories, providing drug information, applied pharmacokinetics and related areas. Credit will be granted after the completion of 900 hours of approved clinical training.

PHARM 601 Isotope Tracer Methodology I
★3 (first term, 3-0-3). Fundamental principles of radioactivity and health physics. The importance of radioisotopes in medicine, agriculture, industry, and research. Problems and limitations in the use of radioisotopes as tracers. Instrumentation and analysis methods. Experimental procedures, application of methods of analysis and criteria for evaluation of results. Laboratory: handling and preparation of radioisotopes for counting. Counting procedures. Tracer chemical and biochemical analyses.

PHARM 603 Activation Analysis
★3 (second term, 2-0-0). Physical and chemical basis of activation analysis, use of slow neutrons from the Slowpoke reactor, proton and charged particle activation; x-ray fluorescence; modern pulse-height analysis technique. Prerequisite: Consent of Faculty. Note: Offered alternate years.

PHARM 604 Applied Problems in Current Research
★3 (either term, 0-0-3). The student will work with one or two faculty members on special research techniques in bionucleonics or radiopharmacy. Prerequisite: Consent of the Faculty.

PHARM 605 Radiopharmaceutical Chemistry
★2 (second term, 2-0-0). A discussion of preparation of short-lived radiopharmaceuticals with emphasis on radiochemical synthesis using carbon-11, fluorine 18 and radionuclides of iodine and bromine; stability, storage and purity of radio-labelled compounds; labelling with long-lived radionuclides. Prerequisite: Consent of the Faculty. Note: Offered alternate years.

PHARM 606 Current Topics in Bionucleonics and Radiopharmacy
★3 (either term, 3-0-0). Assigned readings, tutorials and seminars in recent advances in the fields of Bionucleonics and Radiopharmacy, conducted under the direction of several faculty members. Prerequisite: PHARM 601, 603, 604 or consent of Faculty.

PHARM 610 Advanced Physical Pharmacy
★3 (first term, 3-0-4). Special topics of a physical-chemical nature applicable to pharmaceutical systems. Emphasis is given to principles of colloid and surface science. Applications to dosage form design and biological systems are considered. Laboratory: experimental work in application of physicochemical principles to pharmaceutical systems. Prerequisite: Consent of Faculty.

PHARM 611 Pharmaceutical Formulation and Development
★3 (second term, 3-0-4). Theoretical considerations basic to the technology of pharmaceutical dosage forms to meet the requirements of therapeutic efficacy, stability, and safety. Laboratory: development and formulation of pharmaceutical products. Prerequisite: Consent of Faculty.

PHARM 615 Advanced Pharmacokinetics
★3 (second term, 3-0-0). This course deals with the theoretical apsects of pharmacokinetics. Compartmental and non-compartmental theories are treated in depth. The application of these theories is made in various areas where kinetics are involved. Prerequisite: PHARM 415 or equivalent or consent of the Faculty. Note: Offered alternate years.

PHARM 624 Application of Nuclear Magnetic Resonance Spectroscopy to Medicinal and Pharmaceutical Chemistry.
★3 (first term, 3-0-0). Basic interpretation and examples of use of N.M.R. spectroscopy in problems of pharmaceutical synthesis and its studies of the mode of action of medicinally active compounds. Prerequisite: Consent of the Faculty. Note: Offered alternate years.

PHARM 626 Applications of Mass Spectrometry to Medicinal and Pharmaceutical Chemistry.
★3 (second term, 3-0-0). Examples of the use of mass spectrometry in the identification of medicinal compounds are considered. Diagnostic spectra of extracts of medicinal preparations, identification of drug metabolites and applications of mass spectrometry to chemical toxicology and neurochemistry are studied. Prerequisite: Consent of the Faculty. Note: Offered alternate years.

PHARM 630 The Metabolism and Excretion of Drugs
★3 (second term, 3-0-0). The chemistry, biochemistry and kinetics of drug metabolism together with the factors affecting metabolism; the practical aspects of in vitro and in vivo studies of drug metabolism; the excretion of drugs by various routes and factors affecting excretion, the kinetics of excretion. Note: Offered alternate years.

PHARM 664 Advanced Topics in Clinical Pharmacy
★3 (first term, 1-0-3). Tutorial and practicum sessions used to review advances in therapeutics and to demonstrate clinical pharmacy responsibilities in a selected number of disease states. The student will have the opportunity to develop practical skills in establishing safe and effective drug use and in providing patient directed information on specific therapeutic agents. Major areas such as hypertension, diabetes and renal disorders will be considered. Prerequisite: PHARM 404, 431, and PMCOL 431 or consent of the Faculty.

PHARM 699 Graduate Seminar
★0.0 (0-1s-0). Graduate students present seminars on topics related to their field of specialization.

204.63 Philosophy

Department of Philosophy
4-108 Humanities Centre
University of Alberta
Edmonton, Alberta T6G 2E5

204.63.1 General Information

The Department offers programs leading to the Master of Arts and Doctor of Philosophy degrees.

The fields in which advanced study may be pursued include ethics; aesthetics; history of ancient, medieval and modern philosophy; logic; philosophy of science; epistemology; philosophy of language; philosophy of mind; and contemporary European and Anglo-American philosophy. Inquiries concerning possible subjects for research should be directed to the Chair of the Department.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

Graduate students in the Department are eligible to compete for the general graduate awards listed in §206 and are encouraged to do so. Inquiries should be directed to the Director of Student Awards. Graduate assistantships are available within the Department; inquiries should be addressed to the Chair of the Department.

204.63.2 The Degree of MA

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MA program normally consists of 18 units of course weight and a thesis.

There is no language requirement for the degree of MA.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

Candidates who have completed training equivalent to that of graduation with Honors in philosophy from this Department will normally require one year to complete the master's program. Other candidates for the MA degree may take up to two years to complete the requirements for the degree. Students with very little background in philosophy may be required to enroll in a qualifying year, or as a special student before being considered eligible for admission to a graduate degree program.

204.63.3 The Degree of PhD

Program Requirements:

The PhD program normally consists of 18 units of course weight and the preparation and defence of a thesis on an approved topic.

Before taking the oral candidacy examination a student in the PhD program must have passed comprehensive examinations in four areas of the student's choice and satisfied the logic requirement.

Students whose field of research involves primary-source material in a language other than English shall in addition be required to pass an appropriate language examination.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.

204.64 Physical Education and Sport Studies

Department of Physical Education and Sport Studies
421 Universiade Pavilion
University of Alberta
Edmonton, Alberta T6G 2H9

204.64.1 General Information

The Department of Physical Education and Sport Studies offers programs leading to the degrees of Master of Arts, Master of Science and Doctor of Philosophy.

Well-equipped facilities are available for a limited number of graduate students. Areas of specialization include biological, behavioural and socio-cultural studies.

Deadline for receipt of completed applications for the following academic year is February 28. Normally, all students are expected to begin their program in the September term. Applications will be considered after this date but only if program vacancies exist. For further information write to: Chair, Graduate Program, Department of Physical Education and Sport Studies.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of at least 7.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution.

In addition to the above, all non-Canadian students for whom English is not their native language must pass, with a minimum score of 600, the Test of English as a Foreign Language (TOEFL) before formal admission approval can be given. (See §202.2.2 of the calendar for further information on English language examinations.)

The requirements for entry into the master's program is the BPE degree from the University of Alberta or its equivalent. Equivalence will be determined by the Graduate Program Chair and any deficiencies will be made up during the applicant's qualifying year or years.

The requirement for entry into the PhD program is a master's degree in physical education and sport studies with thesis. Applications from individuals with a master's degree without thesis are considered by the Graduate Chair on individual merit, providing documentary evidence is supplied attesting to the student's research capabilities. Before enrolment in the PhD program is permitted, a student who has gained tentative acceptance must provide documentary evidence stating that all requirements towards fulfillment of a master's degree have been met.

Financial Assistance:

Graduate assistantships are available to a limited number of students.

204.64.2 The Degree of MA

Both a thesis-based and a course-based option are available in the MA degree program. While both are research-oriented programs, the thesis program requires fewer courses and places more emphasis on the research.

Students entering the course-based MA route must possess a bachelor of physical education and sport studies degree or equivalent, and are expected to have professional experience in the field of physical education and sport studies.

The Department offers a part-time, course-based MA program. Students entering this route must possess a bachelor of physical education and sport studies degree or equivalent as well as two years of professional experience in the field of physical education and sport studies.

Program Requirements:

The normal requirements for the thesis-based MA are the completion of 24 to 36 units of course weight in addition to the thesis.

Students enrolled in the course-based MA program must complete as a minimum, the equivalent of 36 to 42 units of course weight. A significant piece of scholarly writing in the form of a project equivalent to six units of course weight is also required.

There is no language requirement for the degree of MA.

For the MA route with a residence requirement, the minimum period of residence is two, four-month terms of full-time attendance at the University of Alberta.

Students must complete the MA degree requirements within four years.

Length of Program:

Depending on the candidate's qualifications, the candidate for the MA should anticipate 18 months to two years to complete the program.

204.64.3 The Degree of MSc

Program Requirements:

The normal requirements for the MSc degree are th completion of 24 to 36 units of course weight in addition t the thesis.

No language other than English is required.

The minimum period of residence is two four-mont terms of full-time attendance at the University of Alberta.

Length of Program:

Depending on the candidate's qualifications, th candidate for the degree of MSc should anticipate 1 months to two years to complete the program.

204.64.4 The Degree of PhD

Program Requirements:

The PhD degree is a research degree; however, number of specific courses are required within the variou areas of specialization. Please consult the staff withi each specified area for further details. All courses must b approved by the Department of Physical Education an Sport Studies. Emphasis is on research leading to th dissertation rather than on course work. No languag other than English is required for the PhD.

The minimum period of residence is two academi years of full-time attendance at the University of Alberta.

Length of Program:

The PhD degree will normally require three year beyond the master's level.

THES 900 Thesis
THES 999 Thesis
PESS 900 ★6 Directed Researach Project A significant piece of scholarly writing.

PESS 500 Seminar in Biomechanics
★3 (either term, 0-3s-0).

PHYSL 507 Thermoregulation and Energy Exchange
★3 (second term, 1-2s-0). Prerequisite: Introductor physiology course or consent of department.

PESS 510 Anthropometry and Physical Activity
★3 (either term, 1-2s-0). An examination of curren research in anthropometry and body composition with special emphasis on obesity and weight control.

PESS 511 Exercise Testing and Exercise Prescription
★3 (either term, 1-1s-2).

PESS 515 Exercise Physiology Laboratory Techniques
★3 (either term, 1-0-3). Prerequisite: Consent o department.

PESS 516 Muscular Strength and Endurance
★3 (either term, 0-3s-0). Study of muscle contraction with emphasis on underlying mechanisms for improvec functioning of cardiac and skeletal muscles.

PESS 520 Physical Growth and Development
★3 (first term, 0-3s-0). An examination of selected topics in physical growth and motor development from both a theoretical and applied perspective.

PESS 530 Adapted Physical Education
★3 (second term, 0-3s-0). Seminar on current theoreti cal, practical and research issues in adapted physica education.

PESS 533 Creative Dance: Acquisition and Development in Children
★3 (first term, 0-3s-0). Examination of predominant theories and practices in creative dance for children. Central emphasis: the study of the developmental phases of creative dance products by children aged 4 to 12 years. Prerequisite: Consent of department.

PESS 534 Research in Creative Dance: Acquisition and Development in Children
★3 (second term, 0-3s-0). Study and research into the inter-relationship of creative dance and processes which children use to derive meaning from and bring meaning to this dance form. Prerequisite: PESS 533.

PESS 536 Planning and Conducting Movement Activities for Adults
★3 (either term, 0-3s-0). Prerequisite: Consent of department.

PESS 540 Behavioral Analysis of the Athlete
★3 (either term, 0-3s-0). Prerequisite: PESS 303 and 403, or consent of Department.

PESS 543 Seminar in the Learning and Memory of Movement
★3 (second term, 0-3s-0). Selected topics of current interest in the field of psycomotor learning, motor memory and control.

ESS 550 The Administration of Amateur Sport: he Role of the Canadian State
3 (either term, 0-3s-0). This course will examine the creasingly large and visible role played by the state in anadian Sport.

ESS 551 Organizational Analysis of Sport
3 (either term, 0-3s-0). An examination of the role, tructure and processes of voluntary sport organiza-ons.

ESS 560 History of Sport and Physical Education 1800
3 (either term, 0-3s-0).

ESS 561 History of Sport and Physical Education Canada
3 (either term, 0-3s-0).

ESS 562 Rise of Modern Sport and Physical ducation
3 (either term, 0-3s-0).

ESS 570 Selected Topics in Popular Physical ulture
3 (either term, 0-3s-0).

ESS 571 Sport in Society
3 (either term, 0-3s-0). An examination of the role of ocial theory in understanding sport in society.

ESS 577 Sport and Ethics
3 (either term, 0-3s-0). An examination of ethical roblems in sport. Prerequisite: PESS 407 or 490 or onsent of department.

ESS 580 The Nature of Scientific Inquiry in hysical Education and Sport Studies
3 (first term, 0-3s-0). An introduction to the basic hilosophy and nature of scientific inquiry as it applies to ontemporary research.

ESS 581 Social Research Applications to Sport
3 (first term, 0-3s-0). An examination of both quantita-ve and qualitative research methodologies as they pply to the socio-cultural area.

ESS 582 Graduate Seminar: A Seminar in Current actors, Problems and Issues
3 (either term, 0-3s-0).

ESS 583 Seminar in Sport Sciences
3 (first term, 0-3s-0).

ESS 590 Research and Directed Studies 1
3 (first term, 0-3s-0).

ESS 591 Research and Directed Studies 2
3 (second term, 0-3s-0).

ESS 599 Directed Studies and Research
3 (0-1.5s-0). A half-course offered over the full session.

ESS 600 Advanced Seminar in Biomechanics
3 (either term, 0-3s-0).

ESS 610 Seminar in Exercise Physiology
3 (second term, 0-3s-0). Prerequisite: Consent of partment.

ESS 611 Issues in Exercise Physiology
3 (either term, 0-3s-0). Seminar course dealing with rrent developments and controversial issues in the ld of exercise physiology.

ESS 612 Physiological Factors Affecting rformance
3 (second term, 0-3s-0). Limited to PhD students in ercise Physiology or consent of department.

ESS 613 Energy Mobilization and Utilization with ercise
3 (second term, 0-3s-0). Cellular adaptations to acute d chronic exercise. Discussion of excitation-contrac-n coupling and metabolic adaptations during exercise. erequisite: Consent of the instructor.

ESS 620 Advanced Seminar in Growth and velopment
3 (either term, 0-3s-0). An advanced study of the search and theories of development of human motor rformance related to maturation and environmental nditions.

SS 640 Advanced Seminar: Theory in Motor arning and Memory
(first term, 0-3s-0).

SS 641 Advanced Seminar: Research and Design Motor Learning and Memory
(second term, 0-3s-0).

SS 660 Seminar in the History of Sport and ysical Education I
(either term, 0-3s-0).

SS 661 Seminar in History of Sport and Physical ucation II
(either term, 0-3s-0).

SS 690 Directed Studies and Research
(first term, 0-3s-0).

SS 691 Directed Studies and Research
(second term, 0-3s-0).

PESS 699 Directed Studies and Research
★3 (0-1.5s-0). A half-course taken over the full session.

204.65 Physical Therapy

Department of Physical Therapy
210 Corbett Hall
University of Alberta
Edmonton, Alberta T6G 2G4

204.65.1 General Information

The Department of Physical Therapy offers a program of graduate studies leading to the degree of MSc in physical therapy. The purpose of the program is to prepare physical therapists for leadership roles in academic, clinical and laboratory settings by preparing them to undertake research to establish the effectiveness of various approaches to treatments used by physical therapists; by so doing, to develop a strong scientific framework for the discipline of physical therapy.

The program has been designed in response to increased demands by academic and clinical institutions for therapists educated above the present baccalaureate level. It provides persons holding a baccalaureate degree in physical therapy with an opportunity for advanced study in their own field. The program at the University of Alberta offers advanced training in physical therapy specialty areas, such as biomechanics, ergonomics, neurology, orthopedics, sports physical therapy, rheumatology, cardiopulmonary physical therapy, and exercise therapy.

Entrance Requirements:

To meet the minimum entrance requirements of the Department of Physical Therapy, applicants must have a grade point average (GPA) of 6.5 in the last two years of their physical therapy baccalaureate program at the University of Alberta or an equivalent qualification from another institution. Where applicable (see §202.2.2) applicants must have a minimum TOEFL score of 580. Applicants to the program will be judged not only on their academic record, but also on their professional potential as indicated in letters of reference and other supportive material. Normally, some clinical experience prior to admission is strongly recommended by the Department. The deadline date for receipt of applications for the graduate program in Physical Therapy is February 1.

Financial Assistance:

Normally every student will be required to undertake one term of teaching and another term of research assistance. For this assistance, the student will receive remuneration as a Graduate Assistant at the prescribed university rate. Fellowships and scholarships may be obtained from a number of external sources (eg. NHRDP, MRC, AHFMR, Alberta Government, CPA, IODE, Arthritis Society and others). More detailed information on these and other awards can be obtained from the Student Awards Office.

204.65.2 The Degree of MSc

Program Requirements:

During the first year of the program students are expected to complete the core courses and select a pattern of courses in a particular area of interest that will enable them to bring their previous educational background in physical therapy and associated fields to an advanced level, to enable them later to engage in meaningful research in that area.

In order that students may design a program which fits their particular needs, only four courses — REHAB 500, PTHER 507, PTHER 570 and an approved statistics course - are compulsory; the remainder of the courses required for the degree are selected by the candidate, in consultation with the candidate's advisory committee.

During the second year of the program the student focuses on the development of a research project, conducting the experiments, and writing and defending the thesis.

Normally, the course requirements for the degree of Master of Science in Physical Therapy are 24 to 36 units of course weight in addition to the thesis. Students, in consultation with their adviser, will design a program of studies suitable to their particular needs and interests; course requirements will be based on students' previous training and anticipated needs in their area of interest. Courses from other departments may be accepted as part of a student's total program. Some undergraduate course work may be contained in a student's program, providing that a minimum of 24 units of course weight are also included. Credit for courses taken elsewhere may be granted transfer credit by the Dean, FGSR upon recommendation of the Department of Physical Therapy, provided that the courses have not been counted towards a previous degree or program.

Each student will be required to complete a thesis based on independent investigation. The thesis will carry a weighting equivalent to at least two full graduate courses.

No language other than English is required for the MSc.

Candidates are required to spend a minimum of two four-month terms of full-time attendance at the University of Alberta to meet the residence requirement.

Length of Program:

The program normally takes two years to complete; however, it is possible to complete the requirements for the MSc in less than two years, depending on the student's academic background.

204.65.3 Graduate Courses

THES 900 Thesis
THES 999 Thesis

REHAB 500 Research Seminar
★3 (either term, 0-3s-0). The examination, evaluation and preparation of the research report. Students will discuss critically various aspects including the selection of the problem, the review of the literature, the research hypothesis, the collection and analysis of the data, and the significance of the research.

PTHER 502 Peripheral Articular Anatomy
★3 (either term, 1-1s-2). Detailed functional and pathological anatomy of the peripheral joints of the body. Particular reference is given to the clinical relevance of the topics discussed.

PTHER 504 Vertebral Articular Anatomy
★3 (either term, 1-1s-2). Detailed functional and pathological anatomy of the vertebral joints of the body. Particular reference is given to the clinical relevance of the topics discussed.

PTHER 505 Motor Control Mechanisms in Health and Disease
★3 (either term, 2-1s-0). Introduction to the neural mechanisms of motor control and disturbances of these mechanisms in disease states. Emphasis will be placed on topics of clinical importance. Prerequisite: REHAB 353 (Neuroscience for Rehabilitation) or equivalent, and approval of the instructor and the student's adviser.

PTHER 506 Electromyographic Kinesiology
★3 (either term, 1-0-2). Seminar and laboratory sessions on advances in electromyography applied to physical therapy and allied areas.

PTHER 507 Instrumentation in Physical Therapy
★3 (either term, 2-0-2). A course on electronic fundamentals applied to measuring instruments and their basic components as used in physical therapy research.

PTHER 509 Tissue Biomechanics
★3 (either term, 1-2s-0). A consideration of the mechanical properties of biological tissue in normal and selected pathological conditions.

PTHER 510 Rehabilitation Ergonomics
★3 (either term, 1-2s-0). The application of ergonomic principles in rehabilitation.

PTHER 514 Readings in Rheumatology for Physical Therapists
★3 (either term, 0-3s-0). Reading course on selected issues in rheumatology for the graduate physical therapist.

PTHER 522 Advanced Electrophysical Agents
★3 (either term, 0-3S-0). A seminar course on the theory, research basis and practice of the use of electrophysical treatment modalities in physical therapy. Prerequisite: Consent of department.

PTHER 530 Research and Directed Studies
★3 (either term, 3-0-0). Work on a special project under the supervision of a faculty member. Prior approval of the instructor and the student's advisor required.

PTHER 531 Research and Directed Studies
★3 (either term, 3-0-0). Work on a special project under the supervision of a faculty member. Prior approval of the instructor and the student's advisor required.

PTHER 532 Research and Directed Studies
★3 (1.5-0-0). Work on a special project under the supervision of a faculty member. Prior approval of the instructor and the student's advisor required.

PTHER 533 Research and Directed Studies
★6 (3-0-0). Work on a special project under the supervision of a faculty member. Prior approval of the instructor and the student's advisor required.

PTHER 540 Practicum
★0 (0). A practicum in the student's area of concentration and interest to be taken by the student if his/her committee feels the student needs, or the student desires, further practical experience. This course may involve experience off campus in any geographical area where the student may gain the necessary experience.

PTHER 550 Physiological Basis of Neuromuscular Disorders
★3 (either term, 2-1s-0). Cellular basis of clinically relevant perturbations to the neuromuscular system. Particular reference will be made to the efficacy of rehabilitative interventions.

PTHER 555 Assessment and Treatment of Pain
★3 (either term, 0-3s-0). A seminar course on the physical, physiological and psychological principles of the assessment and treatment of acute and chronic pain.

PTHER 561 Pathokinesiology of Peripheral Joints
★3 (either term, 3-0-2). The application of kinesiological analysis to the treatment of pathological conditions affecting the peripheral joints.

PTHER 562 Pathokinesiology of the Spinal Joints
★3 (either term, 3-0-2). The principles, theory and application of advanced techniques of mobilization on selected spinal joint syndromes.

PTHER 564 Recent Advances in Orthopaedics
★3 (either term, 0-3s-0). A seminar of recent advances in medical and surgical techniques in rheumatology and orthopaedics.

PTHER 568 Advanced Sports Therapy
★3 (either term, 0-3s-0). Seminar on advances in sports therapy and other related topics.

PTHER 570 Measurement and Evaluation in Physical Therapy
★3 (either term, 2-0-3). The principles involved in measurement and evaluation and their application in the practice of physical therapy.

PTHER 571 Advanced Geriatric Rehabilitation
★3 (either term, 0-3s-0). Seminar on methods of assessment of physical programs of the elderly and the management of programs for care in various settings for the long term support of elderly patients.

PTHER 572 Infant Motor Development
★3 (either term, 0-3s-0). A seminar course on the neuromotor development of the human fetus, neonate and infant.

PTHER 573 Prosthetics and the Amputee
★3 (either term, 2-0-1). Management and rehabilitation problems arising from the design and use of prosthetics.

PTHER 575 Advanced Therapeutic Exercises
★3 (either term, 2-0-1). Physiological and therapeutic principles in the evaluation and comparative analyses of various approaches to exercise.

PTHER 580 Curriculum Analysis in Physical Therapy
★3 (either term, 0-3s-0). Analysis of curriculum and its relevance to the process of physical therapy undergraduate, graduate and continuing education.

PTHER 581 Information Transfer in Physical Therapy Education
★3 (either term, 1-0-2). Application of the principles of information transfer to physical therapy undergraduate, graduate and continuing education.

PTHER 585 Cardiopulmonary Rehabilitation
★3 (either term, 2-0-2). The general principles of cardiopulmonary rehabilitation as applied to patients with selected pathological conditions.

204.66 Physics

Department of Physics
412A Physics Building
University of Alberta
Edmonton, Alberta T6G 2J1

204.66.1 General Information

Programs leading to the degrees of Master of Science and Doctor of Philosophy are open to suitable graduates in physics, engineering physics, geophysics, or equivalent programs.

The Department's principal fields of research are:

Astrophysics: Astronomy, laboratory astrophysics, precision optical spectroscopy.

Geophysics: Geomagnetism, paleomagnetism, space physics, stable and radioactive isotope studies, theoretical and experimental seismology. For geophysics courses see §204.35.

Subatomic Physics: Intermediate energy nuclear and particle physics. The TRIUMF facility, a 500 MeV negative ion cyclotron on the University of British Columbia campus, and the Saskatoon Accelerator Laboratory are the main sites for experimental work. Other research projects involve collaboration with physicists at laboratories in Europe and the USA.

Low Temperature and Solid State Physics: Superconductors, semiconductors, solid helium, NMR, acoustic attenuation, electron microscopy, transport properties in metals.

Theoretical Physics: Condensed matter physics, subatomic physics, field theory, general relativity, cosmology, and mathematical physics.

Other Areas: Radiation and medical physics, biophysics.

Individual programs will be arranged in consultation with the Associate Chair of the Department of Physics and members of the Department. Information may be obtained by writing to the Associate Chair of the Department of Physics.

Entrance Requirements:

The Department's admission requirements are an undergraduate degree in physics, engineering physics, geophysics or an equivalent program, normally with an average of 7.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (refer to §202.2.2), candidates must pass the TOEFL test with a score of 550 or better.

Financial Assistance:

A number of graduate assistantships are available; these range from $12,900 to $17,000 per annum depending upon the degree program and year of study. Applicants are automatically considered for this assistance when they are accepted in the graduate program. In addition to the graduate assistantships, a certain number of research supplements to the value of approximately $4,000 are available during the summer.

204.66.2 The Degree of MSc

Program Requirements:

For an MSc program in experimental physics a minimum of 12 units of course weight is generally required of students with the equivalent of an Honors BSc degree from the University of Alberta. For students in a theoretical program the minimum course requirement is 18 units of course weight, including PHYS 680 and 682 or 684. A small research project, the results of which are to be presented in a thesis and an oral examination, are also required.

A supervisory committee of three faculty members is appointed for each graduate student. In May of the first year of the program the committee makes a formal recommendation on the candidate's potential for graduate work. At this time students may in certain cases be permitted to transfer directly to a PhD program if their progress warrants it.

There is no language requirement for the degree of MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required will vary according to the previous training of the candidate and the nature of the research undertaken; however, an average of two years is normally required to complete the MSc program.

204.66.3 The Degree of PhD

Program Requirements:

Students in an experimental program are required to take a minimum of 30 units of course weight, including PHYS 680, after the equivalent of the Honors BSc degree from the University of Alberta. These include the courses required for the MSc program. An exception is made in the case of the geophysics program where PHYS 571 may be substituted for PHYS 680. For the theoretical program there is a minimum of 36 units of course weight after the Honors BSc level including PHYS 680, 683, 684 and 685. All students in the PhD program are advised to take at least six units of course weight in fields of study different from their own research areas. When the course requirements are successfully completed and the PhD student's research is well-advanced, each PhD student must pass an oral candidacy examination. The student's research is presented orally and in written (thesis) form to an examining committee. No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The minimum time for completion of a PhD degree is three academic years of study and research after the Honors BSc degree or two academic years after the equivalent of the MSc degree at the University of Alberta.

204.66.4 Undergraduate Courses

The following undergraduate Geophisics and Physics courses may be taken for graduate credit.

Geophysics

GEOPH 421 Seismology and Physical Structure of the Earth
★3 (second term, 3-0-0). Seismology; Infinitesimal strain theory; elastic stress and moduli of elasticity; plane waves in isotropic layered media; imperfectly elastic media earthquake mechanisms. Physical structure of the earth seismometers. Prerequisite: MATH 300 or 437.

GEOPH 424 Electromagnetic and Potential Methods of Exploration
★3 (second term, 3-0-0). Theory and application o Maxwell's equations. Potential theory as applied t gravity, magnetic and electrical studies. Interpretation o field data. Direct and indirect methods of inversion t obtain model structures. Prerequisite: GEOPH 325 o consent of department, and MATH 300 or 437. Corequisite GEOPH 428.

GEOPH 426 Time Series in Applied Seismology
★3 (first term, 3-0-0). Application of time series analyse to seismic data processing. Fast Fourier transforms; Z transformation, spectral analyses, band pass and veloc ity filtering, deconvolution, auto and cross correlation analog to digital conversion, wave propagation in layered media. Prerequisite: GEOPH 326 or equivalent. Corequisite GEOPH 428.

GEOPH 428 Application of Methods of Exploration Geophysics
★6 (0-0-6). A ten day field camp held before the beginning of the fall term provides data for interpretation during the fall and winter terms. Problems associate with the analysis of real data are discussed in a weekly seminar. Prerequisite: MATH 300. Note: Restricted t geophysics honors and specialization students.

GEOPH 429 Upper Atmosphere and Space Physics
★3 (second term, 3-0-0). Generation of the solar wind; the interplanetary plasma and field environment; the solar terrestrial interaction; magnetospheric substorms; the au rora borealis; magnetosphere-ionosphere interactions; effect of magnetospheric storms on man-made systems; use o natural electromagnetic fields for geophysical exploration Prerequisite or corequisite: PHYS 382.

Physics

PHYS 411 Statistical Physics I
★3 (first term, 3-0-0). Kinetic theory of gases, ideal gas fundamental principles of statistical mechanics, Maxwell Boltzmann distribution, Gibbs paradox, microcanonica ensemble, canonical ensemble, quantum statistics. Pre requisite: PHYS 211, 372; MATH 300 or 437.

PHYS 413 Statistical Physics II
★3 (second term, 3-0-0). Grand canonical ensemble Bose condensation, Fermi gas, Debye theory of solids black-body radiation, ortho- and para-hydrogen, ap proximation methods. Prerequisite: PHYS 411.

PHYS 415 Introduction to Condensed Matter Physics I
★3 (first term, 3-0-0). Lattice structure and binding Lattice vibrations. Electrons in solids, band structure o metals, Fermi surface. Semi-conductors and junctions Paramagnetism and diamagnetism. Introduction to lattic defects. Prerequisite: PHYS 372. Corequisite: PHYS 411

PHYS 417 Introduction to Condensed Matter Physics II
★3 (second term, 3-0-0). Lattice imperfections, disloca tions, crystal growth. First and second order phas transitions. Ferro- and antiferro-magnetism. Productio of low temperatures. Super-conductivity and superfluidity Dielectric and optical properties of solids. Ferro-electric ity. Prerequisite: PHYS 411, 415.

PHYS 445 Theory of Classical Fields
★3 (second term, 3-0-0). Lagrangian and Hamiltonia formulations for continuous systems and fields; fiel equations; Schrodinger field; Scalar field, conservatio laws. Prerequisite: PHYS 382 and MA PH 444.

PHYS 462 Atomic and Laser Spectroscopy
★3 (either term, 3-0-0). Radiative transitions; hydrogen fine-structure; two-electron systems; external fields; widt and shape of spectral lines; radiative transfer; popula tion inversion mechanisms; applications of lasers i atomic physics. Prerequisite: PHYS 472.

PHYS 463 Physics of Stellar Atmospheres
★3 (either term, 3-0-0). Introduction to stellar spectra theory of excitation and ionization; emission and absorp tion of radiation, continuous spectra; model stellar at mospheres; the Fraunhofer spectrum. Prerequisite: PHY 271 and MATH 300 or MATH 437.

PHYS 465 Physics of Stellar Interiors
★3 (either term, 3-0-0). Stellar interiors and nuclea transformation; model stars; variable stars; stellar evolu tion. Prerequisite: PHYS 271, and MATH 300 or 437.

PHYS 472 Quantum Mechanics B
★3 (first term, 3-0-0). Review of the physical basis o quantum mechanics; matrix formulation; angula momemtum; perturbation theory; collision theory; th many-particle Schrodinger equation; identical particles spin and statistics; atomic and molecular systems. Pre requisite: PHYS 372.

PHYS 473 Nuclear and Particle Physics
★3 (first term, 3-0-0). Electron scattering and th

structure of nuclei and particles, symmetries and conservation laws, isospin in nuclear and particle physics; electromagnetic, weak and hadronic interactions; models of nuclear structure; nuclear reactions; quarks and hadron spectroscopy. Prerequisite: PHYS 372.

PHYS 475 Medical Radiation Physics - Fundamentals
★3 (either term, 3-0-0). Basic concepts of dosimetry; microscopic energy distribution in irradiated matter; production of x-rays; charged particle interactions; nuclear magnetic resonance; ionization cavity chambers. Prerequisite: PHYS 372.

PHYS 477 Medical Radiation Physics - Applications
★3 (either term, 3-0-0). The physics of diagnostic imaging with x-rays, isotopes, nuclear magnetic resonance. The physics of radiation therapy-applied dosimetry. Prerequisite: PHYS 475.

PHYS 491 Advanced Laboratory
★3 (first term, 0-0-6). Open-ended experiments in atomic, nuclear and solid state physics. Prerequisite: PHYS 382, 395.

PHYS 493 Instrumentation B
★3 (second term, 3-0-0). Topics in instrument design in several fields of experimental physics. Prerequisite: PHYS 382 and 395.

PHYS 499 Special Projects
★3 (second term, 0-0-6). Experimental or reading project under the direction of a staff member. This course is intended for both Honors Physics students and Honors Mathematical Physics students. Prerequisite: A 300-level Physics course and consent of department.

204.67 Physiology

Department of Physiology
7-55 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2H7

204.67.1 General Information

Facilities are available for graduate training leading to the Master of Science and Doctor of Philosophy degrees. The Department is well equipped for most fields of physiological research, including various areas of endocrinology, cellular physiology, neurophysiology, and biophysics.

Information and requests for application forms for admission may be obtained from the Department. Students may also write to the Chair of the Department in regard to their special interests and related matters.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of at least 7.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

Financial assistance in the form of graduate assistantships is usually available for graduate students.

204.67.2 The Degree of MSc

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the program normally consists of four single-term courses and a thesis.

There is no language requirement for the MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a minimum of 12 months is normally required.

204.67.3 The Degree of PhD

Program Requirements:

The PhD program normally consists of 12 units of course weight and the preparation and defence of a thesis on an approved topic.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.

204.68 Plant Science

Department of Plant Science
4-10 Agriculture-Forestry Centre
University of Alberta
Edmonton, Alberta T6G 2P5

204.68.1 General Information

The Department of Plant Science offers programs leading to the degrees of Master of Agriculture, Master of Science, and Doctor of Philosophy.

The Department is equipped with laboratories, greenhouses, growth cabinets and field facilities for research in horticulture, plant pathology, plant biotechnology, plant physiology and biochemistry, weed science, range science, forage physiology, plant breeding and crop production. Specific research interests of the Department include breeding, agronomy and quality of forage, cereal and oilseed crops, crop physiology, weed control, herbicide physiology, grassland improvement, the physiology and production of greenhouse and other horticultural crops, host-pathogen relationships and protection of plants against

disease, seed dormancy, the biochemistry of energy production and utilization in plants, and the roles of ethylene and carbon dioxide in plant growth.

New programs in plant biotechnology applied to these research areas include genetic engineering, plant tissue culture and plant regeneration. A Chair in Plant Molecular Biology and Biotechnology has been established to serve as a focus for interdisciplinary research in this subject on campus.

Course requirements in graduate programs are based on the student's previous training and anticipated needs in the student's field of specialization. Normally, all advanced courses are acceptable as part of a graduate program. All candidates must submit and defend a thesis based on research, for the MSc and PhD. A directed research project and a seminar presentation are requirements of the MAg.

Inquiries should be addressed to the Chair, Graduate Studies Committee.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of at least 7.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). A minimum GPA of 6.5 is acceptable for admission to the MAg only.

Financial Assistance:

Financial assistance from research grants is available for a number of qualified candidates.

204.68.2 The Degree of MSc

Master's degrees are offered in plant science, horticulture, plant breeding, range science, weed science, plant pathology, forest pathology, plant biochemistry, plant molecular biology and biotechnology, and in agronomy (jointly with the Department of Soil Science).

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MSc program normally consists of 12 to 18 units of course weight and a thesis.

There is no language requirement for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a minimum of 18 months is normally required.

204.68.3 The Degree of MAg

Program Requirements:

The MAg is a course-based program consisting of 30 units of course weight in graduate-level courses, including a research project course (three units of course weight) and a seminar course, PL SC 600 (one unit of course weight). Candidates will be required to give a seminar on their research project topic which will be evaluated, along with the project, by the student's three-member supervisory committee. The evaluation will be on a pass/fail basis. This capping exercise, along with the PL SC 600 requirement, is intended to evaluate the student's ability to review, synthesize, and present scientific research and literature.

The minimum period of residence is one, four-month term of residence in full-time attendance at the University of Alberta.

Applicants are normally expected to have completed three years of satisfactory professional experience.

Length of Program:

The time required to complete the MAg program will vary; however, the time limit for program completion is four years from the date of initial registration.

204.68.4 The Degree of PhD

PhD degrees are offered in plant breeding, range science, weed science, plant pathology, forest pathology, plant biochemistry, plant molecular biology and biotechnology, and agronomy (jointly with the Department of Soil Science).

Program Requirements:

The PhD program normally consists of 12 to 18 units of course weight and the preparation and defence of a thesis on an approved topic.

There is no language requirement for the degree.

The residence requirement is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The length of the PhD program will depend to some extent on the previous qualifications of the candidate; however, normally three years are required.

204.69 Political Science

Department of Political Science
10-16 Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4

204.69.1 General Information

The Department of Political Science offers programs leading to the Master of Arts and Doctor of Philosophy degrees.

The following fields of specialization are offered: Canadian politics, political philosophy, international relations, comparative politics, urban politics, political behavior and psychology.

Students contemplating graduate work in political science should direct their inquiries to the Graduate Chair, Department of Political Science.

Entrance Requirements:

The Department's minimum admission requirements are an under graduate degree with an average of 7.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

A number of graduate assistantships are available for qualified students.

204.69.2 The Degree of MA

Program Requirements:

Two MA routes are available: a) a thesis-based MA designed to prepare the student for entrance into a PhD program; b) a course-based MA for both full- and part-time students.

For the thesis-based MA required courses depend on the area of specialization and the undergraduate background of the student; however, the program normally consists of 18 units of course weight and a thesis. For the course-based MA, 27 units of course weight including a project are required. No fewer than 12 units of course weight will be in a single field. The Project, POL S 900 equivalent to three units of course weight, must be taken for the preparation of a research paper. Students in the part-time program must take one of the following courses: POL S 510, 521, 525, 550, 560, 593. Upon completion of the requirement of 27 units of course weight, the student must pass an oral examination covering course materials and defend the paper submitted in POL S 900.

There is no language requirement for the MA degree.

The minimum period of residence for full-time programs is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MA will vary with the individual candidate; however, a minimum of 12 months of study and research is normally required. A part-time MA student must maintain continuous registration and complete the program in four years.

204.69.3 The Degree of PhD

Program Requirements:

A PhD student with an MA or equivalent in political science is normally required to complete a minimum of 30 units of course weight (plus dissertation hours) primarily at the 500- and 600-levels. Some courses may be waived for a graduate student with an exceptional background in Political Science at the graduate level.

All students in the PhD program are required to show competence in the area of the logic of political inquiry. Students not competent in the logic of political inquiry are required to enroll in POL S 508 and 509, or their equivalent. Students are also required to obtain credit in POL S 503 or another course equivalent to three units of course weight that provides a research skill. Courses other than POL S 503, 508, and 509, must be approved by the Graduate Chair in consultation with the student's supervisor.

During the summer between the PhD student's first and second year the student is expected to complete a dissertation proposal acceptable to the student's advisor.

It is expected that PhD students will complete coursework in four terms. In the fourth term, two of the student's courses are reading courses primarily for the preparation of the candidacy exam.

Before taking the candidacy examination each doctoral student must demonstrate proficiency in a language other than English. The student's advisor or committee will determine the language most appropriate to the student's program and research interest. Students taking Canadian politics as a field will be required to take French. In addition, the student's adviser or committee may determine that a special skill, such as statistics, is essential to the student's program and may require that the student demonstrate proficiency in that skill.

It is expected that PhD students will normally take the candidacy exam in the month following the completion of the second year of their program. Students must take and pass written comprehensive exams in two of the six PhD fields of specialization. They are: Canadian Politics; Political Philosophy; International Relations; Comparative Politics; Urban Politics; Political Behaviour and Psychology. The oral exam is held within one week of the written comprehensive exams, supervised by a committee formed according to FGSR regulations. Within one week following the successful completion of the oral exam, the student's dissertation proposal will be examined by a committee formed in accordance with FGSR regulations.

All candidates for the PhD must prepare an acceptable dissertation embodying the results of their research. Candidates will be examined orally on their dissertation results by committees formed according to FGSR regulations.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years are normally required.

204.69.4 Graduate Courses

The consent of department is required for all 500 and 600 level courses.

204.70 Psychiatry

Department of Psychiatry
1E1.01 Mackenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2B7

204.70.1 General Information

The Department of Psychiatry offers programs leading to the degrees of MSc and PhD. The PhD program is offered as part of the PhD in Medical Sciences interdisciplinary program (see §204.49).

For further information contact the Graduate Coordinator in the Department of Psychiatry.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 7.0 in the last two years of undergraduate (or graduate) work at the University of Alberta or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance

Financial assistance may be available from the Medical Research Council of Canada, the Alberta Heritage Foundation for Medical Research, the Alberta Mental Health Research Fund, grants to faculty members, and from other sources.

204.70.2 The Degree of MSc

Program Requirements

Requirements include the preparation and defense of a thesis based on research conducted by the candidate.

All candidates must include some coursework, as specified by their Supervisory Committee. Normally six to nine units of course weight are required.

There is no second language requirement for the MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 12 months is normally required.

204.71 Psychology

Department of Psychology
P220 Biological Sciences Building
University of Alberta
Edmonton, Alberta T6G 2E9

204.71.1 General Information

The Department of Psychology offers graduate work leading to the degrees of MA, MSc, and PhD.

Research facilities consist of numerous laboratories:

(1) for work with animals: surgeries, physiological recording rooms, behavioral testing rooms, various kinds of programming equipment, and a histological laboratory;

(2) for work with humans: rooms for interviews and personality testing; observation rooms and experimental areas for social and developmental psychology; laboratories for sensory and perceptual studies in vision, audition, tactile, and chemical senses; and laboratories for the study of cognitive processes.

Entrance Requirements:

The Department's minimum admission requirements are a four-year undergraduate degree with a 7.0 or better grade point average in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution (see §202.2.1) and a TOEFL score of 550 where applicable (see §202.2.2).

The Department also requires that applicants submit a statement of their research interests, three letters of recommendation, and the results of the Graduate Records Examination (GRE), including the test in Psychology. No minimum cut-off is used to evaluate GRE scores, but successful applicants generally score above the 70th percentile in most categories.

Financial Assistance:

Graduate assistantships for research and teaching are normally available for students who maintain satisfactory performance in their assistantship duties and make satisfactory progress toward a degree. In addition, a certain number of assistantships are available during the summer.

204.71.2 The Degrees of MA and MSc

Program Requirements:

Requirements for the master's degree include demonstration of competence in PSYCO 530 and in 12 units of course weight selected from the following: PSYCO 541, Advanced Social Psychology; PSYCO 561, Advanced Psychology of Conditioning and Learning; PSYCO 567, Advanced Psychology of Development; PSYCO 560, Advanced Memory and Cognition; PSYCO 562, Advanced Psychology of Perception; PSYCO 575, Advanced Physiological Psychology; PSYCO 587, Advanced Abnormal Psychology. Incoming students are required to conduct empirical research during their first year, and to provide a written report on the research. All students are required to present their research at least once every two years at a conference.

All candidates for the master's degree are required to conduct thesis research in one of the following areas of specialization within psychology: animal learning, physiological, developmental, cognitive, perception and psychophysics, personality and psychopathology, psychological aesthetics, social, or theoretical.

No language other than English is required for the master's degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary with the individual candidate; however, a minimum of two years is normally required.

204.71.3 The Degree of PhD

Program Requirements:

Students who are continuing after receiving a master's degree from the Department are required to take at least 12 units of course weight. These courses must be approved by the student's supervisory committee and may include courses and seminars offered in Psychology or in other Departments.

Students entering the program with a master's degree from another university are required to complete PSYCO 530, nine units of course weight from the core, and an additional three units of course weight. Incoming students are required to conduct an empirical research project during their first year, and to provide a written report on the research. All students are required to present their research at least once every two years at a conference.

Additional requirements for the PhD include the written and oral candidacy examinations and thesis research in one of the areas listed in §204.71.2, paragraph 2. Individual programs are determined in consultation with the student's supervisory committee.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD varies according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years beyond the master's degree is normally required.

204.71.4 Undergraduate Courses

The following may be taken for graduate credit:

204.72 Radiology and Diagnostic Imaging

Department of Radiology and Diagnostic Imaging
2A2 42 Mackenzie Health Sciences Centre
Edmonton, Alberta T6G 2B7

204.72.1 General Information

Facilities exist within the Department of Radiology and Diagnostic Imaging, University of Alberta, for students who wish to proceed to the Master of Science degree.

Research may be carried out in medical imaging, radiation oncology, radiological and health physics, or radiation biology and biophysics.

The Department of Radiology and Diagnostic Imaging also participates with other departments of the medical school in offering an interdisciplinary PhD program in medical sciences. Details of the entrance requirements and term of the PhD program are defined in §204.49 of this Calendar.

Inquiries regarding graduate work in the Department of Radiology and Diagnostic Imaging should be directed to the Department Chair or to the Director of Diagnostic Radiological Research, Department of Radiology and Diagnostic Imaging, 2A242 MacKenzie Health Sciences Centre.

Entrance Requirements:

The Department's minimum entrance requirements are graduation in medicine for the clinical research areas, and in the appropriate scientific disciplines for the other research studies, with an average of 7.0 or equivalent in the last two years of undergraduate (or graduate) work at the University of Alberta. Applicants with an equivalent qualification from a recognized institution will be considered for graduate studies. Where applicable (see calendar §202.2.2), applicants must obtain a score of 550 on the TOEFL test.

Financial Assistance:

Support may be obtained from several grant-awarding agencies for work in these areas.

204.72.2 The Degree of MSc

Program Requirements:

Appropriate course work will be decided upon in conjunction with the Chair of the Department or the Graduate Coordinator. Under normal circumstances candidates for the master's degree would be expected to complete nine units of course weight at the graduate-level and to prepare and defend a thesis on an approved topic.

There is no language requirement for the MSc.

The minimum period of residence is three four-month terms of full-time attendance at the University of Alberta.

Note: This program does not lead to specialty (fellowship) qualifications in Diagnostic Radiology, Radiation Oncology or Nuclear Medicine.

Length of Program:

The length of the program is one to two years.

204.72.3 Graduate Course

RADDI 511 Physics of Diagnostic Imaging — Fundamentals
★3 (2-0-1). This course is divided into two ma sections:
(1) Basic Radiation Physics which deals with nuclear a atomic structure using the Bohr model; Radiati Dose, Risk and Safety from low-level ionizing radiati to Diagnostic Radiology, Radiobiology.
(2) General Radiography: production and clinical use x-rays; the radiographic image and image parameter patient radiation/imaging concepts.

There will be also a lab component where th student will spend an average of one hour per week in diagnostic procedure room completing specified imagi tasks/lessons. These labs will not be held at speci times, but will be arranged individually for each stude This course will be offered in alternate years to RADI 512. Prerequisite or corequisite: PHYS 475/477 or co sent of department.

RADDI 512 Physics of Diagnostic Imaging - Imagir Modalities
★3 (2-0-0). This course will build on the curricul present in RADDI 511 and will discuss in detail t physics involved in the following imaging modalitie Fluoroscopy, Conventional Tomography, Digital Tec niques (DSA), Computed Tomography (C mammography, Nuclear Medicine, Ultrasound, Magne Resonance Imaging (MRI). This course will be offered alternate years to RADDI 511. Prerequisite or corequisi RADDI 511, PHYS 475/477 or consent of department

ON RA 530 Oncological Radiology
★3 (first term, 3-0-0). An advanced description of t effects of ionizing radiation deposited in mammali cells on cell biomolecules and function. Radiation- duced events will be discussed according to their tir scale of action. Selected topics include a description radiation physical and radiation chemical mechanisms relevance in mammalian cells will be presented. Ph nomenology of mammalian cell radiation response v be discussed in the context of specific theoretical mo els, cellular endpoints of proliferative capacity, chrom some aberration induction, mutation and cell transformati radiation damage in DNA and other biomolecules will described. General topics include the extrapolation cellular radiation response to tissue effects, the radiobiolo of solid tumors and estimation of radiation risk at l doses. Note: Offered in alternate years.

RADDI 600 Special Topics in Radiology Research
★2 (second term, 0-2s-0). A seminar course for a vanced students covering selected topics from the curr literature in the fields of medical imaging, radiologi physics, radiation biology and radiation biophysics.

204.73 Recreation and Leisure Studies

Department of Recreation and Leisure Studies
E401 Van Vliet Physical Education and Recreation Cen
University of Alberta
Edmonton, Alberta T6G 2H9

204.73.1 General Information

The Department of Recreation and Leisure Studi offers a program leading to the degree of Master of Arts recreation. The program provides advanced study in administration of recreation services, emphasizing acquisition of theoretical knowledge and the developm of skills for effective planning, management and po development. The three program foci are: (1) conce and theories relevant to leisure and recreation; (2) princip and practices of administration, with special referenc leisure and recreation services; and (3) research in recreation and leisure field. Beyond this required c program there is an opportunity for more specialized st in one of the sub-fields of leisure and recreation (e.g., history of recreation and leisure; the social psychology recreation and leisure; recreation resource planni recreation program planning and development; recreat services for selected user groups). All students m complete a thesis in their area of specialization.

The Department provides personal study and resea space, interactive terminals for the University's mainfra computer, minicomputers, technical support services a reference resource room. The close proximity of Alberta provincial government offices provides many uni opportunities for recreation and leisure research.

Entrance Requirements:

Applicants for admission to the program must hol four-year degree in recreation administration or a rela field and must have obtained a minimum average of 6.

quivalent in the last two years of undergraduate work (or raduate work) at the University of Alberta. Where applicable see §202.2.2) candidates must obtain a score of at least 00 on the TOEFL test. Applicants with an undergraduate egree in another field may apply for the qualifying year rogram. Full-time professional work experience is esirable, while some work experience in the field (if not ull-time, then as a part-time employee or volunteer) is ssential.

Financial Assistance:

Graduate assistantships are available to a limited umber of students.

For further information write to the Graduate oordinator, Department of Recreation and Leisure Studies.

204.73.2 The Degree of MA

Program Requirements:

o complete a minimum of 24 units of course weight, at east 12 of which must be recreation courses. In addition, ney must undertake research leading to the completion of thesis.

Two of the recreation courses (REC 500 and REC 10) are mandatory for all students. The remaining two equired recreation courses must be selected from REC 11, REC 531, REC 541 and REC 551.

All students must complete an approved graduate esearch methodology course at the University of Alberta nd must participate in the Department's graduate student-aculty research seminar.

The remaining nine units of course weight of the equired minimum of 24 units of course weight may be aken from any of those listed by the Faculty of Graduate tudies and Research for which the student has met the rerequisites and obtained approval from the student's rogram adviser.

There is no language requirement for the MA degree.

All students must complete a residence requirement f two four-month terms of full-time attendance at the niversity of Alberta.

ength of Program:

The time required to complete the program will vary ith the individual candidate; however, a minimum of 12 onths is normally required.

04.73.3 Undergraduate Course

Note: This is a senior undergraduate level course hich is approved to graduate credit. It may be selected s one of the approved optional courses; however, it oes not count as one of the four required recreation ourses.

204.74 Romance Languages

Department of Romance Languages
1-2 Arts
University of Alberta
Edmonton, Alberta T6G 2E6

204.74.1 General Information

The Department of Romance Languages offers graduate work leading to the degrees of Master of Arts and Doctor of Philosophy. MA programs are offered in French or French-Canadian literature, French translation, Hispanic literatures, Italian literature, and Romance linguistics. PhD programs are offered in French/French-Canadian, Hispanic literatures, Romance linguistics, and Romance languages. N.B. Students working in applied and historical-comparative romance linguistics are normally expected to include some courses from the Department of Linquistics in their degree programs.

The Department is large and various, offers courses in many areas of study in Romance Languages, literatures and linguistics, and is supported by fine holdings in the University library. Students are asked to consult the Associate Chair (Graduate Coordinator) concerning course requirements and acceptable fields of research in the various areas of specialization.

Entrance Requirements:

Prospective graduate students will require a good undergraduate degree for admission to an MA program. The Department generally does not accept students with an overall grade point average of less than 7.0 in their last two undergraduate years at the University of Alberta, or an equivalent qualification from another institution, and normally requires that the grade point average for the year's work of a student in a qualifying year be at least 7.0. The MA or an equivalent degree from a recognized university is normally required for admission to the PhD program. A TOEFL score of 550 is required where applicable (see §202.2.2).

Financial Assistance:

Financial aid is available to admitted students in the form of Winter Session Graduate Assistantships (September to April) and Third Term Graduate Assistantships (May to August). Non-thesis students, qualifying students and probationary students are not eligible for Third Term assistantships.

204.74.2 The Degree of MA

Program Requirements:

For students entering from a four-year undergraduate program, the master's degree in all areas normally requires 18 units of course weight in graduate courses; for students who have done less undergraduate work, course requirements may vary. In addition, all French, Italian, and Hispanic programs require some practical training in bibliography.

There are two MA routes in French:

(1) a thesis-based MA in French literature or French-Canadian literature normally requires 18 units of course weight in graduate courses covering various literary periods and fields of study, and may lead to PhD work in French/French-Canadian literature;
(2) a thesis-based MA in French translation requires certain undergraduate translation and other courses as prerequisites (which may be completed in a Qualifying Year), and 18 units of course weight in graduate courses in practical translation and translation theory. It does not normally lead to the PhD degree at the University of Alberta.

In Hispanic literatures, and in Italian literature, course work for the MA is determined by the Department according to individual cases.

Two MA routes are available in Romance linguistics:

(1) a thesis-based MA designed to prepare the student for entrance into a PhD program normally requires 36 units of course weight in graduate courses, plus a thesis.
(2) a course-based MA designed to meet the needs of second-language teachers normally requires 36 units of course weight in graduate courses, plus a project equivalent to six units of course weight.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MA program will vary according to the previous training of the applicant and the nature of the research undertaken. However a minimum of 12 months is normally required.

204.74.3 The Degree of PhD

Program Requirements:

For a student presenting an MA in the same area of specialization, the PhD program in all areas normally requires 24 units of course weight in graduate courses (with the exception of the PhD in Romance languages which requires 36), prescribed departmental exams, the faculty candidacy oral examination, and a dissertation. There are additional major requirements for each area.

For the PhD in French literature, program requirements include a departmental written and oral exam and a critical essay which forms part of the material examined at the faculty candidacy examination.

Students working towards the PhD in Hispanic literatures must fulfill second Romance language and literature requirements as well as written examinations leading to the faculty candidacy examination.

Students working towards the PhD in Romance linguistics require proficiency in at least one Romance language, a reading knowledge of two additional Romance languages (Latin may be substituted for one of the preceding), a reading knowledge of an approved research language other than English or a Romance language, and a pre-candidacy research paper. At or near the beginning of their dissertation work, students will present for approval a prospectus of their dissertation.

The PhD program in Romance languages allows comparative study of two or more Romance literatures, or the study of one Romance literature and Romance linguistics. After demonstrating their linguistic competence, students are required to take a minimum of 36 units of course weight and, if required, further language examinations prior to the faculty candidacy examination. Students interested in this doctoral program must submit a detailed thesis proposal to the Department prior to seeking admission.

PhD students changing research fields will be required to obtain departmental approval and may be required to take a new candidacy examination meant to test their understanding of their newly selected research area.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is normally required.

204.75 Rural Economy

Department of Rural Economy
515 General Services Building
University of Alberta
Edmonton, Alberta T6G 2H1

204.75.1 General Information

The Department of Rural Economy offers programs leading to the Master of Agriculture, Master of Science and Doctor of Philosophy degrees. Programs at the master's level are offered in agricultural finance, management, marketing, policy, prices, production, international trade, forest economics, natural resource economics, rural development and rural sociology. Programs at the doctoral level are offered in agricultural economics and forest economics.

Entrance Requirements:

The Department's minimum admission requirements for each master's program are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). Admission requirements for the doctoral program are an approved master's degree with an average of at least 7.5 or equivalent or an approved bachelor's degree with an average of at least 8.0 or equivalent, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

Information about details of program requirements and the availability of financial assistance may be obtained from the Department.

204.75.2 The Degree of MAg

Applicants for this program are normally expected to have completed three years of satisfactory professional experience in agriculture.

Program Requirements:

Master of Agriculture programs consist of 30 units of course weight plus a project course equivalent in weight to at least three units of course weight. Students must also participate in the graduate seminar AG EC 601 while in residence.

There is no language requirement for the degree of MAg.

Candidates must spend a minimum of one single term (four months) in full-time attendance at the University of Alberta to meet the residence requirement.

Length of Program:

A candidate with adequate undergraduate prerequisites and appropriate professional experience should complete the program in one academic year (twelve months).

204.75.3 The Degree of MSc

Program Requirements:

Master of Science programs consist of at least 18 units of course weight plus a thesis equivalent in weight to 12 to 18 units of course weight. At least 12 units of course weight must be in addition to specified undergraduate course requirements. Students must also participate in AG EC 601 while in residence.

No language other than English is required for the MSc.

Candidates must spend a minimum of two single terms (eight months) in full-time attendance at the University of Alberta to meet the residence requirement.

Length of Program:

The time required to complete the MSc will vary with the individual candidate; however, a Category A MSc candidate should be able to complete the program in 12 to 16 months.

204.75.4 The Degree of PhD

Program Requirements:

Doctor of Philosophy programs include, in addition to the Master of Science course requirements, preparation for candidacy examinations in economic theory, quantitative techniques, the field of specialization and a supporting field. Fields of specialization are limited to agricultural economics and forest economics. In addition, all candidates for the PhD must prepare and defend a thesis on an approved topic and must participate in the graduate seminar AG EC 601 while in residence.

A minimum of 36 units of course weight in graduate courses shall be taken at the University of Alberta of which at least 18 units of course weight shall be from the Department of Rural Economy.

No language other than English is required for the degree.

Length of Program:

The time required to complete the PhD will vary according to the academic background of the applicant and the nature of the research undertaken; however, a minimum of 30 months is normally required.

204.76 Secondary Education

Department of Secondary Education
341 Education South
University of Alberta
Edmonton, Alberta T6G 2G5

204.76.1 General Information

The Department of Secondary Education offers programs leading to the Master of Education (with or without thesis), Doctor of Philosophy and Doctor of Education degrees. Graduate instruction in these programs is designed to develop competencies as master teachers, educators in the specific disciplines, curriculum and instruction specialists, and curriculum and instruction scholars.

Graduate programs in the Department normally include advanced studies in the following areas: subject matter specialization, curriculum and instruction related to a specific discipline, enquiry into curriculum perspectives and into the nature of education and its practice. Programs of an interdisciplinary nature, and co-advisers, are possible. The particular program for each student is designed in consultation with a staff advisor designated by the Chair of the Department.

Application forms for admission to a program or further information regarding the programs may be secured by writing to the Chair of the Department of Secondary Education.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). In addition, candidates must obtain a satisfactory score on either the Miller Analogies Test or the Graduate Record Examination before they are considered for admission. No arbitrary standards are employed for the Miller or GRE results since they are used as corroborative evidence in conjunction with other indicators of potential.

Financial Assistance:

Limited assistantships are available to qualified candidates for the MEd, EdD or PhD in Secondary Education for services rendered in the Department's programs.

204.76.2 The Degree of MEd

Normally, two years of teaching experience and an undergraduate degree of appropriate quality are required for admission to MEd programs.

Program Requirements:

The normal course load per term consists of nine to 12 units of course weight. Students in the course-based MEd route normally must successfully complete 42 units of course weight (usually 14 three-weight courses) and present a project (equivalent to six units of course weight) in colloquium. Students in the thesis-based MEd route normally complete 30 units of course weight, and complete and successfully defend a thesis.

There is no language requirement for the degree of MEd.

Both resident (full-time) and non-resident (part-time) programs are available through the Department. A minimum of two consecutive four-month terms of full-time attendance at the University of Alberta are required for the resident program, in both thesis-based and course-based routes. The course-based master's is also offered on a part-time basis.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally, the maximum time allowed to complete the requirements for the degree is four years.

204.76.3 The Degrees of EdD and PhD

Program Requirements:

The EdD and PhD programs normally consist of coursework and the preparation and defence of a dissertation on an approved topic.

There is no language requirement for the PhD degree.

Both doctoral programs require two academic years of full-time attendance to meet the residence requirement; this involves four (four-month) terms of full-time study with a minimum of nine units of course weight per term.

Length of Program:

The time required to complete the EdD or PhD program will vary with the individual candidate; however, a minimum of two years of full-time study and research is usually required. The maximum time normally allowed for completion of the doctoral program is five years.

204.77 Slavic and East European Studies

Department of Slavic and East European Studies
450 Arts Building
University of Alberta
Edmonton, Alberta T6G 2E6

204.77.1 General Information

The Department of Slavic and East European Studies offers programs leading to the degrees of Master of Arts and Doctor of Philosophy.

MA programs are offered in (a) Russian, Ukrainian, Slavic Linguistics, Slavic Literatures, and (b) East European and Soviet Studies. PhD programs are offered in Slavic Languages and Literatures and in Slavic Linguistics. The Department will approve only fields of study in which adequate library resources and supervision are available.

Students are asked to consult the Department concerning acceptable areas of research and course requirements in the various areas of specialization.

The holdings of the University of Alberta Library in Slavic Languages and Literatures comprise some 39,000 works; of these, approximately 18,500 are in Russian, 5,200 are in Ukrainian and 4,200 in Polish. The majority of the holdings are computerized for quick retrieval. Computerization of research projects and thesis writing is available both on the Amdahl 5860 and on Macintosh and Apple microcomputers.

Research interests in the Department include the following. In literature: Russian and Ukrainian Nineteenth and Twentieth century literatures, especially Romanticism and Modernism; also Polish literature. In linguistics: synchronic and diachronic phonology, especially Russian and Ukrainian; Russian syntax; and Slovene and Ukrainian dialectology. In folklore: the history of Ukrainian folklore studies and Ukrainian-Canadian topics. In the social sciences: the 'Woman Question' in the Soviet Union and Eastern Europe; Russian intellectual history.

The Department also participates with other departments in offering programs of study leading to the degrees of MA, MEd, and PhD with notation of specialization in East European and Soviet Studies.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 7.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

Financial aid is available in the form of graduate assistantships. Applications for these assistantships should be made before March 1 and should be sent to the Chair of the Department.

204.77.2 The Degree of MA

Program Requirements:

Requirements for the MA degree include:

(1) for (a) Russian, Ukrainian, Slavic Linguistics and Slavic Literatures completion of a minimum of 18 units of course weight, including SLAV 515; for (b) East European and Soviet Studies completion of a minimum of 18 units of course weight from within the Department, including INT D 546 and six units of course weight in one other area-related course, or six units of course weight outside the Department.

(2) for (a), a thorough knowledge of the language of specialization; competent reading knowledge of a second Slavic language and/or French or German. Specialists in Russian must normally pass RUSS 501 and RUSS 502 during the first year of their program; for (b), a knowledge of the language of the area of study and normally, of one other major language of Eastern Europe, or German or French;

(3) submission and oral defence of a thesis.

Candidates for the MA must spend at least two four-month terms in full-time residence at the University of Alberta.

Length of Program:

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 12 months is normally required.

204.77.3 The Degree of PhD

To be admitted as a provisional candidate for the PhD a student must normally hold the equivalent of the MA in Slavic Languages from the University of Alberta. Students whose MA work was done at other universities may be required to make up program deficiencies by special examination or by course work. Any make-up examinations are to be taken within one year following admission as a provisional PhD candidate.

Program Requirements:

General requirements for the PhD include the completion of a minimum of 24 units of course weight beyond the master's degree, and an additional six units of course weight in a minor subject, and the submission and oral defence of a dissertation. Specific requirements include:

(1) for students in Slavic Languages and Literatures:

a. Russian Language and Literature: comprehensive knowledge of Russian Literature and general knowledge of at least one of the other Slavic literatures and cultures; active knowledge of Russian. The suggested minor in this program is Comparative Literature.

b. Ukrainian Language and Literature: comprehensive knowledge of Ukrainian literature and general knowledge of at least one of the other Slavic literatures and cultures; active knowledge of Ukrainian. The suggested minor in this program is Comparative Literature.

c. Ukrainian Folklore: comprehensive knowledge of Ukrainian folklore and general knowledge of the folklore of another Slavic group; active knowledge of Ukrainian; and an approved minor.

In all three programs competent reading knowledge of one other Slavic language plus French or German is required.

(2) For students in Slavic Linguistics: comprehensive knowledge of the history and structure of one Slavic language and general knowledge of the history and structure of each of the three groups of Slavic languages (East, West and South Slavic); active knowledge of one Slavic language; competent reading knowledge of Russian, of French or German, and of one West Slavic and one South Slavic language. The suggested minor in this program is Linguistics.

Candidacy examination: Written examinations covering the candidate's area of specialization. If the student passes the written examination, the student will be examined orally on the student's areas of specialization and dissertation proposal.

The residence requirement for PhD students is a minimum of two years in full-time attendance at the University of Alberta. At the Department's discretion, and with approval of the Faculty of Graduate Studies and Research, a student may be permitted to spend up to one year of the period of residence at another institution (preferably, in a Slavic-speaking country).

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.

204.77.4 The Degrees of MA and MEd With the Notation of Specialization in East European and Soviet Studies, Offered with Participating Departments

Slavic and East European Studies coordinates interdisciplinary programs and courses dealing with Eastern Europe, the Soviet Union, and East European peoples in Canada.

The departments participating in offering graduate programs leading to the notation of "specialization in East European and Soviet Studies" are Comparative Literature, Economics, Educational Foundations, Educational Psychology, Geography, History, Physical Education, Political Science, and Sociology.

Signatures from the Department of Slavic and East European Studies and from the other participating department are required on the recommendation of admission, the study program, the notice of oral examination, and the report of the final examining committee (see §203.1.2).

Slavic and East European Studies and the other participating department shall agree to the nature of the student's program of study, including the specification of course requirements, by joint signing of a program of study. Similar agreements with respect to general departmental requirements and comprehensive examinations shall be placed in the student's file.

Supervisory committees must include at least one member from Slavic and East European Studies and one from the participating department. These shall not be the same person. For examining committees, an additional person shall be added who is neither from Slavic and East European Studies nor from the department participating in the student's program.

Inquiries, including requests for financial aid, should be sent by March 1 to the Chair, Slavic and East European Studies.

Entrance Requirements:

The minimum admission requirements are those normally required for admission to the master's program in the relevant participating department.

Graduate students in western Canadian universities may be admitted to Slavic and East European Studies as visiting graduate students.

Financial Assistance:

A number of graduate assistantships are available through the Department of Slavic and East European Studies and through participating departments.

Program Requirements:

The basic graduate program at the master's level normally consists of a number of courses of area-related study in the participating department (the specific number of courses will depend on the department involved); the interdisciplinary seminar on East European and Soviet Studies (INT D 546); and a thesis on Eastern Europe, the Soviet Union, or East Europeans in Canada. Unless waived on the basis of previous study or background, students are also required to include in their program one area-related full-year course or two single-term courses from a third department.

In addition, the student must demonstrate competence in one of the languages of the area to the satisfaction of the Department of Slavic and East European Studies.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MA or MEd program will vary with the individual candidate; however, a minimum of two years is normally required.

204.78 Sociology

Department of Sociology
5-21 Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4

204.78.1 General Information

The Department of Sociology offers programs leading to the degrees of Master of Arts and Doctor of Philosophy. Four MA programs are available: (1) a thesis-based MA; (2) a course-based MA; (3) a course-based MA in corrections; and (4) a thesis-based MA in demography.

Three PhD programs are available: (1) a PhD in Sociology emphasizing the core areas of the discipline (social psychology, social organization, theory, and methods) in addition to a specialization of interest to the student; (2) a PhD in demography; and (3) a PhD in Sociology emphasizing health care planning and evaluation and administered jointly by the Departments of Sociology and Health Services Administration and Community Medicine.

Application forms for admission and further information on the above programs may be obtained by writing the Graduate Student Coordinator, Department of Sociology.

Entrance Requirements:

The Department's minimum admission requirements are a four-year undergraduate degree (or equivalent) with an average of 7.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2).

Financial Assistance:

A number of graduate assistantships are available. Stipends vary from $8,230 to $11, 300 for the eight-month academic year depending upon qualifications. Students may also qualify for a summer stipend of approximately $1,000/month for a two-month period. Application for assistantships should be made to the Graduate Student Coordinator. Other scholarships and fellowships are available through the Student Awards Office.

204.78.2 The Degree of MA

Program Requirements:

Required courses depend on the area of specialization and the undergraduate background of the student. Normally the thesis-based MA program consists of 21 units of course weight (including core courses in statistics, methods

theory, social psychology, and social organization) and a thesis. The course-based MA program normally consists of 33 units of course weight (including core courses in statistics, methods, theory, social psychology, and social organization) and a project equivalent to three units of course weight. The MA in demography requires 21 units of course weight (including core courses in statistics, methods, theory, social psychology, social organization, demographic analysis, and two of fertility, mortality, and migration) and a thesis. The MA in corrections offers a choice of two tracks: one in correctional administration and the other in correctional counselling. Each track requires 27 units of course weight, a project equivalent to three units of course weight, and, depending on the student's background, may require two full-time field placements of four months each.

There is no language requirement for the MA.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary with the individual candidate; however, a minimum of two years is normally required.

204.78.3 The Degree of PhD

Program Requirements:

The PhD program normally consists of 18 units of course weight. Nine of the units of course weight must consist of statistics, methodology, and sociological theory, all at the 600-level. One pass-fail seminar in teaching and professional skills is required. Students must also complete three comprehensive examinations (in the areas of social psychology, social organization, and a specialization), and prepare and defend a thesis on an approved topic. The PhD program in Health Services Studies requires, in addition to the above, four months of field residency and four months of guided health services studies experience. In this program, the student's specialization comprehensive examination will be in the area of health services studies. The PhD program in demography normally consists of 27 units of course weight, one pass-fail seminar in teaching and professional skills, three comprehensive examinations (in technical demography, substantive demography, social organization or social psychology) and the preparation and defence of a thesis on an approved topic.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.

★3 (either term, 3-0-2). Prerequisite: SOC 609.

SOC 617 Selected Topics in Sociological Research Methods
★3 (either term, 0-3s-0). Prerequisite: SOC 517 or 615 or equivalent.

SOC 624 Advanced Field Placement in Criminal Justice
★6 (either term, 0-40c-0). Prerequisite: Consent of department. Note: Restricted to MA (Corrections) students.

SOC 631 Seminar in Advanced Sociological Theory
★3 (either term, 0-3s-0).

SOC 633 Mathematical Sociology
★3 (either term, 0-3s-0).

SOC 641 Selected Topics in Social Psychology
★3 (either term, 0-3s-0).

SOC 642 Experimental Small Group Research
★3 (either term, 0-3s-0).

SOC 652 Seminar in Population, Social and Economic Development
★3 (either term, 0-3s-0).

INT D 653 Regionalism and Urban Planning
★3 (either term, 3-0-0).

SOC 661 Seminar in the Sociological Profession
★2 (either term, 0-1s-0).

SOC 670 Seminar in Advanced Topics in Family Theory and Research
★3 (either term, 0-3s-0).

SOC 682 Selected Topics in Medical Sociology
★3 (either term, 0-3s-0).

204.79 Soil Science

Department of Soil Science
442 Earth Sciences Building
University of Alberta
Edmonton, Alberta T6G 2E3

204.79.1 General Information

The Department of Soil Science offers programs leading to the Master of Agriculture, Master of Science, and Doctor of Philosophy degrees.

Fields of interest in the Department of Soil Science include: genesis, classification (taxonomic and interpretive), physics, chemistry, mineralogy, nutrient cycling, biology, remote sensing, fertility, management, conservation and agroecosystem modelling.

All graduates receiving an MAg, MSc or PhD specializing in soil science from the University of Alberta must have obtained (before or during their graduate program) a minimum level of competence in the following four areas of soil science: soil genesis and classification (SOILS 420), soil physics (SOILS 440), soil mineralogy/

chemistry (SOILS 415 or 450) and soil biology (SOILS 330 or 430). Candidates for all graduate degrees are required to participate in SOILS 600 and the Department seminar.

Details regarding program requirements and availability of financial assistance may be obtained from the Graduate Coordinator, Department of Soil Science.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with a strong background in one of the basic sciences and an average of 7.0 in the last two years of full-time undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. To remain in a graduate program in soil science a student must maintain a minimum grade point average of 7.0, with no grade less than 6.0.

In addition to the above, all non-Canadian applicants for whom English is not their native language must pass, with a minimum score of 550, the Test of English as a Foreign Language (TOEFL) before formal admission is granted (see §202.2.2).

Financial Assistance:

A limited number of teaching assistantships is usually available to qualified individuals; however, they are not awarded until commencement of each academic year. Research grant-funded assistantships are usually available to students with high academic standing.

204.79.2 The Degree of MAg

Program Requirements:

Requirements for the Master of Agriculture degree are the equivalent of 30 units of course weight in graduate-level courses, SOILS 600, plus a project equivalent in weight to at least three units of course weight. Competence in the four areas listed above must be met if not covered in previous degree programs.

There is no language requirement for the degree of MAg.

The minimum residence requirement is two four-month terms of full-time attendance.

The applicant is normally expected to have completed three years of satisfactory professional experience.

Length of Program:

Normally, a minimum of 12 months of study and research is needed to complete the requirements for the degree.

204.79.3 The Degree of MSc

Program Requirements:

Requirements for the Master of Science degree are at least 18 units of course weight plus SOILS 600 and thesis. Competence in the four areas listed above must be met if not covered in previous degree programs.

There is no language requirement for the degree of MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the program will vary with the individual candidate; however, a minimum of two years is normally required.

204.79.4 The Degree of PhD

Program Requirements:

There are no fixed course requirements, except SOILS 600, for the PhD in soil science. The candidate and supervisory committee will select courses as may be necessary to enable the candidate to carry out an acceptable research program. Competence in the four areas listed above must be met if not covered in previous degree programs. Preparation and defence of a thesis on an approved topic is the main requirement.

There is no language requirement for the degree of PhD.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, four years is normally required to complete the program.

204.79.5 Undergraduate Courses

The following may be taken for graduate credit:

SOILS 401 Research Project
★3 (either term, 0-3s-0). Prerequisite: Consent of Department Chair.

SOILS 402 Research Project
★6 (0-3s-0). Prerequisite: Consent of Department Chair.

SOILS 415 Soil Mineralogy
★3 (second term, 3-0-3). Prerequisite: SOILS 310.

SOILS 420 Soil Formation and Classification
★3 (first term, 3-0-3). Prerequisite: SOILS 310 or any 300-level earth science course.

SOILS 425 Soil and Land Evaluation
★3 (second term, 3-0-3). Prerequisite: SOILS 420.

SOILS 430 Soil Microbiology and Biochemistry
★3 (second term, 3-0-3). Prerequisite: SOILS 310 or any 300-level course in the biological sciences.

SOILS 440 Soil Physics
★3 (first term, 3-0-3). Prerequisite: SOILS 310 or completion of 60 units of course weight of university science courses.

SOILS 450 Soil Chemistry
★3 (first term, 3-0-3). Prerequisite: SOILS 310.

SOILS 460 Soil Fertility
★3 (second term, 3-0-3). Prerequisite: SOILS 310.

SOILS 461 Agroecosystem Simulation
★3 (second term, 3-0-3). Prerequisite: BOT 240, SOILS 310 and one other Soils course.

SOILS 470 Land Drainage
★3 (second term, 3-0-0). Prerequisite: One of AG EN 308 or 313, GEOL 588, SOILS 440. (Offered jointly with the Department of Agricultural Engineering). Offered in alternate years.

SOILS 485 Soil Reclamation and Conservation
★3 (first term, 2-4s-0). Prerequisite: Four (4) Soil Science areas beyond SOILS 310.

204.79.6 Graduate Courses

Except for SOILS 600, the following courses are offered only when justified by enrollment, normally in alternate years.

SOILS 900 ★3 Directed Research Project

SOILS 501 Individual Research Project
★3 (either term, 0-3s-0). A topic of interest to the student and instructor(s) is selected for detailed study. The project may involve library research, field or laboratory work, computer studies of soil data, map work, etc. Prerequisite: Consent of Department Chair.

SOILS 502 Individual Research Project
★6 (0-3s-0). A topic of interest to the student and instructor(s) is selected for detailed study. The project may involve library research, field or laboratory work, computer studies of soil data, map work, etc. Prerequisite: Consent of Department Chair.

SOILS 505 Special Topics in Soil Science
★3 (either term, 3-0-0). Prerequisite: Consent of Department.

SOILS 510 Advanced Remote Sensing
★3 (second term, 3-0-3). A quantitative approach to remote sensing for land resource studies; specialized techniques for hard copy and digital image analyses; remote sensing and soil-vegetation-landscape models; literature review and laboratory project on a selected problem. Prerequisite: FOR 410.

SOILS 520 Advanced Soil Classification
★3 (second term, 3-0-3). Systematics of soil classification throughout the world with special emphasis on pedogenesis, classification, distribution and use of soils outside of Canada. Laboratory consists of a minimum 10-day field trip normally scheduled immediately following the final examination period and conducted regionally in North America. Costs of lodging and meals to be borne by students. Prerequisite: SOILS 420.

SOILS 530 Advanced Soil Ecology
★3 (first term, 3-0-3). Ecological approach to studying plant, microbial, and faunal interactions. Role of microorganisms and fauna in energy flow and nutrient cycling in soil. Prerequisite: SOILS 430.

SOILS 535 Advanced Soil Biochemistry
★3 (second term, 1-2s-3). A lecture and seminar course on special topics from the recent literature in soil biochemistry; intensive literature review and laboratory project on some aspect of the topics discussed. Prerequisite: SOILS 430.

SOILS 540 Advanced Soil Physics
★3 (second term, 3-0-3). Fundamental equations governing the flow of fluids through porous media; examination of solution techniques including physical and analogue models, analytical and numerical techniques with application to such physical processes as infiltration, moisture redistribution, drainage, and evaporation. Prerequisite: An introductory course in differential calculus and a course in one of the following: soil physics, soil mechanics, or hydrogeology.

SOILS 550 Advanced Soil Chemistry
★3 (second term, 3-0-3). More complex chemical reac tions and properties of soil systems. Prerequisite: Con sent of instructor.

SOILS 555 Advanced Soil Mineralogy and Micromorphology
★3 (second term, 3-0-3). Concepts and methods i the study of soil mineral reactions including applica tion of thermodynamics to mineral weathering an secondary mineral formation, principles of fabri analysis, and instrumental methods in mineralogica research. Prerequisite: SOILS 415 and 420.

SOILS 600 Seminar
★0 (either term, 0-1s-0). Provides a forum in whic graduate students learn to prepare and present profes sional seminars or papers at both general and technica levels. Attendance is expected of all graduate student 'in residence.' Students will participate actively as pre senters, chairs, discussants and evaluators. Studer participation is assessed as credit/no credit at the end o their programs.

SOILS 620 Experimental Pedology
★3 (second term, 3-0-3). A review of the more importan classical research contributions in the area of exper mental pedology. The scientific method as applied t research in experimental pedology. Prerequisites: SOIL 520, 535, and 555.

204.80 Speech Pathology and Audiology

Department of Speech Pathology and Audiology
400 Garneau Professional Centre
University of Alberta
Edmonton, Alberta T6G 0T2

204.80.1 General Information

The Department of Speech Pathology and Audiolog offers graduate work leading to the Master of Scienc degree in Speech-Language Pathology and, commencin in 1992, the Master of Speech-Language Pathology degree

The MSc program is designed to provide speech language clinicians with the research skills needed t study the etiology, prevention, diagnosis, and remediatio of speech, language, and hearing disorders. Students wi undertake research to enhance their abilities to tak leadership roles in academic, clinical, and laborator settings.

The MSLP program is designed to develo competencies in the preventions, evaluation, treatmen and management of articulation, language, fluency, voice and resonance disorders as well as in the fundamenta practices of audiology, and will commence with the fa 1992-93 term. This course-based master's program i designed to provide students with the academic an clinical education required for certification by provincia and national professional associations.

The Department maintains laboratory, instrumentation and clinical facilities for a wide range of research interest in stuttering, motor speech disorders, voice, languag development and disorders, craniofacial anomalies, hearin disorders, and clinical supervision.

Entrance Requirements:

The minimum entrance requirements include a fou year baccalaureate degree with a grade point average o at least 6.5 in the courses taken during the last 2 years o university work at the University of Alberta or equivalen qualifications from another academic institution. Student who use the TOEFL exam to fulfill the Faculty of Graduat Studies and Research's English language proficienc requirement must present a minimum score of 600. N language other than English is required. The period o residency is two, four-month terms of full-time attendanc during the regular session at the University of Alberta Applicants must also submit a statement of their researc interests, three letters of recommendation, and the result of the Graduate Records Examination (verbal, quantitative and analytical subtests). No minimum cut-off will be use to evaluate GRE scores, since the scores will be used i conjunction with other indicators of student potentia Personal interviews may be used if deemed necessary i making final selections. Specific program requirement will vary depending upon the academic background of th students. The deadline for submitting applications fo winter session admission is March 15.

Financial Assistance:

A limited number of teaching and researc assistantships may be available within the Departmen Applications for financial assistance should be submitte to the Department Chair before March 15. Students shoul contact the University Student Awards Office and th Alberta Department of Social Services and Communit Health for information on other possible sources of fundin

204.80.2 The Degree of MSc

Program Requirements:

Requirements for the MSc degree include an undergraduate degree in Speech-language Pathology at the University of Alberta, or equivalent qualifications from another academic institution, and successful completion of a minimum of 24 units of course weight. An advanced course of three units of course weight in research design and/or statistics, and the completion of a satisfactory thesis. Fifteen units of course weight of the required 24 must be taken within the Department and will include SPA 500. The other courses may be chosen in consultation with the student's academic adviser and must include a course in research design and/or statistics.

Length of Program:

The length of program and the time required to complete the program will vary with the individual candidate but cannot exceed the statutory limits of the Faculty of Graduate Studies and Research as set out in §202.13. A minimum of two academic years normally will be required to complete the MSc degree in Speech Pathology.

204.80.3 The Degree of MSLP to Commence September 1992

Program Requirements:

The minimum entrance requirements include a four year baccalaureate degree with a grade point average of at least 6.5 in the courses taken during the last two years of university work at the University of Alberta or equivalent qualifications from another academic institution. Requirements for the MSLP will normally include successful completion of a minimum of 48 units of course weight, plus a research project equivalent to six units of course weight, and a minimum of 300 supervised clinical hours. The prerequisite courses will typically be a portion of a more extensive undergraduate knowledge base which is relevant to graduate study in speech-language pathology. The program requirements will ensure that students meet standards required for membership/certification in provincial and national professional associations. Prerequisite courses and the required program of study may be obtained from the Department of Speech Pathology and Audiology. Program requirements will be reduced or modified for students holding an undergraduate degree in Speech-language Pathology from the University of Alberta or equivalent qualifications from another academic institution.

Length of Program

The length of program and the time required to complete the program will vary with the individual candidate but cannot exceed the statutory limits of the Faculty of Graduate Studies and Research as set out in §202.13. A minimum of two calendar years of 24 months will normally be required to complete the program.

204.80.4 MSc Graduate Courses

THES 900 Thesis
THES 999 Thesis

REHAB 500 Research Seminar
★3 (either term, 0-3s-0). The examination, evaluation and preparation of the research report. Students will discuss critically various aspects including the selection of the problem, the review of the literature, the research hypothesis, the collection and analysis of the data, and the significance of the research.

SPA 500 Introduction to Graduate Research
★3 (first term, 3-0-0). Investigation of research strategies in speech pathology and audiology, analyses of completed and proposed research, initial thesis planning. Normally taken during student's first term.

SPA 559 Instrumental Measurement and Analysis
★4 (either term, 3-0-3). Advanced study of laboratory methods in speech acoustics and physiology. Prerequisite: SPA 503 or Department consent. Formerly SPA 506.

SPA 561 Methods of Data Analysis
★3 (either term, 0-3s-0). The role of statistics in speech pathology and audiology research, including study of basic concepts related to selection of analysis methods for particular data sets and interpretation of results. Prerequisite: Introductory statistics course and Department consent. Formerly SPA 502.

SPA 563 Behavioral Measurement and Analysis in Speech-Language Pathology
★3 (either term, 0-3s-0). Consideration of the evaluation process in speech pathology: study of systematic test procedures, measurement, and analysis. Prerequisite: Department consent. Formerly SPA 505.

SPA 565 Supervision of Speech-Language Pathology
★3 (either term, 0-3s-0). An introduction to the supervisory process as a quantifiable, goal-oriented component of the clinical process: including relevant information from the literature in speech pathology, education and counselling. Prerequisite: Department consent. Formerly SPA 508.

SPA 567 Aging and Communication
★3 (either term, 0-3s-0). Advanced interdisciplinary study of the research literature on physiological, psychological and sociological aspects of aging and their impact on speech, hearing, and language. Topical focus may vary. Prerequisite: Department consent. Formerly SPA 513.

SPA 569 Research in Fluency Disorders
★3 (either term, 0-3s-0). A study of current research in fluency disorders. Students will research theoretical issues in assessment or therapy. Prerequisite: Department consent. Formerly SPA 515.

SPA 571 Issues on Phonology and Phonological Disorders
★3 (either term, 0-3s-0). Advanced study of current literature on phonological development and disorders. Topical focus may vary. Prerequisite: Department consent. Formerly SPA 523.

SPA 573 Issues in Child Language
★3 (either term, 0-3s-0). Advanced study of selected topics in normal language acquisition. Topical focus may vary. Prerequisite: Department consent. Formerly SPA 523.

SPA 575 Language Disorders: Children
★3 (either term, 0-3s-0). Advanced study of current literature on specific topic areas in the evaluation and management of children with acquired language disorders. Topical focus may vary. Prerequisite: Department consent. Formerly SPA 525.

SPA 577 Language Disorders: Adults
★3 (either term, 0-3s-0). Advanced study of research literature on acquired aphasia and related language disorders. Topical focus may vary. Prerequisite: Department consent.

SPA 579 Dyspraxia and Dysarthria
★3 (either term, 0-3s-0). Advanced study of the research literature on congenital and acquired disorders of motor speech programming and execution. Topical focus may vary. Prerequisite: SPA 509 or Department consent. Formerly SPA 531.

SPA 581 Craniofacial Anomalies
★3 (either term, 0-3s-0). Advanced study of recent research on the evaluation and management of communication disorders associated with craniofacial anomalies. Prerequisite or corequisite: SPA 559 or Department consent. Formerly SPA 533.

SPA 583 Disorders of Phonation
★3 (either term, 0-3s-0). Advanced study of current evaluation and management techniques for disorders of phonation and resonance. Prerequisite or corequisite: SPA 559 or Department consent. Formerly SPA 535.

SPA 585 Diagnostic Trends in Audiology
★3 (either term, 0-3s-0). Current research issues and developments in the differential diagnosis of hearing loss. Prerequisite: SPA 514, SPA 536, or Department consent. Formerly SPA 541.

SPA 587 Habilitative Trends in Audiology
★3 (either term, 0-3s-0). Current research issues and developments in amplification systems and communication programs for the congenitally hearing impaired population. Topical focus may vary. Prerequisite: SPA 514, SPA 534, SPA 538, or Department consent. Formerly SPA 551.

SPA 589 Rehabilitative Trends in Audiology
★3 (either term, 0-3s-0). Study of recent research trends in the evaluation and rehabilitation of individuals with acquired hearing impairments. Prerequisite: Department consent. Formerly SPA 553.

SPA 591 Special Topics
★3 (either term, 0-3s-0). Special seminars. Content will vary from year to year. Topics will be announced prior to registration period. The student's transcript will carry a title descriptive of the content. May be repeated. Prerequisite: Department consent. Formerly SPA 570.

SPA 598 Directed Individual Reading and Research
★3 (either term, 0-3s-0). May be repeated. Prerequisite: Department consent.

204.80.5 Proposed MSLP Graduate Courses

SPA 900 ★6 Directed Research Project

REHAB 500 Research Seminar
★3 (either term, 0-3s-0). The examination, evaluation and preparation of the research report. Students will discuss critically various aspects including the selection of the problem, the review of the literature, the research hypothesis, the collection and analysis of the data, and the significance of the research.

SPA 503 Speech and Hearing Science
★3 (either term, 3-0-1). Study of the principles of acoustics and aeromechanics, sound measurement, hearing physiology, speech perception, the acoustical theories of vowel and consonant production, and the physiology of respiration, phonation, articulation and resonance in speech production. Prerequisite or corequisite: ANAT 412 or equivalent.

SPA 507 Phonological Disorders
★3 (either term, 3-0-2). In-depth study of the nature, assessment and remediation of articulatory/phonological disorders according to various theoretical models. Emphasis will be placed on phonologically based clinical approaches including phonological process analysis and generative phonology. Practical experience in assessment and remediation will be provided through clinical observation and laboratory experiences.

SPA 509 Clinical Dysarthria and Dyspraxia
★3 (either term, 3-0-1). Study of dysarthria and dyspraxia (congenital and acquired) including the nature of their underlying neuropathologies, methods of instrumental and perceptual assessment, and systematic instrumental and behavioral management strategies. Students will develop their understanding of the course material via a series of clinical problem solving and treatment planning exercises. Prerequisite: ANAT 412 or equivalent and SPA 503.

SPA 511 Assessment of Children with Language Disorders
★3 (first term, 3-0-2). A comprehensive study of the assessment and identification of children with language disorders. A review of normal language development provides a comparison for deviant language development. Assessment procedures involve language test administration and interpretation. Discussion of research findings highlights disordered language behaviors associated with such problems as mental retardation, emotional problems, and learning disabilities. The laboratory provides experience in administrating a variety of language tests.

SPA 514 Diagnostic Audiology I
★3 (either term, 3-0-2). Study of foundation principles and instrumentation for pure tone and immittance testing. Emphasis is on calibration, evaluation and test result interpretation. Laboratory experience in test administration is provided. Prerequisite or corequisite: SPA 503 and ANAT 412 or equivalent.

SPA 516 Diagnosis and Appraisal of Communication Disorders
★3 (either term, 3-0-1). A study of the principles underlying the evaluative and management procedures in communication disorders. History taking, report writing, recording observations, analysis of tests relevant to the clinical process and test procedure administration will be covered.

SPA 518 Remediation of Child Language Disorders
★3 (second term, 3-0-2). A study of the theoretical models of intervention and clinical application in remediating children's disordered language patterns. Specific attention focused toward commercial and clinician-generated programs that serve these various theoretical frameworks. Discussion of language goals, intervention strategies and accountability measures that serve to guide the therapeutic process and determine treatment effectiveness. The laboratory provides opportunity to observe therapy and design sample language therapy units. Prerequisite: SPA 511.

SPA 520 Clinical Aphasiology
★3 (either term, 3-0-1). Study of acquired aphasia including the nature of the underlying neuropathologies, methods of differential diagnosis and comprehensive assessment, and clinically-pertinent behavioral management strategies. Students will develop their understanding of the course material via a series of clinical problem solving and treatment planning exercises.

SPA 522 Professional Topics in Speech-Language Pathology
★3 (either term, 3-0-0). An orientation to topics critical to effective functioning in the professional community. Topics will include ethics, relationships with allied professionals, administration strategies, and professional networking. Flexibility in course topics will accommodate new issues arising from continued development.

SPA 524 Introduction to Clinical Practicum
★2 (either term, 0-2c-0). Credit. Practical application of clinical procedures under direct supervision. Normally, students will possess an academic background enabling them to assume direct treatment responsibilities with children and adults having disorders of articulation, language, and/or motor speech. A minimum of 25 hours will be accrued.

SPA 526 Voice Disorders
★3 (either term, 3-0-1). A study of etiologic factors involved in voice and resonance disorders and the use of that information to diagnose and provide rehabilitation. Research review relevant to rehabilitation and etiology will be discussed. Prerequisite: ANAT 412 or equivalent.

SPA 528 Stuttering
★3 (either term, 3-0-1). A study of the development, nature and treatment of stuttering with particular emphasis on management strategies.

SPA 530 Craniofacial Anomalies and Communication Disorders
★3 (either term, 3-0-0). Evaluation of recent research important to understanding etiology and physical management of craniofacial anomalies as those procedures relate to and affect resonance, articulation, voice and hearing development. The course will also include observation of diagnostic procedures, surgery and prosthetic management. Prerequisite: ANAT 412 or equivalent.

SPA 532 Advanced Clinical Practicum
★3 (either term, 0-5c-0). Credit. Supervised advanced clinical practicum with a variety of communication disorders. Normally arranged as a part-time commitment in an approved Edmonton area clinical service facility. A minimum of 55 hours will be accrued. Prerequisite: SPA 524.

SPA 533 Advanced Clinical Practicum
★3 (either term, 0-5c-0). Credit. Supervised advanced clinical practicum with a variety of communication disorder.s Normally arranged as a part-time commitment in an approved Edmonton area clinical service facility. A minimum of 55 hours will be accrued. Prerequisite: SPA 532.

SPA 534 Aural Rehabilitation
★3 (either term, 3-0-0). The course provides an in-depth consideration of the auditory communicative problems associated with adult onset hearing loss. Hearing aids and group amplification systems are considered. Prerequisite: ANAT 412 or equivalent; SPA 503; SPA 514.

SPA 536 Clinical Audiology for Speech-Language Pathologists
★3 (either term, 3-0-2). Overview examination of audiologic site-of-lesion tests including speech audiometry, test of recruitment, tone decay tests, vestibular tests and evoked response audiometry. Applications are made of diagnostic audiology tests to special populations. Personal and group amplification systems are considered. Prerequisite: SPA 514.

SPA 538 Habilitative Audiology
★3 (either term, 3-0-2). Consideration of the communication needs of the congenitally hearing impaired population. An intensive study of auditory-oral and manual methods of communication. Experience is provided in administration and interpretation of a variety of diagnostic tests. Assistive listening devices for the hearing impaired are examined. Laboratories provide opportunity for the development of manual communication skills. Prerequisite or corequisite: SPA 514; SPA 534.

SPA 540 Clinical Internship
★3 (13 weeks). Credit. Full-time supervised clinical practice normally for a period of 13 weeks in an approved clinical service facility. Students will have completed all academic course work and will be prepared to work with a broad range of communication disorders under reduced supervision. A minimum of 165 hours will be accrued.

204.81 Statistics and Applied Probability

Department of Statistics and Applied Probability
434 Central Academic Building
University of Alberta
Edmonton, Alberta T6G 2G1

204.81.1 General Information

The Department of Statistics and Applied Probability offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in statistics and/or probability.

For graduate work in the Department a strong background in mathematics and/or statistics is required. Prospective graduate students should consult both the Chair of the Department and the Graduate Coordinator with regard to the facilities available and the background for the field (including any field of application) in which they are particularly interested.

Entrance Requirements:

The Department's minimum admission requirements are an undergraduate degree with an average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). Requirements for admission into a specific program are outlined below, under the appropriate degree heading.

Financial Assistance:

Graduate assistantships are available for candidates working toward a higher degree. They are awarded on the basis of merit and involve at most 12 hours of work per week, including teaching, class preparation and working time. Research grant assistantships are also available.

204.81.2 The Degree of MSc

Candidates for the MSc must have a BSc (Honors) degree or equivalent from a recognized university, with a strong background in mathematics and/or statistics. Candidates holding specialization bachelor's degrees will be required to take additional courses either concurrently with their graduate program or prior to admission as an MSc candidate.

Program Requirements:

The requirements for the MSc can be met either by completing graduate courses with a total of 18 units of course weight and a thesis, or by completing graduate courses with a total of 24 units of course weight and a project equivalent to three units of course weight. Students normally select one of the two programs after their first or second term following admission. Students with a grade point average of less than 7 on courses taken toward the MSc degree will normally be required to select the course-based program. Courses will ordinarily be taken in the Departments of Statistics and Applied Probability, Mathematics, or Computing Science.

There is no language requirement for the MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The MSc program will normally be completed in 20 months of full-time attendance at the University of Alberta, but it can be done in a minimum of one year.

204.81.3 The Degree of PhD

To be admitted as a provisional candidate for the PhD a student must normally hold the equivalent of an MSc degree in statistics or mathematics from the University of Alberta. In addition to the examinations called for by the general regulations, a qualifying examination must be taken at the end of the first year as a provisional candidate. The principal requirement for the PhD is a substantial contribution to knowledge, embodied in a thesis.

Program Requirements:

Except in very special cases, every PhD student will be required to take a minimum of 42 units of course weight in graduate courses or equivalent after the BSc (Honors) degree.

Each student, on admission to graduate work in the Department, will have an advisery committee. The committee will determine, supervise, and modify, if necessary, the student's program of study and research. In order to qualify for a degree, the student must satisfy the departmental requirements described above; the student must also satisfactorily complete the program set up for the student by the advisery committee.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

Candidates will spend at least two years in advanced study and research after the PhD qualifying examination. The time normally required to complete the PhD degree is four years after the BSc (Honors) degree.

STAT 900 ★3 Directed Research Project

Open only to students taking the MSc non-thesis option in statistics.

STAT 501 Introduction to Graduate Statistics I
★1 (either term, 1-0-0). Selected topics as required for graduate study in Statistics.

STAT 502 Introduction to Graduate Statistics II
★1 (either term, 1-0-0). Selected topics as required for graduate study in Statistics.

STAT 558 Techniques of Statistical Analysis I
★3 (first term, 3-0-0). The contents of STAT 558 and 559 will be selected each year from such applied topics as: Sampling methods, Multi-variate Analysis, Nonparametric methods, Combinatorial methods, and Analysis of Design. Prerequisite: STAT 450 or 466 or 471 or equivalent, and consent of department.

STAT 559 Techniques of Statistical Analysis II
★3 (second term, 3-0-0). For course description see STAT 558. Prerequisite: STAT 450 or 471 or 466 or equivalent, and consent of department.

STAT 561 Sample Survey Methodology
★3 (either term, 3-0-0). Review of basic sampling schemes: simple random sampling, and stratified random sampling, and systematic sampling. Multistage sampling schemes. Estimation of nonlinear parameters: ratios, regression coefficients, and correlation coefficients. Variance estimation techniques: linearization, BRR, jackknife, and bootstrap. Selected topics: model-based estimation, regression analysis from complex survey data. Relevant computer packages. Prerequisite: STAT 361, 471.

STAT 563 Theory of Games
★3 (either term, 3-0-0). Games in normal and extended form. Methods of solution. Statistical games. Minimax strategies. Bayes solutions. Linear programming. Prerequisite: STAT 471.

STAT 568 Design and Analysis of Experiments
★3 (either term, 3-0-0). The general linear model. Fully randomized designs, one-way layout, multiple comparisons. Block designs, Latin squares. Factorial designs confounding, fractions. Nested designs, randomization restrictions. Response surface methodology. Analysis of covariance. Prerequisite: STAT 465.

STAT 569 Experimental Design
★3 (either term, 3-0-0). Latin squares. Balanced and partially balanced incomplete blocks. Nested and partially nested models. Two level factorial experiments. Confounding. Higher level factorial designs. Prerequisite: STAT 568 or equivalent.

STAT 575 Multivariate Analysis
★3 (either term, 3-0-0). Multivariate normal distribution, estimation of the mean vector and the covariance matrix. The distribution of the sample covariance matrix and the sample generalized variance, Hotelling's T2. Discriminant analysis. Some statistical applications. Prerequisite: STAT 466, 475 and MATH 227.

STAT 577 Nonparametric Inference
★3 (either term, 3-0-0). Tests for randomness. Rank tests and estimates of location: one-sample and two-sample location model. Nonparametric analysis of variance: one-way and two-way layouts. Nonparametric tests in linear regression. Multivariate location model. Prerequisite: STAT 466, 472.

STAT 578 Regression Analysis
★3 (either term, 3-0-0). Multiple linear regression, ordinary and generalized least squares, partial and multiple correlation. Regression diagnostics, collinearity, model building. Nonlinear regression. Selected topics: robust and nonparametric regression, measurement error models. Prerequisite: STAT 465.

STAT 580 Stochastic Processes
★3 (either term, 3-0-0). Elements of stochastic processes. Discrete and continuous time Markov Chains; Birth and Death processes. Branching processes. Brownian Motion. General Stationary and Markov processes. Examples. Prerequisite: STAT 471.

STAT 661 Stochastic Processes I
★3 (first term, 3-0-0).

STAT 662 Stochastic Processes II
★3 (second term, 3-0-0).

STAT 666 Theory of Point Estimation
★3 (first term, 3-0-0). Concept of decision theory. Exponential families of distributions. Unbiased, equivariant, Bayes and minimax estimation. Large sample theory, asymptotic optimality. Prerequisite: STAT 466, 471, 472.

STAT 667 Theory of Hypothesis Tests and Confidence Regions
★3 (second term, 3-0-0). Optimality criteria, unbiasedness, invariance. Prerequisite: STAT 666, 571.

STAT 671 Probability Theory I
★3 (first term, 3-0-0). Probability spaces, introduction to measure and integration, random variables, types of stochastic convergence. Distribution functions and characteristic functions. Weak limit theorems. Prerequisite: STAT 472.

STAT 672 Probability Theory II
★3 (second term, 3-0-0). Zero-one laws, three-series criterion, laws of iterated logarithm, Central Limit Problem, conditional expectation. Introduction to stochastic processes. Martingales and Markov processes. Prerequisite: STAT 671.

STAT 679 Time Series Analysis
★3 (either term, 3-0-0). The autocorrelation function and spectrum and their estimates. Linear stationary models; autoregressive, moving average, and mixed models. Linear nonstationary models; autoregressive integrated moving average models. Forecasting. Model identification and estimation. Spectral analysis. Prerequisite: STAT 466 or equivalent.

STAT 766 Topics in Statistics I
★3 (first term, 3-0-0).

STAT 767 Topics in Statistics II
★3 (second term, 3-0-0).

STAT 771 Topics in Probability I
★3 (first term, 3-0-0).

204.82 Surgery

Department of Surgery
2D1.02 MacKenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2B7

204.82.1 General Information

The Department offers research facilities in the Surgical Medical Research Institute and the Clinical Research Building for graduate students who wish to register for the degree of MSc or PhD in experimental surgery.

The Surgical Medical Research Institute is well-equipped for all types of experimental work on animals of all sizes. The surgical research laboratories in the Clinical Research Building are well-equipped to meet the requirements for both clinical investigation and related basic studies. Special facilities are available for projects in the fields of experimental, cardiovascular, gastrointestinal, renal, and endocrine physiopathology. An adequately equipped isotope laboratory, a biochemical laboratory and electron microscope laboratory, with technical staff in these laboratories, are able to assist graduate students who wish to carry out research projects.

Inquiries should be directed to the Chair of the Department of Surgery in advance of formal application for admission to the program.

Entrance Requirements:

Normally, an MD degree will be considered an entrance requirement for the MSc program; however, consideration will be given to suitable candidates holding an appropriate Bachelor of Science degree. Applicants for the PhD program must be medical graduates or hold a master's degree. The minimum requirements include a grade-point average of 6.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §202.2.2). Applicants who are graduates of programs, including MD programs, where grades are not assigned will be assessed on an individual basis.

Financial Assistance:

Candidates are encouraged and fully supported in applying to major granting agencies for financial assistance. Limited funds are available in the Department of Surgery for the support of additional candidates.

204.82.2 The Degree of MSc

Program Requirements:

Requirements for the MSc degree include preparation and defence of a thesis based on research performed by the candidate; in addition, all candidates must include some course work specified by their supervisory committee in the program. (Normally, six to nine units of course weight are required.)

There is no language requirement for the degree of MSc.

The minimum residence requirement is one full calendar year of research.

Length of Program:

The time required to complete the MSc will vary according to the candidate's previous training and the nature of the research undertaken; however, a minimum of 12 months is normally required.

204.82.3 The Degree of PhD

Program Requirements:

Requirements for the PhD degree include preparation and defence of a thesis and successful completion of courses taken for graduate credit, as specified by the supervisory committee.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years of study and research is normally required.

204.82.4 Graduate Courses

THES 900 Thesis
THES 999 Thesis

SURG 500 Experimental Surgery
★3 (second term, 0-0-3). Designed to introduce MSc and PhD candidates to basic experimental surgical procedures. Course will include: (a) surgical anatomy of laboratory animals, (b) basic surgical methods, (c) selected methods in experimental surgery. Prerequisite: Consent of department.

SURG 520 Directed Reading in Biomedical Research
★3 (2-0-0). Lecture series on research techniques in the biomedical sciences intended for students with an advanced medical background. Prerequisite: Consent of department

SURG 530 Directed Reading in Biology and Medicine
★3 (either term, 3-0-0). Reading and study of topics in biomedical research of relevance to the student's interest under direction of one or more faculty members.

SURG 600 Research Seminar
★2 (0-1s-0). A weekly series of seminars on current research is held during both terms. Graduate students must attend and make two presentations in this series.

204.83 Zoology

Department of Zoology
CW312 Biological Sciences Building
University of Alberta
Edmonton, Alberta T6G 2E9

204.83.1 General Information

The Department of Zoology has facilities to educate students for the Master of Science and Doctor of Philosophy degrees.

Particular emphasis is laid upon ecology, physiology, limnology, invertebrate zoology, vertebrate paleontology, parasitology, endocrinology, developmental biology, marine biology, systematics and animal behavior. A reference collection of the invertebrate and vertebrate fauna of Alberta is housed in the Department. Electron microscope, histological, radio-biological, controlled environment and outdoor holding facilities are available, as well as general laboratory and collecting equipment. Three biological stations in Alberta serve as headquarters for summer field work. The University of Alberta is a member of the Western Canadian Universities Marine Biological Society and, as such, makes use of the Bamfield Marine Station on Vancouver Island as a site for zoological research.

All inquiries concerning registration and financial assistance should be directed to the Associate Chair of the Department of Zoology. Registration as a graduate student in Zoology is done in consultation with members of the Department.

Entrance Requirements:

The Department generally does not accept students with an overall grade point average of less than 7.0 in their last two undergraduate years at the University of Alberta, or an equivalent qualification from another institution. Where applicable (see calendar §202.2.2) applicants must obtain a score of 550 on the TOEFL test or 85 on the Michigan English Language Battery.

Financial Assistance:

A number of assistantships for graduate students are available. Limited funds are also available for the support of research undertaken during the summer.

204.83.2 The Degree of MSc

Program Requirements:

The MSc program consists of research leading to a thesis and two courses, one of which will be ZOOL 620. Additional courses may be required by the Supervisory Committee.

Candidates for the MSc may be required to show proficiency in one or more languages other than English at the discretion of their supervisory committees.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the MSc will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is normally required.

204.83.3 The Degree of PhD

Program Requirements:

A PhD program consists of research leading to a thesis and ZOOL 620. Additional courses may be required by the Supervisory Committee.

Candidates for the PhD may be required to show proficiency in one or more languages other than English at the discretion of their supervisory committees.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program:

The time required to complete the PhD will vary with the individual candidate; however, a minimum of three years of study and research is normally required.

204.83.4 Undergraduate Courses

The following may be taken for graduate credit:

ZOOL 305 Ichthyology
★3 (first term, 3-0-3). Prerequisite: ZOOL 200 or 225.

ZOOL 306 Ornithology
★3 (first term, 3-0-3). Prerequisite: ZOOL 200 or 226.

ZOOL 307 Herpetology
★3 (second term, 3-0-3). Prerequisite: ZOOL 200 or 226.

ZOOL 308 Mammalogy
★3 (second term, 3-0-3). Prerequisite: ZOOL 200 or 226.

ZOOL 311 Analysis of Animal Development
★3 (first term, 3-0-3). Prerequisite: BIOL 202 and ZOOL 200 or equivalent.

ZOOL 321 Mechanisms of Evolution
★3 (first term, 3-0-0). Prerequisite: GENET 197, ZOOL 231.

ZOOL 331 Animal Population Ecology
★3 (second term, 3-0-3). Prerequisite: ZOOL 231 or equivalent. Offered in alternate years.

ZOOL 332 Animal Community Ecology
★3 (second term, 3-0-3). Prerequisite: ZOOL 231 or equivalent. Offered in alternate years.

ZOOL 335 Principles of Zoological Systematics
★3 (second term, 3-0-0). Prerequisite: A 200-level biological sciences course. Offered in alternate years.

ZOOL 340 Environmental Physiology
★3 (first term, 3-0-0). Prerequisite: ZOOL 241, or 242. Offered in alternate years.

ZOOL 341 Comparative Animal Physiology I
★3 (first term, 3-0-0). Prerequisite: ZOOL 241 or 242.

ZOOL 342 Comparative Animal Physiology II
★3 (second term, 3-0-0). Prerequisite: ZOOL 241 or 242. Offered in alternate years.

ZOOL 343 Comparative Endocrinology
★3 (second term, 3-0-0). Prerequisite: ZOOL 241 or 242. Offered in alternate years.

ZOOL 351 Aquatic Invertebrates of Alberta
★3 (first term, 3-0-3). Prerequisite: ZOOL 250 or 252/253.

ZOOL 352 Principles of Parasitism
★3 (first term, 3-0-3). Prerequisite: ZOOL 231; ZOOL 250 or 252/253.

ZOOL 353 Protozoology
★3 (first term, 0-1s-6). Prerequisite: ZOOL 250 or 252/253. Offered in alternate years.

ZOOL 354 Wildlife Disease
★3 (second term, 3-0-3). Prerequisite: AN SC 350 or FOR 365 or MICRB 265 or 200-level course in Zoology. Offered in alternate years.

ZOOL 361 Marine Biology
★3 (second term, 3-0-0). Prerequisite: ZOOL 250 or 252/253.

ZOOL 366 Boreal Ecology
★3 (second term, 3-0-0). Prerequisite: ZOOL 231, or consent of department. Note: See GEOG 465, 466.

ZOOL 370 Ethological Mechanisms
★3 (first term, 3-0-3). Prerequisite or corequisite: ZOOL 241 or 242.

ZOOL 371 Behavioral Ecology and Sociobiology
★3 (first term, 3-0-3). Prerequisite: ZOOL 231.

ZOOL 382 Comparative Vertebrate Histology
★3 (second term, 3-0-3). Prerequisite: ZOOL 200 or 225.

ZOOL 406 Current Problems in Ornithology
★3 (second term, 3-0-0). Prerequisite: ZOOL 306.

ZOOL 430 Experimental Zoology
★3 (second term, 3-0-3). Prerequisite: STAT 237 and a 300-level biolodical sciences course.

ZOOL 434 Field Course in Animal Ecology
★3 (first term, 0-0-6). Prerequisite: ZOOL 331 or 332; STAT 237.

ZOOL 436 Theoretical Population Biology
★3 (second term, 3-0-3). Prerequisite: MATH 113, STAT 237, ZOOL 231, and a 300-level biological sciences course.

ZOOL 444 Laboratory Experimental in Animal Physiology
★3 (either term, 0-0-6). Prerequisite: ZOOL 340, 341, 342, or 343 and consent of department.

ZOOL 464 Limnology
★3 (first term, 3-0-3). Prerequisite: A 300-level biological sciences course and consent of department.

ZOOL 467 Wildlife Conservation
★3 (first term, 3-0-3). Prerequisite: ZOOL 306 and 308, (or ZOOL 201), and consent of department.

ZOOL 468 Problems in Wildlife Conservation
★3 (second term, 3-0-0). Prerequisite: ZOOL 467 and consent of department.

ZOOL 474 Projects in Animal Behavior
★3 (second term, 0-1s-4). Prerequisite: ZOOL 370 or 371.

ZOOL 495 Honors Research
★3 (either term, 0-0-6). Prerequisite: A 300-level Biological Sciences course. Only open to Honors students.

ZOOL 498 Honors Colloquium
★0 (either term, 0-1s-0). Prerequisite: A 300-level Biological Sciences course. Only open to Honors students.

204.83.5 Graduate Courses

THES 900 Thesis
THES 999 Thesis

ZOOL 420 Seminar in Zoology
★0.0 (0-1s-0). Note: Strongly recommended for all fourth year Honors and first year graduate students. Prerequisite: A 300-level biological sciences course.

ZOOL 422 Molecular Evolutionary Biology
★3 (second term, 3-0-3). Laboratory techniques and the application and interpretation of protein and DNA variation in evolutionary biology: phylogeny reconstruction and vicariance biogeography (with particular emphasis on problems unique to molecular data), paternity analysis, direction and extent of hybridization, various aspects of population structure (e.g., inbreeding, population subdivision). Prerequisite: BIOCH 301 and consent of department. GENET 280 or ZOOL 321 strongly recommended.

ZOOL 423 Current Problems in Evolutionary Genetics
★3 (first term, 3-0-0). Discussion of selected topics in ecological genetics emphasizing both methodology and interpretation. The course will focus on a detailed discussion of a few topics, rather than on a general review, and will rely heavily upon readings from the primary literature. Prerequisite: ZOOL 231 or ZOOL 321 or GENET 280. Credit for this course may be obtained more than once.

ZOOL 429 Special Problems in Zoology
★3 (either term, 3-0-0). Registration will be contingent on the student's having made prior arrangements with a faculty member willing to teach the course. Credit for this course may be obtained more than once. Prerequisite: A 300-level biological sciences course and consent of department.

ZOOL 431 Individual Study
★3 (either term, 0-0-6). Registration will be contingent on the student's having made prior arrangements with a faculty member willing to supervise the program. Successful completion of this course requires an oral presentation on the research project to students registered in the course.Credit for this course may be obtained more than once. Prerequisite: A 300-level biological sciences course and consent of department.

ZOOL 442 Current Problems in Neurobiology
★3 (second term, 3-0-0). Discussion of selected topics in invertebrate and vertebrate neurobiology. Prerequisite: ZOOL 342 or consent of department. Credit for this course may be obtained more than once.

ZOOL 452 Experimental Parasitology
★3 (second term, 0-1s-6). Experimental approaches to study host-parasite relationships including *in vitro* cultivation of parasites, characterization of parasite antigens and molecular mechanisms of host defense. Requirements include a seminar and a research project. Prerequisite: ZOOL 352 and consent of department.

ZOOL 461 Current Problems in Animal Ecology
★3 (second term, 3-0-0). Credit for this course may be obtained more than once. Prerequisite: ZOOL 231 and a 300-level biological sciences course.

ZOOL 471 Current Problems in Animal Behavior
★3 (second term, 3-0-0). Discussion of topics and problems most characteristic of invertebrate behavior (vertebrate behavior treated in ZOOL 371), such as kineses, taxes, complex orientation, species specific behavior, social phenomena and communication. Prerequisite: ZOOL 370 or 371. Offered in alternate years.

ZOOL 472 Current Problems in Behavioral Ecology
★3 (first term, 3-0-0). Discussion of behavioral problems with ecological implications. Prerequisite: ZOOL 370 or 371 or consent of department.

INT D 543 Current Problems in Neuroendocrinology
★3 (second term, 3-0-3). Discussion of selected tpoics in neuroendocrinology. Prerequisite: ZOOL 343 or PHYSL 401. Creidt for this course may be obtained more than once. Offered alternate years.

INT D 544 Physiology of Reproduction
★3 (second term, 3-0-0). [Physiology]

INT D 545 Physiology of Transport Systems
★3 (second term, 3-1s-=0). A consideration of transport, mechanisms primarily from the physiological rather than biochemical viewpoint. Major models considered are the vertebrate erythrocyte and a variety of epithelia from vertebrates and invertebrates. Designed for advanced undergraduate and graduate students. Offered in alternate years. Prerequisite: PHYSL 310 or 352 or ZOOL 241 or 242. [Physiology]

ZOOL 580 Monoclonal Antibodies
★3 (second term, 0-0-6). Laboratory exercises designed to impart training in raising monoclonal antibodies by hybridoma technology and screening antibody production by enzyme linked assay and immunocytochemistry. This course will be organized to include individual projects and is designed for graduate students and senior undergraduate students. Note: Enrolment is strictly restricted due to limited labortory facilities. Consent of the instructor is required.

ZOOL 601 Philosophy, Sociology and Politics of Science
★3 (first term, 3-0-0). Discussion of the influences of current philosophical concepts, and the sociological and political realities, on zoological research and teaching. Prerequisite: Consent of department.

ZOOL 602 Scientific Communication
★3 (second term, 3-0-0). How to write and publish scientific papers, write grant proposals, present results in graphs and tables, and give oral presentations. Prerequisite: Consent of department.

ZOOL 605 Current Problems in Fish Ecology and Systematics
★3 (second term, 3-0-0). Credit for this course may be obtained more than once.

ZOOL 620 Graduate Core Course
★3 (first term, 2-3s-0). A course designed for first-year Zoology graduate students which emphasizes the application of scientific methodology. A major goal of the course will be to illustrate the interdisciplinary nature of zoological research and how such interdisciplinary connections can be relevant to the student's research. Prerequisite: Consent of department.

ZOOL 631 Seminar in Ecology
★1 (either term, 0-2s-0). Credit for this course may be obtained more than once.

ZOOL 642 Seminar in Comparative Animal Physiology
★1 (either term, 0-2s-0). Credit for this course may be obtained more than once.

ZOOL 643 Advanced Comparative Animal Physiology
★3 (either term, 3-0-0). Credit for this course may be obtained more than once.

ZOOL 656 Helminthology
★3 (first term, 0-6L-0).

ZOOL 657 Biology of Parasites
★3 (either term, 3-0-0). Lectures and discussion of selected topics in parasitology. Credit for this course may be obtained more than once.

ZOOL 663 Advanced Ecology
★3 (either term, 3-0-0). Credit for this course may be obtained more than once.

ZOOL 664 Limnology and Fisheries
★1 (either term, 0-2s-0). Credit for this course may be obtained more than once.

ZOOL 665 Aquatic Biology
★3 (second term, 3-0-0). Credit for this course may be obtained more than once.

ZOOL 666 Seminar in Northern Biology
★1 (either term, 0-2s-0). Credit for this course may be obtained more than once.

Note:
(1) See also courses listed under §204.10/Biology.
(2) A list of paleontology courses may be found under §204.58/Paleontology.
(3) See also immunology courses listed under §204.53.5/Microbiology.

Marine Science

MA SC 500 Graduate Level Directed Studies
★6 (0-0-6). A graduate level course of directed studies under the supervision of a member of the faculty. The study will involve a research project provided by the supervisor in the field of interest of the student, and will be designed to take maximum advantage of the laboratory and/or field opportunities offered at Bamfield Marine Station. May be offered over a 3-week period.

MA SC 501 Graduate Level Special Topics
★6 (0-0-6). Courses offered, as opportunities arise, by distinguished scientists who are visiting at Bamfield Marine Station. It is expected that the course will generally be of a specialized nature and will carry graduate credit.

MA SC 502 Graduate Level Special Topics
★3 (0-0-6). Courses offered as opportunities arise, by distinguished scientists who are visiting at Bamfield Marine Station and are prepared to offer a course extending over a three-week period. The course will carry graduate credit.

215.2 General Information

The Faculty of Extension serves as a link between the University and the people of the province who need access to the information and expertise of the University in order to solve practical problems and to further personal and professional growth and interests. Established as the Department of Extension in 1912, the Faculty offers continuing education courses and programs to the provincial community in the areas of business, fine arts, the humanities, the professions, and various sciences. The Faculty also provides books, films, tapes and educational media equipment. Faculty members are involved in consulting, training, and research in adult education. An Annual Report is available upon request.

Brochures giving detailed information on courses or programs may be obtained by calling the particular programming area. For full listings of courses or further information contact the University of Alberta, Faculty of Extension, 8811 - 111 Street, Edmonton, AB, T6G 2G4 or telephone 492-3116. A summary of programs and services follows.

216 Programs and Services

216.1 Adult Education

The Faculty of Extension provides continuing professional education for educators of adults from a wide range of public and private agencies, including business and industry, government departments, social service agencies, hospitals, community organizations, and educational institutions. These seminars and workshops serve instructors, trainers, staff development officers, counsellors, group leaders, curriculum designers and librarians alike. Course topics are aimed at developing competencies associated with the design, development and delivery of adult education and training. A certificate in Adult Continuing Education is now available. Courses are offered both by distance delivery and face-to-face format. Phone 492-7237.

216.2 Agriculture and Forestry

This program area facilitates the development, dissemination, interpretation and application of scientific knowledge and technology in partnership with the Faculty of Agriculture and Forestry, Alberta Agriculture and various other professional and industrial organizations. Activities include conferences, seminars, home-study courses and extension publications designed for professionals in the production, marketing and service areas of agriculture and forestry. Some of the courses and publications in these areas are also of benefit to the novice or amateur. Phone 492-3029.

216.3 Applied Behavioral Sciences

Through this programming area, the Faculty of Extension offers a wide range of psychology and personal development courses for the general public, as well as continuing education for the helping professions. Phone 492-5069.

216.4 Business

This program area provides seminars and short courses for supervisors, managers and human resources staff from business, government and industry. Topics range from general management sales, personnel and small business issues to a variety of general interest courses in personal finance and investment planning. Phone 492-8315.

Courses leading to accreditation in accounting are offered in conjunction with the Society of Management Accountants. Accounting courses qualifying as educational equivalencies for the Society of Management Accountants are offered in conjunction with the Faculty's business certificate programs. Phone 492-3027 or 492-5545.

The Faculty also provides industry-recognized certificate programs in computers and business data processing; management development; personnel administration; and security management. Phone 492-3027 or 492-5545.

In addition, a citation program is offered in supervisory development. Phone 492-8315.

The Faculty also operates an IBM microcomputer laboratory in downtown Edmonton, in cooperation with Edmonton Telephones. In addition, the Faculty operates a Macintosh microcomputer lab in the Campus Tower Building, 8625 - 112 Street. Introductory, intermediate and advanced courses are offered in a variety of convenient formats. Phone 492-5318.

216.5 Community Development and Public Affairs

The Public Affairs program of the Faculty was established in 1963 and the Community Development aspect added in 1967. It has deployed two educational methods: the **practicum advocacy form** to provide a dialogue and information base for adult learners and citizen actives who are seeking to develop a body of concepts and an advocacy posture on matters of topical public policy; and the **classroom mode** to provide for the transfer of a body of knowledge or technical data through workshops, seminars, courses, and conferences. This data may be drawn from industry, academia, or commerce. Topics dealt with by this unit have been social policies, urban planning policies, historic preservation, city transportation, energy and environmental conservation, and local economic development such as the Old Strathcona Historical District. In 1985 the Unit took on the creation of Summer Youth University which now caters to 650 high school students who are expectant University registrants. For the immediate years of 1991 and beyond, the unit is incorporating a set of permanent programs for the institutionalization of Environmental Education.

216.6 English Language Program

The English Language program area offers levels of training from basic to advanced for non-native speakers who wish to improve their command of English reading, writing and conversation. Forty-hour evening courses, 200-hour intensive day courses and special intensive day courses, ranging from 100 to 500 hours, are offered through the program.

Teaching English as a Second Language courses are also offered for those interested in learning more about this area. Phone 492-3036.

216.7 Fine Arts

The Faculty offers a wide range of courses in many areas of the fine arts, including art history, ceramics, design, drama, drawing and painting, film studies, music, photography, printmaking and professional development for artists and others in the arts community. Offerings range from short workshops to 20-week courses. While many of the classes are held in the Faculty's own studios, others are offered in rural communities as part of the Faculty's long-standing community art program. The Fine Arts Program also hosts conferences for artists and art programmers and plays an active consultative role in the cultural community. Phone 492-3034.

216.8 Government Studies

The three program units within Government Studies, Faculty of Extension, focus continuing education programming to the public sector, including federal, provincial, municipal, university, and not-for-profit administrators.

Local Government Programs provide a variety of programs throughout the province for appointed municipal officials and school authorities, assessors, and tax agents. Certificate and Citation programs are offered in the areas of local government administration and municipal assessment. A Senior Executive Fellows program is geared to senior level local government administrators.

Public Policy Programs, in conjunction with various government departments and municipal associations address policy issues in a variety of areas. Traditionally, two yearly conferences are held for local government officials, both elected and appointed. Recently a growing number of programs have been offered to develop political leadership of both incumbent and newly elected municipal officials.

Public Administration Programs provide continuing education for practising and aspiring public administrators and managers. Offerings include a certificate program in public administration and a citation program in public management as well as general management seminars, colloquia, and conferences.

Phone 492-5052 for information on any of the Government Studies programs.

216.9 Land Economics and Real Estate

Educational program offerings in Land Economics and Real Estate include a Certificate in Real Estate, approved courses for Professional Designations in the real estate industry, a series of seminars in Real Estate Management, a Real Estate 1000 Course, and short courses in Home Management.

Real Estate Certificate, Seminar, and Professional Designation courses, directed toward real estate practitioners, institutional investors, property developers, construction personnel, professionals, and interested individuals, aim to equip students to function more efficiently and effectively in their working environments by providing a combination of theory and practical information with a major focus on current real property issues and market direction. Real Estate 1000 is an entry-level mandatory prelicensing education program for all prospective real estate sales personnel. Short courses in Home Ownership and Interior Design offer a diverse range of educational opportunities in home management for the public of Alberta.

216.10 Law

This program area is served through the Legal Resource Centre, which provides a variety of legal education opportunities, including library services, consulting services, courses, seminars, workshops, publications and research assistance. Activities are designed chiefly to meet the needs of teachers, librarians and community leaders; however, members of the general public and the legal profession also make use of the resources. The centre's Applied Legal Studies Program is designed for anyone who would benefit professionally from a greater understanding of the law and for those who have a general interest in the law. Phone 492-5732.

The centre is also active in promoting the need for a comprehensive approach to legal education and maintains a toll-free Public Legal Education Hotline (1-800-232-1961) which provides information about province-wide legal education services.

216.11 Liberal Studies

The Faculty offers a wide range of non-credit courses for the public through its Liberal Studies program. Content is drawn mainly from the Humanities and Social Sciences and includes a large conversational French program, an extensive writing program, courses in classics and modern languages and literature, as well as history, religion and current issues. The annual Spring Session for Seniors program and opportunities to study abroad are also part of this program. Phone 492-5055.

216.12 Science and Technology

The Faculty offers certificate programs in Occupational Safety for industrial managers and technicians; Gerontology for nurses, social workers, or staff at nursing homes and hospitals; and Construction Administration for junior administrators. A variety of courses, seminars, and short courses in design and development, technology, fitness, health science, and general sciences are also offered. Topics include professional development in the construction industry, biology, geology, transportation, gerontology, health promotion, and traffic safety. Phone 492-2015.

In conjunction with the Faculty of Nursing, Extension provides continuing education courses, seminars, workshops and conferences for members of the nursing profession. Phone 492-2015.

216.13 Special Sessions

The Office of Special Sessions organizes and administers the delivery of degree-credit courses from 60 departments in 15 other University faculties.

It provides extra-sessional credit course opportunities through Intersession (Spring and Summer terms) and the Off-Campus Credit Program at both undergraduate and graduate levels to full- and part-time students. The Spring and Summer terms provide a wide variety of degree credit courses from May through August on the university campus, while the Off-Campus Program provides students with credit course opportunities in their home communities.

These sessions provide students already in programs with an ideal opportunity to complete or supplement their degree. In addition, new students may embark on a university degree through these sessions.

Besides providing individually arranged courses, the Off-Campus Credit Program offers programming in Slave Lake and Spruce Grove enabling students to attend full-time or part-time at the first-year university level and, in some cases, the second-year level. Phone 492-3752.

216.14 Women's Program

The Women's Program located at 11019 - 90 Avenue provides non-credit courses and services of special interest to women. The overall goal is to provide a program which increases awareness of the position of women in society and options for improving that position both individually and collectively.

The Women's Program offers a wide range of courses, seminars, and workshops in applied women's studies, personal, and career development. The Women's Program works closely with a variety of women's groups and sponsors provincial women's conferences, public forums, and lectures. Phone 492-3093 for more information or to have your name added to the mailing list.

216.15 Adult Student Centre

The Adult Student Centre, located in Room B-03 of the Campus Tower Building, 8625 - 112 Street, serves the informational needs of Faculty of Extension students and the community. In addition to substantial book collections to service a broad range of Extension courses, the centre houses the most extensive adult education library on campus. The centre also acts as a distribution point for Educational Media Services' collection of records, audiocassettes, laserdiscs, compact discs, and videocassettes. The centre's print resources are used by Extension students and staff and students in the Faculty of Education and other parts of the University. The nonprint collections of audio and video materials are available to the general public on a service fee basis. Phone 492-5044.

216.16 Educational Media Services

Educational Media Services, located in Room B-02 of the Campus Tower Building, 8625 - 112 Street, provides equipment, educational materials, consultation, and production services to support the Faculty's continuing education courses. Educational materials are also supplied to other faculties and departments for their credit programs. A province-wide materials service is provided to other educational institutions, government agencies, businesses, community organizations, and individuals. Individual home-use materials are housed in the Adult Student Centre and are available on a membership service fee basis. A large library of 16 mm educational films, as well as a growing collection of videocassettes, are available for educational programs. Other resources include slide-tape sets and overhead transparencies. Phone 492-5041.

216.17 Legal Resource Centre Library

Located at 10049 - 81 Avenue, the Legal Resource Centre houses a library of legal education materials which is open to the public. Phone 492-5732.

216.18 Women's Resource Centre

The Women's Resource Centre at 11019 - 90 Avenue, Edmonton supports the activities of the Women's Program, Faculty of Extension and addresses the informational needs of women in the community. It contains books, periodicals, and offprints for, by, and about women. It is open to the public. Phone 492-3093.

Awards

221 Introduction

The Office of Student Awards at the University of Alberta provides overall direction, planning and on-going management of university entrance, undergraduate, graduate, and post-doctorate scholarship and fellowship support programs. The Office is primarily an academic service unit in that it coordinates the awards administration function for all faculties on campus, implements the awards policies made by the various policy-making bodies, reports back to these committees on issues and concerns that are identified, and provides an administrative liaison function to external funding agencies offering awards to University of Alberta students.

In its dealings with students, the Office's primary role is that of an information service. It advertises and informs students of awards opportunities available, informs students of the application and selection processes for both on and off-campus scholarship competitions, and advises students on techniques which will help them maximize their chances of receiving an award.

For further information regarding awards, contact the Office of Student Awards, 252 Athabasca Hall (492-3221).

221.1 Director of Student Awards

R Chilibeck, BEd

221.2 General Information

This Calendar includes a list of awards of all kinds and of financial assistance available to students at the University of Alberta as shown in the Table of Contents.

Students of high ability or those who require financial assistance are urged to read carefully the sections of interest to them.

Application forms may be obtained from the Student Awards Office, and completed forms must be received by the Student Awards Office by the dates indicated in the various sections.

The University assumes liability for the payment of fellowships, scholarships, bursaries, prizes, and other awards only to the extent that gifts from donors, or returns from particular investments for these purposes, will permit.

For information regarding assistance under the Provincial Students Finance Act or the Canada Student Loans Plan refer to the special sections in this Calendar.

As this Calendar is published a considerable time before the opening of the session, the University reserves the right to make whatever changes circumstances may require, including the cancellation of particular awards.

222 Awards Open to All Faculties

222.1 Matriculation Awards

222.1.1 General Information

Unless otherwise stated in the terms of any award, these awards are tenable only at the University of Alberta, Edmonton. There are a few which are also tenable at colleges affiliated with the University. Unless otherwise stated, matriculation awards are for students entering the University for the first time. Students who have attended other postsecondary institutions are ineligible.

Students entering the first year of Faculté Saint-Jean are eligible for these awards and may apply on the University of Alberta Matriculation Scholarship application form, or may apply directly to any of the other donors as indicated.

In order that funds be broadly distributed, no undergraduate student may hold more than one University of Alberta major award in any one year. All monetary awards, except certain cash prizes, are contingent upon students proceeding with their university programs in the **immediate, next academic session** and are payable only when students are in actual full-time attendance at the University. Payment of tuition fees is a first charge against such awards. The minimum value of a major award shall be determined by the Undergraduate Awards and Scholarship Committee and reviewed by that Committee. The current minimum value of a major award is approximately $2,500.

Completed application forms must be received as indicated in the terms of the various awards. Awards will be announced about October 1.

For scholarship purposes the University of Alberta will compute matriculation averages as follows:
The mark in English 30 and the best four other marks in subjects from Group A (Humanities) and Group C (Sciences). The classification of subjects is as follows:

Group A (Humanities)
Social Studies 30
English 30
30-level language other than English
Additional 30-level language other than English

Group C (Sciences)
Biology 30
Chemistry 30
Mathematics 30
Mathematics 31

222.2 Undergraduate Awards

222.2.1 General Information

Application forms for awards which require application may be obtained from the Student Awards Office. For undergraduates the due date for completed application forms in most cases is June 3. Where no application information is listed, the award is made automatically without application.

Normally, unless otherwise stated, these awards are based on the grade point average obtained on a full normal load of academic work (30 units of course weight or as defined by the Faculty) done only at this University during the preceding Winter Session (September to April). Where an award is listed in a particular Faculty, it is generally tenable in that Faculty (except course prizes which are open to any full-time student in that course). In order that funds be broadly distributed, no undergraduate student may hold more than one University of Alberta major award in any one year. The minimum value of a major award shall be determined by the Undergraduate Awards and Scholarship Committee and reviewed by that Committee. The current minimum value of a major award is approximately $2,500.

Eligibility for the following existing academic awards is open to all undergraduate students, based upon outstanding academic merit: Faculty Club Scholarship, Peter Lougheed Scholarships, Lou Hyndman Edmonton Glenora Scholarships, Arthur Scroggie Scholarship, University of Alberta Undergraduate Prizes, University of Alberta Undergraduate Scholarships, and Louise McKinney Scholarships. Students who are enrolled in less than a full-course load are allowed to apply for these awards when they have accumulated the equivalent of a full, normal course load as defined by the Faculty. For awards purposes, all those courses taken in the terms used to accumulate the minimum number of courses for a full, normal course load will be used to calculate the awards GPA. In the case of the Leadership awards, the policies and procedures will be adjusted so that students meeting the academic and leadership criteria are assured that they will have at least one opportunity to apply during their academic careers.

Awards will be announced as they are made from May through to September.

Unless otherwise stated, monetary awards, except certain cash prizes, are contingent upon the student's proceeding with his or her university program in the immediate next academic session, and are payable only when the student is in actual full-time attendance at the University. The payment of tuition fees is a first charge against such awards.

The University assumes liability for the payment of scholarships, bursaries, prizes, and other awards only to the extent that gifts from donors or returns from particular investments for these purposes will permit. For matriculation awards, refer to §222.1. For awards in graduate study, refer to §224 or the Graduate Studies and Research section of this Calendar.

224 Awards in the Faculty of Graduate Studies and Research

224.1 General Information

Regulations Governing Graduate Awards

Scholarships, Fellowships, Bursaries, and Prizes

The following regulations apply to holders of scholarships, fellowships, bursaries, and prizes (known as "awards").

If an agency administering an award has published regulations which disagree with any of the regulations outlined herein, then the regulations of the agency shall take precedence.

Major Versus Minor Awards

For the purposes of these regulations, a major award is considered to be one valued at a minimum of $6,000 over an 8-month period or a minimum of $9,000 over a 12-month award period (or the equivalent for other award periods). A minor award is one valued at less than a major award.

Conditions of Appointment and Acceptance

Dissertation Fellowship Holders

A student awarded a Dissertation Fellowship is not eligible for any further assistance from scholarship or assistantship funds after the conclusion of the 12-month tenure.

Income Tax

Scholarships, fellowships, bursaries, prizes, and so on, are subject to income tax and must be reported as income. For some major awards tax deductions may be made at the source. There is an exemption of up to $500 allowed against the aggregate of such income for the individual.

Acceptance of Multiple Awards

A student holding a major award from any source may hold additional awards totaling not more than $6,000 for 8 months or $9,000 over 12 months from sources administered by the University.

Acceptance of Awards by Full-time GA's

Full-time graduate assistants (GA's) may accept awards from sources administered by the University of not more than $6,000 in an 8-month period or $9,000 over a 12-month period.

Duties and Responsibilities

The University of Alberta recognizes that awards are given to students to enable them to carry out scholarly activities. The University and the department therefore have a responsibility not to encumber an award-holder with other duties to the extent that he or she may not devote ample time to creative scholarship.

Acceptance of Other Remunerative Assignments

Holders of Dissertation Fellowships may not accept any other remuneration for University or departmental duties. All other major award holders may accept a teaching or other remunerative assignment involving no more than 200 hours during the 12-month academic year commencing September 1. (Two hundred hours is the equivalent of a 6 hour-per-week assignment for the academic session, September to April, a 12 hour-per-week assignment during any 4-month term or 4 hour-per-week assignment during any 12-month assignment.)

Notwithstanding the above, holders of major awards must not be prohibited from matching the income of a full GA by combining a part-time GA (where applicable) with a major award, provided that this is allowed under the donor agency regulations.

Termination of Awards

Recipients who are able to complete their program in less than 12 months are expected to do so. If you complete your program in a period shorter than 12 months, the award will be terminated in a period not exceeding one month from the date of successful completion of the final oral examination. Written request for extension beyond one month must be submitted to the Secretary, Graduate Scholarship Committee, Office of Student Awards by the Department Chair for review by the Graduate Scholarship Committee.

Awards will be terminated on a prorated basis from the date you cease to be a full-time student if the recipient withdraws or is required to withdraw from his/her program.

You must notify the Office of Student Awards, in

writing, immediately following the successful completion of your final oral examination, or upon submission of your completed project or immediately following the termination of your program.

The following Scholarships and Fellowships are awarded primarily on the basis of academic standing. In general, awards are usually made only to applicants whose previous academic standing is First Class. Students admitted to a "Qualifying year" are not eligible for scholarships or fellowships.

Unless otherwise stated, awards are for one year only, but application for renewal will be considered in open competition. No award will be made to other than a full-time student. Unless otherwise stated, awards are tenable only at the University of Alberta.

In order that awards may be equitably distributed, no student may hold more than one award in a given year. A major award is defined generally as a minimum of $6,000 payable over eight months or $9,000 for twelve months. A student holding a major award from any source may hold additional awards totalling not more than $6,000 for 8 months or $9,000 for 12 months from sources administered by the University.

Major award holders may accept a teaching or other remunerative assignment involving no more than 200 hours during the 12 month academic year commencing September 1. (200 hours is the equivalent of a 6-hour per week assignment for the academic session, September to April, or 12 hours per week during any 4-month term.) Notwithstanding the above, holders of major awards must not be prohibited from matching the income of a full G.Ap. by combining a part G.Ap. (where applicable with a major award, provided that this is allowed under the donor agency regulations). A student who is awarded a Dissertation Fellowship may not be given any departmental duties during the period of tenure of the fellowship. Recipients of twelve month awards are expected to maintain full-time student status and to carry out a full-time research project during the Interssion, or to take a sufficient number of courses during the Interssion to maintain full-time student status.

Holders of awards must pay regular tuition fees unless otherwise stated.

All Fellowships, Scholarships, Assistantships, etc., are subject to Canadian Income Tax.

228.3 The Canada Student Loans Plan

The Canada Student Loans Plan was inaugurated in September 1964. Under this plan full-time and part-time students are permitted to borrow, on the basis of financial need.

Applicants must be Canadian Citizens, or have Permanent Resident (Landed Immigrant) status and have lived in Canada for at least a year and state an intention to live in Canada after graduation.

Students whose home residence is, or has been, in another province for the past twelve months should apply through that Province.

In the Province of Alberta the same application form covers both the Provincial Students Finance Act and the Canada Student Loans Plan. Assistance may be given under one or other or both plans on the same application form.

228.4 Federal-Provincial Bilingual Education Program

Funds may be provided for Alberta students pursuing post-secondary studies in the French language. The eligibility criteria for a bilingual fellowship are as follows: the student is a Canadian Citizen or a Permanent Resident (Landed Immigrant); the student is a resident of Alberta; the student has been accepted by a Canadian post-secondary institution providing a milieu conducive to acquiring a better command of his or her second language and is currently enrolled in French language instruction, normally for at least 60% of a full-time program of studies.

The maximum amount of a fellowship is $2,000. which is non-renewable. Preference is given to students registering in Quebec universities, but students of French attending Alberta institutions may be granted smaller awards.

In addition, students who have been awarded the maximum fellowship and who are pursuing their studies in a francophone institution outside the province, may, in subsequent years of their program, qualify for travel bursaries.

The deadline for receipt of applications for the fellowship is September 30th. Applications for the travel bursary may be submitted at any time during the year. Application forms and further information may be obtained from: Students' Finance Board, 10th Floor, Baker Centre, 10025 - 106 Street, Edmonton, Alberta, T6J 1G7.

228.5 Northern Alberta Development Bursaries

The Northern Alberta Development Council Bursary program is intended to offer students who have been long term (3 years) residents of Alberta special bursary assistance where these students demonstrate that they intend to apply their education after graduation in the remote areas of the province. The actual amount of the bursary is dependent upon such factors as the need of the student. Any student who receives a bursary will sign an agreement acknowledging that they will work in a remote area of the province for one year of each year of full bursary support. For further information please contact: The Secretary Northern Alberta Bursary Committee Students Finance Board 10th Floor, Baker Centre 10025 - 106 Street Edmonton, Alberta T6J 1G7.

229 Other Sources of Financial Assistance

The Maude Abbott Memorial Loan Fund

This fund has been established by the Federation of Medical Women of Canada. Loans up to $350 per year are available to women medical students or first year interns. A loan up to $1,000 may be granted to a medical woman for postgraduate training.

Apply to The Maude Abbott Memorial Fund, c/o The Federation of Medical Women of Canada, 1867 Vista Drive, Ottawa, Ontario.

The Alberta Dental Association Student Loan Fund

The Association has established a loan fund for undergraduate students in the Faculty of Dentistry.

Apply to the Office of the Dean of Dentistry.

The American Dental Trade Association

The Association has made available a sum of $700 annually to be issued as loans to students who have entered or are about to enter, the final year in the Faculty of Dentistry and who require financial assistance. Application should be made to the Dean.

The Association of Professional Engineers, Geologists and Geophysicists of Alberta Student Loan Fund

The Association has provided a fund from which loans may be made to students in Engineering, Geology or Geophysics. This fund is designed for emergency loans and generally students should have exhausted the other normal sources first.

Apply to the Dean of Engineering or the Chair of the Department of Geology or of Physics.

Bulkley Valley Cattlemen's Association Bursary

Valued at $500, this bursary is available to students entering first or second year postsecondary training in agriculture. Applicants must be from the Bulkley Valley area in British Columbia. Application forms available from the Registrar or Bulkley Valley Cattlemen's Association, Box 415, Smithers, BC, V0J 2N0.

The Samuel Gadeski Loan Fund

Loans and fellowship grants are open to residents of Alberta for the purpose of obtaining post-graduate education. For further information contact: The Executive Director of the Provincial Hospitals Board, 11560 University Avenue, Edmonton, Alberta, Canada, T6G 1Z2.

Kellogg Foundation Fund Loans

Through the generosity of the Kellogg Foundation of Battle Creek, Michigan, a sum of money has been made available to serve as a revolving fund to provide a limited number of loans to needy students in Medicine or Dentistry. For particulars in regard to these, apply to the Dean of Medicine or Dentistry.

The George E McDougall Loan Fund

The fund was established to assist needy students in Engineering. Inquiries should be made to the Director of Student Awards.

Medical Class of '41 Loan Fund

A fund has been established by the Medical class of '41 from which small loans may be made at the discretion of the Dean of Medicine. Inquiries should be made at the office of the Dean of Medicine.

Proctor and Gamble Forestry Student Bursary Fund

This fund was established by forestry staff of Proctor and Gamble Cellulose Ltd. It is designed to provide emergency assistance to forestry students and support to forestry student activities at the discretion of the Department of Forest Science.

The Joseph Stiles Beggs Bursary Fund

This small bursary fund was established to help needy students by Mr and Mrs Joseph Stiles Beggs of California.

The Albert Strickler Memorial Loan Fund

This fund, which is administered from Philadelphia, provides for loans up to $600 for students in the Faculty of Medicine. While this is not restricted to American citizens, it may be of particular interest to any such who are studying at this University. Apply to the Office of the Dean of Medicine.

Terwillegar Memorial Fund

This fund was established by Dr Norman L. Terwillegar in memory of his only sons, Norman Allin, who was killed while serving with the British Navy, and William Robert, who served in the Royal Canadian Air Force and who died while attending Queen's University; both were former students of the University of Alberta.

The proceeds of the fund will be available to suitably qualified students in Medicine or Engineering in the form of loans, free of interest to the date of graduation. Application forms and further information may be obtained from the Deans of Medicine and Engineering.

WR Zeidler Memorial Loan Fund

This fund which is administered by the Department of Forestry, was established by the Zeidler Forest Industries Limited in memory of its founder, Mr WR Zeidler. Small interest free loans to Forestry students may be made from this fund.

230 Canadian Armed Forces Subsidization Plans

230.1 General Information

The high professional ability required of present day military officers demands the best in education and training. The Department of National Defence therefore sponsors programs of university education and leadership training for selected young men and women who have the potential to become officers in the Canadian Armed Forces. The admission standards are high, but for those who qualify the way is open to a challenging and rewarding career.

The programs sponsored are the Regular Officer Training Plan, (ROTP), Medical Officer Training Plan, (MOTP), Dental Officer Training Plan (DOTP) and Reserve Entry Training Plan (RETP). Training given under these plans is divided into two parts: normal attendance at university throughout the academic year and military training each summer.

230.2 Regular Officer Training Plan

This plan combines university subsidization with career training as an officer in the Regular Component of the Canadian Forces. Successful applicants are enrolled in the rank of Officer Cadet. They are required to maintain a good standing both academically and militarily while in the plan. All tuition and other essential fees are paid by the Department of National Defence. In addition the Officer Cadet receives an annual grant to purchase books and instruments, and is paid for personal and living expenses. This increases annually. Free medical and dental care is provided. Annual leave (20 working days) with full pay and allowances may be granted each year, usually after the summer training period. Subsidization may be available in Engineering, Applied Science, Arts, Physiotherapy, Pharmacy and BSc in Nursing.

230.3 Medical Officer Training Plan

The Medical Officer Training Plan provides, at public expense, academic and internship training of not more than three years and nine months of the final medical studies, including compulsory internship, for undergraduates of Canadian medical schools who enrol in the Canadian Forces for service as Medical Officers. It consists of paid tuition, an annual book and instrument grant, complete medical and dental coverage, paid holidays and monthly pay of 2nd Lieutenant. Three years military service in the Canadian Armed Forces starting with the rank of Captain, is required upon obtaining your licence to practice medicine.

230.4 Dental Officer Training Plan

Sponsorship is provided under the Dental Officer Training Plan during the first, second, third, and fourth year of dentistry. Subsidization consists of paid tuition, an annual book and instrument grant, complete medical and dental coverage, paid holiday and monthly pay for personal and living expenses. Four years military service in the Canadian Armed Forces starting with the rank of Captain is required upon receiving your licence to practise dentistry. Three years obligatory military service applies for successful candidates who are sponsored for three years or less.

230.5 Reserve Entry Training Plan

This plan provides an opportunity for selected undergraduates to prepare themselves for promotion to commissioned rank in the Reserve Component of the Canadian Forces. They are selected during the later months of the University year by the local Reserve Unit and are enrolled as Officer Cadets in the Primary Reserve. Cadets receive pay for training completed at local Reserve Units during the academic year (up to 15 days) and at training bases during the summer (up to 16 weeks).

230.6 Admission Requirements

An applicant must:

(1) be a Canadian Citizen;
(2) be physically fit for enrolment in the forces; and
(3) if ROTP, be between the ages of 16 and 21 on the first of January of the year of commencement of first year studies at University; if MOTP and DOTP, be between the ages of 17 and 35; RETP from 17 to 23.

Note: The above plans are subject to change without notice. The monthly pay associated with each plan normally increases annually.

230.7 How to Apply

Students interested in ROTP, MOTP or DOTP are requested to contact the following:

Commanding Officer
Canadian Forces Recruiting Centre
10414 - 103 Street
Edmonton, Alberta T5J 0J1

Students interested in RETP are requested to contact the following:

General Information

241 University History and Traditions

241.1 Historical Sketch

241.1.1 Introductory

The University of Alberta is a publicly supported, non-demoninational, co-educational institution. It is a member of the Association of Commonwealth Universities and of the Association of Universities and Colleges of Canada.

The University's main campus of 89 hectares borders the wooded southern bank of the North Saskatchewan River and lies about two miles from Edmonton's business centre. Away from the main campus, the University Farm occupies approximately 148 hectares; other holdings include the botanical gardens near Devon and lands as far distant as Fort Assiniboine. A considerable area is held under rental agreements, including the Ellerslie farm and the Kinsella ranch.

Some two dozen major teaching and research buildings are situated on the campus as well as two affiliated colleges, six halls of residence, the Students' Union, and service buildings. Michener Park, once part of the University Farm, is a student housing area. South of 87th Avenue, on lands formerly part of the original campus, are the quarters of the Research Council of Alberta, the Provincial Laboratory of Public Health, two teaching hospitals, the Edmonton Veterans' Hospital, the Aberhart Sanatorium, the Dr. W W Cross Cancer Institute, and the Northern Alberta Jubilee Auditorium.

241.1.2 The Beginnings of the University

Alberta became a province in 1905. In 1906 the first session of legislature passed an act to authorize the establishment of the University of Alberta. The act's sponsor was Alexander Cameron Rutherford, Alberta's first Premier and first Minister of Education. His government purchased the site in what was then Strathcona, and Dr. Rutherford himself persuaded Henry Marshall Tory to leave McGill to become the University's first President, an office he held from 1908 to 1928.

The act permitted all resident graduates of British and Canadian universities to register as members of Convocation. Convocation elected five members to a Senate; the government appointed ten more. The Senate, acting as the governing body of the University, established the Faculty of Arts and Science as the core of the new institution. In 1910 a revision of the University Act constituted the Board of Governors, with powers of business management and administration.

Classes opened in September, 1908, in what is now Queen Alexandra School with forty-five students and a faculty of five: WH Alexander, Classics; EK Broadus, English; WM Edwards, Mathematics; LH Alexander, Modern Languages; and Dr. Tory himself. Thence they moved to the upper floor of Strathcona Collegiate Institute and then in 1911 to Athabasca Hall. Athabasca not only served as residence for staff and students, but also accommodated classrooms, laboratories, the library, the gymnasium, and the administrative offices. The members of the first graduating class received their degrees at the Convocation of 1912, with Mr. Justice CA Stuart presiding as Chancellor.

A period of rapid growth followed, with registration reaching 439 in 1914. Assiniboia Hall was completed in 1913, Pembina Hall in 1914, and the Arts Building was formally opened in 1915. The Faculty of Law had its beginning in 1912. In the same year the Department of Extension initiated its work of promoting a closer relationship between the University and the people of the province. In 1913 the Faculty of Applied Science (renamed Engineering in 1948) and the Faculty of Medicine were instituted, the latter able to offer three years of a five-year program.

The Students' Union was established during the first session and the first edition of The Gateway, the students' newspaper, appeared in 1911. The Committee on Student Affairs began in 1912 as a joint committee of students and University officials to exercise general supervision over matters affecting student welfare and discipline. Today the Council on Student Affairs carries on its work.

241.1.3 Years of Challenge: 1914 to 1945

The outbreak of war in 1914 slowed the pace of development. The new University sent 438 of its staff, alumni, and students to the armed forces. Eighty-two were killed or died on active service. Their names, together with those of the casualties of the war of 1939-45, are commemorated on a bronze tablet near the entrance to Convocation Hall.

Although the war brought a halt to the building activity, the organization of the University's teaching moved on with the establishment of the Faculty of Agriculture in 1915, the School of Accounting (later the Faculty of Commerce, and now the Faculty of Business) in 1916, the School of Pharmacy and the sub-faculty of Dentistry in 1917, and the Department of Household Economics in 1918 (all of which have since become faculties).

With the end of the Great War the University rapidly expanded in number of students and staff. New laboratories were built adjacent to the Arts Building, and the Medical Building was completed in 1921 in the form it had until new wings were added following the war of 1939-45. The curriculum was fundamentally revised in 1919-1920 to permit greater freedom in election of courses. The first summer session was held in 1919. The institution of the Research Council of Alberta signified not only an increasing emphasis on science, but a further recognition of the University's involvement in the development of the province.

In 1927 St. Joseph's College was opened under Roman Catholic auspices. St. Stephen's College had been, as Alberta College South, the first building on the campus. After the union of the Methodist and Presbyterian churches, it was renamed in 1927 and became the United Church theological college for Alberta.

The depression years brought serious problems. Though registration did not decline, its increase was painfully slow, from 1,560 students in 1929 to 2,327 in 1939. Full-time teaching staff increased even more slowly. The budget actually fell and did not recover to its pre-depression level until after the war. No new building took place after the present Corbett Hall was completed. (Corbett Hall was originally constructed as a provincial normal school, not a University building.) RC Wallace succeeded President Tory in 1928, and in 1936 was followed by WAR Kerr, who had been the first Dean of the Faculty of Arts and Science. The affiliation of Mount Royal College in 1931 marked a new beginning of university work in Calgary. The Banff School of Fine Arts opened in 1933 and the Western Board of Music was established in 1931. Entrance to the University from Grade XI was abolished in 1937. In 1930 fraternities were permitted; a less controversial change was the abolition of the old practices involved in freshman initiation.

The impact of the war of 1939 was very different from that of 1914-18. Though war naturally disrupted the University's life, there was a determination to preserve its essential being while using its facilities as fully as possible in relation to the national effort. The Air Force took over the three residences and out-of-town students, whose number had not substantially declined, flocked into Garneau boarding houses and made use of a new cafeteria known to later generations as Hot Caf (which was demolished in 1969 to provide the site for the Central Academic Building). Medicine, Dentistry, and Education offered accelerated courses. Engineering offered special courses to members of the armed services. No more important development took place than the acceptance in 1945 by the University of sole responsibility for the training of Alberta teachers. The School of Education, established in 1928, became a faculty in 1942, and after the war it became, in terms of enrollment, the largest in the University.

Robert Newton was named President on WAR Kerr's retirement in 1941. He played an important part in the framing of the University Act of 1942, which transferred from the Senate to the General Faculty Council jurisdiction over academic matters and vested all final authority in the Board of Governors, whose jurisdiction had previously been confined to finance.

241.1.4 Years of Expansion: 1945 to 1969

With the end of the war, a flood of veterans poured into the University and registration rose from 2,023 in 1943-44 to a peak of nearly 5,000 in 1947-48. Accommodation in classrooms, laboratories, and libraries was pathetically inadequate, and housing was generally even less satisfactory. Army huts only partially relieved the pressure. While by 1947 student numbers had tripled from pre-war figures, the full-time teaching staff did not even double. Thereafter the pace of campus development slowly increased. New wings were added to the Medical Building in 1947 and 1948; the first Students' Union Building opened in 1950, the Rutherford Library and the Engineering Building in 1951, and the Agriculture Building in 1953 (now, after enlargements and renovations, the Earth Sciences Building). The Administration Building dates from 1957.

The hectic post-war years merged into the slower growth of the 1950s. Andrew Stewart became president in 1950 and was succeeded by Walter H. Johns, who served from 1959 to 1969. In that ten-year period the enrollment rose from approximately 5,000 to 17,500, as the post-war generation came to university age.

This unprecedented increase in numbers made necessary the rapid construction of new buildings during the 1960s. The Physical Education Building, the Physical Sciences Building, and additions to the Medical and Engineering Buildings were followed by the Education Building in 1963, the Donald Ewing Cameron Library, the Household Economics Building, and the new residences named after western explorers. The dining centre was named in honor of Reg Lister, who had for so many years taken care of the older residences. The Henry Marshall Tory Building was opened in 1966, Phase I of the Engineering Centre in 1968, and the Clinical Sciences Building of the Faculty of Medicine in 1969. A new Students' Union Building opened in 1967.

No major changes in the University's legal status occurred until the Act of 1966 provided for the establishment of other and separate provincial universities under a Universities' Commission, which has since disbanded.

The increasing range and complexity of subjects studied at the University was reflected in the classification of Graduate Studies as a faculty in 1957, in the division of the Faculty of Arts and Science into two faculties in 1963, and in the foundation of a number of new centres and institutes dedicated specifically to research. Outside of Edmonton, the University's work in Calgary, instituted in 1951, gradually expanded and an affiliated junior college was established in Lethbridge. These became separate universities in 1966. Other junior colleges in Medicine Hat, Camrose, Red Deer, and Grande Prairie became affiliated with the University to help bring higher education to more areas of the province.

241.1.5 Recent Years

Max Wyman, the first graduate of the University to become its president, took office in 1969 and served until 1974; Harry Gunning followed from 1974 to 1979, and Myer Horowitz from 1979 to 1989, when Paul Davenport was installed as the tenth president. During these years new problems arose, as a levelling-off of student numbers and world-wide inflation made the University's projected budgets less adequate than had been expected.

In the 1980s a gradual increase of student numbers resumed, reaching almost 25,000 full-time and more than 4,000 part-time students in 1986-87. Buildings already begun were completed one by one: the Biological Sciences Centre and the Central Academic Building in 1970, the Law Centre in 1971, and the Basic Medical Sciences Complex and the Engineering Centre, Phase II, in 1972. In 1972, also, the first residents moved into the Housing Union Building, designed and financed on the initiative of the Students' Union. Since then, the Humanities Centre, the Fine Arts Building, one phase of a projected expansion of the Rutherford Library, and additions to the Chemistry Building and Education Building have successively come into use. In 1978, following several years of moratorium on construction, ground was broken for a new Agriculture and Forestry Building; it was completed and opened in October, 1981. Part of the Walter C Mackenzie Health Sciences Centre was opened in 1982, and a new building for the Faculty of Business was completed in 1984.

A growing awareness of the value, both architectural and practical, of the University's older buildings led to a decision to renovate, rather than demolish, Pembina Hall. Pembina's transformation into a fully modern graduate student residence was so successful that it earned national recognition in the form of a Heritage Canada Award. Athabasca Hall underwent an even more drastic transformation, as its wooden construction needed to be completely replaced with modern materials; the renovated building was reopened in the autumn of 1977 and received a Heritage Canada Award in its turn. A similar rebuilding of Assiniboia Hall was completed in 1982. Convocation Hall was also renovated, and a new organ installed; several recitals on this instrument have been nationally broadcast since it was inaugurated in 1978. Renovation of the Arts Building was completed in the spring of 1988.

In 1970 the Collége Saint-Jean, in South Edmonton, became an integral part of the University as the Collége Universitaire Saint-Jean and in May of 1978 it became the University's newest faculty when the name officially changed to Faculté Saint-Jean. It offers a bilingual program of courses in Arts, Science, and Education.

Spring Session (a six-week period between the end of the regular Winter Session and the beginning of Summer Session), during which intensive courses are offered, was inaugurated in 1972 and proved to be an immediate success.

The importance of scholarly publishing in the academic community was recognized when the Board of Governors formally established the University of Alberta Press. Although at first without regular staff, the Press nevertheless succeeded in publishing a small group of works of high quality. The appointment of LES Gutteridge as the first Director of the Press in 1977 placed its operations on a more adequate basis; since then it has issued a number of works of scholarly value each year. The publication in July, 1981, of *A History of the University of Alberta*, by former president Walter H Johns, was a sign of the maturity both of the University and of the Press.

In 1983 the University celebrated the seventy-fifth anniversary of its foundation in a way that illustrated its significance in Canada and the international community. HRH the Prince of Wales received an honorary doctorate at a special convocation, and opened the World University Games, which attracted more than 6,000 participants from 87 countries to a wide variety of athletic and cultural events. The Universiade Pavilion, the Tennis Centre, and new student housing in Garneau, all completed in time to be used during the games, remain as reminders of the occasion.

241.2 University Traditions

241.2.1 The University Motto

The University motto, Quaecumque vera, is taken from the Latin Vulgate version of the Bible, the Epistle of St. Paul to the Philippians, chapter 4, verse 8: De cetero, fratres, quaecumque sunt vera, quaecumque pudica, quaecumque justa, quaecumque sancta, quaecumque amabilia, quaecumque bonae famae, si qua virtus, si qua laus disciplinae, haec cogitate.

The same passage, from the King James version, is: Finally, brethren, whatsoever things are true,whatso-ever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things.

241.2.2 The Coat of Arms

On November 15, 1909, a Faculty meeting passed a motion recommending to the Senate the adoption by the University of the Provincial coat-of-arms as its crest with the addition of an open book superimposed upon the cross and bearing the motto "Lux et Lex", and also the words "University of Alberta" attached as may seem fit. The present motto was substituted for that originally proposed in January 1911.

In 1950, the form of the shield and other details were altered to conform more strictly to heraldic principles, and the following official description of the Arms was adopted:

Blazon: Azure in front of a range of Snow Mountains proper, a range of Hills Vert, in base of a Wheat Field surmounted by a Prairie, both also proper, on a chief Argent a St. George's Cross.

Crest: In front of Sun Rays or an Open Book proper.

Motto: Quaecumque vera.

The Arms are copyrighted and may not be used without permission of the Board of Governors. The name of the University is similarly protected.

241.2.3 The University Colors

The original suggestion for the University colors came from the late Mrs. WH Alexander, who drew her inspiration from the autumn colours of the river valley below the campus. Professor Alexander relayed the suggestion to the Faculty meeting of October 5, 1908, which passed it on to the Senate for approval.

At its first meeting of October 13, 1908, the Senate accepted the "beautiful and at the same time infrequent" combination of green and gold as particularly appropriate to the new University of Alberta - the green representing the "wide stretches of prairie land flanked by deep spruce forests", and symbolic of "hope" and "optimism", the gold representing the "golden harvest fields", and symbolic of the "light of knowledge".

241.2.4 Academic Costume

All gowns are to be of the customary Cambridge shape, i.e., for undergraduates, a gown of black material not falling below the knee with round sleeves cut above the elbow; for bachelors, a gown of black material falling below the knee with full sleeves cut to the elbow and terminating in a point; for masters, doctors of medicine and doctors of dental surgery a gown of black material falling below the knee with black sleeves with semi-circular cut at bottom.

Hoods are to be of the Oxford pattern, and of spruce green material.

The bachelor's hood is to have a border (2 1/2 inches wide), the master's a full lining, of the color distinctive of the faculty. The MD and DDS hoods are to be of the master's pattern.

The Faculty colors are:

Agriculture and Forestry	Pale Blue
Arts	White
Business	Silver Grey
Dentistry	Maroon
Education	Royal Blue
Engineering	Light Green
Home Economics	Burgundy with Pink trim
Law	Scarlet
Library and Information Studies	Lemon
Medicine	Crimson
Nursing	Crimson with White trim
Pharmacy & Pharmaceutical Sciences	Cinnamon
Physical Education & Recreation	Royal Blue and Gold
Rehabilitation Medicine	Salmon Pink
Faculté Saint-Jean	Lavender
Science	Gold-yellow

Doctor's gowns (PhD, DMus and EdD) are to conform to the Intercollegiate Code in design. They are to be of black material and the velvet trim is to be Philosophy blue for the PhD, and Education light blue for the EdD. Doctors of Laws, Science and Letters are entitled to wear a full-dress scarlet robe faced with white silk.

Doctor's hoods (PhD, DMus and EdD) are to conform to the Intercollegiate Code in shape, size and color. They are to be of black material to match the gown, and the full lining is to be of gold satin with a six-inch green satin chevron. The velvet trim distinguishes the two degrees and matches the velvet trim on the gown. There is to be a narrow green piping where the gold lining joins the black material. Honorary degree hoods (LLD, DLitt and DSc) are of scarlet silk and of the Cambridge form and have a full lining of white silk.

All caps are to be of the ordinary black trencher shape with black tassels, except for a black velvet cap with gold cord for LLD, DLitt, and DSc full dress.

242 Constitution of the University

242.1 Introductory

The main lines of the constitution of the University of Alberta are laid down in the Universities Act assented to April 15, 1966.

Note: §242.2 - Reserved

242.3 The Universities Coordinating Council

242.3.1 General Information

The Universities' Coordinating Council consists of the following representatives of each university in Alberta: the President, the Vice-President (Academic), two Deans and two other members of the academic staff appointed by the General Faculties Council, and not more than three other members of the academic staff appointed by the Coordinating Council itself. The Chair is elected by the Council, but shall not be elected from the representatives of one university for more than three consecutive years. The Council may appoint a secretary and prescribe his or her powers, functions and duties.

The Council inquires into any matter that in its opinion calls for cooperative action on the part of the General Faculties Councils, and makes recommendations thereon to any General Faculties Council or the Minister of Advanced Education; it may give its advice and opinions to the General Faculties Council or to the Minister on any matter. It may make recommendations to the Board of Governors of a University or to the Minister. It may determine minimum standards for the affiliation of colleges or other institutions with the Universities, and may recommend that an affiliation agreement be made, modified, or dissolved. It gives or withholds its approval of standards or policies proposed by a General Faculties Council with regard to the admission of first-year students to any University. It has jurisdiction over the conditions of entrance to certain learned professions and callings.

Note: §242.4 - Reserved

242.5 The Chancellor

Chancellor of the University
SA Mactaggart, BA, MBA, LLD (Hon)

The Chancellor is titular head of the University, and represents the public interest in the University. Elected for a four-year term of office by the Senate, the Chancellor is chair of the Senate, an ex officio member of the Board of Governors, confers all degrees and represents the University at ceremonial occasions.

242.6 The President and Vice-Chancellor

President and Vice-Chancellor
P Davenport, BA, MA, PhD

The President, who is also the Vice-Chancellor, is ex officio a member of the Universities Coordinating Council, the Board of Governors, the Senate, and all faculty councils. The President chairs meetings of General Faculties Council and Deans' Council. He is entrusted with the general supervision of the academic work and the business affairs of the University and may recommend to the Board of Governors on any matter affecting the University.

242.7 The Vice-Presidents

Vice-President (Academic)
JP Meekison, PhD

The Vice-President (Academic) is the senior vice-president. In the absence or incapacity of the President, or when the presidency is vacant, he is the Acting President.

242.8.2 Administrative Director

PA Robison, CD, BA, UE

The Board of Governors is a corporation with the name "The Governors of The University of Alberta". It consists of a Chair appointed by the Lieutenant-Governor in Council, the Chancellor, the President, and 17 other persons appointed by the Lieutenant-Governor in Council. Of the 17, two are members of the Alumni Association nominated by the Association, one is a member of the Senate nominated by it from those of its members who are not on the University Staff, two are members of the academic staff nominated by the General Faculties Council, one is a member of the non-academic staff nominated by the non-academic staff, one is a student nominated by the Graduate Students' Association, two are students nominated by the Students' Council, and eight are appointed as representatives of the "general public."

The conduct, management, and control of the University and all its property, revenue, business, and affairs are vested in the Board. The Board appoints the deans of all faculties, all members of the teaching staff, the Librarian, the Registrar, and all members of the administrative staff, but no one may be appointed to a senior administrative post or to the academic staff of the University unless first nominated by the President of the University. The Board provides for the maintenance of buildings and the erection of new buildings. It has authority to purchase and acquire such property as it may deem necessary for the purposes of the University. It fixes the various fees charged in connection with university courses and it makes financial provision for the establishment of new faculties, departments, and courses. It may establish arrangements designed to contribute to the educational and cultural advancement of the people of Alberta at large. When any question arises as to the powers or duties of the Senate or any other University body or of the President or a dean or other officer or employee, and these powers and duties are not definitely provided for in The Universities Act, the Board's decision on the question is final.

242.9.4 Executive Officer

RM Totman, BA

The Chancellor of the University is Chair of the Senate, which has 62 members, 30 of whom are elected from the general public, and nine appointed from the public by the Minister of Advanced Education.

It is the mandate of the Senate to inquire into any matter that might tend to enhance the usefulness of the University. It is specifically authorized to interpret the University to the public, to require reports from faculty councils, the Students' Council, and any members of the academic staff; to receive and consider submissions from anyone interested in the University; to arrange for public meetings, radio and television programs and other means of providing and acquiring information on the University; as a consequence, to make reports and recommendations to the Board or the General Faculties Council or other appropriate body. In addition, the Senate may authorize the conferring of Honorary Degrees.

The Senate brings together the University and the public. Although it has little formal decision-making power, it seeks to stimulate discussion on issues of concern and to aid in their resolution. It is a two-way link between the communities.

242.10.5 Secretary

EA Schoeck, BA, MA

General Faculties Council (GFC) consists of the President, the Vice-Presidents, the Deans, the Librarian, the Registrar, elected members representing the Faculties and appointed members, including students. The number of elected staff members is twice that of the ex officio members and the number of appointed student members equals the number of elected staff members. General Faculties Council, subject to the authority of the Board of Governors, is the senior academic body of the University. It provides for the granting and conferring of degrees, for the approval of courses and programs of study, and for the hearing of appeals by students and others from decisions of Faculty Councils. GFC makes rules and regulations for the management and conduct of the Library and determines standards and policies respecting admission of students. It may make recommendations to the Board on affiliation of other institutions, on academic planning, campus planning, the budget, procedures regarding the appointment, promotion and dismissal of academic staff, and any other matter which it considers to be of interest to the University. It has the general supervision of student affairs.

242.11 Deans' Council

EA Schoeck, Secretary

Deans' Council is an advisory body to the President, the Board of Governors, and to General Faculties Council. It consists of the President, the Vice-Presidents, the Dean of each Faculty, the Director of the School of Native Studies, the Registrar and Chief Librarian.

242.12 Faculty Councils

Each Faculty, except that of Graduate Studies and Research, has a council consisting of the President, the dean of the Faculty, all full-time members of the academic staff of the Faculty, a representative of each of the appropriate professional societies associated with the faculty appointed by General Faculties Council on the recommendation of the Faculty Council, and other persons appointed by General Faculties Council on the recommendation of the Faculty Council. The Council of the Faculty of Graduate Studies and Research consists of the President, the Dean, and other persons appointed by General Faculties Council.

Each Faculty Council, subject to the control of General Faculties Council, arranges the courses of study falling within its jurisdiction and provides for the setting of examinations and for determining the results. It deals with admissions and withdrawals, and authorizes the granting of degrees in branches of learning within its jurisdiction.

The resources of the University of Alberta Library system comprise one of the major research collections in Canada. The system consists of 13 subject collections with a total of over 3,400,000 volumes, 735,000 government documents, 19,000 serial subscriptions, audiovisual resources, and a large collection of research materials in microform.

Collection access is provided through an online computerized catalogue system, and a card catalogue for older materials. The Library offers electronic literature searching of several hundred commercial databases, and provides interlibrary loan service through a network of research collections in North America and around the world.

The Humanities and Social Sciences Library includes a 1.5 million volume monograph collection in Rutherford North; the Periodical and Microform Centre in Rutherford South (containing current, bound and micro editions of thousands of periodicals plus Canadian and foreign newspapers); Government Publications and Reserve Reading Room in Cameron Library; and the business reference library at the Winspear Reading Room in the Business Building. A large reference collection of indexes, handbooks, and statistical sources, provides access to the literature in the humanities and social sciences.

The Bruce Peel Special Collections Library is located on the lower level of Rutherford South. This collection of approximately 75,000 volumes houses the University's rare books in the humanities and social sciences. It also includes some literary manuscripts, Western Canadian papers, and the archival collection of all the University of Alberta theses and dissertations. Major holdings in English literature include: John Bunyan, John Milton, DH Lawrence, 18th century plays, and three-decker novels with emphasis on the Minerva Press. Western Canadiana is another collection area, as is 20th century fine printing from England, the United States, and Canada.

The Science and Technology Library occupies the first, second, and third floors of Cameron Library. This collection consists of books, government publications, and a large number of periodicals of a scientific nature in the areas of agriculture and forestry, engineering, science, and home economics. The Head of this library is also responsible for four branch libraries: the Mathematics Branch Library, located in the Central Academic Building; the Physical Sciences Branch Library, located in the Chemistry Building; the Computing Sciences Reading Room, located in the General Services Building; and the Canadian Circumpolar Library, located on the Ground Floor, Cameron Library. The Canadian Circumpolar Library specializes in information resources about Arctic and sub-Arctic regions of the world.

Cameron Library also houses Information Technology Services, Operational Support Services, Administrative Services, and Interlibrary Loans/Photocopy Services.

The John W Scott Health Sciences Library, in the Walter C Mackenzie Health Sciences Centre, contains books and periodicals for the field of medicine, dentistry, nursing, pharmacy, rehabilitation medicine, health services administration, dental hygiene, and related basic sciences. It also houses a reserve book collection for these subject areas and a reference collection which includes indexes, abstracts, and government documents. Historical materials are found in the Phyllis Russell Rare Book Room. Audiovisual material on health-related topics as well as the necessary equipment for their use are available at the Media Desk.

The John A Weir Memorial Law Library is in the Law Centre located on 111th Street and 89th Avenue. The Library contains law reports, statutes, and regulations for the Canadian federal, provincial, and territorial government, the United Kingdom, other Commonwealth countries, and the United States. It also has periodicals, treatises and textbooks, government documents, and reference sources. The collection includes books, microform materials, audio and video tapes, and access to electronic databases. The Library has extensive collections in oil and gas, health, and communications law. The collections are totally accessible through the online catalogue.

The other major library on campus is the Herbert T Coutts (Education) Library which occupies the three-storey east wing of the Education Building. Although collections in Rutherford, Cameron, and the John A Weir libraries are important resources for education topics, this is the primary resource library for the Faculty of Education. The Education Collection (located on the main and second floors) contains material on the theory and practice of teaching. The Curriculum Collection (located in the basement) contains curriculum guides and classroom materials for use with students from kindergarten to the Grade XII level.

The Bibliothèque Faculté Saint-Jean is located at 8406 - 91 Street. It contains 60,000 volumes (monographs, periodicals, and government documents) mainly in the humanities, social sciences, and education. The collection emphasizes French Canadian history and literature. Materials are in both official languages with an emphasis on French.

The University Archives rejoined the Library System in the summer of 1990. Located in Rutherford South Library, the University Archives is responsible for the preservation and research use of the historical records of the University of Alberta.

244 Research Centres and Institutions

244.1 Alberta Institute of Pedology

The Institute of Pedology is an organization of soil scientists with headquarters at the University. It was organized in 1968 by agreement between the University, the Research Council of Alberta, and the Research Branch of the Canada Department of Agriculture. The Institute consists of all pedologists in the Soil Science Department of the University, the Terrain Sciences Department of the Alberta Research Council and the Alberta Pedology Unit of the Land Resources Research Centre, Agriculture Canada.

The Institute is involved in coordinating work in the following fields: soil survey in Alberta, research in pedology, compilation and publication of information on soils, interpretation of basic data on Alberta soils for use by all disciplines, and the clearing of requests for assistance and/or cooperation from other institutions concerned with pedological data.

The Institute is authorized to accept funds in support of investigations requested by donors. The Technical Coordinating Committee may administer funds, exclusive of the budgets of the cooperating institutions, accepted by the Institute to assist it in achieving its objectives.

The Chair of the Soil Science Department of the University is ex-officio Chair of the Technical Coordinating Committee.

The Alberta Law Reform Institute was established in November 1967 by agreement between the Provincial Government, the Law Society of Alberta, and the University. Its primary object is to promote law reform, particularly at the provincial level. It undertakes legal research in connection with its law reform work. By March 1990 the Institute had made 57 final reports to the government in connection with law reform covering a wide range of subjects. Recent reports include: Towards Reform of the Law Relating to Cohabitation Outside Marriage; Financial Assistance by a Corporation: Section 42, The Business Corporations Act (Alberta); Limitations; The Bulk Sales Act; and Section 16 of the Matrimonial Property Act. A high percentage of the Institute's reports have been, or are currently being enacted into legislation. From time to time members of the Institute's legal staff present and publish learned papers which often are prompted by work on law reform projects although they may not be directly connected with them.

244.3 Alberta Microelectronic Centre

Chair of the Board
H Schaefer

President
J Zupancic

The Alberta Microelectronic Centre is dedicated to the development of a strong microelectronic technology base in the Province of Aiberta.

The AMC was established in 1982 with initial assistance from the federal government as a non-profit company wholly owned by the University of Alberta. The Centre is now an integral part of the high technology network supported by the Alberta Government Department of Technology, Research and Telecommunications. The AMC is governed by the Board of Directors comprised of government, university, and industry representatives.

The Centre's mandate is to promote and support the development and application of microelectronics technology throughout the province. This is accomplished through education programs, design and applications services, product development, prototype manufacture, and research activities.

The AMC facilities include a fabrication facility for manufacturing application specific integrated circuits (ASIC's), a microelectronics research laboratory, an applications development service, and an ASIC design centre in Calgary.

The AMC supports university research through a graduate student scholarship program and by providing access to the design and fabrication facilities.

The Alberta Telecommunications Research Centre (ATRC) is a private, non-profit research institute incorporated by the University of Alberta in 1986. ATRC was established with three charter sponsors: the University of Alberta, the Government of Alberta and Bell-Northern Research Ltd. Additional sponsors include: the University of Calgary, Alberta Government Telephones, ED TEL, LSI Logic Corporation of Canada, Inc., Digital Equipment of Canada, and NovAtel Communications Ltd. Sponsors contribute funding, services in kind, or both, to the Centre and have preferred access to research results and personnel.

ATRC conducts applied research to provide a bridge between basic research conducted at universities and product development conducted by industry. The research program has three technology thrusts: Networks and Systems; Photonics; and Wireless. These major thrusts are closely aligned to the needs of the sponsors and to current developments and business opportunities in the telecommunications and related industries.

The staff at ATRC is a mix of professors and students from the affiliated universities; attached scientific staff from industrial sponsors; and ATRC scientific, management, and support staff. ATRC's research teams involve personnel from all these sources.

244.5 Applied Mathematics Institute

Director
HI Freedman, PhD, Mathematics

The Applied Mathematics Institute was established in 1987 to promote research in applied mathematics. The active membership is comprised of University and non-University researchers actively engaged in the application of mathematics. The research interests of the membership are extremely varied and reflect the diverse and interdisciplinary nature of modern applied mathematics. The research interests of the membership include traditional or classical disciplines such as elasticity, computational and theoretical fluid dynamics, statistics, and mathematical physics and also other disciplines such as zoology, theoretical seismology, meteorology and physical oceanography, optimal control theory, mathematical economics, chaos, parallel computing, and mathematical biology.

The Applied Mathematics Institute has an established visitors program which provides partial support for guest speakers and research collaborators. The Institute sponsors a biweekly colloquium and also co-sponsors from time to time conferences and research workshops. The Applied Mathematics Institute organizes the publication of the *Newsletter* of the Canadian Applied Mathematics Society. The Applied Mathematics Institute also publishes the AMI Newsletter to promote and publicize the activities of the Institute membership. In cooperation with the Canadian Applied Mathematics Society, the AMI publishes an international journal, the *Canadian Applied Mathematics Quarterly*. Anyone interested in being placed on the mailing list for the AMI Newsletter should contact the Director.

The Canadian Circumpolar Institute (formerly the Boreal Institute for Northern Studies) services the University of Alberta as its centre for research on the northern regions of Canada and other circumpolar nations. The CCI sponsors research, supports conferences, encourages exchanges of research associates, directs a publications program, and advises on policy regarding the University's Canadian Circumpolar Library.

Research is the focus of the Institute's activities. Under the direction of the CCI, annual "seed money" grants, in support of short-term circumpolar and northern research projects, are awarded. To support approved projects there are three separate programs available to graduate students and to academic staff (see Awards §225.4.9). Longer-term and larger-scale research programs, as well as a variety of grant-funded and contract research, also operate under the aegis of the CCI.

The CCI is served by a multidisciplinary library, located on the ground floor of Cameron Library. Its 200,000 item collection features concentrations of materials in all disciplines relative to Canada north of 60, Alaska, Greenland, and Canadian Native peoples, while materials relating to other circumpolar and cold regions, and to northern issues are acquired selectively. The Canadian Circumpolar Library subscribes to newspapers and newsletters from communities north of 60, and to a great many periodicals concerning northern regions. It maintains a Stanford Public Information Retrieval System (SPIRES) on-line database of its holdings, called BOREAL, which can be searched on the University's computer or on CAN/OLE. The Library also produces computerized indexes to the collections as well as other research tools. The Northern Titles KWIC Index collects headlines from Native and other northern newspapers and first-named authors and titles from journal articles, government documents, and other ephemerae received by the Library. At present, the Canadian Circumpolar Library is working with other institutions to establish a Canadian Polar Information System.

The publications program of the CCI comprises two series, both peer-reviewed: the Occasional Publications Series publishes selected conference proceedings, collections of papers, and monographs resulting from scholarly research; the Circumpolar Research Series features monographs focusing primarily, but not exclusively, on interdisciplinary scholarly research in international circumpolar studies.

Beyond the University, the CCI establishes liaisons with other institutes through the exchange of researchers, exchanges of its publications, participation in the Northern Libraries Colloquy, and prominent involvement of its affiliated researchers at national and international conferences. From time to time, formal exchange agreements are struck between the CCI and other institutes of northern and circumpolar research. A regular newsletter informs readers on and off campus of current and future activities relevant to the Institute's area of interest.

Within the University, the CCI cooperates with all faculties offering courses or conducting research on northern studies. The Unviersity of Alberta Northern Research Committee (UANRC) – made up of the on-campus members of CCI's Advisory Board – includes representation from various University faculties. The UANRC works in cooperation with the Institue's Coordinator to initiate policy. Further, it advises the Office of the Vice-President (Research) and informs the general University community on northern and circumpolar issues and matters.

Administrative offices of the CCI are located in Rooms 207/215 of the Central Academic Building. Enquiries regarding the work of the Institute should be addressed to the Office of the Coordinator (CAB 215); information concerning the Canadian Circumpolar Library, including its reference services, can be obtained from the Institute's Librarian, at Cameron Library.

244.7 Canadian Institute of Ukrainian Studies

The Canadian Institute of Ukrainian Studies was established in 1976 with the following objectives: (i) to encourage research and publications in Ukrainian studies; (ii) to serve as a resource centre for English-Ukrainian bilingual education; (iii) to encourage contacts among scholars and students in Ukrainian studies through seminars and conferences. The Institute offers no courses or degree programs.

CIUS Press has published some 70 titles to date. The Press also publishes research reports. The Institute is preparing a five-volume alphabetical Encyclopedia of Ukraine in association with the Shevchenko Scientific Society at Sarcelles (near Paris) and the Canadian Foundation for Ukrainian Studies. The encyclopedia is published by the University of Toronto Press. Work on the encyclopedia is coordinated by the Institute's office located in the Department of Slavic Languages and Literatures at the University of Toronto. The Institute also publishes a semi-annual Journal of Ukrainian Studies and a newsletter.

Located at the Institute is the Ukrainian Language Education Centre whose purpose is to prepare learning resources for Ukrainian language instruction in the English-Ukrainian bilingual schools, and other types of programs. The Centre also encourages research on the problems of English-Ukrainian bilingualism, services the professional needs of teachers, and maintains print and audio-visual Ukrainian language educational resources. The Institute is also home to the Peter Jacyk Centre for Ukrainian Historical Research which sponsors research and publishing on Ukrainian history.

The Institute offers research grants to bona fide scholars in Ukrainian and Ukrainian-Canadian studies, as well as undergraduate and graduate scholarships. The Institute has wide ranging contacts and exchange agreements with institutions in the Ukrainian SSR. The Institute also administers post-doctoral and research fellowships offered by the Canadian Foundation for Ukrainian Studies. Other activities include a visiting professor's program and organization of the annual Shevchenko lecture.

The Institute is under the jurisdiction of the Vice-President (Research). Policy is developed by the Director, assisted by an advisory committee of research associates and the Advisory Council. Inquiries should be addressed to the Director of the Institute.

Established in 1965, the Centre for Advanced Study in Theoretical Psychology offers a program of formal and informal seminars and forums for research into the foundation of the psychological sciences. The program is directed toward explicating the methodological and philosophical presuppositions guiding the diversity of theoretical viewpoints in basic and applied research as well as psychological practice.

Current Centre faculty members' research interests are focused in cognitive and language studies, aesthetic and hermeneutic theory, and logic of explanation.

The Centre sponsors conferences and publishes proceedings of the International Society of Theoretical Psychology, and publishes the Annals of Theoretical Psychology.

Student Affiliates (Undergraduate
R Rose, Honors Psychology (University of Alberta)
B Cech, Honors Psychology (University of Alberta)
L Kondratski, Honors Psychology (University of Alberta)
D Symbaluk, Honors Sociology (University of Alberta)

The Centre was established in 1976 as a modern research facility that permits experimental analysis of human behavior. Major functions of the Centre include: promoting research and publication on human behaviour; providing information and discussion about human behaviour through a weekly seminar; and, contributing to the intellectual climate of the University through invited presentations by scholars in the fields of sociology, psychology and the biological sciences.

244.12 Centre for Frontier Engineering Research

President
T Nasseri, PhD, Engineering

The Centre for Frontier Engineering Research (C-FER) is a not-for-profit research organization established in 1983 to conduct engineering research for the safe and economical development of frontier resources. Financial support for the Centre comes from Canada's leading resource and service industries, academic institutions and government agencies and laboratories.

C-FER offers a broad range of services through the integration of expertise in disciplines including: structural analysis and engineering; cold regions and offshore engineering; mathematical modelling and numerical analysis; materials science and engineering; risk and reliability analysis; synthesis and analysis of information. Core and contract research is carried out within departments including: offshore and marine technology; downhole technology; product and application development; and materials and manufacturing technology.

C-FER's new $18 million facility in the Edmonton Research Park features an unique combination of testing and analysis tools designed to simulate realistic design, loading and environmental conditions for testing materials, components, structures and downhole systems. Laboratories include a large cold chamber, two state-of-the-art loading systems and a self-contained special environments system.

In addition to research, C-FER is committed to networking, a program of technology transfer involving not only the acquisition and dissemination of information, but also its synthesis and strategic application to decision-making.

244.13 Centre for Gerontonolgy

Director and Chair of the Board
BG Rule

Administrative Assistant
L Abraham

The Centre for Gerontology was established in 1983 as a research unit operating under the auspices of the Vice-President (Research) at the University of Alberta. The Director and a voluntary board of gerontological researchers governs the operation of the Centre.

The overall objective of the Centre is to enhance the understanding of the aged individual and of the dynamics of the aging process, by means of:

(1) fostering, conducting and coordinating research on aging

(2) providing and disseminating research findings to researchers, practitioners, policy makers and administrators of services to older people

(3) encouraging the development and implementation of courses and programs in gerontology.

The Centre's research activities and services include: an annual up-dated publication listing gerontological research by staff and graduate students; research symposia on selected aspects of aging; the facilitation of research interest groups.

The Centre's education activities and services include: development of multi-disciplinary research projects; a quarterly newsletter; community speaking engagements; participation in media probes of issues in aging; an annual publication of the courses in gerontology offered on campus; participating in an advisory committee for the Faculty of Extension, Certificate Program in Gerontology.

244.14 Centre for Studies in Clinical Education

Director
P Hagler, PhD

Executive Committee (Ex-Officio)
L McFarlane, BSc
S Rennie, MSc
R Urbanowski, MSc
J Vargo, PhD

The Centre for Studies in Clinical Education was established in 1989 by the Faculty of Rehabilitation Medicine which includes the Departments of Occupational Therapy, Physical Therapy, and Speech Pathology and Audiology. Objectives are to promote research on the clinical education process, foster continuing education for clinical supervisors in rehabilitation medicine, serve as a clearing house for practicum policies within the faculty, promote positive relationships with the clinical community, maintain student practicum records, and encourage graduate study of the clinical education and clinical supervisory processes.

The Centre maintains a database of affiliated institutions and their employees who hold joint clinical teaching appointments. It organizes workshops for participating clinical supervisors and joint clinical appointment holders and sponsors annual social events to recognize the important contribution of these clinical professionals to student training. Current research projects relate to student coping strategies during practicum, selection procedures for the quota programs, graduate follow-up surveys, supervisor effectiveness, and cost-benefit analysis of student training in clinical service facilities.

244.15 Developmental Disabilities Centre

Director
JP Das, PhD

Editor of Developmental Disabilities Bulletin
R Sobsey, PhD

The objectives of the Developmental Disabilities Centre are:

(1) to pursue research of an interdisciplinary nature into the problems of intellectual subnormality;

(2) to encourage faculty and graduate students to carry out investigations in the field of developmental disabilities; and

(3) to provide facilities for clinical investigation and remediation of the child with learning handicaps from biomedical, educational, and psychological aspects, and to provide interdisciplinary training for students in these areas.

The Centre seeks and receives grants from government agencies and private organizations for research and demonstration projects so as to understand the nature of intellectual subnormality and learning disorders, and to devise methods for their prevention and treatment. A journal, Developmental Disabilities Bulletin, is published twice a year by the Centre.

244.16 Devonian Botanic Garden

Director
PND Seymour, BSc

Associate Director
KE Denford, PhD

Research Associate
RS Currah, PhD
LS Sigler, MSc

The Devonian Botanic Garden was founded in 1959 on 80 acres of land near Devon donated by the late HA Dyde (QC, LLD, OBE). It has been developed on naturalistic lines. Part of it is a nature conserve, and there are two ecological reserves.

The aims and objectives of the Devonian Botanic Garden include the following:

(1) To establish a collection of cultivated plants hardy in the Edmonton region and to establish a collection of indigenous plants of Alberta, both for University teaching, research, and public education.

(2) To conduct plant introduction and winter hardiness trials with the aim of increasing the range of plants grown in the Edmonton region.

(3) To seek out variations in native materials suitable for introduction as ornamental plants.

(4) To maintain a garden of plants used by the native peoples of Alberta.

(5) To take part in the International Seed Exchange with some 400 world-wide institutions and botanic gardens.

(6) To provide outdoor laboratory space for the University and other institutes of learning.

(7) To conduct taxonomic and applied research into ornamental and native plants and to maintain a herbarium of species used in these research projects.

(8) To maintain a collection of living fungi, the Microfungus Collection and Herbarium, for applied and systematic research on an international basis.

(9) To enable the public to become aware of, and appreciate, one of the many aspects of the extension work of the University in a congenial setting.

(11) To encourage public interest in, and support for the Garden by means of the Friends of the Devonian Botanic Garden.

(12) To publish informative bulletins and to conduct a Public Education Program.

The Devonian Botanic Garden is situated 9.5 kilometres west of Edmonton on Highway 16 and 14.5 kilometres south on Highway 60.

The Institute of Earth and Planetary Physics was founded in 1970 with the aid of a Negotiated Development Grant from the National Research Council. Its support has since been assumed by the University. The institute unites geophysicists in the Departments of Physics, Mathematics and Geology and meteorologists in the Department of Geography for the promotion of research in Earth and planetary physics. The scientific members of the Institute include the academic staff listed above, about 10 research associates and about 50 graduate students registered in the three Departments. Technical assistance is provided by staff of the Departments of Physics, Geology and Geography. One or more distinguished visitors are invited each year for two or three months and, in addition, short term visits by distinguished researchers are arranged.

Research topics in which Institute members are active include seismology, geomagnetism, electromagnetic induction in the Earth, paleomagnetism and rock magnetism, plate tectonics, high pressure studies of the Earth's interior, time series analysis, mass spectrometry applied to geochronology and to stable isotopes, synoptic-scale and local-scale meteorological studies including studies of atmospheric and oceanic pollution, and space physics especially of the magnetosphere and environment of the Earth-Sun system.

The Population Research Laboratory (PRL) is a research arm of the Department of Sociology, University of Alberta. Established in 1966, it is the largest and longest-running demographic and social survey research unit in Western Canada. The PRL has four major functions: teaching students within the Sociology programs; serving the research and information needs of Sociology faculty members and graduate students as well as providing similar assistance to other University departments and community groups; undertaking original research in demography and a variety of areas within sociology; sponsoring publications and conferences.

As part of its teaching function, the PRL sponsors with University Computing Systems the two-week Summer Institute on Quantitative Analysis of Social Data. The objectives of the Summer Institute are (1) to teach participants quantitative research methods; (2) to introduce them to applications in data analysis; and (3) to train them in statistical computing techniques.

Research projects carried out by PRL staff and research associates cover a wide range of areas: population studies of fertility, mortality, and migration; population projections, and analyses of demographic methods; and social surveys in the areas of quality of life, criminology, labor market dynamics, family processes, housing and public opinion. The PRL has conducted the Edmonton Area Study, a random sample survey of Edmonton adults, annually since 1977. Since 1987 the study has been expanded into the Alberta Survey by including a telephone survey of the complete province. Also since 1987, an annual all-Alberta telephone survey has also been completed.

The PRL's publication program includes Canadian Studies in Population, a demography journal published jointly with the Canadian Population Society; a quarterly newsletter "In Summary"; two working paper series (Research Discussion Papers and Alberta/Edmonton Series Reports); a Population Reprint series; and a Survey Highlights series.

The Research Institute for Comparative Literature was founded in 1985. The purpose of the Institute is to foster interdisciplinary and team, as well as individual research in Comparative Literature (i.e., general literary scholarship, theory, and methodology) in collaboration with scholars from the University of Alberta and other Canadian and foreign universities. Depending on funding, post-graduate and post-doctoral positions are offered by the Institute.
The Institute is involved in the following programs:

(1) "Towards a History of the Literary Institution in Canada" - in collaboration with over 60 scholars from Canada and abroad.

(2) "Romanticism in European Literatures" - in the series *A Comparative History of Literature in European Languages* - in collaboration with the International Comparative Literature Association.

(3) African-Carribbean Studies - in collaboration with the African Literature Association, the Canadian Association of African Studies, Heinemann's Educational Books, African World Press, and Three Continents Press.

(4) Support for the editorial work and administration of the *Canadian Review of Comparative Literature/ Revue Canadienne de Littérature Comparée*

(5) Proposed program - "Literature and the Other Arts" - in collaboration with some 30 scholars from various departments of the University of Alberta.

Publications:

(1) Proceedings of conferences held (*Problems of Literary Reception*, 1986. *Questions of Funding, Publishing and Distribution*, 1987. *Prefaces and Literary Manifestoes*, 1987. *Literatures of Lesser Diffusion*, 1988.) for "Towards a History of the Literary Institution in Canada."

(2) Publications in the series *A Comparative History of Literature in European Languages.*

(3) African Literature Studies - SH Arnold, ed., *The Present State/L'Etat présent*, 1985. J Ngete, *Francophone African Fiction: Reading a Literary Tradition*, 1988. RK Priebe, *Myth, Realism, and the West African Writer*, 1988.

(4) Newsletters of the Institute - *Update/Mise à jour* and other publications of research results of the project "Towards a History of the Literary Institution in Canada".

The Nuclear Research Centre conducts studies to determine the fundamental properties of nucleons and nuclei. The staff is directly involved in the experimental program of the 500 million electron volt cyclotron at Vancouver (TRIUMF Project). This is a cooperative project of the University of Alberta, the University of British Columbia, Simon Fraser University, and the University of Victoria.

In addition, staff are involved in collaborative programs using the AGS accelerator at Brookhaven, USA; the Saturne accelorator at Saclay, France; the linear electron accelorator at the Bates Laboratory, MIT, USA; the continuous electron beam at the Saskatoon Linear Accelorator Laboratory, and the HERA facilty at DESY in Hamburg, Germany. The Centre offers research fellowships to physicists for research in subatomic physics.

The Theoretical Physics Institute was established in 1960 to promote research in theoretical physics. The active membership is comprised of the University staff actively engaged in research in theoretical physics. Their research interests range over astrophysics, statistical physics, many-body theory, general relativity, elementary particles, nuclear physics, non-linear fields, properties of metals and semi-conductors, quantum field theory, quantum liquids and solids, chemical physics and condensed matter physics.

There are also normally about a dozen postdoctoral fellows and research associates carrying out research under the direction of the permanent members. In addition, the Institute offers special visiting fellowships for periods of one month to one year to visiting physicists of distinction. A support staff of one secretary and one computer programming analyst provides technical assistance.

244.24 Water Resources Centre

Director
DS Chanasyk, PhD

The Water Resources Centre fosters basic and applied water resources research at the University of Alberta by securing exchange and cooperation among researchers in water resources from different scientific disciplines, by encouraging response of the University to public needs concerning water, and by maintaining a research capability in water resources. Stimulation of public interest and improved communication in water resources is achieved through conferences, seminars, and other activities.

The Western Centre for Economic Research is a research unit sponsored by the Departments of Economics, Rural Economy and the Faculty of Business.

The objectives of the Western Centre for Economic Research are:

(1) to conduct studies into the effects of economic policies and programs on the Western Canadian economy generally and the four provincial economies in particular;

(2) to assess the implications of these programs and policies for the operations of Western Canadian business enterprises;

(3) to monitor the performance of the Western Canadian economy and to provide evaluations that contribute positively to business planning;

(4) to conduct research into other areas of business and economic interest to Western Canadians; and

(5) sponsorship of publications and conferences.

Publication activities are:

(1) Western Studies in Economic Policy Series released through the CD Howe Institutes,

(2) an information bulletin series, and

(3) a quarterly newsletter that provides summaries of research on Western Canada relevant to the Centre's objectives.

The Alumni Association, formed in 1915, counts among its members over 120,000 graduates world wide and in all walks of life. Upon graduation, without fee, every student automatically becomes a lifetime member.

Members in good standing are entitled to benefits including:

New Trail
Published quarterly, New Trail Magazine travels to the four corners of the world at a voluntary rate of $12.00 per year. New Trail contains feature articles, Association news, and campus and class notes.

Recreational Privileges
Alumni user cards for self and family are available at a special rate, for access to all campus recreational facilities.

Reduced Insurance Rates
In co-operation with major insurance companies, the Association offers alumni life, auto, and home insurance at reduced rates.

Affinity Card
A no-fee Mastercard credit card, administered by one of the major chartered banks, is available to alumni and is a unique method of contribution to the University.

Employment Seminars
At least four times each year, the Association sponsors workshops for graduates who wish to prepare effective resumes and learn job search and job interview techniques in order to make themselves more saleable in the competitive job market.

Travel Programs
A combination of education and entertainment, these programs are arranged by the Association to let you expand your horizons - literally!

Library Privileges
Graduates are welcome to use library materials in place. A special borrower's card is available for alumni at $50.00 annually.

University Affairs
Your perspective is valuable. As a member, you can involve yourself in University government by being named to various University bodies including the Senate and the Board of Governors.

Annual Fund
Your contribution is needed for worthwhile projects. Fund donations are tax-deductible and in many cases, matched by the Provincial Government.

Alumni Branches
These groups of alumni have their own constitution and executive committees and operate under the auspices of the Association. Branch representatives sit on the Alumni Council and organize social and educational functions for graduates in their area. Branches are located in numerous Canadian cities and in several foreign countries.

Faculty Associations
Constituent Alumni Associations are currently organized for the following Faculties, Departments, and special interest groups: Medicine, Dentistry, Pharmacy, Business, Nursing, Library and Information Studies, Education, Health Services Administration, Forestry, Drama, and Native Studies graduates. Administered by the Alumni Association with the cooperation of Faculty/Department staff and graduates, these associations serve to promote the welfare of their specific Faculty/Department or area of special interest.

Class Representatives
Students in their senior year are regularly invited to volunteer for the position of class representative for their department/faculty. Class representatives assist classmates in maintaining contact with one another and the University by organizing reunions and preparing class newsletters. Representatives are the liaison between the class and the Association.

Reunion Weekend
Organized annually by the Association. You're invited. And if you're about to celebrate your 10th, 15th, 20th or more anniversary of graduation, we'd be happy to help organize a class reunion. Organizational booklets on the "how to" of planning a reunion are available to class representatives from the Alumni Office.

Newsletter Service
The Association absorbs all costs of mailing one newsletter per year for each class. Class representatives simply send a typed copy to the Alumni Office and we do the rest. If you are organizing a reunion, we'll send two newsletters that year.

Alumni Scholarships and Awards
The Association sponsors scholarships for future alumni (undergraduate students) and presents special recognition awards to outstanding alumni.

Official Alumni Mementos
Periodically, the Association offers special edition memorabilia to alumni. Items in the past have included official U. of A. watches, a chime clock and a framed sketch of a University building.

Host Family
In conjunction with the U of A's International Centre, alumni families are invited to share friendships and experiences with foreign students attending university.

246 Affiliated Colleges

246.1 On-Campus Colleges

Two denominationally-sponsored colleges, with buildings located on the campus, are related to the University by a form of agreement described as affiliation, and offer certain courses that may be taken for degree credit by students of the University.

General Information
St Stephen's College, an undergraduate and graduate theological school of the United Church of Canada, established by Provincial Charter, has been affiliated with the University since 1908 and currently is working on a broadly ecumenical basis, integrating faith and theology with practice and experience.

Courses Offered for University Credit
By an arrangement with the University, courses in Biblical Literature, Christian Theology and Faith Development taught in St. Stephen's College are open to students of the University for credit towards the Bachelor of Arts degree, or as Arts options open to students in other faculties. For information about courses offered, see §44.10.2 of this Calendar.

Non-Credit
The College provides a variety of short-term, non-credit courses of a professional and interdisciplinary nature for professional church workers and laity, and many of these courses are open to members of the University. Laypersons desiring a more structured program of study may apply for admission to the non-residency program leading to certification in theological studies (CTh).

Degree Courses
The College offers graduate theological degrees: a professional Doctor of Ministry (DMin), an academic Master's Degree (MTh), Preparation in Diaconal Ministry (Diploma BTh, MTS), and a Master of Theological Studies (MTS) for laypersons. Enquiries may be directed to the office: 439-7311.

General Information
St Joseph's College is established under the authority of the Roman Catholic Church, and directed by the Congregation of other clerics, religious, and lay persons. It was affiliated with the University by an agreement with the Board of Governors on April 28, 1926.

Courses Offered for University Credit

Christian Theology
For courses taught by St Joseph's College in Christian Theology see §44.10 (Faculty of Arts) of this Calendar.

Philosophy
For courses taught by St Joseph's College in Philosophy see §44.29.4 of this Calendar.

246.2 Off-Campus Colleges

Four private colleges have formal affiliation agreements with the University of Alberta, under which certain courses offered by the colleges will be accepted by the University for transfer credit. These colleges are: Canadian Union College, College Heights; Concordia College, Edmonton; The King's College, Edmonton; and North American Baptist College, Edmonton.

246.3 Public Colleges and Technical Institutes

Formal affiliation agreements do not exist between the University and the public colleges or technical institutes in the Province. However, arrangements are in place which allow for the transfer of students from these post-secondary institutions to the University of Alberta (See §13.9 of this Calendar).

The Alberta Research Council, founded in 1921, is a Crown corporation of more than 600 employees, with a stated mission to advance the economy of the province through the promotion of technology development; performing applied research; and providing expert advice, technical information and scientific infrastructure. Research and/or testing programs are conducted in oil sands and hydrocarbon recovery, coal and hydrocarbon processing, resource technologies (including geological survey, environmental research and engineering, and forestry), advanced technologies (including advanced computing and engineering and advanced manufacturing), biotechnology, electronics testing and automation technologies using artificial intelligence and expert systems. Joint research venture programs are carried out with industrial partners.

Dr. Henry Marshall Tory, the first President of the University of Alberta, was instrumental in the establishment of the Research Council; since then a close association has been maintained between the two organizations. The Universities of Alberta, Calgary, and Lethbridge are represented on the Research Council's Board of Directors.

Two corporate offices are located in Edmonton and Calgary. The main laboratories are located in the Edmonton Research Park, 250 Karl Clark Road, Edmonton, with other offices and/or laboratories in Calgary, Devon, Nisku, Red Deer, and Lethbridge. Further information is available from the Corporate Secretary, tel. 450-5224 or mailing address, P.O. Box 8330, Postal Station F, Edmonton, Alberta T6H 5X2 (FAX: 450-5198).

The University of Alberta Hospital was founded in 1906 as the Strathcona Hospital. The University Hospitals Board administers the Walter C. Mackenzie Health Sciences Centre, the Aberhart Centre, the Mewburn Veterans Centre, the Outpatient Residence, Educational Development Centre and the Patient Support Centre located in Millwoods. The President of the University and the Dean of the Faculty of Medicine are statutory members of this corporate board. The University of Alberta Hospitals has approximately 1355 in-patient beds and many ambulatory care programs, including a 125-bed out-patient residence. Students in the Faculties of Medicine, Dentistry, Nursing, Pharmacy and other health sciences faculties receive instruction there.

247.5 The Western Board of Music

The Western Board of Music was founded in 1935 in order to conduct examinations of a high standard in music. Associated with the Board are universities in Alberta, Manitoba, and Saskatchewan. The central office is at the University of Alberta and it is funded by the prairie universities, and from revenue derived from examination fees. The Board awards the diplomas of Associate in Music (AMus) and Licentiate in Music (LMus) in its examinations. Theoretical and practical examinations are held in January, February, May, and June of each year. Further details, including information about prizes and awards, are found in the official announcements of the Board, obtainable by writing to The Western Board of Music, the University of Alberta.

University Staff

251 Continuing Academic Staff

Note: The following is a list of continuing academic staff in 1990-91. Appointments taking effect in 1991-92 have not been included. In addition, the ranks shown are 1990-91 ranks; any promotions which take effect in 1991-92 have not been included. The two years shown in parentheses at the end of each entry are: first year – the year of first appointment to the University; second year – the year of attainment of the current rank. Continuing academic staff are those employees whose contracts of appointment are under one of the Board-AASUA Agreements, viz. Faculty, Administrative and Professional Officer, Librarian, or Faculty Service Officer.

Glossary

261 Glossary

The entries which follow have been prepared by the Calendar Editor for information only. If needed, official definitions should be obtained from a member of the Registrar's Office staff.

Academic Schedule
A schedule of events and deadlines of importance to students and prospective students, covering the period of the University's academic year, July 1 to June 30.

Admission
Acceptance of a candidate for enrollment in a specified program and Faculty.

Advanced Placement
The process whereby students are excused from taking a particular course (usually at the junior level), because they have already acquired the knowledge necessary to proceed into another course in the subject at a more advanced level. Advanced placement, unlike advanced standing, does not serve to reduce the number of courses that a student must complete for the degree.

Advanced Standing
See Transfer Credit.

Aegrotat Standing
Provision whereby a Faculty may grant deserving students credit in one or more courses in which they have missed the final examination because of illness.

Auditor
A person who has been permitted to register in a course for informational instruction only. Regular attendance at classes is expected, normally without participation in assignments or examinations, and without credit towards a degree or diploma.

Baccalaureate
A term relating to the bachelor's degree.

Calendar
An annual publication of academic regulations, schedules, programs of study, and course descriptions.

Candidacy Examination
The examination which tests doctoral students' knowledge of their discipline and of the subject matter relevant to their thesis, and their ability to pursue and complete original research at an advanced level.

Corequisite
The requirement, usually a course, that must be taken in conjunction with, or previously passed, when registering in a course with corequisite requirements.

Course Load Requirement
The number of courses a student is expected to take while in attendance in a given academic session.

Course Weight
See Units of course weight.

Credit
The quantitative measurement assigned to a course. At the University of Alberta a credit is equivalent to one unit of course weight.

Credit by Special Assessment (Credit by Challenge)
The procedure whereby a student may seek credit in certain specified courses without actually registering in and taking the courses at the University of Alberta. This privilege is limited to students who have been admitted to the University.

Credit Course
A course that carries credit toward a degree or diploma.

Deferred Final Examination
An examination written by a student, with permission of the student's Faculty, subsequent to the regular time of writing.

Degree with Distinction
The notation which is inscribed on the permanent record and graduation parchment of a candidate for any degree, except an honors or graduate degree, if the candidate has obtained a grade point average of 7.5 or higher over the last two years of the program.

Degree with Honors (Honors Program)
A four-year concentrated course of study under the supervision of one of the departments in the Faculty of Arts or Faculty of Science.

Department
The basic organizational unit in an institution of higher learning responsible for the academic functions in a field of study. The term department may also be applied to an administrative or service unit in an institution.

Domicile
Domicile is the place in which a person has a settled connection for legal purposes either because his or her true home is there or because it is assigned to him or her by law. It is the place where he or she is generally understood to reside with the intention of remaining there indefinitely or to which he or she returns after a temporary absence. The term residence as it refers to legal residence is used as synonymous with domicile.

Entrance Requirements
Academic background necessary for admission to a particular program of study.

Extension Students
Students who are registered in any of the courses offered by the Faculty of Extension which may or may not lead to certificate credit.

Extramural Students
Students granted the privilege of taking one or more courses by correspondence or directed studies without having to attend the University of Alberta or any of its off-campus centres.

Faculty
A formal subdivision within the University whose mission is the administration of programs and courses relating (usually) to common fields of study and academic disciplines.

First-Class Standing
A distinction awarded to students who obtain a grade point average of not less than 7.5 while enrolled in a full, normal academic course load in the academic year in question.

Full Course
A course with a weighting factor of six or greater, that normally extends over two consecutive University terms.

Full-Time Students
Students who are registered for credit in the equivalent of nine units of course weight or more in a term.

Grade Point Average
A measure of a student's weighed average, obtained by dividing the total number of grade points earned by the total units of course weight attempted.

Grade Points
A weighted value assigned to the grade a student receives in a course, obtained by multiplying the grade by the course weight. Used in computing grade point averages.

Graduate Student
Students admitted to the Faculty of Graduate Studies and Research.

Half Course
A course with a weighting factor of less than six that normally extends over one University term.

Interdisciplinary Course
A course that is offered jointly by two or more departments, not necessarily in the same faculty.

Intersession (May-August Summer Period)
A period of lessons and study during the months of May through August which is divided into two, six-week terms. The first-term runs from the first week of May to the second week of June, inclusive; the second-term runs from the first week of July to the second week of August, inclusive.
For Graduate Studies students, Intersession is a period from May through August for which those who are working full-time on their graduate program record their presence.

Intramural Students
Students who are attending the University of Alberta or any of its off-campus centres.

Limited Enrollment
A restriction on the number of students admitted to a program where there are invariably more qualified applicants than it is possible to accommodate.

Matriculated Applicants
Students eligible for admission to a university program because they have satisfied the regular admission requirements of the Faculty offering the program.

Mid-Session Examination
The examination written at the end of the first term of a session (i.e. in December). For single-term courses the examination will be a final. For full- session courses it will be a mid-term examination.

Non-Matriculated Applicants
Students who are at least 24 years of age, and who are given permission to enroll in a degree program although they do not meet the regular admission requirements of a Faculty.

Part-Time Student
Students who are registered for credit in the equivalent of fewer than nine units of course weight in a term. See Course Load Requirements.

Plagiarism
The submission by a student of the words, ideas, images, or data of another person as the student's own in any academic writing, essay, thesis, research project, or assignment in a course or program of study.

Prerequisite
The preliminary requirement, usually another course, which must be met or waived before a course can be taken.

Reading Week
A recess near the middle of the second term designed to allow students to catch up on outstanding reading and to prepare for the oncoming final examinations.

Reappraisals
The privilege of having the final examination paper re-read in a particular course.

Reexamination
The provision whereby students may be granted (subject to the conditions published by their Faculties) a further examination in a course if their standing following the final examination is unsatisfactory.

Registration
The process of selecting courses that are to be taken by a student in a term or session, usually in accordance with the relevant program specifications for a degree or diploma.

Residence Requirements
See Transfer Credit, Course Load Requirements, Domicile.

Seminar
A group of students who meet regularly for reports and discussion in an area of research under the guidance of a professor.

Session
A period of lessons and study. See Winter Session, Intersession, and Term.

Statement of Results
An unofficial copy of the student's year-end academic results, with neither an original signature nor a seal.

Term
Each session (Winter and Intersession) is divided into two terms of equal length for the purposes of registration and the scheduling of classes and examinations.

Term Examination
An examination which is conducted prior to the time that the instructional portion of a course has been completed.

TOEFL
Test of English as a Foreign Language.

Transcript
A statement of the student's entire official academic record bearing the original signature of an authorized member of the Registrar's staff and the official seal of the University.

Transfer Credit (Advanced Credit)
Course credit which an institution accepts towards a degree,and which the student has not earned in the course work at that institution. A student proceeding toward a first (bachelor's) degree at the University of Alberta must complete a minimum of one full year's program of studies at this University. Normally these studies constitute the final year of the program.

Tutorial
Instruction given to students individually or in small groups.

Unclassified Students
Students registered in selected credit courses, but who are not committed or admitted to a degree or diploma program.

Undergraduate Student
Students registered in a Faculty other than the Faculty of Graduate Studies and Research.

Units of Course Weight
A numerical used in computing grade point average, which reflects the amount of class time devoted to the course.

Weighting Factor
A unit used in the calculation of a student's overall grade point average. In most faculties a weight of six is assigned to a full-session course (or equivalent) and a weight of three to a single term course.

Winter Session
The twenty-six week teaching session which commences near the beginning of September and concludes in April.

Withdrawal
The voluntary cancellation of registration by a student who completes a "Notice of Withdrawal" form. The student notifies the appropriate authorities thereby making it an "Official Withdrawal". When the student merely stops attending classes without notifying authorities, or withdraws after the deadline, failing marks may be recorded. This is termed "Unofficial Withdrawal."

Intersession 1991 **Spring Term — May 6 - June 14** **Summer Term — July 2 - August 9**

PLEASE NOTE

(1) REGISTER EARLY— Students are reminded that only courses which can be justified by adequate enrollment are offered in Intersession. Low enrollment courses will be withdrawn by the following deadlines:

Spring Term — April 10, 1991.
Summer Term — June 5, 1991.

The telephone registration system will remain open after those dates for students to add courses or drop courses. (Refer to Step Four of the Telephone Registration Procedures.) Students registering after those dates may find some courses listed in the timetable have been cancelled due to low enrollment.

(2) When registering, students should ensure that their registration applies to the correct term of the Intersession. This information is noted in the TERM column of the timetable by the words SPR (Spring Term) or SUM (Summer Term) or by specific dates.

(3) **Students are responsible for the completeness and accuracy of their own registrations.** Please read the Calendar carefully and, if you are in doubt about the regulations pertaining to your program, consult the appropriate University official.

(4) Students are responsible for ensuring the accuracy and completeness of their official record at the end of each session that they attend by verifying their Statement of Results and the copy of their transcript provided during Winter Session registration and at convocation. Students should be aware that only the official transcript is retained permanently and that source documentation (the student file in the Registrar's Office) is destroyed *seven years* after the last registration. Queries regarding errors or omissions on the official transcript must be made as soon as possible, and will not be considered after the source documentation has been destroyed.

(5) The Calendar sets forth the intention of the University, at the time of its publication, with respect to all matters contained therein. The University reserves the right at any time to deviate from what appears in the Calendar, either in order to serve the best interests of the University, or because of circumstances or occurrences beyond the University's reasonable control. The University expressly denies responsibility or liability to any person or persons who may suffer loss or who may be otherwise adversely affected by such change.

(6) The University reserves the right to make changes in regulations governing degree programs from time to time. All such changes apply to continuing and new students. Where a required course for a degree program is no longer offered, the faculty may specify an alternative. Students who interrupt their program and who apply for readmission to the program will be required to comply with any new regulations upon resumption of their studies, Students are responsible for the accuracy of their address. Please advise the Registrar's Office of any changes to your address. **Students should annually refer to the Calendar for appropriate faculty regulations governing their degree program.**

For Intersession 1991, no new admissions will be accepted, with the exception of the Unclassified Student Program.

NOTE:

1. This deadline includes payment for courses which start later in the term.

262 University Regulations

262.1 Classification of Students

UNDERGRADUATE AND GRADUATE STUDENTS

(1) **Undergraduate Students** are those who are registered in a faculty other than the Faculty of Graduate Studies and Research. These students fall into two categories:

a. Full-time students—those who are registred in 9 units of course weight in a term in the Winter Session. In the Intersession full-time students are those who are registered in a three-week course with a weight of 3 or more units of course weight of six units of course weight in one or more courses extending over the full six weeks of the term. Students concurrently registered in a six-week three-weight course, and a three-week three-weight course, are considered to be full-time only for that three week period in which they are registered in both courses.

b. Part-time students—those who are enrolled in the equivalent of less than the course load noted above for full-time students.

(2) **Graduate Students** are those who have been admitted to the Faculty of Graduate Studies and Research. These students are designated as "Full-time" or "Part-time" by the Faculty of Graduate Studies and Research according to their workload of courses and/or research. A more detailed classification of graduate students will be found in § 202 of the University of Alberta 1990/91 Calendar.

INTRAMURAL AND EXTRAMURAL STUDENTS

(1) **Intramural Students** are those who are attending the University of Alberta at Edmonton or any of its off-campus centres.

(2) **Extramural Students** are those who, although not attending the University or any of its off-campus centres, are permitted to take one or more courses by correspondence or directed study. This privilege may be granted by a faculty in special circumstances.

CLASSIFICATION OF UNDERGRADUATE STUDENTS

(1) **Degree, Diploma, or Certificate Program Students** are those who are registered in a program leading to a degree, diploma, or certificate normally granted by the University of Alberta.

(2) **Special Students** are those who have been permitted to register in one or more courses, but not officially for credit towards a degree or diploma at this or any other institution.

(3) **Visiting Students** are bona fide students of other universities or colleges, who have been permitted to take one or more courses for transfer of credit to their own institutions which have agreed in advance to such an arrangement.

(4) **Probationary Students** are students who have been admitted (or permitted to continue) on a probationary basis, because their previous academic record is either deficient in some respect, below the standard ordinarily required, or difficult to assess. Normally, if such a student fails to meet the conditions stipulated within the time limit imposed, they will not be allowed to proceed further in the program.

(5) **Unclassified Students** are students registered in selected credit courses, but who are not committed or admitted to a degree or diploma program.

(6) **Auditors** are not necessarily admitted students and are not registered for credit, but are attending one or more courses under the following conditions:

a. Since permission to audit cannot be given until it is known that all students registered for credit have been accommodated, registrations as auditors will be accepted only on the first and second day of classes in the term.

b. The auditor registration form can be obtained from the Registrar's Office or Faculty Office.

c. The permission of the course section instructor must be obtained and the form submitted to the Registrar's Office.

d. The Registrar's Office will determine if space exists in the course section and, if space is available, process the registration.

NOTE: Obtaining the instructor's permission does not guarantee registration in the course section if it is determined that the course section is full.

e. Courses audited in this manner will not be considered as meeting prerequisite, admission, or course requirements for any University degree programs.

f. Individuals auditing courses shall limit their participation in the class to that deemed appropriate by the instructor.

g. Any person who is registered as a full-time or part-time student may also seek permission to audit a course by securing the approval of the instructor and the dean of the student's faculty.

h. The imposition of attendance requirements for auditors is a matter of faculty self-determination. Auditors should seek clarification of this information from the faculty offering the course when they register.

i. Withdrawal from an audited course will result in a grade of "AW", as will a failure to attend where attendance is a course requirement.

262.2 Admission

ADMISSION REQUIREMENTS

Please Note: The following regulations outline the admission requirements presently in effect at the University of Alberta. For the 1991 Intersession, no new admissions are being accepted.

Admission from Alberta High Schools: Every applicant for admission from the high schools of Alberta must present an overall average of at least 70% on five appropriate Grade XII subjects and a mark of at least 50% in each. Faculties may require a higher overall average, and/or a higher mark in a particular subject. When this is done, it is indicated in the detailed requirements of the faculty. For detailed information on particular faculties, students should consult Admission Requirements Brochure available from the Office of the Registrar.

Refusal of Admission: Notwithstanding anything in its regulations, the University of Alberta may, at its discretion, refuse admission to any applicant. Admission will normally be refused to an applicant who has had to write what the University considers an inordinate number of examinations to attain the nominal entrance requirements of the University.

ADMISSION PROCEDURES FOR NEW STUDENTS

Any person who wishes to register and who has never attended the University of Alberta before must seek admission by the deadline as noted in the Academic Schedule (§261). The procedure is outlined below.

Undergraduate Students: Complete an Application for Admission form and return it with the $30.00 application fee to the Office of the Registrar. Arrange to have two transcripts for all previous education sent by the appropriate offices to the Registrar.

Graduate students: Complete the Application for Admission to Graduate Studies form and return it to the Office of the Faculty of Graduate Studies and Research. Arrange to have two transcripts sent by each of the appropriate offices for all previous education to the Office of the Faculty of Graduate Studies and Research.

Unclassified Students: Complete an Unclassified Student Application and Registration form and return it with the $30.00 application for admission fee and the tuition fee to the Office of the Registrar. Notes: (1) the application for admission fee is required only once as an Unclassified student; (2) students who have attended the University of Alberta as an Unclassified Student and who subsequently wish to transfer to a graduate or undergraduate Faculty must complete the appropriate application for admission form, and submit the required $30.00 application for admission fee.

Transfer Credit: Transfer credit (in the form of advance credit) may be granted to applicants for admission who have completed one or more University-level courses at another recognised university or college. Transfer of credit is used to reduce the length of the program the student is required to take at the University of Alberta to qualify for a degree. Generally the amount of transfer credit granted will depend on how relevant and applicable the previous course work is to the particular degree program applied for.

The amount of transfer credit is determined by faculty regulations, and shall be subject to the same regulations as for those transferring from one faculty to another within the University.

Some provincial post-secondary institutions have approved university transfer programs that provide for transfer of credit. The University of Alberta will accept for credit the courses listed in the appropriate university or Provincial transfer guide to the extent that the courses fit the degree program to which the student wishes to transfer.

A copy of the annual Alberta Transfer Guide which explains the nature and the detail of transfer credit arrangements between various post-secondary institutions in Alberta is available from:

Alberta Council on Admissions and Transfer
4th Floor, 9942-108 Street
Edmonton, Alberta
T5K 2J5
Telephone: (403) 422-9021

Advanced Placement: Advanced placement may be granted to applicants who have taken the equivalent of university courses in some other manner. This excuses them from taking the corresponding university courses, but other courses must be taken in their stead. Thus, students who have been granted advanced placement will not have the length of their program reduced.

If applicants feel they may be eligible for either transfer credit or advanced placement, they should ensure that the application is submitted well in advance of the deadlines given in §261. The University reserves the right to require applicants for transfer credit or advanced placement to write examinations at any level including that of matriculation.

Credit by Special Assessment: Some faculties have agreed to allow students to seek credit in certain specified courses without actually registering in and taking courses, if they can demonstrate an acceptable level of mastery of the course content. The procedure whereby a student seeks credit in a course by this non-traditional route is known as **Credit by Special Assessment.**

Faculties, in consultation with departments, will determine which, if any, of their course credits may be earned by special assessment, and the conditions that students must satisfy in order to have an application approved. Interested students are advised to contact their faculty.

The privilege of seeking credit in a course by special assessment is limited to students admitted to the University.

Students wishing to receive credit in courses by this means are advised to report to their Faculty Office in order to be apprised of faculty regulations and deadlines for submission of applications.

ENGLISH LANGUAGE PROFICIENCY

English is the primary language of instruction in all faculties except Faculté Saint-Jean, where French is the primary language. Therefore, all the applicants to undergraduate faculties other than Faculté Saint-Jean must possess an adequate knowledge of written and spoken English as a prerequisite to admission. For example, non-matriculated applicants and unclassified program students must comply with the requirement along with other applicants.

Applicants to Faculté Saint-Jean need not demonstrate proficiency in English prior to admission being granted. However they must demonstrate profiency in English before they may be granted a degree from this institution.

Regardless of country of origin or of citizenship status, all applicants except for Faculté Saint-Jean will be required to demonstrate proficiency in the English language prior to admission. This demonstration may take any one of several forms:

(1) Six full years of education in English in Canada or the equivalent in another country where English is the principal language. Such education must include the Alberta Grade 12, or equivalent level, and can be in a combination of secondary and post-secondary training.

(2) Successful completion of the equivalent of 6 years of full-time instruction in a school/institution in Alberta in which the major language of instruction is other than English, but where the level of English proficiency required for graduation is equivalent to that in English language schools/institutions in Canada.

(3) A grade of 80% or better on the diploma examination portion (only) of the Alberta English 30 course, or a grade of 6 or 7 on the International Baccalaureate Higher Level English course or a grade of 5 on the Advanced Placement English (Language Composition: Literature and Composition) course.

(4) Graduation from a degree program offered by an accredited university at which English is the primary language of instruction and in a country where English is the principal language.

(5) A score of at least 580 on the test of English as Foreign Language (TOEFL) or a score of at least 90 on the Michigan English Language Assessment Battery (MELAB). The TOEFL results must include a score of at least 50 on each of the three components.

NOTE: Authority to hear petitions and to waive the requirement for undergraduate applicants to write the TOEFL resides with the Registrar acting on behalf of the Faculties. Exemptions will be based on assessments of the applicants English Language proficiency as evidenced by a written petition and a personal interview. Please direct enquiries and petitions to the Associate Registrar, Admissions.

Specific Faculty Requirements

Some faculties may require greater strength in English communicative skills than is required in other programs.

These additional requirements are detailed in the various faculty regulations sections of this Calendar. In applying to such faculties the applicant must satisfy the additional language requirements as well as meet the general requirements outlined above. Students seeking entry as nonmatriculated applicants should see the special English proficiency requirements detailed in the various faculty regulations sections of the Calendar.

Further information on TOEFL examinations is available from the Schedules Division, Office of the Registrar, Room 120, Administration Building. TOEFL application forms are available from the Student Access Centre, Office of the Registrar, Administration Building; or by writing directly to Educational Testing Service, Princeton, New Jersey, U.S.A., 08540.

ADMISSION PROCEDURES FOR CONTINUING AND FORMER STUDENTS

Students who have previously registered and are continuing in the same program without interruption are not required to re-apply for admission to subsequent years unless they have been advised that they may not continue in the program.

Students who wish to register either in another program within the same faculty or in a program offered by another faculty must complete an Application for Re-admission form and submit the appropriate fee. This may be obtained from the Registrar and the application must be approved by the Dean who is responsible for the program sought.

Students who have previously attended the University of Alberta as Unclassified Students and who subsequently wish to transfer to a graduate or undergraduate Faculty must complete the appropriate application for admission form and submit the appropriate fee.

Students who have interrupted their program for more than twelve months must also complete an Application for Re-admission form and submit the appropriate fee which will be handled in the same manner as that outlined in the paragraph above.

262.3 Registration

RESPONSIBILITY FOR REGISTRATION

Students are responsible for the completeness and accuracy of their registration. Particular care should be exercised to ensure that students have the required prerequisites. **Students wo register and do not attend and fail to cancel their registration will be subject to fees and possible academic penalty.**

LIMITATIONS ON REGISTRATION

Generally, one full course or equivalent per term is regarded as the normal load for a student in the Intersession. However, students with a good academic record may be permitted by their faculty to register in more than one course. Decisions with respect to the quality of a student's academic record normally will be based on the equivalent of a year's university work completed previously. Students must contact their faculty office to obtain approval to increase their course load.

There are, however, certain designated courses which may not be taken concurrently with other courses and this is indicated immediately after the course number in the Schedule of Courses and Timetable.

COURSE SELECTION

A consolidated schedule of courses and Timetable for both terms of Intersession appears in Section 269 of this calendar, students should ensure their registration applies to the correct term.

Every effort will be made to have the courses, sections, and instructors follow the Calendar descriptions, but courses and sections may be dropped or added, and instructors may not be those listed.

PREREQUISITE COURSE REQUIREMENTS

Students registering in courses for which a prerequisite is listed must meet the prerequisite requirements. A grade of 4 is the minimum grade acceptable in a course which is to be used as a prerequisite. Departments may cancel the registrations of students who do not meet the prerequisite requirements as stated in the course descriptions in this calendar.

Degree credit may be withheld for courses with prerequisite requirements if the prerequisite requirements have not been met or have not been waived in writing.

Where a prerequisite is stated, it is understood that equivalent courses may be used to satisfy the requirement. In addition, the prerequisite requirements may be waived with the written approval of the department that offers the course.

Students who are unsure that they meet the prerequisite requirements in a course, or who wish to obtain permission to have a prerequisite waived, should consult the department offering the course.

COREQUISITE COURSE REQUIREMENTS

Students registering in courses for which a corequisite is listed must also register in the corequisite course or have previously passed the corequisite course with a minimum grade of 4. Departments may cancel the registrations of students in courses offered by the departments who do not meet the corequisite requirements as stated in the course description of this calendar. Degree credit may be withheld for courses with corequisite requirements if the corequisite requirements have not been met or have not been waived in writing.

Where a corequisite is stated, it is understood that equivalent corequisite requirements may be waived with the written approval of the department that offers the course.

Students who are unsure that they meet the corequisite requirements in a course, or who wish to obtain permission to have a corequisite waived, should consult the department offering the course.

Courses with corequisite requirements may only be used for degree credit if the corequisite requirements have been met or waived in writing. A grade of 4 is the minimum grade acceptable in a course used as a corequisite.

REGISTRATION PROCEDURES (INCLUDING CHANGES AND CANCELLATION OF REGISTRATION)

Please refer to Telephone Registration Procedures (Section 267).

NOTE: The Telephone Registration System cannot be used to register as an Auditor.

AUDITOR'S REGISTRATION PROCEDURE

Auditor's Only: Students wishing only to audit a course, who have not been admitted to a faculty, and who are not registered (or planning to register) in any courses for credit, must obtain an 'Auditor Only Registration Form' from the Office of the Registrar. The approval (and signature) of the Instructor of the course must be obtained, and the form delivered to the Office of the Registrar, where it will be determined if space in the course exists. If space exists, the registration will be approved and a fee assessment provided. Since space in many classes is limited, auditors **will not** permitted to register in courses which are over-subscribed. For this reason, **AUDITOR registrations are accepted only on the first or second day of classes for the course**.

Combination of Credit and Audit Courses. Students who have already been admitted to a faculty, and who wish to only audit a course, or to audit a course in addition to taking a course for credit, must use the 'Change to Audit Status/Withdrawal' form which can be obtained from the Office of the Registrar or their Faculty Office.

To add courses as an auditor, students must complete this form, obtain the approval (and signature) of the Instructor and deliver it to the Office of the Registrar.

To change from credit to audit (for those who have already registered in the course for credit), students must also complete the above form, obtain the approval (and signature) of the Instructor, but must also obtain the approval of the their Faculty Office before delivering the form to the Office of the Registrar.

In both cases, the Office of the Registrar will determine if space in the course exists. If space exists, the registration will be approved and a fee assessment provided. Since space in many classes is limited, Auditors **will not** be permitted to register in courses which are over-subscribed. For this reason, **AUDITOR registrations are NOT accepted PRIOR to the first or second day of classes for the course.**

262.4 Fees - Intersession

This section contains the following information:

262.4.1 Undergraduate instructional and general fees.
262.4.2 Graduate instructional and general fees.
262.4.3 Deadlines for paying instructional and general fees.
262.4.4 How to obtain and pay your fee assessment.
262.4.5 Penalties for late payment.
262.4.6 Obtaining a refund.
262.4.7 Fee remission program for senior citizens.
262.4.8 Schedule of fees for special services.
262.4.9 Privileges conferred by general fees.

At the time of publication of this Calendar, the 1991-92 fee schedule had not been set. Fees are approved by the Board of Governors and students pay their fees at the rates which are in effect at the time of payment.

If you have a question about fees, please call the following:

Undergraduate fee assessment: Registrar's Office (492-3113)

Graduate fee assessment: Faculty of Graduate Studies and Research (492-3499)

Fee payment: Comptroller's Office (492-3389)

262.4.1 1990/91 Undergraduate Instruction and General Fees

262.4.1.1 How Instructional (Tuition) Fees are Assesed.

With few exceptions, tuition fees for undergraduate students are assessed by calculating the cost of each course in which the students are registered for credit, according to the following formula: course weight x fee index value x 2. In the **Course Descriptions** section of this Calendar, the course weight is shown following the title of each course, and is indicated by*. The fee index value is a dollar amount that is approved annually by the Board of Governors.

Audited courses are assessed using formular "course weight x fee index value".

Fee are assessed by term. A full-session course counts for fee purposes as two half-courses, one in each term.

Differential fee for students on Student Authorizations: If you are a student who is not a Canadian Citizen or Permanent Resident you are required to pay an additional 50% on tuition fees. If you become a Permanent Resident (landed immigrant) during a session, part of the differential fee may be refunded. Please submit proof of your change of immigration status to the Registrar's Office (main floor Administration Building).

262.4.1.2 Undergraduate General Fee Schedule

Student are assessed general fees per term for the following items; the corresponding privileges conferred are explained in 262.4.9. Exceptions to general fee payment rules are listed at the end of this section.

Library & Computing Services
Students' Union[1]
Health Services

[1] Includes the use of athletic facilities.

Exceptions to general fee payment regulations:

- Unclassified students do not pay general fees, with the exception of the Library & Computing Services fee, and are not granted the corresponding privileges.

262.4.2 Graduate Instructional and General Fees

262.4.2.1 How Instructional (Tuition) Fees are Assessed

Student in Degree Programs

Program Fee: Each category of graduate program has been assigned a "program" fee, which covers the basic instructional cost per student for that program. The program fee is based on a term fee, defined below. For an explanation of graduate student classifications, see 262.1.

Term Fee: This is the basic unit of program fee assessment for one term of full-time registration in Winter Session.

Program Category	Total Program Fee
Qualifying Period[1]	Maximum of 2 term fees
Probationary Period[2]	Maximum of 2 term fees
Master's Degree (Cat. A)	2 term fees
Master's Degree (Cat. B)	3 term fees
Doctoral Degree (two-year)	4 term fees
Doctoral Degree (three-year)	6 term fees

[1] Qualifying period program fees are not credited toward the program fees for any subsequent degree program(s) a student may wish to take.

[2] When probationary students are re-classified as candidates for a degree, the program fees assessed for the probationary period are credited toward the program fee for the student's subsequent degree program.

Program fees are assessed in installments. The size of the installment you are assessed at each registration depends both upon the session in which you register, and upon your registration status (full-time or part-time). The amount you are assessed is credited toward your total program fee, successively reducing the balance you owe. For each term of the session in which you register, the installment is:

Session	Registration Status	Installment payable
Winter or Intersession	Full-time	1 x term fee
Winter or Intersession	Part-time	1/2 x term fee

Minimum Instruction Fee: Once you have been assessed your program fee in full, you are assessed a minimum instruction fee for all subsequent terms of registration. If there is a balance owing on your program fee which is less than the installment that would normally be assessed, you are assessed either that balance or the minimum instruction fee, whichever is greater.

Continuous Registration Fee: Students who wish to keep their program active, but do not wish to register either in course or in project or in thesis research, register in continuous registration. Such students are assessed a continuous registration fee for each term in which they are so registered. (For 1990/91 the continuous registration fee is $249.00.)

Re-admission Fee: Student must register at least once in a twelve-month period in either course, project or thesis research, or in continuous registration. Students who fail to do so must re-apply to their graduate program and be re-admitted before they can resume their program of studies. All re-admitted students are assessed a re-admission fee in addition to all other applicable fees.

Individual Course Fees: Students in degree programs who wish to take courses extra to their degree program are assessed individual course fees for all such courses. These fees are normally calculated according to the following formula: fee index value x course weight x 2. (The course weight is shown following the title of each course in the Calendar, and is indicated by *.)

General Fees: All students in degree programs are assessed general fees in addition to instructional fees. See 262.4.3.

Special Graduate Students, Visiting Graduate Students, and Postgraduate Diploma Students

Individual Course Fees: Students in these categories are assessed individual courses fees. These fees are normally calculated according to the following formula: fee index value x course weight x 2. (The course weight is shown following the title of each course in the Calendar, and is indicated by *.)

General Fees: All students in these categories are assessed general fees in addition to instructional fees. See 262.4.3.

262.4.2.2 Differential Fee

Students who are not Canadian Citizens or Permanent Residents are assessed a "differential fee" of an additional 50% of all instructional fees (program fees, minimum instruction fees, continuous registration fees and individual course fees). If you become a Permanent Resident (landed immigrant) during a session, part of the differential fee for that session may be refunded. Please submit original proof of your change of immigration status to the Faculty of Graduate Studies and Research. The differential fee is not counted toward the total program fee.

262.4.2.3 1990/91 Graduate General Fee Schedule

Students are assessed general fees for each term in which they register as shown below, the corresponding privileges conferred are explained in 262.5.2.9.

Registration
Library & Computing Services
Graduate Students' Association[2]
Athletic Services[3]
Health Services[1]

[1] Extramural students are not assessed these fees.
[2] Mandatory in the Intersession for those students who were not assessed this fee in the previous Winter Session i.e., either were not registered in the Faculty of Graduate Studies and Research then, or were extramural.
[3] No athletic fees are assessed in the Intersession. Athletic privileges are granted during this period to all students with valid ID cards for the current Intersession, or from the previous Winter Session.

262.4.2.4 Fees Inquires

The Faculty of Graduate Studies and Research is responsible for the **assessment** of all graduate student fees. Inquires concerning graduate fee assessments, changes in fees related to program or registration changes, and so on, should be directed to the Fees Coordinator, Faculty of Graduate Studies and Research.

The Fees Division, Office of the Comptroller is responsible for fee **collection.** Inquires concerning method of payment and late payment penalties should be addressed to the Fees Division, Office of the Comptroller.

262.4.3 1990/91 Deadlines for Instructional and General Fee Payment

Spring Terms and Full Sessions	May 7, 1991
Summer Term	July 3, 1991

These deadlines include payment for courses which start later in the term.

In those rare instances where a student is permitted to register late, the last date for payment of fees is 10 days after the date of assessment.

262.4.4 Obtaining and Paying our Fee Assessment

262.4.4.1 Obtaining a Fee Assessment:

Intersession fee assessments are mailed to the most recent mailing address provided.

Unclassified Students are required to pay their fees when they register.

262.4.4.2 Method of Payment:

Cheques or money orders should be made payable to the University of Alberta; please write your Student ID number on the cheque. Your fee assessment notice must be presented with payment.

Students registered for a full session may choose to pay fees in two installments, one for each term. Spring Term fees must be paid by the Spring Term deadline, and Summer Term fees by the Summer-term deadline. **An installment charge is payable with the second installment.**

262.4.4.3 Where to Pay Fees:

Fees can be paid:

- in person, at the cashier's wicket of the Comptroller's Office, third floor, Administration Building (hours for February - April, 9:00 - 12:00, 13:00 - 16:00, and for May - August, 8:30 - 12:00, 13:00 - 15:30);
- by campus mail by depositing your cheque and fee assessment in the mail slot on the 3rd floor of the Administration Building. After hours, you can use the campus mail box located at the front of the Administration Building.
- by regular mail, to the Comptroller's Office, University of Alberta, Edmonton, AB T6G 2M7.

Fees must be **received** in the Comptroller's Office by the payment deadline, if late payment penalties are to be avoided (see 262.4.5). Mail delays will not be accepted as a reason for late payment.

262.4.4.4 Dishonored Cheques

Payment by dishonored cheque is treated as nonpayment on fees. Please refer to 262.4.5. for consequences. In addition to the penalties outlined there, **a $15 penalty is assessed for the dishonored cheque itself.**

262.4.4.5 Student Loans:

Students who apply for assistance from the Students' Finance Board on or before their last day for payment of fees without penalty will not be charged a late penalty provided that their loan application are subsequently approved, resulting in full payment of fees on or before the last day of the appropriate session.

Students must be registered full-time for the period of their loan. If your loan covers both terms of the Intersession, you must be registered for credit in courses with a combined weight of 6 or more in each term in order to have your loan approved.

How to process an Alberta loan: Students who receive loan assistance through Students' Finance Board of the Province of Alberta should submit all copies of their Certificate of Eligibility **with their laminated 1990/91 Student ID card** to the Comptroller's Office fees wicket on the third floor of the Administration Building.

The fees due to the University are the first charge against the loan. If the amount of assistance awarded is less than the full amount of fees, the balance of fees owing is subject to normal fee payment regulations and deadlines.

262.4.4.6 Receipts

If you pay by mail, your cancelled cheque is your fee payment receipt. You may request a formal receipt from the Comptroller's Office for such purposes as reimbursement by your employer.

The Tuition and Education Credit Certificate will be mailed by the Office of the Comptroller in late February to students whose fees have been fully paid (see next section). This form replaces the former Education Deduction Certificate and the separate tuition fee receipt.

262.4.5 Penalties for Late Payment of Fees

Nonpayment of fees does not constitute withdrawal from courses. Please refer to 261 of this Calendar for instructions on withdrawing from courses.

If fees owing are not paid by the relevant deadline, all certification of your student record (diploma, transcript, Tuition and Education Credit Certificate, etc.) is withheld. You will also not be able to register in any future sessions, or make changes to your current registration, until your account has been settled. A late payment penalty of $15 per month is assessed for each month in which your account is outstanding, to the end of the session. Further information on this topic can be found in 262.7.

262.4.6 Obtaining a Refund

Withdrawals

Refer to Step Four in the Telephone Registration Procedures for course add/drops prior to the telephone registration deadlines.

Students who wish to withdraw from the University must complete a "Change to Audit Status/Withdrawal" form. This form must be submitted to their Dean for approval. Students who withdraw without completing the form are not eligible for any refund of fees nor from exemption from fees in the event they have not been paid. If the withdrawal form is approved by the Faculty Office on or before the date specified in the Academic Schedule (261.1) the student will receive a full refund. A withdrawal form approved after those dates will have the fees re-assessed on a pro-rate basis by the Office of the Comptroller to the effective date on the withdrawl from (the date the form was approved) and an administrative charge added. In the case of the graduate students, the registration fee will be retained. Note also that no fee will be charged for Spring Term and Full Session courses dropped on or before the second day of the Session nor for Summer Term course(s) dropped on or before the second day of the term.

Refunds will be authorized when the previously paid fee assessment exceeds the assessment to date of withdrawal. The effective date of withdrawal is that on which the Dean or Director signs the required forms.

Graduate Students:

Consult the Faculty of Graduate Studies and Research to determine the effect on your fees before you withdraw from individual courses, a term, a session or a program.

262.4.7 Fee Remission Program for Senior Citizens

Residents of Alberta who are aged 65 or over are eligible for complete remission of both tuition and general fees. You must meet normal admission criteria and aplication deadlines for your chosen program, and must have reached your 65th birthday before the start of the session in which you are registering. Application for Remission forms are available from the fees wicket of the Comptroller's Office, third floor, Administration Building, and must be completed and submitted with your Senior Citizen's identification card, or other proof of age and residency, by the fee payment deadline.

262.4.8 Special Services Fees

Fees are assessed for the following special services.

Examination and examination-related fees:
- Deferred examination
- Re-examination
- Special examination[1]
- Examination conducted at an established centre other than Edmonton
- Final examination reappraisal
- Credit by special assessment

[1] Part of the fee may be waived if a student is prevented by illness or other extreme circumstance from writing the examination at the regular time.

Other fees (**payable in advance**):
- Official transcript of student record
- Replacement diploma
- Application for undergraduate admission
- Application for undergraduate readmission or transfer
- Graduate readmission (262.5.2.1)
- Graduate thesis microfilming
- Replacement Student ID card

262.4.9 Privileges Conferred by Payment of General Fees

Please refer to Sections 262.4.1.3 and 262.4.2.4.

Library & Computing Services fee

This fee recognizes the costs of maintaining extensive library and computer support systems for the benefit of all students, full- and part-time, on- and off-campus, both directly and indirectly.

Student's Union fee

Associate members may not stand for office, but are entitled to all other priviliges. For further information see 266, or contact the Student's Union Vice-President (Finance & Administration) in Room 259 SUB (492-4236).

Graduate Student's Association fee

For information contact the GSA Office in Room 206, North Power Plant (492-2175).

Health Services fee

Confers the privilege of using University Health Services, which offer a wide range of convenient medical consultation, immunizations, an on-site pharmacy and reduced costs on prescriptions and dental hygiene. See also 266.

262.5 Academic Regulations

PRE-SESSION STUDY

Where pre-session study is a requirement, this is indicated in the schedule of the courses offered, and the students concerned must request study outlines from the Office of the Registrar. This may be done in-person at the Office of the Registrar or by mail using the request form immediately following the Timetable. Information concerning required textbooks may be obtained from the University bookstore.

Where pre-session study is required, examinations on the prescribed preparatory study may be held during the first week of classes. If preparation proves to be inadequate, a student may be asked to withdraw from the course. This requirement makes it essential that registration be completed at an early date, textbooks secured, study commenced, and work carried forward consistently.

CHANGES IN REGULATIONS

The University reserves the right to make changes in regulations governing degree programs from time to time. All such changes apply to continuing and new students. Where a required course for a degree program is no longer offered, the faculty may specify an alternate. Students who interrupt their program and who must apply for re-admission to the program will be required to comply with any new regulations upon resumption of their studies. *Students should annually refer to the Calendar for appropriate faculty regulations governing their degree programs.*

RESIDENCE REQUIREMENTS

A student proceeding towards a first (bachelor's) degree is expected to complete at least half of the credits required through courses offered by the University of Alberta (either "on" or "off" campus in Winter Session or Intersession). Normally, at least half of these "University of Alberta" courses will be taken as the final courses in the program. Credits obtained by special assessment at the University of Alberta may be included in the count of courses used to satisfy the residency requirements.

Students should consult their faculty's section of the calendar in order to become familair with time limits for completion of degrees.

ATTENDANCE

Since presence at lectures, participation in classroom discussions and projects, and the completion of assignments are important components of most courses, students will serve their interests best by regular attendance. Those who choose not to attend must assume whatever risks are involved.

EVALUATION PROCEDURES AND GRADING SYSTEM

(1) **Weighting of Term Work and Final Examinations**

In each course in which a final examination is held, a weight of not less than 30% and not more than 70% will be assigned to the final examination, except where a departure from this arrangement has been authorized by the council of the faculty in which the department offering the course is situated. The remaining weight for the course will be assigned to term work.

(2) **Guidelines Regarding Term Work**

The following guidelines should normally be followed:

a. Instructors are required by GFC to announce at the beginning of each course the distribution of weight between term work and final examination. In particular, they should provide a course outline and inform students during the first week of classes of any assignment, examination, or other course activity (e.g. class participation) to which 20% or more of the final term mark will be allotted. Instructors are also required to inform students at the beginning of the session that information on re-examination policies may be obtained from individual faculty offices.

b. Instructors are required to announce at the beginning of a course the manner in which the official University grading system is to be implemented in that particular course or section, i.e. whether a particular distribution is to be used to determine grades, or whether there are absolute measures or marks which will determine them, or whether a combination of the two will be used.

c. Upon request, instructors are required to provide the method which was used to translate final and, where appropriate, term marks into grades.

d. In addition, instructors should announce the weight given to each assignment, examination or other course activity *well before* the assignment, examination or other course activity is to be completed by the student.

e. Instructors should allow students a reasonable time in which to complete an assignment, bearing in mind its weight.

f. Instructors should mark and return to students with reasonable dispatch all term examinations and, provided the students submit them by the due date, all course projects, papers, essays, etc.

g. All projects, papers, essays, etc., should be returned on or by the last day of classes in the course, with the exception of a final major project or paper (which may be *due* on the last day of classes), which should be returned by the date of the scheduled final examination or, in non-examination courses, by the last day of the examination period.

(3) **Procedures for Registering Complaints about Marking, Grading and Related Issues**

a. Where the above guidelines have not been followed or where students have concerns about the instructor's teaching, the student should make the concern known to the appropriate individual in the following sequence:
   1) Instructor
   2) Chairman of the department in which course is taught
   3) Dean of the faculty in which course is taught

b. A student needing advice on these matters should see the student advisers in the Office of the Dean of Student Services.

c. These procedures do not constitute a mechanism for appeals and grievances regarding the academic standing or individual grades of a student. Appeals and grievances of that nature are dealt with later in this section of the Calendar.

(4) **The Nine Point Grading System**

An important feature of the nine point grading system is that the marking and grading are supposed to be done separately. For a large class, examiners should mark the papers and record the raw scores, sort the papers in order of merit, and decide whether the class as a whole is average, above average or below average. They should then determine what percentage of the class should fall into each of the nine possible grades and assign grades accordingly. In small classes, the honors or senior courses, instructors should mark in terms of raw score, rank the papers in order of merit, and with due attention to the verbal descriptions of the various grades, assign an appropriate grade to each paper.

The process of ranking and grading students may be carried out as each assignment and examination is marked, or it may be deferred until all assignments, including the final examination, have been marked. Instructors should announce at the beginning of a course, the manner in which the official University nine point grading system is to be implemented in their particular course.

In the first case, at the end of the term, instructors will have a record of each student's grades for all assignments and examinations with the percentage weight assigned to each. They should then assign a term results summary remark and a final grade in the course, rounding off any fractional values that may occur to the nearest full grade.

In the second case, at the end of the term, instructors will have a record of every student's marks (raw scores) for all assignments and examinations with the percentage weight assigned to each. They should then compute a term results summary mark based on the student's term mark and final examination. Having computed this for each student, they should then rank the students in order of merit and assign final grades by the process described in the first paragraph of this section.

Since the distribution of grades is not standard, the system should not be referred to as a stanine system, nor should the various grades be called "stanines".

(5) **Grade Point Average (GPA)**

All courses have been assigned an appropriate weighting factor, which along with a student's grades, enables the Registrar's Office or the Dean's Office to compute the GPA. The GPA is common to all Faculties. This is a sessional GPA only and should be reported on transcripts and session-end Statements of Results.

Rules for Computing the GPA

a. The GPA for any session shall be based on the final grades in all courses taken during that session including half-courses repeated in the second term and courses extra to the degree program.

b. A re-examination mark or a deferred examination replaces the original final examination mark. The revised final grade will be included in the computation of the GPA. The Faculty of Law is exempt from this policy as re-examinations are graded on a pass/fail basis. The following will apply to the Faculty of Law:
   1) The original grade will be retained in the computation of the GPA after the re-examination;
   2) Where a re-examination is graded as a pass, the remark "CR" will be noted on the transcript will be noted on the transcript to indicate Completed Requirements in the re-examination course.
   3) The remarks "R" and "D" will be noted on a trascript to indicate that a re-examination or deferred examination was written in the course.

c. When a student has an Absent-Deferred, Incomplete or missing grade, the GPA will not be computed until a final grade is reported.

d. Alphabetical grades of ABF, WF and DB will be counted as numeric grades of 1 in the computation of the common GPA. Faculties are, however, strongly encouraged to compute a numerical grade based on the student's total work even when the student misses the final examination.

e. Alphabetic grade of W (withdrawal) are excluded from the computation of the GPA on the transcript.

f. Grades of Credit – No credit and Pass-Fail are not included in the computation of the common GPA.

g. The common GPA is rounded to the nearest decimal place using standard rounding rules – that isit should be rounded up with a value of 5 or greater in the first non-significant place.

Note: Faculties may use a variety of different averages for various decisions regarding academic standing, promotions and graduation, as long as these have been approved by General Faculties Council. Such averages are descriptively labelled with titles other than Grade Point Average, for example, Promotion Average, Graduation Average.

(6) **Aegrotat Standing**

Aegrotat standing may be granted, in special circumstances, on the grounds of illness to deserving students who have completed at least one year at the University of Alberta in the faculty in which they are currently registered. Any student wishing to take advantage of this privilege should apply without delay to the Dean of the faculty concerned. Any other student absent from a final examination because of illness may apply for permission to write the regular deferred examination.

(7) **Competence in Written Work**

General Faculties Council urges all instructors of University under graduate courses to provide that suitable portions of course testing or other course work should be in the form of written essay responses and to emphasize to students that competence in written work is integral to competence in a subject and will constitute part of the basis on which the student's course grade is determined.

All instructors should make clear at the outset of each course their expectations in regard to the standard and importance of writing in assignments and examinations.

(8) **Approval of Grades**

Student grades are unofficial until they have been approved by the appropriate Faculty Council at the end of the session. Prior to approval by Faculty Council unofficial grades are reported on transcripts and so noted. Students can generally expect that official grades will be available in early June for the Winter Session, mid-September for the Intersession. A Statement of Results is mailed to students following the approval of grades for each session.

EXAMINATIONS

The following regulations apply to **term examinations:**

(1) **Term examinations optional.** The holding of term examinations is optional with each department.

(2) **Absence from term examination or test.** If a student has an unexcused absence from a term examination or test, the raw score assigned will be zero. However, in case of illness or other extreme circumstance the student may be excused from writing the examination or test. In applying for exemption students must present to their instructor an absence slip signed by a University Health Service physician where the cause is illness, or by the Registrar where the cause is other than illness. When exemption is granted the percentage weight allotted to the examination or test missed is added to the percentage weight allotted to the final examination.

The following regulations apply to **final examinations:**

(1) **Final examinations.** A final examination is held in each course except where departure from this arrangement has been authorized by the faculty council governing the department offering the course. A weight of not less than 30% and not more than 70% will be assigned to the final. The remaining weight for the course will be assigned to the term work.

(2) **Absence from final examinations.** Any student who is ill or suffering from severe domestic affliction is advised not to sit for a final examination. A student who has missed a final examination because of illness or domestic affliction or who is obliged to be absent from an examination for some other compelling reason (including religious convictions) may apply for a deferred final examination. Documentation pertaining to such an absence must be submitted to the Registrar within 48 hours, following the examination period or periods for the course or courses effected. Similar action should be taken by any student, who, because of religious convictions or for other cogent reasons, is unable to write a final examination at the scheduled time. Such application will be referred to the student's Dean for a final decision.

When a student is absent from a final examination without acceptable excuse, a final grade may be computed using a raw score of zero for the final examination.

(3) **Cancellation of paper during examination.** Students who become ill or receive word of domestic affliction during the course of an examination, should report at once to the Supervisor, hand in their unfinished paper, and request that it be cancelled. Thereafter, if illness is the cause, they must go directly to the University Health Service so that any subsequent application for a deferred examination may be supported by a medical certificate. The Registrar must be notified in writing of the circumstances within 48 hours of the examination.

(4) **No subsequent cancellation of papers.** Should a student write an examination, hand in his or her paper for marking, and later report extenuating circumstances to support a request for cancellation of his or her paper and for another examination, such request will not be entertained.

(5) **Debarment from final examination.** A student may be refused permission to write the final examination in a course, on the recommendation of the department concerned and with the concurrence of the Dean of his or her faculty, in the following circumstances:

a. The student has neglected to do a substantial portion of his or her written assignments in a course of which these are an essential feature, or has attended insufficiently in a course in which class participation is a necessity.

b. The student has neglected to do a sufficient amount of the practical or laboratory work in a course in which these are considered a basic requirement.

(6) **Failure in Spring Term Course.** Students who have failed the first half-course in a two half-course sequence, may not proceed to the second half-course, unless their faculty has ruled otherwise.

(7) **Release of Final Examination Papers.** Departments subscribing to the belief that there is educational value in permitting students to see their final examination papers after they have been marked, may arrange for this to be done. However, papers should not actually be released to students until the deadline for applications for reappraisal has passed, as an appeal cannot be entertained after the custody of the paper has been relinquished to the student.

The following regulations refer to the **notification of results:**

(1) **Reappraisals.** Since great care is taken in marking final examination papers, a student should apply for reappraisal of a paper only if he or she has good reason to believe that a mistake has been made. Reappraisals are dealt with by the chairman of the department in consultation with members of the staff. A request for reappraisal must be made by letter to the Registrar (or by completion of an application form in the Schedules Division/Examinations and Timetabling, Registar' Office, Room 120, Administration Building) within thirty days of the publication of results for courses offered in the Intersession. The request must include a statement of whether the intent of the appeal is to raise or lower the grade. If a student fails to include such a statement it will be assumed that the intent is to have the grade raised. The request must be accompanied by a fee of $25.00 for each paper; the fee will be refunded if the appeal is successful.

The privilege of having a paper re-appraised applies only to final examinations.

The reappraisal privilege is limited to two papers for the Intersession.

It should be understood that if the grade is changed, the new grade, whether higher or lower than the original, replaces it as the student's official grade in the course.

The following regulations apply to **re-examinations**:

Supplemental Examinations have been abolished at the University of Alberta. Faculties have established criteria whereby undergraduate students in special circumstances may be permitted re-examination. Students should consult their faculty section of the University of Alberta composite calendar for details.

(1) Students wishing to apply for a re-examination should:

a. ensure that they meet the eligibilty criteria for re-examination in both the faculty offering the course and the faculty in which they are enrolled.

b. complete an application form (available at Examinations and Timetabling, Schedules Division, Office of the Registrar, Room 120 Administration Building). Students are advised to apply early, in order to obtain the necessary approvals. Students in the faculties of Dentistry, Law or Medicine should consult their faculties.

c. have the application for re-examination approved by the chairman of the department offering the course.

Departmental approval indicates that a paper can be set *subject to* approval by the Dean of the student's faculty.

d. have the application for re-examination approved by the Dean of their faculty.

Students are advised that it may not be possible for the Dean to make a ruling until all grades are recorded for the session. In this case, the form should be left with the faculty office for a later ruling.

(2) If immediate approval is given, the student should return the approved application and fee to the Access Centre, Office of the Registrar, Administration Building.

Otherwise, when a ruling is made, the Dean's office will send the form to Examinations and Timetabling who will advise the student and request appropriate fee payments where necessary.

Once approval has been granted, re-examinations are to be written as follows, except for students in the Faculties of Dentistry, Law or Medicine, who will be re-examined at a time determined by their faculties.

Re-examinations are to be written at a time and place agreed upon by the instructor and students concerned.

If a student has been granted a re-examination in a Spring Term course and it is not possible to reach mutual agreement as to the date of writing, then the student should advise the Examinations and Timetabling Office so that the examination can be scheduled during the regular re-examination period, August 6-10, 1991. An examination timetable will be mailed in late July to those who apply to write a re-examination in August.

If a student has been granted a re-examination in a Summer Term course the examination should be written as soon as possible after the end of the term at a time and place mutually agreeable to the student and instructor. If agreement is not possible, the examination will be scheduled on the special re-examination and deferred final examination day in September.

(3) A special re-examination may be granted to a student who is prevented by illness, domestic affliction, or other extreme circumstance from writing at the regular time, if approved by the Dean concerned.

Application with supporting documentation must be made to the Registrar three weeks before the special examination is to be written, and must be accompanied by the prescribed fee. Special examinations are normally written at the University of Alberta on the first Saturday following Labor Day in September.

(4) Applicants should consult §262.4 for fee information

The following regulations apply to **deferred final examinations:**

(1) **Deferred final examinations.** A student who has missed a final examination because of illness or domestic affliction or who is obliged to be absent from an examination for some other compelling reason (including religious convictions) may apply for a deferred final examination. Students wishing to apply for such an examination must:

a. complete an application form (available at Examinations and Timetabling, Schedules Division, Office of the Registrar, Room 120, Administration Building). The application must be supported by a satisfactory medical certificate in the case of illness or other documentation substantiating the reason for an absence. The application and the documentation pertaining to the absence must be presented to the Registrar within two working days following the examination period or as soon as the student is able having regard to the circumstances underlying the absence;
b. have the application for a deferred final approved by the Dean of their faculty;
c. have the application for a deferred final signed by the instructor (or the department chairman, or designate, if the instructor is not available); and
d. return the approved application to the Registrar (Examinations and Timetabling, Schedules Division, Room 120, Administration Building), within two working days of initiating the application. The approved application must be accompanied by the prescribed fee.

(2) Any student who is granted a deferred final examination in a Spring Term course by his or her Dean may write that examination as soon as possible after the end of the term at a time and place mutually agreeable to the student and to the instructor and to any other students in the course requesting the same privilege. If agreement is not possible, the examination will be scheduled during the regular re-examination and deferred final examination period in August.

Any student who is granted a deferred examination in a Summer Term course by his or her Dean may write that examination as soon as possible after the end of the term at a time and place mutually agreeable to the student and to the instructor and to any other students in the course requesting the same privilege. If agreement is not possible, the examination will be scheduled on the special re-examination and deferred final examination day in September.

In order to ensure that applications for the writing of deferred examinations for the students attending in the Intersession are received in time to be processed, students are advised to submit their application to the Registrar's Office as the necessity arises and not to wait until they receive their statement of results.

The following regulation applies to **Special Examinations:**

A special re-examination or a special deferred final examination may be granted to a student who is prevented by illness (attested by a physician), domestic affliction, or other extreme circumstance from writing a re-examination or a deferred final examination at the regular time in August. Application must be made to the Schedules Division, Office of the Registrar, Room 120, Administration Building, three weeks before the special examination is to be written, and must be accompanied by the prescribed fee. Special examinations are normally written on the Saturday following Labor Day. In certain approved cases they may be written during the regular examination periods in April, May, August, or September.

APPEALS AND GRIEVANCES

General Faculties Council (GFC) has instructed each faculty to publish in the Calendar the regulations which affect a student's academic standing, a notice that such decisions are appealable and information as to where the faculty-level appeal regulations may be obtained.

In addition, GFC has established an Academic Appeals Committee and has delegated to it authority to hear appeals from students against faculty decisions which affect their academic standing. An appeal may be made only on the basis that there has been a miscarriage of justice.

Students must exhaust the provisions for appeal within their own faculty before taking an appeal to the GFC Academic Appeals Committee.

The GFC Academic Appeals Committee is not authorized to hear an appeal from a decision respecting a mark or grade in an individual course, from an examination decision made in the Faculty of Graduate Studies and Research, from a decision to refuse admission to a faculty, or a decision relating to credit for courses taken or to be taken outside the University of Alberta.

For further information regarding appeal procedures at the faculty level students should seek the advice of their Dean. Students who have been unsuccessful in appealing at the faculty level and who wish to appeal to the GFC Academic Appeals Committee should consult the Secretary to General Faculties Council in order to learn the procedures to be followed.

If students are unsure of the validity of their grievance or procedures of appeal they should contact the Student Adviser in the Office of the Dean of Student Services.

GRIEVANCES CONCERNING GRADES

The assignment of marks and grades is the initial responsibility of a course instructor. Any grievances concerning grades should first be discussed with the instructor. If the problem is not resolved, the student is encouraged to talk with the Chairman of the department where the course is taught, and then with the Dean.

This informal process is meant to precede and to avoid formal appeal, but does not preclude formal appeal to the Faculty Council.

If students are unsure of the validity of their grievance or procedures for appeal, they should contact the Student Adviser in the Office of the Dean of Student Services.

262.6 Academic Standing

ACADEMIC STANDING

The term "academic standing" comprises matters such as transfers from one program to another within a faculty, continuation in a new program, graduation and the requirement for a student to withdraw. Unless stated otherwise, changes to academic standing regulations affect new students, continuing students, and students readmitted to a program or faculty. Students should refer annually to the Calendar for the academic standing regulations governing their degree programs.

FIRST-CLASS STANDING

First-class standing in a given year shall be awarded to any student who obtains a grade-point average of not less than 7.5 while enrolled in a full normal academic course load in that year; the definition of a full normal academic course load shall be left to the faculty concerned.

DEGREES WITH HONORS

A student in the Faculty of Arts or of Science with approved qualifications may proceed to the degree of Bachelor of Arts or Bachelor of Science with Honors by following a more concentrated course of study in a special field under the supervision of one of the departments. The time required for an honors degree is four years from senior matriculation.

Degrees with Honors are awarded in two classes: First Class Honors, and Honors, in accordance with the requirements of the faculty and department concerned.

DEGREES WITH DISTINCTION

At the discretion of the faculty concerned the notation "With Distinction" is inscribed on the permanent record and graduation parchment of a candidate for any degree, except an honors or graduate degree, if the candidate has obtained a grade-point average of 7.5 or higher over the last two years of their program. In the cases of the BA (Special) and BA (Canadian Studies), degrees with distinction shall be awarded to students who achieve a grade-point average of 7.5 or higher over all courses completed after the first five full course equivalents. (Courses declared extra-to-the-degree at the time of registration will not be used in the calculation.) In the BFA and BMus programs, the candidate is required to carry a full course load in each of the last two years. Students who have taken part of their work at another university may be granted adegree "With Distinction" at the discretion of the faculty concerned.

PROMOTION

Promotion regulations are set by the faculties of the University. Details will be found in the Faculty Regulations Section of the appropriate university calendar.

UNSATISFACTORY STANDING

(1) Students who have been admitted to the University with a weak matriculation record may be warned of the fact at the beginning of their first session.

(2) The records of all students are reviewed at the end of each session. Students whose records are found to be unsatisfactory will be notified by their Dean and may be referred to the Student Counselling Services for counselling. They may be denied the privilege of writing supplemental examinations and required to repeat their year. Students whose records are extremely unsatisfactory may be required to withdraw from the University, and normally at least a year must elapse before re-admission to the University will be considered.

(3) Students who have been required to withdraw must apply for re-admission to the Dean of the faculty in which they propose to register. The Dean may require a student to undergo counselling as a part of the process for obtaining re-admission. Students seeking re-admission must report their intentions by letter to the Dean not later than mid-June of the year in which re-admission is sought. The letter should include an explanation of their previous difficulties and indicate why the applicants believe that they may now be successful.

(4) Students with an extremely unsatisfactory record at another university will not be considered for admission to the University of Alberta until at least a year has elapsed from the date of leaving their former university. Thereafter, the procedure outlined in (3) will apply.

262.7 Student Records

STUDENT RESPONSIBILITY

Students are responsible for ensuring the accuracy and completeness of their official record at the end of each session that they attend by verifying their Statement of Results and the copy of their transcript provided during Winter Session registration and at convocation. Students should be aware that only the official transcript is retained permanently and that source documentation (the student file in the Registrar's Office) is destroyed *seven years* after the last registration. Queries regarding errors or omissions on the official transcript must be made as soon as possible, and will not be considered after the source documentation has been destroyed.

UNIVERSITY TRANSCRIPTS

(1) The only official academic record for each student is the Official University Transcript issued by the Office of the Registrar.

(2) The University of Alberta transcript includes the following information for each student record:

a. student name
b. student previous name(s)
c. student I.D. number
d. student birthdate
e. date of issue of transcript
f. degrees and awards granted
g. admission status and basis of admission
h. credit granted from other institutions or programs
i. faculty and degree program of registration
j. course information, including for each course:
session and term, course name, number, title, grade, course, weight, course units (Engineering students), grade points, hours of instruction index, class average and class enrolment
k. total weights and grade points used to calculate GPA
l. grade point average calculation
m. comments pertaining to academic standing in program
n. withdrawal date, if appropriate
o. disciplinary record of suspension or expulsion, if appropriate

(3) For further information regarding grades or GPA, refer to § 262.5 Academic Relations — Evaluation Procedures and Grading System.

(4) **Course Weight**: Course weight is assigned for the purpose of calculating a weighted (grade point) average. Normally a full course carries a weight of 6.0.

(5) **Course Hours of Instruction Index**: The Hours of Instruction Index is a weighted value based on the number of instruction hours per week as follows: total hours per week of lecture plus half the hours per week of all other types of instruction.

(6) **Units**: Units are used only for students in undergraduate programs in the Faculty of Engineering. Units are normally calculated in the same manner as the Hours of Instruction Index.

(7) **Grade Points**: Grade points are calculated by multiplying the course grade by the course weight, or the course grade by the course unit value for undergraduate Engineering students. Grades, weights and grade points not used in the calculation of the GPA are so indicated by brackets on the transcript.

COURSE REGISTRATION DEADLINES IMPLICATIONS FOR RECORDS

(1) Undergraduate students have until the second day of classes of the term in which to make changes to their registration without penalty. Courses dropped during this period are deleted entirely from a student's record.

Course withdrawals following this period and up to the **last day for withdrawing from courses for that term** result in a grade of W (withdrew) being recorded on a student's record. Grades of W are not included in the calculation of the Grade Point Average (GPA).

(2) Courses which are dropped following the deadline of the last day for withdrawing from courses for that term result in a grade WF (withdrew failing) being assigned for the course(s) by the student's faculty. Grades of WF are counted as numeric grades of 1 in the computation of the GPA on the transcript.

(3) Pass/fail (credit/no credit) courses which are dropped following the deadline for the last day of withdrawing from courses for that term, result in a grade of F(fail) being assigned for the courses(s) by the students's faculty. Grades of F are not included in the calculation of the GPA.

(4) When a student withdraws from one or more courses after the second day of classes, fees will be reassessed on a per course basis with the fee for each dropped course prorated to the date of withdrawal.

(5) §261 Academic Schedule of this Calendar contains the specific dates for the change of registration and course withdrawal dates noted above.

RELEASE OF STUDENT RECORDS

(1) Official transcripts of a student's academic record are issued by the Office of the Registrar upon written request of the student.Transcript request forms are available at the Student Access Centre, main floor, Administration Building. Transcripts are issued to the student personally or to whomever the student designates. Transcript fees are payable when the request is made. An official transcript bears the original signature of an authorized member of the Registrar's staff and the official seal of the University imprinted over the signature.

(2) Unofficial copies of the student's academic record are issued in the form of a sessional Statement of Results to the student, the student's Dean, and the Chairman of the Department or designee, in the case of a student registered in a specialized, honors or graduate program. An unofficial transcript or copy of the student's academic record bears neither an original signature nor the University seal.

(3) Unofficial copies of students' academic records may be issued to the following at their request: the Dean of a faculty to which a student wishes to transfer; Student Counselling Services, when a student has been referred for counselling by an authorized officer of the University; and the Student Awards Office, where an award made through a University scholarship committee is involved, on the understanding that information regarding the student's academic record will not be furnished to the scholarship donor without the student's consent.

(4) Unofficial copies may be issued at the student's request to other offices or individuals in the University.

(5) Public information regarding students, such as dates of attendance, place and date of birth, city and home address, verification of degree or degrees may be issued at the discretion of the authorized officer of the University to educational institutions, appropriate government agencies, prospective employers, and scholarship donors.

(6) Academic and disciplinary records are separate. The only disciplinary action that will be documented on a student's academic record is one involving the student's suspension or expulsion from the University. There is to be only one official disciplinary record. Prior to January , 1974 disciplinary records were kept by the Dean's Council. Since that date they have been kept in the custody of the Student Discipline Officer, who is responsible for implementing University disciplinary procedures, and who reports to the General Faculties Council (GFC). The only persons having access to such records will be those directly concerned with the action.

(7) Where access to academic records is sought for the purpose of statisitical research, such access may be granted by the Executive Committee of General Faculties Council on such terms as may be necessary to ensure the confidentiality of individual student records. Research on student data will be defined as not being within the normal administrative operation of the University. In case of doubt as to what may fall within "the normal administrative operation of the University", the GFC Executive Committee will decide.

(8) Where information is sought for the purpose of biographical research, it may be released at the discretion of the Registrar, subject to the following conditions; (i) for records less than 50 years old, the researcher must provide a release from the student or estate, or receive permission to obtain the information from the Executive Committee of GFC; (ii) for records more than 50 years old the Registrar will, at his discretion, provide the information; (iii) the researcher will not be permitted direct access to records, but must submit requests for specific information; (iv) decisions made by the Registrar may be appealed to the Executive Committee of GFC.

EXCEPTIONS TO STATED POLICY

Students who object to the release of information regarding their academic record, in accordance with the policy stated above, should notify the Registrar in writing, giving their specific objection. Appropriate action will be taken by the Registrar and the student will be advised.

WITHHOLDING OF UNIVERSITY DOCUMENTS

In any case where a student has neglected or refused to pay amounts owed to the University, the Registrar has been empowered and directed by the Board of Governors to withhold registration materials, student examination results or other indicators of academic attainment, until the student has settled the account with the University. For example, registration materials and certification with respect to the student's academic attainment may be withheld if the student owes the University for library penalties or fines; for purchases at the University Bookstore; for parking or traffic violations; for breakage or damage to laboratory facilities or supplies; for student fees and University of Alberta Emergency Student Loans; for room and board fees; for fees for re-examination or deferred final examinations; or, for fines imposed by the Discipline, Interpretation, and Enforcement Board, or other University disciplinary panels and boards.

263 Code of Student Behavior: Conduct and Discipline

This information is contained in full in the University Calendar (Section 19). It is the responsibility of each student to be familiar with, and adhere to, the terms of the Code of Student Behavior.

Students who wish to receive a copy of the Code may do so by contacting the Special Sessions Office or the Office of the Registrar.

264 Student Services

DEAN OF STUDENT SERVICES

The Dean of Student Services is the senior administrator in charge of administrative units working in the area of student services. These include the Office of the Dean of Student Services, the Office of Native Student Services, the International Centre, Counselling Services, Health Services, Disabled Student Services, Career and Placement Services, and the Student Awards Office.

The Dean chairs the Council on Student Services which is comprised of representatives from various service units on campus, the university administration, and the student body. The Council functions to ensure cooperation and coordination between all aspects of student services and as a forum in which any matter affecting students can be considered and recommendations made to the appropriate university authorities.

OFFICE OF THE DEAN OF STUDENT SERVICES

The office offers a number of services. It provides grievance advisory services to assist students with academic concerns. It handles club registrations and monitors and administers university liquor regulations.

STUDENT AWARDS OFFICE

Located at 252 Athabasca Hall, the Student Awards Office administers University of Alberta awards at the matriculation, undergraduate, and graduate level as well as small emergency loan fund intended to provide interim funding for students whose Alberta Student Finance Board disbursments have been unexpectantly delayed. The Office also houses a Graduate Resource Centre which provides information on graduate scholarships at other Universities around the world.

Financial Assistance. Undergraduate students enrolled in Intersession may apply for a loan based on financial need. Applicants must be enrolled in the Intersession in one or more courses leading towards the degree for which they are registered. Applicants must be bondafide residents of Alberta.

Inquires should be directed to the Students' Finance Board, c/o The Provincial Department of Advanced Education.

STUDENT COUNSELLING SERVICES

Counselling is offered on a confidential basis to students and prospective students throughout the year. There are minimal fees for vocational testing and study skills, but no charge for other services. Students wishing to see a counsellor are advised to arrange an appointment in advance.

Although counselling regarding vocational and faculty choice is available to prospective students during or after completion of their Grade XII year, concerns with selection of individual courses or options should be directed to the Dean of the Faculty in which the student intends to register.

University students may use Counselling services for any of the purposes indicated below:

(1) Study Skills. Study skills assistance may be provided through a combination of individual and / or group counselling.

(2) Vocational planning. A counsellor may be consulted about future plans, including professional training. Tests and other means of vocational assessments are available when deemed appropriate by the counsellor.

(3) Personal problems. Sometimes when a student's performance suffers because of worry, restlessness, inability to concentrate, or preoccupation with personal problems. In such circumstances personal counselling is advised.

(4) Unsatisfactory standing. Students with academic standing labeled "unsatisfactory" are advised but not required to see a counsellor before continuing their programs, while those labeled "extremely unsatisfactory", may, in some cases, be required to see a counsellor before readmission is considered.

For futher information or to arrange an appointment, telephone 492-5205 weekdays between 8:00 a.m., May 1 through August 31; and between 8:30 a.m. and 4:30 p.m.; September 1 through April 30, or write Student Counselling Services, 102 Athabasca Hall, University of Alberta, Edmonton, Alberta T6G 2E8.

OFFICE OF NATIVE STUDENT SERVICES

The Office of Native Student Services serves both the University and the wider community. First, it is a student service which is complementary to counselling, remediation and other student services within the University. The office provides an orientation for new students and is a primary resource for the Native Student Organization, which maintains a meeting room and study room connected to the office. As administrators of the Native Student Development Fund, the office reviews applications for small bursaries and emergency loans, and awards bursaries and prizes based on academic achievement. The office assists students in all aspects of university life. Its main function is to make the University more accessible to Native students. Its main function is to make the University's information services and academic services available to the Native sector of Alberta's population.

Enquires are welcome at the Office of Native Student Services, 124 Athabasca Hall, The University of Alberta, Edmonton. T6G 2E8 (telephone 492-5677).

INTERNATIONAL CENTRE

The International Centre is the unit within Student Services responsible for:

Services

A major purpose of the Centre is to provide information and asistance to foreign students so that they will adjust to their new culture and achieve their educational goals. The Centre offers oreintation and re-entry workshops, administers an emergency loan fund and a bursary fund, assists CIDA, Commonwealth and other scholars, provides information on Canada Immigration matters, provides advising on concerns ranging from the personal (specific) to the academic (general), offers administrative assistance including providing official letters to banks, families and sponsors, and conducts referral, liasion, advocacy and research regarding foreign students and the issues that concern them.

Programs

Through programs offered by the Centre, the University community has the opportunity to interact with students from other countries. A major thrust of programs if to promote international students as "living resources" on campus and to increase the level of global understanding by exploring issues in development. Programs range from the daily lunchtime "Passport to the World" program (Winter Session) to the comprehensive Family Life Program, which meets the needs of foreign students and their families.

Study Abroad/Exchange

The Centre offers a study abroad/exchanges program enabling Canadian students to gain valuble experience overseas while attending the University of Alberta. The program includes the administration of several academic student exchanges with institutions overseas, the annual Overseas Options Week in October, and Overseas Opportunities Room containing information on study/work and volunteer opportunities overseas as well as workshops and advising sessions throughout the year.

The Centre has several publications, including a newsletter (10 issues/year) Foreign Student Handbook, and Guide to International Exchanges. The Centre is open Monday - Thursday from 8:30 - 10:00 pm (on days classes are held) and until 4:30 pm on Fridays throughout the Winter Session, 8:00 am - 4:00 pm throughout the Intersession.

DISABLED STUDENT SERVICES

Students with physical, sensory or learning disabilities are invited to contact the Office of Disabled Student Services, Room 300, Athabasca Hall, 492-3881 (voice or TDD) or 492-7269 (TDD only) for information or assistance. The Office coordinates the efforts of various University departments and off-campus agencies in meeting the special needs of students with disabilities and provides services relevant to program access and participation in campus life. A wide variety of services are available including: orientation to the university; program planning; sign language interpretation arrangements; and financial and personal advising.

Through an extensive Volunteer Program, the Office also offers the following kinds of volunteer assistance: exam writing, taping of readings, escort or study help, tutoring, library research help, mobility assistance and special project help.

A Disabled Student Handbook, campus accessibility map, tactile map for the campus (for the blind), and specialized aids and equipment are available for student use.

The Office is the contact point for students sponsored by the Alberta government's Vocational Rehabilitation for Disabled Persons (VRDP) program.

Early contact by those considering attending the University of Alberta or by those admitted will assure easier transition to the university.

UNIVERSITY HEALTH SERVICES

Comprehensive medical care is provided throughout the year by the University Health Service. A fee is assessed to cover in part, pharmaceutical and other ancillary services not paid for by the Alberta Health Care Insurance Commission. Fully qualified medical and nursing personnel staff the Health Services which is located on the corner of 111 Street and 88 Avenue, immediately south of the Law Centre. Details of the range of services provided may be obtained by contacting the Nursing Supervisor at 492-2612.

HOUSING AND FOOD SERVICES

The Department of Housing and Food Services recognizes student housing as an important part of the University experience, and is pleased to offer you convenient, comfortable, on-campus housing while you attend the Intersession. Pembina Hall and the Lister Residence are our furnished residences, and are available for the Intersession or short-term accommodation. If you will be staying with us for the whole summer, you might want to consider one of our unfurnished residences, Garneau, Hub Internation, or Michener Park, which are leased on a monthly basis. Application forms may be obtained from the Housing and Fod Service's Office, 44 Lister Hall, University of Alberta, Edmonton, Alberta T6G 2H6, or by calling us at 492-4281.

Pembina Hall: Pembina offers a relaxed and quiet study atmosphere, for the whole summer or just a night or two. Constructed in 1914, Pembina is one of the University's original residences, located in the heart of the campus and surrounded by well-kept lawns and trees. The Central Academic Building Students' Union Building, and HUB Mall are all close by. Dining facilities are available in Lister Hall and CAB, as there are no cooking facilities in the study bedrooms. Each floor does feature a small kitchenette and communal lounge for your use. All rooms are fully furnished singles, and linen (except towels) is provided. Coin-operated laundry facilities are located in the residence.

Lister Residence: The Lister Residence is also right on campus, and consists of three high-rise tower overlooking south-central Edmonton. Single accommodation is available on a room and board basis. The study bedrooms are fully furnished, and Lister provides many amenities; steam room. weight room, tennis courts, colour televisions in the lounges, piano and music practice rooms, tanning beds, and study rooms. Dining facilities are located right in the residence, or at various food service outlets across campus. Students must provide their own bed linen and towels, and coin-operated washers and dryers are located on each floor.

Garneau: Garneau is one of Edmonton's finest old neighborhoods, located just east of campus next to the Law Centre. The Garneau Residence is made up of a variety of apartments and houses which are leased on a month-to-month basis. A coin-operated central laundry facility is available to all students living in the residence.

The Garneau apartments are attractive, modern walk-ups, constructed as residences for Universiade '83 (the World University Games). Most of these one, two and four-bedroom unfurnished units features, spacious balconies for suntanning and relaxing, and are equipped with a refrigerator, stove and security intercom system. Bicycle storage space is available.

The Garneau houses are unique in design, ranging in size from cozy one and two-bedroom units to spacious four and six-bedrooms communal houses. All are equipped with a refrigerator and stove, and utilities are included in the rent.

HUB International: HUB is one of the most unusual housing complexes in North America. An international gathering place, HUB offers opportunities to meet students from as far away as Hong Kong, Lebanon and Kenya. Students overlook a self-contained mall with a wide variety of restaurants shops, and services, inlcuding a dry cleaner, laundromat, and hair stylist. The mall is conveniently joined by covered skywalks to the Rutherford Library, Humanities Center, and the Fine Arts, Law, and Business buildings. Unfurnished bachelor, one, two or four-bedroom units are available on a month-to-month basis.

Michener Park: Michener Park is a quiet community six kilometers south of the main campus, designed for couples with or with children. For families, two-bedroom apartments with balconies on the upper floors and patios at ground level are available, or two and three-bedroom row houses with sem-private yards opening onto landscaped courtyards. Couples without children may chose between Vanier House, a 14 story high-rise featuring unique bi-level one-bedroom apartments, and Galbraith House, a 21 story tower of two-bedroom apartments. All units are available on a monthly only.

Furnishing include refrigerator, stove, drapes, and living room carpeting. Free laundry is also available at a central location, and utilities are included with your rent. Michener Park provides playgrounds, day-care, a babysitting co-op, and computer room on-line to the mainframe University of Alberta academic computer system. The Park is close to shoppi ng, the University of Alberta Tennis Centre, and excellent bus routes to the University and downtown.

Food Services: During the Intersession, food service is available at Lister Hall, CAB, and a various convenient lunchrooms in academic buildings across campus.

Parking: Arrangements for parking at Lister Residence may be made at the Front Desk when you arrive. At Michener Park, a permit must be obtained from the Housing and Food Services' office. For parking at any other residence, please contact Parking Services at 492-3811.

Other:

1. **Off-Campus Housing** information is available at the Housing Registry in Room #150. Students' Union Building. The Housig Registry compiles lists of available houses, apartments, suites, and rooms throughout Edmonton, and provide information on subsidized housing and qualifying guidelines. A custom computer printout of available units is provided, and students are responsible for contacting landlords directly. For more information, call 492-6207.
2. **St. Joseph's College Residence** offers a limited number of rooms for men and women during the Intersession. For more information please write to the St. Joseph's College, University of Alberta, T6G 2J5, or call **492-7681.**

CAREER AND PLACEMENT SERVICES (CAPS)

The University, with the assistance of Employment and Immigration Canada and the Students' Union, maintains a full-time career advising and student placement service on campus on a year-round basis. Students at all levels of their studies are invited to use the facilities of this Office whether they are seeking part-time, summer or permanent employment. CAPS provides:

(1) On-campus recruitment
(2) Resumé writing, job interview and job search workshops
(3) Job selection and referral
(4) Career advising and employment counselling
(5) Career Resource Library
(6) National job marketing information bank

To take advantage of services offered, all students seeking assistance in finding employment are urged to contact the Office, preferably early in the school year.

Career and Placement Services is located on the 4th floor of the Students' Union Building (telephone 492-4291).

CAMPUS RECREATION

During the Intersession, through the cooperation of the Faculty of Physical Education and Recreation and the Students' Union, the Campus Recreation Wing of the Department of Athletic Services organizes and administers well balanced programs of recreational activities. The Intersession Recreation Program offers students a wide variety of instruction, tournament and league play and also the use of facilities for casual (non-structured) recreation. Co-ed basketball, slow pitch, soccer, and volleyball league play, are yearly favorites. The Instructional Program offers extensive activities including golf, 3 levels of tennis, squash, dance and weight training. In addition physical fitness programs are available to students for a nominal fee. Casual recreation is also provided in the following facilities: Universiade Pavilion, 3 gymnasiums, 2 swimming pools, ice arena, 7 squash, 7 racquetball, and handball courts, weight training room, sauna, outdoor playing fields, and tennis courts. Lockers and towel service will also be provided during the sessions for a "nominal charge".

Further information may be obtained from the Campus Recreation Office (Room W108, Physical Education and Recreation Centre) between 9:30 a.m. - 12:00 p.m. and 1:00 p.m. - 4:00 p.m.

BOOKSTORE

The University maintains a large and modern bookstore in the Students' Union Building, where prescribed textbooks and supplies of all kinds may be purchased. The Bookstore also stocks a wide range of other items of special interest to students and faculty. Information concerning textbooks for the Intersession can be obtained from the Bookstore. Students are advised to order textbooks as soon as possible. Failure to do so may result in their being unable to obtain prompt delivery at a later date owing to textbooks being temporarily out of stock.

Textbooks may be returned as late as the week following the date of commencement of the course, provided that they are unmarked and are accompanied by the original sales slip or C.O.D. order. Textbooks purchased after this date will be non-returnable. Returns of textbooks resulting from withdrawal may be made after this date providing that the books are in an unmarked condition and the student requesting the refund has retained his sales slip, and in addition has obtained a copy of the withdrawal form. This request for return must be made within seven days of the withdrawal.

Mail orders will be accepted only on a C.O.D. basis. When ordering textbooks by mail from the Bookstore, please state the course name, course number, and section number.

PARKING REGULATIONS

No free parking is available within the boundaries of the campus. While parking facilities are available for all students who wish to park on campus during the Intersession, a permit must be obtained and affixed to the vehicle.

Specific information with respect to Intersession parking is printed at the back of this Calendar.

DAY CARE CENTRES

The Students' Union and Community Day Care Centre located in HUB (8917 - 112 Street) may have several openings for children of Intersession students from May/91 until September/91. The Centre operates from 7:15 a.m. to 5:15 p.m. Monday to Friday with mid-day meals provided. The staff are fully qualified to work with young children. Fees are based on family income. Interested students should contact the Day Care Centre at 492-2245.

The University and Community Day Care Centre operates in Windsor Park School, two blocks from campus (8720-118 Street). Applications will be accepted from the families of University of Alberta staff and students, and from families from the community in general. Interested parents should direct inquiries to the Director at 433-0070.

265 Intersession 1991

In 1991 the former, separate, Spring and Summer Sessions have been combined to form the **Intersession,** comprised of a Spring Term and a Summer Term. The purpose is to improve program planning and to provide a better integration of course offerings over the May to August period.

The other notable feature is that most 3-credit courses are now scheduled over the six-week period of the Spring Term or the Summer Term.

For 1991 the relevant dates are as follows:

Intersession 1991

Spring Term	Summer Term
May 6 - June 14	July 2 - August 9

265.1 Intersession Timetable Format

The Timetable which follows this section is integrated, combining the courses planned for the Spring and Summer Terms of the 1991 Intersession. Those courses scheduled for the complete Spring Term are referenced as **Spr: FULL** and those scheduled for the complete Summer Term as **Sum: FULL.** Exceptions are noted with specific dates.

The **Explanation of Timetable Columns** preceeding the **Timetable** provides an explanation of the various information included in the Timetable. A chart of **Building Abbvreviations** appears immediately preceeding the Timetable.

265.2 Registration

Continuing students may register by telephone according to the procedures outlined in the **Telephone Registration** section of the Calendar. No further admission or permission process is necessary with the exception of those specifically noted on certain courses in the Timetable or in the **Course Descriptions** section of the Calendar.

Students should ensure that their registration applies to the appropriate term as not all courses are offered in both terms.

Enrollment in some courses may be limited so students are encouraged to register as early as possible. Also, courses may be withdrawn for reasons of insufficient enrollment. Low enrollment sections in the Spring Term will be withdrawn on April 10, 1991 and those in the Summer Term on June 5, 1991.

For further information on registration refer to Section 262.3.

265.3 Admission

For the 1991 Intersession no new admissions are being accepted, with the exception of the Unclassified Student Program.

265.4 Re-admission of Former Students

See **Admission Procedures for Continuing and Former Students** in the **Admissions** section of this Calendar or contact:

ANTHR 396 Archaeological Field Methods ★6 Much of data which archaeologists use to study past societies is obtained through the medium of site excavation. But excavation is a destructive process which requires a wide assortment of skills ranging from meticulous excavation techniques to managing large budgets with interpersonal relations. This course is designed to provide students with a foundation in basic archaeological methods including: excavation and recording techniques; site mapping, and; lab procedures. The course is six weeks long (May 21-June 28, 1991). The first and last weeks will be conducted in Edmonton at the University of Alberta.

LOCATION: For the 1991 field season, the field school will be excavating a site on Saskatoon Mountain, located just west of Grande Prairie. The site is estimated to be about 8,000 years old. The project is being conducted in association with the Archaeological Survey of Alberta. Arrangements are being made for accommodations at Grande Prairie College in Grande Prairie. Daily transportaion will be provided to and from the site.

TUITION AND FEES: In addition to the tuition and fees, students will be required to supply their own basic excavation kits (estimated cost $45.00), using a list of recommended equipment that will be provided as part of an information package upon acceptance into the course.

PREREQUISITE: An introductory anthropology or archaeology course and permission of the Department. The course is limited to an enrolment of 15 students and preference will be given to those students majoring in archaeology.

ROOM AND BOARD: Student should budget approximately $325.00 (rent and food) for the four week period in Grande Prairie.

CREDITS: One full course equivalent (equal to 26 weeks of instruction).

CLASSICS 475/476/602 Practical Methods in Classical Archaeology ★3 The techniques of excavation and recording in Classical Archaeology. Prerequisite: Consent of the Department.

(A) This course will be offered in Italy during the Summer Term only. It will be open to individuals with some background in Classics, Ancient History, Archaeology or Anthropology. It will be taught as a field school at the excavation site Roccagloriosa where the University is currently involved in active fieldwork and at Gravina di Puglia. Students taking the course will be trained in:

a) distinguishing and excavating archaeological strata;
b) recording the structures and materials found;
c) elementary on-site draftmanship;
d) classifying and cataloguing artifacts, especially pottery, in the excavation laboratory;
e) techniques of recovering animal and plant remains.

(B) A letter of permission will be needed by students applying from other universities to ensure that proper credit will be given. If not currently enrolled in another degree program, prospective students should apply for Special Student Status. The tuition will not be refunded except in cases of extreme distress.

(C) Audit privileges are not extended to students in this course. Students who do not wish credit may apply to the Dean of the Faculty of Arts for permission to register as Special Student and will pay the normal fee.

(D) This course will be withdrawn unless there is a minimum of 12 students enrolled by May 4. Registration is limited.

266 Unclassified Student Program

266.1 Definitions and Deadlines

Unclassified students are adult students registered in selected credit courses but who are not committed or admitted to a degree or diploma program but are taking specified courses for general interest. No assurance is given that courses taken through the Unclassified Student Program will subsequently be credited to a degree or diploma program. A full record of each student's work will be kept. If an Unclassified Student decides to apply for admission to a degree or diploma program at a later date, the credits earned can be evaluated for appropriateness to that program.

Deadlines:

Unclassified Students must apply and register by:

Spring Term	**Summer Term**
May 7, 1991	July 3, 1991

266.2 Application/registration Procedure

1. Obtain a copy of the **Unclassified Student Application and Registration** form from:
   Special Registrations Co-ordinator
   Office of the Registrar
   2nd Floor Administration Building
   University of Alberta
   Edmonton, AB T6G 2M7
   Phone: (403) 492-4610
2. Consult the list of course offerings for Unclassified Students (Section 264.4) to determine which courses are open to Unclassified Students.
3. Complete all parts of the "Application and Registration" forms. Incomplete applications will be returned.
4. Enclose a cheque or money order to cover the full cost of the fees required.
   Fees to be paid are made up of three components:
   a) Application Fees (*);
   b) Tuition Fees, and;
   c) Library and Computing Services Fees.
   (*) Not required if the student has previously been enrolled as an Unclassified Student.
   Unclassified Students are not assesed General Fees (that is, Students' Union, Athletic Services, and Health Services).

At the time of publication of this Calendar, the 1991-92 fee schedule had not been set. Fees are approved by the Board of Governors and students pay their fees at the rates which are in effect at the time of payment.

For information on fees applicable to Unclassified Students contact:
Special Registrations Co-ordinator
Office of the Registrar
2nd Floor Administration Building
University of Alberta
Edmonton, AB T6G 2M7
Phone: (403) 492-4610

Alberta residents age 65 or more are not required to pay application fees or tuition fees (proof of age is required). Students who are not Canadian Citizens or Permanent Residents (Landed Immigrants) must pay an additional 50% of the tuition fee and submit official education transcripts. **Payment in full must accompany the form. (No cash will be accepted).**

5. Read the declaration at the bottom of the form and sign it.

266.3 Special Regulations

University Regulations: Rules and regulations applicable to all other University students apply to Unclassified Students as well.

Transcript Requirements: Unclassified Students are not normally required to submit high school or university transcripts. In some cases, documents may be requested. An example would be to clear a prerequisite for a certain course.

Students who have been required to withdraw from a post-secondary institution will not be considered for admission as Unclassified Students for a period of one year from the date they were required to withdraw.

English Language Proficiency Requirements: Unclassified Students are subject to the English Proficiency requirements as specified in Admission section of this Calendar. Students whose native language is other than English will be required to provide proof of English Language Proficiency.

Maximum Course Load: Contact the Special Registrtions Coordinator, Office of the Registrar (492-4610) for details of maximum course load.

General Fees: Unclassified Students will not be assessed general fees, and are not eligible for Students' Union, University Athletic Services, or Univesity Health Services benefits.

Student I.D. Cards: Student I.D. cards will be issued which may be validated for library privileges.

Withdrawals and Cancelation of Registration: Students who wish to cancel their registration must submit a "Notice of Withdrawal" form to the Special Registrations Co-ordinator (2nd Floor, Administration Building). Fees will be pro-rated according to the schedule in section 262.4 of this Calendar, **to the date when the form is approved.** A failing grade will be assigned if a student ceases to participate in a course without providing notification of withdrawal, or if a student withdraws after the deadline published in the **Academic Schedule** (Section 261) of this Calendar.

267.3 Telephone Registration Procedures

STEP ONE

Check your telephone to ensure that it is a true Touch Tone Telephone. Push button phones which do not generate a different tone for each number selected will not work.

ORGANIZE YOUR REGISTRATION MATERIAL

You will need the following to register:
- Special Sessions Calendar
- Admission Letter for new students

It is to **your advantage** to register as soon as possible.

PROGRAM REQUIREMENTS

Before selecting your courses, review the requirements for your program.

CHOOSING COURSES AND SECTIONS

Before proceeding, check the course listing and the calendar requirements for:
- Course restrictions
- Need for department consent
- Prerequisites
- Corequisites
- Pre-session study

When you select your courses, be certain that you have included each type of instruction [LEC (lecture), LAB (laboratory), SEM (seminar), etc.] listed for the course.

- Auditors

  To register as an Auditor Only (i.e., you are not registered for credit in any courses), complete an 'Auditor Only' registration form, available at the Registrar's Office, Student Access Centre, main floor of the Administration Building. Auditors may not register until the first day of classes. If space permits, audit registrations may be accepted at that time. If you wish to register in a combination of credit and audit courses, please refer to section 262.3.

- Unclassified Students

  Unclassifed students should contact the Special Registration Coordinator at the Registrar's Office, 2nd floor, Administration Building or phone 492-4610.

- Examination Schedule

  When you select your courses, check your examination schedules, which appear in the 'Timetable'.

STEP TWO

COMPLETE THE TELEPHONE REGISTRATION WORKSHEET

Locate the "tear out" Telephone Registration Worksheet.

The example on the next page shows how to transfer information from the course listings in this calendar to the worksheet.

Complete your Telephone Registration Worksheet.

Enter the following information:
- Catalogue Number
- Course Abbreviation
- Course Number
- Section Type
- Section Number

Refer to the course listings in this calendar to double check your entries. Complete an entry for each type of instruction required for the course (e.g. LEC, LAB, SEM, CLN).

Session Codes:
Intersession 9105
For Faculty/Degree Codes for Telephone Registration
see page 34.

Telephone Registration System Opens February 15, 1991
(see page 36 for operating hours)

Example . . .

COURSE	WT	TERM	CATALOGUE NUMBER	SECTION TYPE	HOURS/DAYS
CHEM 100	6	Spr: FULL	12345	Lec nn	1000-1220
Introductory University Chemistry			98765	Sem nn	1300-1405
			34587	Lab nn	1415-1730

4 Enter the proper course request sequence and listen for the response:

TO ADD A COURSE

Add Code	Star Key	Catalogue Number	Pound Key	Course Abbreviation	Course Number	Section Type	Section Number
A	*	12345	#	CHEM	100	Lec	20
A	*	98765	#	CHEM	100	Sem	20
A	*	34587	#	CHEM	100	Lab	20

Courses closed to telephone registration are so indicated by a comment in the timetable footnote and an 'X' preceding the catalogue number. You must go to the teaching department to register in such courses.

Re-check your Telephone Registration Worksheet.

When you are satisfied that the information on your worksheet is complete and accurate, go to **STEP THREE.**

STEP THREE

REGISTER BY TOUCH TONE TELEPHONE

REGISTER EARLY

Due to financial constraints only courses which have adequate enrollment are offered in the Intersession. Low enrollment courses will be withdrawn by the following deadlines:

Spring Term — April 10, 1991
Summer Term — June 5, 1991

STANDARD OPERATING HOURS
Monday through Thursday:
0800 - 2200 hours

Friday:
0800 - 1630 hours

Saturday and Sunday:
0800 - 1700 hours

The system will be closed:
Statutory Holidays

The system opens for Intersession Registration on Friday, February 15, 1991.

Follow the steps on the "tear out" Telephone Registration Worksheet. The shaded area is for your information only.

For each course, register in the primary section (normally a LECTURE) first. You must register in a non-primary section (e.g. LAB, SEM, CLN) immediately thereafter, if one is required for the course.

The voice response will confirm a successful registration in a course immediately after entry. If your selection is unavailable, the computer will suggest an alternative choice, if one is available.

Note: When a desired course is unavailable, you may wish to interrupt your registration by terminating this call (enter X#). The course sections you have successfully selected will be retained for you. When you have made alternative selections that fit your timetable, call again to continue your registration.

If the suggested alternative is not listed, telephone 492-8237 for the catalogue number and time offered. Ensure that you are prepared to write down the information provided. (This number is available during normal office hours only).

Before terminating the telephone call, you should use the list function (enter L#) to check the entries which were successfully completed.

STEP FOUR

HOW TO CHANGE YOUR REGISTRATION

If you are registered in courses that are open to the telephone registration system, you can:

- Drop courses
- Add courses
- Cancel your entire registration

using the telephone system.

If you drop a primary section (e.g. lecture), the non-primary sections, (e.g. laboratories, seminars, clinics) are automatically dropped.

If you drop a non-primary section, your primary section will be unaffected.

If you wish to change sections in a course, drop your original request before adding the new section.

If you have registered in a course or section that is subsequently cancelled, you will be notified by mail.

Use the telephone registration system to make changes until 2200 hours on the appropriate dates as indicated below:

Spring - term and full session courses	Tues. May 7, 1991
Summer - term courses	Wed. July 3, 1991

WITHDRAWAL FROM COURSES

After the closing of telephone registration in a term, use a 'Change to Audit Status/Withdrawal' form to withdraw from courses. Forms are available at the Student Access Centre, main floor of the Administration Building, and at your faculty office.

CANCELLATION OF YOUR ENTIRE REGISTRATION

The request to cancel your entire registration **must be used with care:** once you have entered the request via the telephone, **all** your courses will be deleted from the program and session that you have accessed.

To cancel your entire registration, please enter:

S * S #

Once the deadline for course changes for first term and full session has passed, this procedure is no longer available. Second term course drops must be done individually.

HOW TO CHANGE YOUR PROGRAM

YOU MAY BE REGISTERED IN ONLY ONE PROGRAM AT A TIME.

If you are registered in courses in one program, and are subsequently admitted to another program, you may:

1. Retain your previous registration if you decide not to enter the new program.
2. Cancel your previous registration and re-register in the new program.
3. Register in the new program by transferring eligible courses from the old to the new program — your previous registration will be cancelled automatically.

If you choose to register in the new program, enter the new Faculty and Degree codes in the action code. You will be prompted by the system when you attempt to add your first course as follows:

You are already registered in another program. To transfer your courses to the new program, please enter the M key followed by the star key, then the M key followed by the pound key and stand by, or to cancel your previous program please enter the S key followed by the star key, then the S key followed by the pound key, or please enter your request now.

After you have completed the request to transfer courses to a new program (M * M #), please list your courses (L #) to verify those that were successfully transferred.

Note that courses for which you are not eligible under the new program will have been dropped.

STEP FIVE

CONFIRMATION OF YOUR REGISTRATION AND FEE ASSESSMENT

Your registration in Spring or Summer courses is confirmed at the time you register. A fee assessment will be mailed to you immediately when you effect a telephone registration.

If you do not receive this notice prior to the start of classes, it is your responsibility to obtain an assessment from the Office of the Registrar. You are accountable for fees for any course in which you are registered.

WARNING

Your student identification number is part of your telephone registration security access code. Do not give your student identification number or student identification card to other students.

Students who attended the 1990-91 Winter Session will continue using their Winter Session identification card.

IDENTIFICATION CARDS AND LIBRARY VALIDATION

Students who have not attended the 1990-91 Winter Session may pick up their identification card at the Office of the Registrar, Administration Building on the first day of classes.

IF YOU DO NOT PLAN TO ATTEND

If you do not plan to attend, it is your responsibility to cancel your registration. Failure to do so will make you responsible for the payment of fees and a failing grade will be added to your record.

Responses from the Telephone Registration System

As you follow the steps of registration, the telephone registration system will:

- Prompt you to make your next request.
- Evaluate each request.
- Inform you whether or not your request was successful.

The following comments are intended to assist you in evaluating some of the responses given by the telephone registration system.

Telephone Registration System

Voice Response	Explanation
Busy Signal	All lines are busy or The telephone registration system has temporarily lost computer access. Please call again at a later time.
No answer	The system is temporarily unavailable. Please call again later.
"You are already registered in another program. To transfer your courses to the new program, please enter the M key followed by the star key, then the M key followed by the pound key and stand by, or to cancel your previous program, please enter the S key followed by the star key, the S key followed by the pound key, or please enter request now."	**TO TRANSFER** your eligible courses from your previous registration press: M*M# (as illustrated on the Telephone Registration Worksheet) OR **TO CANCEL** your previous registration entirely press: S*S# (as described in Step Four). If you do not wish to transfer or to cancel your previous registration, you cannot continue with this registration. Terminate this call by pressing X#.
I am sorry. You are not eligible to register in the requested session or program. Check and please enter an action code now.	You have not been admitted to the requested session or program, or you have not entered your action code correctly.
"I am sorry. There is a financial hold on your record. For assistance, call the Registrar's Office at 492-3113 between 9:00 a.m. and 4:00 p.m. Thank you for calling. Good bye."	You are unable to register because you failed to clear an outstanding account (e.g., parking ticket, transcript fee, tuition, library fine, etc.).
"I am sorry. You are not eligible to register in this section. Please enter your request now."	Refer back to the course timetable and check the published restrictions for this course.
"I am sorry. This section you requested is full. No other sections of this course are available. Please enter your request now."	As a course becomes full, additional sections may be added or seats may be released as other students request registration changes. Try again later to see if openings are available or choose an alternative course.
"I am sorry. The section you requested is cancelled. No other sections of this course are available. Please enter your request now."	Additional sections may be added at a later date.Try again later to see if openings are available or choose an alternative course.

"I am sorry. The section you requested is cancelled (or full). Section _ _ at the same time is available. If you would like this class, press A followed by the pound key or please enter your request now."	If this section you requested is full or cancelled and another section is available at the same time, the system will offer that section to you. To accept registration in the section offered, simply press "A" followed by the pound (#) key.
"I am sorry. The section you requested is cancelled (or full). Section— at another time is available. Please enter your request now."	Note the section number suggested. Go back to the timetable, select either the suggested section or an alternative section. Be careful not to introduce a scheduling conflict into your timetable. If the suggested alternative is not listed, telephone 492-8237 for further information.
"The section you requested does not exist. Check and please enter your request now."	The catalogue number you have entered is incorrect. Go back to the course listings and check the catalogue number.
"I am sorry. The section you requested cannot be added to your registration. Check and please enter your request now."	The catalogue number you have entered is not a valid number for the session requested. Go back to the course listings.
"I am sorry. Adding this section will exceed the maximum number of courses permitted in a term or session. Please enter your request now."	If you wish to exceed the maximum course load permitted for your program, you must contact your faculty office for approval.
"I am sorry. You must add the primary section of the course first. Please enter your request now."	The primary section (usually LEC) must be added to your registration before you attempt to add non-primary (e.g. LAB, SEM) sections.
"Course (e.g. Biology) Number (e.g. 197) Type (e.g. Lecture) Section number (e.g. 50) has been added to your timetable. Ensure you register in the associated lab seminar or clinic. Please enter your request now."	If you do not register in the required non-primary section(s) such as LAB, SEM, CLN, your registration in the course is not complete. Due to the demand for laboratory space, you will have problems when classes start if you fail to register now in the appropriate non-primary sections.
"Course (e.g. Biology) Number (e.g. 297) Type (e.g. Lecture) Section number (e.g. 50) has been dropped from your timetable. The associated Lab, Seminar or Clinic has been dropped from your timetable. Please enter your request now."	When you drop a primary section (usually LEC) the associated non-primary sections (LAB, SEM, CLN) are automatically dropped. If you wish to re-add the course you must add both the primary and non-primary sections.
"Telephone registration in this course is not available. Check and please enter your request now.	If you receive this response, contact the teaching department for registration assistance.

If you encounter problems with telephone registration, call:

270 Pre-Session Study

Certain courses listed in the **Timetable** require pre-session study. This requirement is shown in the comment section of specific courses.

It is the student's responsibility to obtain the required pre-session study instructions. This may be done in-person by picking up the material at:

Special Registrations
Office of the Registrar
2nd Floor Administration Building
University of Alberta

or by completing the form below and mailing it to:

Special Registrations Co-ordinator
Office of the Registrar
2nd Floor Administration Building
University of Alberta
Edmonton, AB T6G 2M7
Phone: (403) 493-4610

NOTE: Receipt of pre-session study instructions does not confirm registration in course. Registration will be confirmed upon the student's receipt of a Fee Assessment.

273 Course Descriptions

GENERAL INFORMATION

The courses listed below are planned for Intersession 1991. Please consult the Timetable for information concerning scheduling of specific courses.

Not all courses are offered in both terms of the Intersession. Students should ensure that their registration applies to the correct term.

Each course is designated by its computer abbreviation and a number. Following the title of the course is the symbol "★" standing for "course weight", and a number indicating the weight of the course as used in computing grade-point averages.

Courses numbered 100 to 199 are introductory, usually equivalent to high school courses. Those numbered 200 to 299 are junior courses, normally taken by first-year undergraduates. Those numbered 300 to 499 are senior courses, normally taken after the first year. Courses numbered 500 and up are normally restricted to senior and graduate students.

The course weight and the instructional time for a course appearing in this calendar is equal to that for the same course offered during the regular Winter Session.

The University reserves the right to impose registration quotas on, or to withdraw, any of the courses listed below.

The appearance of a course in the following list does not constitute any guarantee that the course will be offered.

ACCOUNTING

ACCTG 311 Introductory Accounting ★3 Postulates, principles, the accounting cycle, capital and income measurement, financial statement preparation and analysis; emphasis on reporting to shareholders, creditors and other external decision-makers. Prerequisite: ECON 101, 102.

ACCTG 322 Managerial Information and Control Systems ★3 Corporate goals, planning and control concepts, cost accumulation for pricing purposes, and product costing. Prerequisite: ACCTG 311.

ACCTG 424 Intermediate Managerial Control Concepts ★3 Accounting for managerial decision-making. Emphasis on cost and revenue accumulation for control and pricing problems as well as on product costing. Prerequisite: ACCTG 322, MGTSC 352, ORG T 301, ORG T 311.■

ADMINISTRATION SCOLAIRE ET MEDIA/EDUCATIONAL ADMINISTRATION AND MEDIA

ADMSC 401 Le rôle du professeur ★3 Etude de l'organisation de l'éducation publique en Alberta et de certains problèmes critiques en gestion scolaire. Ces problèmes peuvent varier selon le niveau et l'intérêt des étudiants. Antérieurement ADMSC 461.■

AGRICULTURAL ECONOMICS DEPARTMENT OF RURAL ECONOMY

AG EC 400 Special Topics: Advanced Farm Management ★3 Individual study. Study of a selected topic or problem requiring both written and oral reports. Prerequisite: Consent of the Department Chair.

AG EC 484 Agricultural Marketing Economics ★3 Structure and performance of agricultural markets. Applied agricultural market and price issues. Prerequisite: AG EC 384.■

ANDRAGOGIE/ANDRAGOGY

ANDR 510 Formation à la méthodologie de l'andragogie ★3 Les grandes tendances de l'andragogie. Les problèmes de communication interindividuelle et de groupe. La communication pédagogique en tant que processus spécifique. Les attitudes du formateur et leurs effets sur les apprenants. Les grandes familles de méthodes pédagogiques: de la directivité à la créativité.

ANDR 520 Formation expérientielle à la dynamique de groupe ★3 Les concepts de groupe, d'organisation et d'institution. La dynamique de groupe: définition, ses différentes étapes, son utilisation dans le groupe de tâche et d'apprentissage. Prérequis: ANDR 510 ou l'accord du Doyen.■

ANTHROPOLOGY

ANTHR 101 Introductory Anthropology ★3 A general introduction to Anthropology through the study of central concepts and key issues. These include human evolution, the appearance of culture, social organization, cultural theory, symbolic systems, culture change. Note: Not open to students with credit in ANTHR 202 or 301.

ANTHR 110 Gender, Age and Culture ★3 An anthropological review and comparison of cultures in terms of social positions based on differences in sex and age.

ANTHR 150 Race and Racism in the Modern World ★3 The challenge of racism in modern societies and the response of anthropology, including the history of the "race" concept in explaining human variation and the uses of racialist notions in discussions of individual and social differences.

ANTHR 301 Topics and Issues in Anthropology ★3 An introduction to Anthropology through the study of selected topics such as human evolution, cultural adaptation, social structure, the individual and society, symbol and meaning, exchange and production, culture change. Note: Not open to first-year students or those with credit in ANTHR 101 or 202.

ANTHR 306 Introduction to Archaeology ★3 Introduction to the nature, purposes, theory and methods of anthropological archaeology. Emphasis is placed upon the principles of reconstruction of

past societies from archaeological evidence and the explanation of cultural evolution. Prerequisite: ANTHR 101 or 301.

ANTHR 307 Introduction to Social and Cultural Anthropology ★3 The comparative study of human society and culture, particularly non-Western communities, with special attention to the family, social structure, economics and political institutions, and religion; processes of change. Prerequisite: ANTHR 101 or 301.

ANTHR 309 Introduction to Physical Anthropology ★3 Survey of theory and basic data in human evolution and human variation. Topics include primatology, osteology, hominoid paleontology, variation in modern populations. Prerequisite: ANTHR 101 or 301.

ANTHR 355 Contemporary Canadian Native Peoples ★3 Anthropological perspective on some current situations of native peoples in Canada.

ANTHR 383 Peoples and Cultures of Western Africa ★3 The cultures of sub-Saharan West Africa and the Zaire basin.

ANTHR 392 Primate Behavior ★3 Emphasis on field studies of non-human primates. Topics to include: social organization, behavior and ecology, territorial behavior communication, reproductive behavior, and other relevant topics.

ANTHR 393 Health and Healing ★3 A cross-cultural study through time of the beliefs and social activities associated with health, illness and healing. Prerequisite: ANTHR 101 or 301 or consent of the instructor.

ANTHR 396 Archaeological Field Training ★6 Instruction in all practical aspects of archaeological field techniques, including excavation, survey, recording, photography, and conservation. Held at a selected location in Alberta during both Spring and Summer Sessions. Prerequisite: ANTHR 306 or equivalent, and consent of the Department.■

ART AND DESIGN

ART 131 Visual Fundamentals ★6 A studio based introduction to the exploration and production, in two and three dimensions, of visually expressed information. Note: Not open to students with credit in ART 132.

ART 312 Painting ★6 Introduction to the principles and techniques of painting. Prerequisite: ART 131, or 232, and consent of the Department.

ART 313 Painting ★6 Continuing introduction to the principles and techniques of painting. Prerequisite or corequisite: ART 312 and consent of the Department.

ART 339 Special Projects in Studio Disciplines: Drawing ★6 BFA students may use ART 339 in lieu of ART 240/340 upon consent of the Department. Prerequisite: ART 131 and consent of the Department.

ART 362 Sculpture ★6 Foundation studies in sculpture. Prerequisite: ART 131, or 132, and consent of the Department.

ART 363 Sculpture ★6 Further foundation studies in sculpture. Prerequisite or corequisite: ART 362 and consent of the Department.

ART 413 Painting ★6 Directed individual study for students wishing to specialize further in painting. Students will be encouraged to explore both contemporary and traditional mediums. Prerequisite or corequisite: Normally, ART 412 and consent of the Department.

ART 414 Projects in Painting ★6 A specialized course for students concentrating in painting. Prerequisite: Consent of the Department.

ART 439 Special Projects in Studio Disciplines: Drawing ★6 BFA students may use ART 439 in lieu of ART 440 upon consent of the Department. Prerequisite: ART 240/340 or ART 339 and consent of the Department.

ART 462 Sculpture ★6 Intermediate studies in sculpture. Prerequisite: ART 362 and/or consent of the Department.

ART 463 Sculpture ★6 Further intermediate studies in sculpture. Prerequisite or corequisite: ART 462 and/or consent of the Department.

ART 464 Sculpture ★6 Additional intermediate studies in sculpture. Prerequisite or corequisite: ART 463 and/or consent of the Department.

ART 512 Painting ★6 Advanced study in the principles and techniques of painting. Prerequisite: Normally ART 412 and consent of the Department.

ART 513 Painting ★6 Individual directed study for students wishing to specialize further in painting at an advanced level. Pre-requisite or corequisite: Normally, ART 512 and consent of the Department.

ART 514 Projects in Painting ★6 A specialized course for advanced students concentrating in painting. Prerequisite: Normally, consent of the Department.

ART 539 Special Projects in Studio Disciplines: Drawing ★6 Normally not offered during the course of the Winter Session. BFA students may use ART 539 in lieu of ART 540 upon consent of the Department. Prerequisite: ART 439 or ART 440 and consent of the Department.

ART 562 Sculpture ★6 Advance studies in sculpture. Prerequisite: ART 462 and/ or consent of Department.

ART 563 Sculpture ★6 Further advanced studies in sculpture. Prerequisite or corequisite: ART 562 and/or consent of the Department.

ART 564 Sculpture ★6 Additional advanced studies in sculpture. Prerequisite or corequisite: ART 563 and/or consent of the Department.

ART H 101 Introduction to the History of Art I ★3 Introduction to Western Art and Design to the end of the fourteenth century by analysis of selected works and movements.
ART H 102 Introduction to the History of Art II ★3 Introduction to Western Art and Design from the fifteenth century to the present by analysis of selected works and movements.
ART H 231 Survey of Renaissance Art I ★3 The history of the visual arts of the fifteenth century in Northern Europe.
ART H 232 Survey of Renaissance Art II ★3 The history of the visual arts of the fifteenth century in Italy.
ART H 281 Survey of Twentieth-Century Art I ★3 The history of the visual arts up to World War II in Europe and North America.
ART H 282 Survey of Twentieth-Century Art II ★3 The history of the visual arts of the twentieth century from World War II to the present, in Europe and North America.■

BIOCHEMISTRY

BIOCH 301 General Biochemistry ★6 Structure and chemistry of the cell; the chemistry and metabolism of carbohydrates, lipids, proteins and nucleic acids; the molecular biology of enzymes and genes as related to the functioning of the living cell. Prerequisite: CHEM 100 or 104 or 204; and CHEM 160 or 260. Those for whom this course is an option require consent of the Department.■

BIOLOGY

BIOL 197 Heredity ★3 The cellular and molecular basis of the transmission of hereditary characteristics: Mendelian inheritance and its cytological basis; microbial genetics; cytoplasmic inheritance; linkage and genetic mapping; DNA as genetic material; gene action; the genetic code. Note: Students cannot receive credit for both BIOL 197 and GENET 351. Those taking BIOL 197 should take GENET 275 for the equivalent of GENET 351. Prerequisite: Biology 30.■

BOTANY

BOT 199 Plant Biology ★3 An introduction to the biology of plants emphasizing the relationship between form and function and the potential of the science. The following topics are covered: the cellular structure of plants; plant tissues and their functions; the classification of plants and the major groups, both prokaryotic and eukaryotic; the relevance of members of the major groups to human life; plant metabolism including water, nutrient and energy relations; growth and development of plants and their reproductive biology. Prerequisite: Biology 30 recommended. May not be taken for credit if credit has been obtained in BIOL 296 and BIOL 299, or in INT D 230.
BOT 304 Field Botany ★3 This course is designed to acquaint non-botany as well as botany students with the collecting, identifying and curating of the major groups of plants. Topics include selected taxonomic and phytosociological concepts, field methods, keys and identifications and herbarium methods. Effective handling of both specimens and field data for scientific purposes will be stressed. Plant collections prepared to acceptable herbarium standards will be required of those taking this course. There will be a transportation charge of $5.00 or less per person. Prerequisite: BIOL 100 or BOT 199.
BOT 383 Biology of Economic Plants ★3 Lectures will deal with the biology and utilization of economically important vascular and non-vascular plants emphasizing relevant morphology, physiology, distribution and history of use. Prerequisite: BOT 199 and a 200-level biological or earth sciences course.■

BUSINESS

BUS 379 Business Policy ★3 Case studies in business policy. Prerequisite: FIN 301, IND R 301, MGTSC 352, MARK 301, and ORG T 311.■

CANADIAN STUDIES

CANST 302 Canada's North: The Human Dimension ★3 An interdisciplinary social science survey of northern Canada with reference to patterns of relationships both in northern Canada and between the North and the rest of Canada.■

CHEMISTRY

CHEM 100 Introductory University Chemistry ★6 Bonding and structure; chemical and phase equilibria; solution chemistry; thermochemistry; electrochemistry and chemical kinetics, with applications to inorganic chemistry. Prerequisite: Chemistry 30, or equivalent.
CHEM 103 Introductory University Chemistry I ★3 Chemical energy, enthalpy, Hess' Law and applications to bond energies and stability of compounds. Ionic and covalent compounds, principles of chemical equilibrium with applications to acid-base chemistry. Chemistry of hydrogen and the oxygen group. Prerequisite: Chemistry 30 or equivalent.
CHEM 105 Introductory University Chemistry II ★3 Oxidation and reduction, electrochemical cells and the Nernst Equation, free energy and equilibrium. Chemistry of the halogens and the transition metals. Chemical kinetics. Prerequisite: CHEM 103.
CHEM 160 Organic Chemistry ★6 The study of functional groups found in the main classes of organic compounds and their molecular conformation and stereochemistry in such a way that the chemistry of some molecules important to biology (eg., amino acids, proteins, medicinals, pesticides, fats, sugars, carbohydrates, nucleic acids) as well as some molecules found in everyday life (soaps, detergents, fibers, perfumes, polymers, etc.) can be discussed. Note: Students with credit in CHEM

100 or 104 normally will proceed to CHEM 260. Such students may enroll in CHEM 160 only if written consent of the Department is obtained. Prerequisite: Chemistry 30 or equivalent.

CHEM 260 Organic Chemistry ★6 The study of molecular structure and reactivity of organic compounds of both biological and industrial interest. Special attention is given to the chemistry of polymers, fats, peptides and carbohydrates. Methods of structure determination are discussed. Note: Students who have obtained credit for CHEM 160, cannot take CHEM 260 for credit. Prerequisite: CHEM 100 or 104 or 204.■

CHINESE
Department of East Asian Languages and Literatures

CHINA 350 The Chinese Language in its Cultural Setting I ★6 Oral immersion course to be studied abroad. Designed for improvement of oral/aural skills at senior elementary level. Prerequisite: CHINA 100 and 200 or consent of Department.

CHINA 450 The Chinese Language in its Cultural Setting II ★6 Oral immersion course to be studied abroad. Designed for improvement of oral/aural skills at senior intermediate level. Prerequisite: CHINA 302 and 306, or consent of the Department.■

CHRISTIAN THEOLOGY

CHRTC 266 New Testament Themes ★3 A study of the meanings attributed to Jesus Christ in the New Testament. The problem of the formation of the Gospels will be examined and particular attention given to the images of Jesus Christ presented by the principal authors of the New Testament. Efforts to relate the Biblical Christ to contemporary culture will also be studied.

CHRTC 292 Spirituality for today's Christians ★3 Theological understanding of the role of prayer, leisure and work in developing a Christian lifestyle.

CHRTC 349 Christianity and Social Justice in Canada ★3 Examines particular problems in Canada and in the world and the alternative solutions offered by contemporary thinkers from a Christian point of view. This course includes Christian social thought, Christian pacifism, theology of politics.

CHRTC 351 The Christian Meaning of Sex and Marriage ★3 The sexual revolution and its relevance for sexual ethics; premarital sex; marriage breakdown and divorce; sex as a human reality; Christian meaning of marriage.

CHRTC 352 Medical-Moral Problems ★3 Christian reasons for valuing life; examination from a Christian perspective of euthanasia, abortion, genetic research, sterilization, reproductive technologies, and medical experimentation; rights of patients.

CHRTC 411 Topics in Christian Unity ★3 An examination of the Protestant-Catholic-Orthodox dialogues in the twentieth century and the efforts to recover the unity-within-diversity of Christianity. Prerequisite: Consent of the College.■

CLOTHING AND TEXTILES

CL TX 430 Selected Topics in Textile Design: Peruvian Textiles ★3

CL TX 433 Selected Topics in Textile and Apparel Merchandising ★3

CL TX 517 Selected Topics Clothing Function and Comfort ★3 Topics of current interest in clothing, textiles and design. Prerequisite: Senior courses(s) in respective area(s).■

CLASSICS

CLASS 102 Greek and Roman Mythology ★3 A survey of classical mythology with readings in translation from various ancient authors as well as from modern scholarly works.

CLASS 110 Early World History I ★3 World history from the beginning of written records down to the end of the 6th century A.D. The course covers the ancient history of the Mediterranean world, with particular emphasis on Egypt, Greece and Rome and compares developments in civilization in these areas with those in Persia, India, China and Japan. Note: Students choosing CLASS 110 for partial fulfillment of the Humanities Group A requirement must also take HIST 110.

CLASS 141 Ancient Science and Technology ★3 A survey of ancient science and technology in the Middle Eastern, Greek, and Roman civilizations.

CLASS 201 Literature of Greece and Rome ★3 An introductory survey in English translation of Greek and Latin literature in its social, artistic, and cultural background. A limited number of major works, representing the most important genres, will be studied. May not be taken concurrently with or subsequent to CLASS 359/360.

CLASS 250 The Greek World ★3 Greek life and society illustrated by archaeological discoveries; the Bronze Age, the city, temples, Athens, Sparta, Greek art and architecture, trade, and warfare. Slides, films, and other materials.

CLASS 251 The Roman World ★3 A study of Roman society illustrated by archaeological discoveries; city life, housing, town planning, games, trade, shipping, and the army. Slides, films, coins, other materials.

CLASS 367 Archaic and Classical Greek Art ★3 The origin and development of Greek Art and Architecture and its relation to, and reflection of, the cultural and political history of the times.

CLASS 368 Hellenistic and Roman Art ★3 The development and role of Art and Architecture in the Hellenistic kingdoms and the Roman Republic; the evolution of Roman Imperial Art

CLASS 475 Practical Methods in Classical Archaeology ★3 The techniques of excavation and recording in Classical Archaeology. Prerequisite: Consent of the Department. Note: Offered only for field work in the archaeology of the Greek and Roman world and restricted to those participating in an excavation sponsored by the Department.

CLASS 476 Advanced Field Techniques in Classical Archaeology ★3 Advanced field application of Classical archaeological theory. Prerequisite: CLASS 475 or equivalent and consent of the Department. Note: Offered only for field work in the archaeology of the Greek and Roman world and restricted to those participating in an excavation sponsored by the Department.
CLASS 602 Studies in Classical Archaeology II ★3 Prerequisite: Consent of the Department.■

COMPUTING SCIENCE

Note:
(1) Students enrolled in Honors and Specialization in computing science, and in other Faculty of Science Honors and Specialization programs will be given preference in registering for computing science courses required in these four-year programs.
(2) Credit for introductory computing science courses: Credit will be granted for only one of CMPUT 114, 157, 162, 251, 300 and ENCMP 100. Credit will be granted for only one of CMPUT 115 and 169
(3) Students taking CMPUT 169 who want to pursue more advanced courses in computing science must take CMPUT 172 before entering second year computing science courses.
(4) The following is a list of courses which, for the most part, are open to any student who satisfies the prerequisite and corequisite requirements. Any special restrictions are specified at the course level.

CMPUT 114 Introduction to Computing Science ★3 Using a computer system; algorithms; introduction to programming in a procedural language such as PASCAL; concepts of programming style and organization; solution of elementary numerical and non-numerical problems. Corequisite: MATH 114 or 117, and MATH 120, or equivalents. See Note 2.

CMPUT 115 Programming with Data Structures ★3 Review of programming principles; review categories of data types; study strings, linear and two-dimensional data structures (lists, stacks, queues, tables and trees); comparison of linked and continguous representation of data structures; methods of searching, sorting, hashing and recursion. Prerequisite: CMPUT 114, MATH 114 or 117, MATH 120, or equivalents. Corequisite: MATH 115 or 118, or equivalents. See Note 2.

CMPUT 157 Introduction to Computing for Business Applications ★3 Capabilities and limitations of computing systems; manipulation and storage of data in files; introduction to programming in a high-level language; survey of business applications. Formerly MGTSC 357. Open only to students in the Faculty of Business. See Note 2.

CMPUT 161 Introduction to Computation ★3 Using a personal computer. Applications of computers: data bases, spreadsheets, word-processing, graphics, communications, etc. Brief introduction to programming. Computers in society. Only open to students who do not have credit in CMPUT 114, 157, 251, 300, or ENCMP 100. Not available to Science students.

CMPUT 169 Structured Programming and Data Structures ★3 Syntax of a high-level structured language such as PASCAL, representation and manipulation of data structures by a high level langauage; recursion; representation of integers, reals; binary arithmetic; numerical error; data structures: strings, arrays, linked lists, queues, trees; applications of data structures. Prerequisite: ENCMP 100, CMPUT 251 or equivalent; MATH 113, MATH 120, or equivalents. Corequisite: MATH 115 or equivalent. See Notes 2 and 3. **Note: This course is designed to accommodate students who have taken a rigorous course in FORTRAN programming, and who wish to pursue more advanced courses in Computing Science.**

CMPUT 172 Formal Systems and Logic in Computing Science ★3 An introduction to the tools of set theory, logic and induction, and their use in the practice of reasoning about algorithms and programs. Basic set theory. The notion of a function. Counting. Propositional and predicate logic and their proof system. Inductive definitions and proofs by induction. Program specification and correctness. Prerequisite: CMPUT 114 or equivalent. Corequisite: CMPUT 115 or 169.

CMPUT 225 Programming Languages I ★3 A study of programming languages with regard to structural organization, syntactical structures, control structures, data structures and name structures. An investigation of procedural languages like Modula-2 and Ada which support modularity and data obstruction. An introduction to non-procedural languages including: Lisp, Prolog and Smaltalk. Prerequisite: CMPUT 280.

CMPUT 251 Introduction to Programming for Scientific Applications ★3 Basic programming techniques using a high level language; representation and manipulation on of numeric and non-numeric data; survey of computing systems, history and applications. Prerequisite: MATH 113 or equivalent.

CMPUT 291 Introduction to File Management ★3 Basic concepts in computer data organization and information processing; hardware devices, physical organization, and access methods for file storage; file I/O; introduction to database systems. Prerequisite: CMPUT 115 or 169, CMPUT 172. 204, MATH 223 or 382.

CMPUT 340 Introduction to Numerical Methods ★3 Introduction to computer arithmetic and errors. The study of computational methods for solving problems in linear algebra, non-linear equations, interpolation, and approximation, integration and ordinary differential equations. The aim is to teach the student how to use mathernatical sub- routine packages currently available in computer libraries. Prerequsite: CMPUT 172, MATH 120 and 214. Credit cannot be obtained for more than one of CMPUT 319, 340, 358 or MATH 280 or 486.■

CURRICULUM ET MÉTHODOLOGIE/EDUCATION CURRICULUM AND INSTRUCTION

CU ME 339 Enseignement de la musique au niveau élémentaire I ★3 Prérequis: MUSIQ 203 ou l'équivalent, ou MUSIQ 150 et 151 ou l'équivalent.

CU ME 347 Introduction à l'ordinateur en éducation ★3 L'ordinateur individuel: définition des principales composantes et fonctionnement. Mode direct et mode différé d'utilisation d'un ordinateur. L'enseignement assisté, séquentiel et ramifié. La répétition d'exercices. L'acquisition de concepts. La simulation. Les jeux. Le traitement de textes. Les langages d'auteur. Initiation aux principales applications pédagogiques de l'ordinateur et réflexions sur le rôle de l'ordinateur en pédagogie.

CU ME 350 Enseignement du français dans les classes d'immersion tardive au niveau secondaire ★3 Principes d'acquisition et d'apprentissage d'une langue seconde. Etude du phénomène d'immersion comme moyen d'apprendre et d'enseigner une deuxième langue. Etude des ressources et des pratiques pédagogiques pour l'enseignement du français en situation d'immersion au niveau secondaire.

CU ME 496 L'enseignement religieux et l'éducation morale ★3

CU ME 500 Théorie générale de curriculum: contexte écoles françaises en milieu minoritaire et écoles d'immersion ★3 Analyse approfondie des définitions et théories du curriculum, de ses composantes et de ses bases idéologiques et de leurs applications dans les écoles françaises en milieu minoritaire et en immersion. Limité aux détenteurs d'un baccalauréat en éducation ou l'équivalent.

CU ME 501 Développement, implantation et évaluation des programmes en immersion et dans les écoles françaises en milieu minoritaire ★3 Cours de curriculum à orientation pratique. Analyse et évaluation des composantes, des valeurs et des idéologies à la base des programmes d'étude, du matériel d'appui et des programmes socio-culturels utilisés en situation minoritaire et immersion. Le développement, l'évaluation et l'implantation de programmes pour les écoles françaises et pour les écoles d'immersion. Prérequis ou corequis: CU ME 500. Limité aux détenteurs d'un baccalauréat en éducation ou l'équivalent.■

DANCE

DANCE 255 Social Dance ★1.5 Personal skill acquisition in individual and partner situations in the foxtrot, waltz, swing, rumba and cha cha cha.

DANCE 260 Jazz Dance ★1.5 Personal skill acquisition in body awareness and placement, locomotion and choreographed jazz dance.

DANCE 340 Modern Dance ★3 Introduction to the study of creative dance techniques, improvisation, composition, and performance through theory and practical experience.

DANCE 355 Social Dance ★3 Theory and practice of social (ballroom) dance forms. (For BPE; BEd, Physical Education majors; Recreation Administration students only.) Prerequisite: DANCE 255 or consent of the Department.■

DENTISTRY

DENT 521 Orthodontic Pre-clinical Lectures ★3 Spring/Summer program of 10 weeks. A continuation of DENT 520.

DENT 524 Orthodontic Seminar ★3 Spring/Summer program of 10 weeks. A continuation of DENT 523. Includes advanced treatment planning and different treatment philosophies.

DENT 528 Surgical/FunctionalAppliances ★1 Spring/Summer program of 10 weeks. A continuation of DENT 527 which presents a more detailed knowledge base to allow comprehensive treatment planning.

DENT 529 Adult Orthodontics ★1 Spring/Summer program of 10 weeks. Pre-clinical lecture/seminar series to introduce the graduate student to adult orthodontics.

DENT 531 Orthodontic Clinic ★5 Spring/Summer program of 10 weeks. A continuation of DENT 530 during which active patients are transferred to junior students.

DENT 538 Surgical/Functional Appliances ★1 Spring/Summer program of 10 weeks. Clinical compliment to DENT 537. Transfer cases from senior to junior students. Alternate clinics.

DENT 539 Adult Orthodontics ★1 Spring/Summer program of 10 weeks. Clinical component associated with DENT 529. Students will assist with, and later assume treatment responsibility during this transfer quarter.

DENT 623 Adult Orthodontics ★1 Spring/Summer program of 10 weeks. Conclusion of the adult ortho theory seminar. Current pertinent literature is reviewed and critiqued.

DENT 631 Orthodontic Clinic ★5 Spring/Summer program of 10 weeks. Continuation of DENT 630. The senior students gradually transfer caseloads to junior students.

DENT 633 Adult Orthodontics ★1 Spring/Summer program of 10 weeks. Continuation of DENT 623. Transfer cases from senior to junior students.

DENT 635 Surgical/FunctionalAppliances ★1 Spring/Summer program of 10 weeks. Cases transferred from senior to junior students.

DENT 699 Research Project ★6 Credit equivalent to a two-term course. The work undertaken can include critical evaluation of a designated area of dentistry which may or may not include original research. The work completed will be presented in the form of a report to the dental department offering the program. No more than one project can be undertaken by any student in a program leading to a graduate degree in oral biology or dentistry. Prerequisite: Consent of the department offering the graduate degree■

DRAMA

DRAMA 102 Play Analysis ★3 Understanding of Drama through critical analysis of plays and its application to creative solutions in their production.

DRAMA 149 Introduction to Dramatic Process ★3 Speech and movement improvisation with an emphasis on imaginative development; introduction to the process of acting and to dramatic form. Note: Designed for students with little or no previous experience in Drama. Not normally to be taken by BA Drama majors.

DRAMA 247 Introduction to and Development of Oral Communication ★3 Exploration of basic techniques of oral communication and oral interpretation drawing from various forms of literature. Prerequisite: Consent of the Department. Not normally to be taken by BA Drama majors. Note: Not open to students with credit in DRAMA 243, 245, 341 and 342.

ENGL 366 The Short Story ★3 Representative works of writers illustrating the tradition of the short story in English.

ENGL 389 Canadian Prose from 1925 ★3 A critical and historical study of representative Canadian non-dramatic prose in English from 1925 to the present. Not to be taken by students with credit in ENGL 382, 384, or 386.

ENGL 442 Studies in Nineteen and Twentieth-Century Prose ★3 Prerequisite: One of ENGL 311, 341, 343, 345, 350, 351, 356, 357, 358, 359, 360, 361, 366, 372, 373, 374, 376, 378, 380, 381, 382, 383, 388, or 389, or the consent of the Department.

ENGL 444 Selected Prose Fiction ★3 A study of several works by each of no more than four fiction writers. Prerequisite: One of ENGL 341, 343, 350, 351, 357, 358, 359, 360, 361, 366, 373, 374, 378, 380, 381, 382, 383, 388, or 389; or consent of the Department.

ENGL 679 Studies in Twentieth-Century Literature ★3

ENGL 694 Studies in Literary Techniques ★3■

EVALUATION EN ÉDUCATION/EVALUATION IN EDUCATION

EVAED 498 La mesure et l'évaluation en éducation ★3 La définition des objectifs. La mesure critériée et normative. L'évaluation sommative, formative et diagnostique. Les étapes de la planification d'un examen. L'observation des élèves. L'évaluation des attitudes. L'analyse et l'interprétation des résultats.■

FILM STUDIES

F ST 200 Introduction to the Study of Film ★6 A survey of major areas in film studies, emphasizing history, theory, film language, and the study of individual masterpieces. Prerequisite: Six weights junior English courses, or ART H 101, and 102, or C LIT 100 or 301/302, PHIL 140, or equivalent. Not open to students with credit in F ST 205.■

FAMILY STUDIES

FAM 445 Practicum in Family Services ★6 Students will be placed in one of a variety of family related agencies for two full days per week during the second term. In addition, attendance at one seminar per week is required. Prerequisite: FAM 444. Note: Open only to senior Family Studies majors. Must be taken during the same year as FAM 444.

FAM 449 Lec 30 Family and Human Development: Consumers and Environments ★3

FAM 460 Family and Consumer Law ★3 An exploration of family and consumer law from a user's perspective. (To be taught in cooperation with the Faculty of Law.) This course will be offered during Special Sessions only.

FAM 649 Sem 10 Seminar in Family Studies: Selected Topics (Action, Research, and Evaluation Facilitating Empowerment) ★3 By permission of instructor only.■

FOODS AND NUTRITION

FD NU 325 Introductory Human Nutrition I ★3 Basic principles of nutrition. The need for and functions of the major nutrients in the human. Prerequisite: CHEM 160 or PHYSL 260, 161, or 162 or equivalent. Not open to Foods and Nutrition or Food Science majors.

FD NU 327 Introductory Human Nutrition II ★3 Further emphasis on the need for and functions of the major nutrients in the human. Prerequisite: FD NU 325. Not open to Foods and Nutrition or Food Science majors.■

FINANCE

FIN 301 Business Finance ★3 Introduction to financial decision-making. Prerequisite: ACCTG 322, MANEC 301, MGTSC 312, CMPUT 157.

FIN 412 Investment Principles: Security Analysis ★3 Theories of investment with special reference to types of securities, prices, and market operation. Analytical techniques in the selection of securities. Prerequisite: FIN 301.

FIN 422 Capital Investment ★3 Capital budgeting and the determination of the cost of capital to the firm. Prerequisite: FIN 301.■

FRANÇAIS/FRENCH

FRANC 110 Cours de français intermédiaire: niveau I ★6 Cours intensif: compréhension orale et écrite, usage créatif de la langue, acquisition des structures grammaticales de base. Prérequis: French 30, ou l'équivalent. Affectation par test de classement. Note: Ce cours n'est pas accessible aux étudiants ayant ou postulant des crédits pour FREN 150 ou 152 à la Faculté des Arts. Cours complet enseigné sur un semestre.

FRANC 113 Cours de français avancé: niveau I ★3 Etude et mise en pratique des points principaux de la morphologie et de la syntaxe du français. Travaux d'application oraux et écrits. Prérequis: French 30 ou l'équivalent. Affectation par test de classement. Ce cours n'est pas accessible aux étudiants ayant ou postulant des crédits pour FREN 158 à la Faculté des Arts. (Précédemment, partie de FRANC 215.)

FRANC 114 Cours de français avancé: niveau II ★3 Développement de l'expression orale et écrite. Etude approfondie de la syntaxe du et de la morphologie français. Travaux d'application. Prérequis: FRANC 113. Précedemment, partie de FRANC 215.

FRANC 315 Cours de francias intermediaire: niveau III ★3 Perfectionnement de l'expression ecrite. Etude d'aspects particuliers de la grammaire francaise. Travaux d'ecriture et prati que de l'autocorrection. Prerequs: FRANC 110. Note: Ce cours n'es t pas accessible aux etudiants ayant ou postulant des credits pour F REN 350 a la Faculte des Arts.

FRANC 319 Cours de francais avance: niveau III ★3 Revision systematique de la grammaire francaise et etude a pprofondie d'aspects particuliers du francais. Mise en practique de la theorie par des travaux de redaction. Note: Ce cours n'est pas accessible aux etudiants ayant ou postulant des credits pour FREN 34 0 a la Faculte des Arts. (Precedemment FRANC 321.)

FRANC 322 Pratique de la dissertation ★3 La compréhension, l'analyse et la synthèse de données. L'étude et la manipulation du raisonnement logique. La recherche et l'exploitation des arguments. L'élaboration et la mise en forme de la dissertation comme texte clair, cohérent et convaincant. Travaux pratiques. Cours obligatoire pour l'obtention du diplôme de la Faculté. Prérequis: FRANC 315, 319, ou l'équivalent.■

FRENCH AND FRENCH-CANADIAN LANGUAGES AND LITERATURES
(Department of Romance Languages)

Note: Only one of FREN 100 or 105 may be taken for credit. Only one of FREN 150, 152, or 158 may be taken for credit.

FREN 100 Beginners' French ★6 Designed to enable students to begin their study of French at the university level. Note: Not open to students with matriculation in French, ie. French 30 or equivalent. Normally, students will go from FREN 100 to FREN 150.

FREN 150 First-Year University French ★6 Intensive training in spoken and written French, including grammar, composition, and literature. Prerequisite: French 30 or equivalent. Note: Not open for credit to students having credit or registered in Faculté Saint-Jean FRANC 110.

FREN 155 Basic Skills for Reading French ★3 A basic course in French grammar and literature designed to develop skills in reading French. Language of instruction is English. Prerequisite: French 30 or equivalent. Note: Not accepted to meet the requirements in a principal area of concentration.

FREN 156 French Reading Comprehension ★3 An intermediate course in French grammar and literature. Language of instruction is English. Prerequisite: FREN 155 or consent of the Department. Note: Not accepted to meet the requirements in a principal area of concentration.

FREN 250 Second-Year University French ★6 Designed to perfect written and oral knowledge of French. The course aims at achieving adequate fluency to enable students to proceed in literature, translation and/or composition courses. Prerequisite: Any junior-level French course except FREN 155 or 156. Note: May not be taken concurrently for credit with either FREN 350 or FR CA 340 or FREN 258 except by consent of the Department.■

GENETICS

GENET 165 Genetics and Human Welfare ★3 An introduction to the genetics of human development and variability. The analysis of human DNA, genes and chromosomes will lead to discussions of: human diseases; prenatal diagnosis; viruses; cancer; applications of biotechnology and human evolution. Note: Students with credit in BIOL 197 cannot receive credit in GENET 165. Students with credit in GENET 165 may register in BIOL 197 or GENET 351 for credit. Students with credit in BIOL 197 may wish to register in GENET 275. Prerequisite: Biology 30.■

GEOGRAPHY

Note: GEOG 130 and 131 do not have to be taken in sequence; they are completely separate courses. Either one may be taken without the other, and GEOG 131 can be taken before GEOG 130.

GEOG 130 Introductory Physical Geography I ★3 Introduction to geomorphology: the nature and formation of major landform features of the earth's surface. Rock weathering and slope movements. Landforms developed by erosional and depositional processes of rivers, glaciers, winds, waves and currents. Laboratory work required.

GEOG 131 Introductory Physical Geography II ★3 Introduction to the atmosphere and biosphere. Physical elements of weather and climate. Causes, changes and patterns of weather. Climatic classification. Spatial and dynamic interrelations of climate, soils and vegetation. Laboratory work required. Note: GEOG 130 does not have to precede GEOG 131.

GEOG 244 Introduction to Third-World Geography ★3 Outlook, traditions and potentials of developing nations in Africa, Asia and the Americas. Characteristics of their environments, natural resources and land use. Geographical and other causes of their slow economic development. Trends in their population, urbanization, industrialization and trade - the need for North-South dialogue.

GEOG 281 Geography of the City ★3 Origin and spread of urban settlement; problems arising from the growth and form of metropolitan areas and inter-city systems.

GEOG 282 Geography of Urban Canada ★3 Spatial aspects of urban development in Canada with particular reference to current research and literature.

GEOG 340 Regionalization in Canada ★3 The regional organization of Canadian life; the influence of variation in resources, geographical location, population, urbanization, industrialization, ethnic presence, and external relations in giving rise to regional differentiation in contemporary Canada. Note: Not open to students with credit in GEOG 400.■

GEOLOGY

Note:

(1) Students enrolled in Honors and Specialization in geophysics, and Honors andSpecialization in geology and zoology will be given preference in registering in geology courses which are required in these four-year programs.

(2) Students are responsible for their own accommodation and meal expenses on all geology field trips.

(3) GEOL 201, 204, 205, 206, 207, 208, and 295 are intended for students following programs other than geology. Students in Honors or Specialization programs in geology, geology and geophysics , or geology and zoology may not take them without consent of the Department.

GEOL 201 Earth Science I ★3 Nature, origin and evolution of the universe and of planetary systems; the physical properties of the earth and of its environment; the materials and structures of the earth's interior and surface and the processes affecting these regions, such as continental drift, the formation of ocean basins and mountain building. Prerequisite: A 100-level science course. Not available to students who have taken GEOL 102, or 290.

GEOL 204 Earth Science II ★3 Measurement of geologic time; history of life on earth and the geological evolution of North America; nature and origin of mineral deposits; geology of coal, oil and gas. Not available to students with credit in GEOL 103. Prerequisite: GEOL 102 or 201.

GEOL 207 Environment Earth ★3 Early history of the earth; formation of the hydrosphere and atmosphere and their evolution to the present 'stable' state; atmosphere and hydrosphere as solar-powered heat engines; hydrologic cycle, water supply and groundwater; geological factors affecting the disposal of waste; quantitative evaluation of the effects on the environment of man's exploitation and use of mineral resources; future availability of fuel and of metallic minerals; permafrost, exploration and construction; earthquakes and man-made explosions; earth resources; observational satellites. Prerequisite: GEOL 102 and 103 or GEOL 201 and 204.

GEOL 208 Earth Sciences III: Geology of the Moon and Planets ★3 Geological properties of the planets. Origin and evolution of the planets: results of space exploration. Planet Earth as now viewed. Prerequisite: GEOL 103 or 204 or 292.■

GERMAN
Department of
Germanic Languages

GERM 165 Reading German for Beginners ★6 An intensive course to give beginning students a reading knowledge of German in the sciences, the arts and the humanities. Note: Not available to students with matriculation standing in German.

GERM 301 Advanced German Grammar and Stylistics ★6 Theoretical and practical study of the more complex areas of German grammar, style and idiomatic usage. Prerequisite: GERM 150, 151, or consent of the Department. Note: Not to be taken after completion of any 400-level German course except with special departmental permission.■

GREEK
Department of Classics

GREEK 100 Beginners' Greek ★6 Essential grammar and vocabulary, the reading of easy Greek and simple sentences for translation into Greek. Not open to students with credit in matriculation-level Greek, during the same year as FAM 444.■

HEALTH EDUCATION

HE ED 210 Introduction to Health Promotion ★3 This course is designed to introduce students to the concepts of the health promotion.■

HISTORY

HIST 100 European History ★6 The evolution of European society from the decline of the Roman Empire in the West to the present.

HIST 110 Early World History II ★3 World history from the end of the 6th century to the 18th century. Note: Students choosing HIST 110 for partial fulfillment of the Humanities Group A requirement must also take CLASS 110. Students will be expected to have a knowledge of material covered in CLASS 110 and it is therefore strongly recommended that they take CLASS 110 first.

HIST 120 World History Since the Eighteenth Century ★6 Core course for the four year BA.

HIST 251 American History Since 1865 ★3 A survey of United States History from Civil War to the present.

HIST 260 An Introduction to the Study of Canadian History 1500-1867 ★3 Note: Formerly HIST 278. Not open to students with credit in HIST 278.

HIST 261 An Introduction to the Study of Canadian History 1867 to the Present ★3 Note: Formerly HIST 279. Not open to students with credit in HIST 279.

HIST 320 The Soviet Union ★6 A historical survey of domestic and foreign policy since 1917.

HIST 365 The Canadian West to 1870 ★3 A lecture course emphasizing the history of the prairie west but dealing as well with westward expansion and the north and with the trans-mountain west.

HIST 439 Imperial Vienna from Mozart to Freud, 1750-1918 ★6 A history of the Habsburg Monarchy in the modern era, with special focus on the imperial capital, Vienna. Prerequisite: One course in European history or consent of the Department. A knowledge of German, though useful, is not required. Note: This course is given in Vienna during the Summer Session only. Those interested may obtain more information from the History Department.■

HISTOIRE/HISTORY

HISTE 375 Le Canada français depuis la Confédération ★3 L'évolution du Canada français étudiée dans sa globalité: économie, société, vie politique.■

INDUSTRIAL RELATIONS

IND R 301 Industrial Relations in Canada ★3 A general introduction to studying employment relationships in unionized and non-unionized organizations and how they are affected by factors within the larger legal, socio-economic, and political environment.

IND R 423 Staffing ★3 Philosophy and procedures in obtaining an effi cient work force with emphasis on the methods of initiating and car rying out an effective human resource management program. Includes r ecruitment, selection, training, and development of human resources. Prerequisite: ORG T 301 and IND R 301.■

INTERDISCIPLINARY STUDIES

Courses listed as Interdisciplinary Studies are the joint concern of the departments stated in the course descriptions. Responsibility for registration is with the department shown in square brackets. For additional information please consult that department or other participating departments.

INT D 465 Natural Resource Utilization ★3 Economics of utilizing and conserving land, water and energy resources in Agriculture and Forestry. Prerequisite: INT D 365. [Rural Economy]■

LATIN
Department of Classics

LATIN 100 Beginners' Latin ★6 Essentials of grammar, syntax, the reading of easy Latin and prose composition. Secondary emphasis on the connexion of English with Latin. Note: Students who have taken Latin 30 or equivalent should consult the Department adviser.■

LAW

LAW 300 Law for Non-LLB Students I ★3 The nature, functions, and sources of law; an outline and components of the Canadian legal system. Note: Not available for credit in the LLB Program.

LAW 301 Law for Non-LLB Students II ★3 Topics to be covered will be chosen from among the following: Morality, Obscenity and the Law; Industrial Relations; the Law and the Family; the Law as a Protector; Freedoms allowed under the Legal System; the Law and the Environment. Prerequisite: Normally, LAW 300 would be a prerequisite but this requirement may be waived at the discretion of the instructor. Note: Not available for credit in the LLB program.■

LEGAL RELATIONS

LEG R 301 Legal Foundations of the Canadian Economy ★3 A synoptic view of the Canadian legal system, with emphasis on underlying considerations of social policy. While considering the nature, courses, philosphy, and policy objectives of the law. selected topics from the fields of tort and contract will be analysed.■

LINGUISTICS

LING 101 Introduction to the Study of Language I ★3 A general survey of the scientific study of language. Topics include attitudes and beliefs about language, origins of language, language compared to other animal communication systems, the physical basis of speech and language, language and society, language description.

LING 203 Introduction to Linguistics ★3 Methods for the analysis of language; phonetics, phonology (sound structure), morphology (word formation), syntax (sentence structure), semantics, and pragmatics. This course is a prerequisite for most other courses in the Department. Not normally open to students in the first year except with consent of the Department.

LING 204 English Syntax ★3 Transformational description of the syntax of modern English. Prerequisite: LING 101 or 203.■

LIBRARY AND INFORMATION STUDIES

LIS 412 Storytelling ★3 To examine the past and present forms of storytelling, including the oral tradition, the function of the storyteller, the selection of material and the techniques of telling stories and listening to stories.

LIS 593 Archives Administration ★3To develop an understanding of archival records and their role in the preserva tion of information resources.

LIS 594 Records Management ★3 To develop an understanding of records management.

LIS 598 Lec 10 Special Topics: Legal Bibliography ★3

LIS 598 Lec 40 Special Topics: Business Literature ★3■

MARINE SCIENCE

Note: Courses are offered during the Intersession (Spring and Summer terms) at the Bamfield Marine Station - check with the Department of Zoology.

MA SC 400 Directed Studies ★6 A course of directed studies under the supervision of a visiting professor. The study will involve a research project approved by the supervisor in the field of interest of the student, and will be designed to take maximum advantage of the laboratory and/or field opportunities offered by the Bamfield Marine Station.

MA SC 401 Special Topics in Marine Biology ★6 Offered, as opportunities arise, by distinguished scientists who are working at the Bamfield Marine Station. It is expected that the course will generally be of a specialized nature and be at a level appropriate to graduate or senior undergraduate students.

MA SC 402 Lab 30 Special Topics in Marine Biology: Echinoderm Biology ★3

MA SC 402 Lab 60 Special Topics in Marine Biology: Island Biogeography ★3

MA SC 402 Lab 61 Special Topics in Marine Biology: Marine Biology for Teachers ★3

MA SC 402 Lab 62 Special Topics in Marine Biology: Introduction to Marine Education ★3

MA SC 402 Lab 63 Special Topics in Marine Biology: Fossils of the Burgess Shale ★3

MA SC 410 Marine Invertebrate Zoology ★6 A survey of the marine phyla, with emphasis on the benthic fauna in the vicinity of the Bamfield Marine Station. The course includes lectures, laboratory periods, field collection, identification, and observation. Emphasis is placed on the study of living specimens in the laboratory and in the field.

MA SC 420 Marine Phycology ★6 A survey of the marine algae, with emphasis on the benthic forms in the vicinity of the Bamfield Marine Station. The course includes lectures, laboratory periods, field collection, identification, and observation. Emphasis is placed on the study of living specimens in the laboratory and in the field.

MA SC 440 Biology of Marine Birds ★6 A study of the inter-relationship of birds and the marine environment. Lectures will emphasize the systematics and ecological relationships, behavior, life histories, movements and conservations of marine birds. Census techniques and methods of studying marine birds in the field will be treated as we observe seabirds and marine associated birds in the Barkley Sound region. Seabird identification, classification, morphology, plumages and moult will be examined in the laboratory.

MA SC 446 Comparative Ethology ★6 A comparative study of marine animals (vertebrate and invertabrate) emphasizing behavioral description, underlying physiological mechanisms, the biological significance of behavior and behavioral evolution. The course will include independent laboratory and field studies.

MA SC 450 Principles of Aquaculture ★6 An interdisciplinary introduction to the principles underlying the commercial cultivation of aquatic plants and animals empha sizing marine systems. The course will include working site-visits to a range of commercial farms and R & D facilities.

MA SC 454 Special Topics in Aquaculture: Molluscan Aquaculture ★3 An examination of the culture techniques for selected grou ps of aquatic plants, animals or microorganisms. Participants will be expected to complete a project which examines some aspect of appl ied science relevant to commercial culture.

MA SC 460 Special Topics in Aquaculture Applied Science: Fish and Shellfish Health ★3 An examination of the principles underlying the applicatio n of selected areas of scientific information to commercial aquacult ure. Participants will be expected to complete a written project.

MA SC 470 Directed Research in Aquaculture ★3 Design and execution of a research project in the field of aquaculture under the supervision of a scientist working in associat ion with the Bamfield Station. A written report is a requirement.

MA SC 500 Graduate Level Directed Studies ★6 A graduate level course of directed studies under the supe rvision of a member of the faculty. The study will involve a resear ch project provided by the supervisor in the field of interest of th e student, and will be designed to take maximum advantage of the lab oratory and/or fiéld opportunities offered at Bamfield Marine Station.■

MANAGERIAL ECONOMICS

MANEC 301 Micro-economics for Canadian Business Management ★3 Theories of choice as applied to consumer behavior and business decisions, production and price determination in alternative market forms; interrelatedness of firm decisions and of market outcomes; the impact of uncertainty. Prerequisite: ECON 101/102, MATH 113 or equivalent. Students may receive credit for only one of ECON 381, 383 or MANEC 301.■

MATHEMATICS

MATH 101 Calculus II ★4.5 Applications of integration to lengths, areas, volumes and masses. Transendental functions. Methods of integration, polar coordinates, parametric equations. Vectors, vector functions and derivatives. Prerequisite: MATH 100 or equivalent. Note: This course may not be taken for credit if credit has already been obtained in either MATH 115 or 118.

MATH 113 Elementary Calculus I ★3 Review of analytic geometry. Differentiation and integration of simple functions. Applications. Prerequisite: Mathematics 30 or equivalent. Students who have taken Mathematics 31 are advised to take MATH 114. This course may not be taken for credit if credit has already been obtained in MATH 100, 114 or 117.

MATH 115 Elementary Calculus II ★3 Differentiation and integration of trigonometric, exponential and logarithmic functions. Indeterminate forms and improper integrals. Techniques of integration. Application. Prerequisite: MATH 113 or 114, or equivalent. Note: This course may not be taken for credit if credit has already been obtained in either of MATH 101 or 118.

MATH 120 Linear Algebra I ★3 Vector and matrix algebra, determinants, linear systems of equatons, vector spaces, eigenvalues and eigenvectors and applications. Prerequisite: Mathematics 30 or equivalent. Note: This course may not be taken for credit if credit has already been obtained in MATH 127, 200 or 243.

MATH 121 Linear Algebra II ★3 Bases, linear transformations, change of bases, eigenvalues and eigenspaces, diagonalization, inner product, Gram Schmidt orthogonalizaton process, orthogonal diagonalization, quadratic form, applications. Prerequisite: MATH 120 or equivalent; Mathematics 31 or MATH 113 is also recommended. Note: This course may not be taken for credit if credit has already been obtained in MATH 227.

MATH 153 Mathematics of Finance I ★3 Simple and compound interest, simple and general annuities certain; variable annuities and perpetuities, amortization schedules, sinking funds, applications. Prerequisite: Mathematics 30. Note: This course may not be taken for credit if credit has already been obtained in MATH 253.

MATH 201 Differential Equations I ★3 First order linear and non-linear equations. Linear differential equations with constant coefficients. Laplace Transforms, applications, Picard's Method. Series solutions. Prerequisite: MATH 101 or equivalent. Pre or corequisite: MATH 200.
NOTE: (1) Open only to Engineering and Agricultural Engineering students and Science students in the following programs: Specialization Physics, Specialization Geophysics; Specialization Computer Science, (Computer Design Stream), Specialization Computer Science (Scientific Computation Stream), or Specialization Geography (Meteorology). (2) This course may not be taken for credit if credit has already been obtained in any of MATH 205, 334, or 336.

MATH 214 Intermediate Calculus I ★3 Infinite Series. Plane curves and polar coordinates. Vectors and three dimensional analytic geometry. Partial derivatives. This course may not be taken for credit if credit has already been obtained in MATH 209 or MATH 217. Prerequisite: MATH 115, or equivalent.

MATH 215 Intermediate Calculus II ★3 First order and second order linear differential equations with constant coefficients. Curves, tangent vectors, arc length, integration in two and three dimensions, polar, cylindrical and spherical coordinates, line and surface integrals. Green's, divergence and Stoke's theorems. Note: This course may not be taken for credit if credit has already been obtained in MATH 209 or 217. Prerequisite: MATH 214.

MATH 223 Introduction to Abstract Algebra ★3 Properties of the integers, permutations, groups, Lagrange's theorem, factor groups, polynomials, rings, fields. Note: This course may not be taken for credit if credit has already been obtained in MATH 128. Prerequisite: Mathematics 30 and a previous university level mathematics course.

MATH 241 Geometry I ★3 Sensed magnitudes. Cross rates. Transformation theory. Prerequisite: Any 200-level Mathematics course.

MATH 242 Geometry II ★3 Transformation theory continued. Euclidean construction. Non-Euclidean geometry. Introductory projective geometry. Prerequisite: MATH 241.

MATH 253 Theory of Interest ★3 Accumulation and amount functions. Effective, simple, compound rates. Force of interest. Discount. Annuities certain, simple and general. Perpetuities. Amortization schedules and sinking funds. Bonds and other securities. Applications — valuation of securities, installment loans, depreciation, depletion, capitalized cost. Prerequisite: MATH 115 or equivalent.

MATH 311 Theory of Functions of a Complex Variable ★3 Complex numbers. Complex series. Functions of a complex variable. Cauchy's theorem and contour integration. Conformal mappings. Schwartz-Christoffel transformation. Inverse Laplace transforms. Note: This course is intended for Engineering students. Prerequisite or co-requisite: MATH 209 or 215.

MATH 323 Applied Algebra I ★3 Boolean Algebra, switching circuits, graph theory, matrix representations; applications to economics, communication networks and social science. Prerequisite: Any 300-level Mathematics course and a single-term course in linear algebra.

MATH 324 Elementary Number Theory ★3 Divisibility, prime numbers, congruences, quadratic residues, quadratic reciprocity, arithmetic functions and diophantine equations; sums of squares. Prerequisite: MATH 120, 223 (or 127, 128) and a 200-level Mathematics course.

MATH 334 Introduction to Differential Equations ★3 First and second order equations. Laplace transforms. Power series solutions. Introduction to special functions. Sturm-Liouville type equations. Calculus of variation. Note: This course may not be taken for credit if credit has already been obtained in any of MATH 201, 205, 336 or 401. Prerequisite: MATH 215 or 317 and MATH 120 or 127.■

MANAGEMENT SCIENCE

MGTSC 301 Probability and Statistics for Business, Part I ★3 Introduction to data anaylsis; probability; discrete and continuous random variables and probability distributions; expectation and variance; normal and binomial distributions; sampling; sampling distributions for means and proportions; quality control; confidence intervals and tests of hypotheses for means and proportions; Bayesian decision theory. Prerequisite: MATH 113 or 114.

MGTSC 312 Probability and Statistics for Business, Part II ★3 Statistical inference for the variance; statistical inference for the means, proportions and variances from two populations; analysis of variance; non-parametric statistics; joint probability distributions; marginal and conditional distributions; covariance, correlation and independence; contingency tables; simple linear regression, multiple linear regression, time series analysis. Prerequisite: MATH 120, MGTSC 301.

MGTSC 352 Operations Management ★3 A problem-solving course which introduces the student to deterministic and stochastic models which are useful for production planning and operations management in business and govern ment. Prerequisitie: MATH 120, MGTSC 301, CMPUT 157.■

MUSIC

MUSIC 100 Rudiments of Music ★3 Fundamentals of music theory approached through aural and written training. Note: Not open to BMus students.

MUSIC 101 Introduction to Music ★3 A study of music literature with an emphasis on listening and analytical tools. A brief survey of the history of Western music will be included.

MUSIC 165 Introduction to World Music ★3 Note: Not to be taken by students with credit in MUSIC 309.

Note: The ability to read music is required for all courses listed below.

MUSIC 201 Masterworks of Music ★3 A study of great works of music, chosen to represent various media and historical styles. Prerequisite: MUSIC 101 or equivalent.

MUSIC 209 Woodwind Techniques I ★3 Practical and theoretical instruction on single-reed instruments. Prerequisite: MUSIC 150 and 151.

MUSIC 211 Woodwind Techniques II ★3 Practical and theoretical instruction on flute, oboe and bassoon. Prerequisite: MUSIC 209.

MUSIC 431 Band Techniques ★3 Musical and practical aspects of band conducting. Prerequisite: A conducting course or substantial conducting experience.■

NATIVE STUDIES

NS 101 Introductory Cree ★6 A general introduction to Plains Cree (Y dialect) grammar and vocabulary, with practice in speaking and work in the language laboratory. No prior knowledge of Cree is assumed. Not open to students with matriculation standing in Cree.

NS 310 Native Issues and Insights (I) ★3 An overview of the background social/cultural/political issues in Native Studies that continue to have a definite impact on the contemporary situation. The focus of the course will be on Aboriginal peoples of the Canadian West and North. Experiences of indigenous peoples elsewhere will also be referred to for comparative purposes. Issues of Native rights, aspirations and conditions regarding language, land and self-government will be examined in more depth. Not available to students who have already taken NS 300. (NS 310 was formerly part of NS 300).

NS 311 Native Issues and Insights (II) ★3 An overview and survey of the major issues facing Canadian Aboriginal peoples and governments today, within a broader context of comparable issues for indigenous peoples and governments elsewhere. This will include Native rights, aspirations and conditions in relation to the following issues: language, land, self-government, maintaining traditional vocations, economic development, education and health. Insights into the hopes and concerns of native communities and individuals, including the dynamics of development and change. Sessions with native leaders will also form part of this course. Prerequisite: NS 310 or HIST 368/369 or consent of the School of Native Studies. Not available to students who have already taken NS 300. (NS 311 was formerly part of NS 300).

NS 340 Native Law ★3 A general and critical overview of the legal issues affecting Native people, with particular reference to Alberta and the NWT. Special attention will be given to the Constitutional Act of Canada, selected federal and provincial legislation, Treaties, and major court cases to introduce current application of native law. PHILOSOPHY

Note: The Department offers three different introductory logic courses. PHIL 121 may provide some introduction to formal logic, but emphasizes the analysis of informal arguments as they occur in everyday contexts. PHIL 122, designed for students with no familiarity with formal reasoning, is an introduction to formal logic, but with a strong emphasis on its practical application. PHIL 389 is an intensive introduction to formal logic which is designed for Honors students and students with some previous background in logic or with a good facility for formal reasoning. Students who have a good facility with formal reasoning are encouraged to take PHIL 389 as their first course in formal logic. There is some redundancy among the three introductory courses; thus, students who remain uncertain as to which introductory logic course would be most appropriate for them are strongly encouraged to enquire at the Department office for further guidance.

PHIL 121 Practical Logic ★3 Elementary methods and principles for analyzing arguments. Topics may include informal fallacies, introduction to scientific method, elementary statistical reasoning, elementary propositional logic, rational decision procedures. SOC 368 Canadian Ethnic and Minority Relations ★3 Analysis of social processes leading to the development and understanding of minority status: case studies of ethnic and minority-group relations, with reference to cross- national studies. Prerequisite: One of SOC 100, 202 or 300.

SOC 376 Sociology of Religion ★3 Religion as a social phenomenon; theories of religious behavior; religious athority and leadership; the individual's religion and the interplay with other spheres of social life; the role of religion in relation to social change and social intergration. Prerequisite: One of SOC 100, 202 or 300.

SOC 382 Introduction to Medical Sociology ★3 The distribution of health and illness in human populations, and the social psychology of health and illness, and the social organization of health care. Prerequisite: One of SOC 100, 202, or 300.

SOC 459 The Demography of Marriage and Family ★3 Review and analysis of the demographic interre;ationships of fertility, mortality, and migration with marriage and the family; a cross-cultural review of historical trends, contemporary patterns and future implications; emphasis on statistical measurement, family planning and policy in the Canadian setting. Prerequisite: SOC 271.

SOC 465 Sociology of Complex Organizations ★3 Approaches to formal organization and management; division of labor and its organizational implications, deviance and conflict within organization, problem solving, and organizational authority. Prerequisite: SOC 261.

SOC 473 Sociology of Death and Dying ★3 Comparative examination of death and dying in socio-cultural contexts, including theoretical and methodological issues. Prerequisite: SOC 241, or 261, or 375.■

SPEECH PATHOLOGY AND AUDIOLOGY

SPA 400 Introduction to Clinical Practicum ★3 Credit. Practical application of clinical procedures under direct supervision for a minimum of one hour per week. This course may also be offered during spring session.

SPA 410 Clinical Practicum ★3 Credit. Advanced practical application of clinical procedures under direct supervision. Students will normally enrol three times during their program of study, accruing a minimum of 44 supervised practicum hours during each enrolment. This course may also be offered during spring and/or summer session. Prerequisite: SPA 398 and SPA 400.

SPA 480 Clinical Internship ★3 Students normally will spend ten weeks during the summer following their third year in full-time clinical practice under direct supervision in an approved institution. A normal minimum of 157 supervised practicum hours will be obtained. Prerequisite: SPA 398, SPA 400, and one term of SPA 410.■

SPANISH

SPAN 100 Beginners' Spanish ★6 A basic course, intended for students with no previous knowledge of the language, emphasizing spoken and written Spanish. Not open to students with credit in matriculation-level Spanish.■

STATISTICS AND APPLIED PROBABILITY

STAT 141 Introduction to Statistics ★3 Random variables and frequency distributions. Averages and variance. The binomial and normal distribution. Sampling distributions and elementary inference. The ^{2}-test for contingency tables. Regression and correlation. Analysis of variance. Prerequisite: Mathematics 30 or consent of the department. This course may not be taken for credit if credit has already been obtained in any of STAT 155, 235, 236, 237, 255, 265 or PSYCO 211.

STAT 237 Biostatistics ★3. Frequency distributions, measures of central tendency and dispersion, methods of sampling biological populations, sampling distributions, elementary inference on means and proportions, analysis of variance, regression and correlation, contingency tables. The concepts will be motivated by problems in the life sciences. Difficulties in actual applications will be stressed. Prerequisite: A 100-level biological sciences course. This course may not be taken for credit if credit has already been obtained in any of STAT 141, 155, 236, 255, 265 or PSYCO 211.

STAT 255 Introductory Statistics for Economics ★6 Frequency distributions and graphs. Sample statistics. Basic probability. Probability distributions and the expectation operator. Sampling. Significance tests and sampling distributions. Contigency tables. Regression and correlation. Analysis of variance. Times series. Index numbers. Nonparametric inference. Prerequisite: MATH 113 or equivalent. This course may not be taken for credit if credit has already been obtained in any of STAT 155, 235, or 265.

STAT 265 Elements of Probability Theory ★3 Finite probability spaces; random variables, random vectors and probability distributions on finite spaces; introduction to discrete and continuous random variables. Prerequisite: MATH 115 or equivalent. Corequisite: MATH 214. Credit may not be obtained for both STAT 265 and STAT 221.

STAT 266 Elements of Statistics ★3 Principles of statistical inference on finite sample-spaces; introduction to statistical inference on discrete and continuous space; some common statistical procedures. Prerequisite: STAT 265. Corequisite: MATH 215. Credit may not be obtained for both STAT 266 and STAT 222.

STAT 341 Applied Statistical Methods ★3. Methods in applied statistics including regression techniques, analysis of variance and covariance, and methods of data analysis. Applications are taken from the Social and Physical Sciences and Commerce. Prerequisite: STAT 141, 155, 236, or 237 or equivalent. Note: This course is not available to a student in the Honors or Specialization programs in Mathematics and/or Statistics.■

UKRAINIAN
(Department of Slavic and East European Studies)

UKR 327 Early Ukrainian-Canadian Culture ★3 A survey of the cultural heritage of Ukrainian immigrants who settled in Western Canada in the late nineteenth and early twentieth centuries. Note: This course is given in the Spring Session only. Not accepted to meet concentration requirements for the BA (General) in Ukrainian. Language of instruction is English.■

ZOOLOGY

ZOOL 120 Principles of Animal Biology ★3 An introduction to the structure, function, and phylogeny of animals, with emphasis on regulation of metabolism, reproduction and development, and interactions among organisms. Prerequisite: Biology 30. May not be taken if credit has been obtained in both BIOL 296 and 299.

ZOOL 241 Vertebrate Physiology ★3 Functional biology at the organ system level. A student may not register concurrently for ZOOL 241 and either ZOOL 242 or PHYSL 310. A student with credit in either ZOOL 242 or PHYSL 310 may not obtain credit in ZOOL 241. Prerequisite: ZOOL 120.

ZOOL 260 Man and Biosphere ★3 A consideration of man's place in the biosphere and of the biological bases of environmental problems including population, pollution, and consideration of renewable and aesthetic resources. Note: Credit may not be obtained for both BIOL 110 and ZOOL 260. Prerequisite: One full year of university level biology, preferably including BIOL 100 or equivalent.

INTERSESSION 1991
(Spring and Summer Terms)

SIGNIFICANT CHANGES IN 1991:

- most 3-credit courses are now offered over a six-week period
- admission of new students through the Intersession is restricted (See the Admissions and Unclassified Student Program sections)
- early fee payment deadlines apply to courses with deferred start dates (See the Academic Schedule and Fees - Intersession sections)
- the Timetable has been consolidated into one listing of all courses offered in the Intersession
